CANADIAN FINANCE IN THE TROPICS

While most readers of the newspapers are aware of the fact that Canadians are interested nowadays in a good many enterprises in Mexico, Cuba, and other countries in the Far South, it is not generally known to what a large extent these investments reach. One or two of the London financial papers are making insidious comments on the fact that Canadians desire to inaugurate such far afield enterprises at all, or at any rate, to sell stock in them to British investors, when according to all accounts, the Dominion itself offers such fine inducements. This is true; Canada at the present time does offer an unlimited field for the investment of its own and British capital, and to that extent it is a pity that that field is not better developed. But the whole question is one in which individual judgment must be allowed to act unfettered. Canadian investments offer good interest, but for a time at least it looks as though some of those in the tropics will offer still better. At any rate, the growth of Canada's knowledge of itself has caused Canadians, as it does other people, to grow more cosmopolitan in their ideas, a spirit which, in the face of past facts, is hardly one at which British financiers, of all people, can cavil.

To glance more directly, however, at the southern enterprises which have been engineered or largely contributed to by Canadian capitalists. The first of any mark was Sir William Van Horne's Cuban Railroad, which though financed largely by American capitalists was due, in its inception, to the C.P.R. magnate. To Sir William's sagacity, and to the fact that he was almost the first capitalist of note to take advantage in a large way of the change which took place in Cuba on the completion of the Spanish-American war, may be attributed the really remarkable interest which is now being taken by Canadians in that Island, an interest which is being manifested by the inauguration of several large and small enterprises in the same field, some promising, and some indifferently so.

Amongst the best known of the tropical enterprises of Canadians in other parts is the Sao Paulo Tramway, Light and Power Company, operating in Sao Paulo, probably the most progressive city in Brazil. The bonds of this company amount to $5,500,000, and are held at 95, and the stock to $7,500,000, being held at 135. The former is bringing just now 5 per cent., and the latter 8 per cent., so that the revenue accruing to this country from this source is approximately a million dollars per year. The Rio de Janeiro Tramway, Light, and Power Company, another Brazilian concern, has so far issued about $12,000,000 worth of bonds and the same amount in stock. It owns a large tramway in the capital city of Rio de Janeiro, as well as two large waterpowers which are being developed for the delivery of hydraulic power. The company also does the lighting for the city.

The Mexican, Light, Heat and Power Company has drawn considerable attention to itself of late by its buying up of important franchises. Some $6,000,000 additional stock was subscribed for only a few days ago for this purpose. It is stated the earnings from one subsidiary company, the Mexican Light Company, are sufficient to cover the fixed charges for the whole. While the original promoters of the scheme are practically all Canadians, large holdings of stock are owned in Europe and the United States, so that the enterprise is of an international character.

Other more or less purely Canadian enterprises are the Havana Electric Railway Company, which electrified the tramway system of that city, and is meeting, we believe, with highly satisfactory results. The bonds issued now amount to nearly $8,000,000, the preferred stock to $5,000,000, and the common to about $10,000,000. The Trinidad Electric Company was organized by a Halifax, N.S., syndicate. Its bonds, of which $720,000 worth have now been issued, bear interest at the rate of 5 per cent., while the stock pays just now a dividend of 5 per cent. The West India Electric Company, operating in Kingston, Jamaica, is another Canadian enterprise with about $750,000 invested. Another tropical company which is only now completing its organization, is the Havana Central Railway Company, which will build tramways in and around Havana.

There are many other enterprises in southern countries in which Canadian capital forms a more or less important integral part, but the above are the more important among the practically purely Canadian undertakings. They are sufficient to show, however, that Canadian finance is becoming a power in the world which has to be reckoned with.

* * *

THE WHEAT SITUATION.

A sharp advance took place this week in Manitoba wheat, due to a similar move in Chicago, which is believed to have been caused by reports of damage to the crop in the North-West States by wet weather and by the fear of rust setting in from the same cause. Some anxiety has been felt in Western Canada, too, on account of the danger from rust apprehended from the wet weather last week, though recent advices from there speak of later weather conditions having been excellent in every way. The growth of the plant, while all through June it was exceedingly luxurious, has been further improved by a few days of a hot and dry character, so, on the whole, the half-scare regarding rust may be relegated to the list of similar scares always so prevalent during the month or two preceding harvest. As to present values, the prices for old wheat, they are dependent on the scarcity which has distinguished this staple ever since the short crops in many of the chief consuming and exporting countries started the advancing market.

It is full early, of course, to speak of the prospects for prices of the coming crop. Opinion is firmly held, however, in many responsible quarters that they are likely to reign high. The supplies in Europe, for one reason, are calculated as being 100,000 bushels less than a year ago, while the present indications regarding growing crops there do not lend color to any very rosy prospects. The Jones following, at whom some fun was made last year, calculate that, all told, the world's main crops will this year be small enough again to warrant dollar wheat. But, as we intimated above, the present is altogether too early a stage at which to prognosticate so nearly.

The flour trade is by no means active just now. Ninety per cent. patents have sold this week for a price considerably lower than has been prevalent for some weeks past. Dealers evidently, too, do not place much credence in the bull reports concerning wheat, and are inclined to do business in small compass. At the same time, while the mills are not turning out any great quantities of flour, they are selling in small parcels pretty well the total made, so that stocks are rather light, and this should ultimately mean a healthy trade.

In respect to other grains, not much need be said. The firmness in oats continues, on account of the alleged scarcity, but many people doubt whether this scarcity is not to some extent a figment. It is true, not much oats is on the actual market, but some believe it is still stored away, awaiting further advances in the market. In barley there is certainly a perceptible shortage. Other grains present no striking feature.

* * *

PROTECTION OF POLICY-HOLDERS.

There is a sort of tacit understanding at Ottawa that all matters connected with banking and insurance should be left for the Government in power to deal with, in accordance with recommendations which may be made from time to time by the experts in charge of those respective departments. It was, therefore, with some surprise that the Senate listened on the 29th ult. to the Hon. Mr. McMullen's explanation of his bill to amend the Insurance Act in respect to the investment of funds of life insurance companies in trust company securities. His intention was, he claimed, to protect policy-holders from the lack of restriction, which has caused such a commotion in the United States recently. No doubt his motives were good enough, and, as he rightly said, life insurance is emphatically a most important matter, and the law should be amended as found necessary from time to time. This does not mean, however, that there was any necessity for a gentleman who, even on his own admission, has not given the matter serious consideration, to take such amendments into his own hands as, apparently, he wished to do. In bringing the matter before the Senate, Mr. McMullen's attitude was such as to cause the impression that life insurance companies in this country were quite unrestricted in regard to the disposal of their funds and the making of their investments, which any one who is acquainted with the Dominion Insurance Act, knows to be totally misrepresentative of the actual facts. The securities which it is permissible for life insurance companies to hold are all therein carefully classified, and though, no doubt, some room exists for improvement, as before intimated, it is much better for such a large and intricate subject to be left for the proper parties to deal with in toto, and not piecemeal, which has been the bane in some of the Provinces. This, it is understood, is now being done, and the Government is likely shortly to announce its proposals.

With reference to Mr. McMullen's strictures regarding the directorate of life insurance companies, it may be brought to the memory of our readers that the company which he mentioned by name was for fifty years conducted as a stock company. Six years ago, however, it voluntarily had the Act amended so that policy-holders now have power to elect a certain number of directors on the board, and these have power to vote, whether they be present at the meetings or not. This, as we understand it, is the very feature contended for by the speaker.

RUSSELL SAGE'S ADVICE.

Still there are a few amongst us who cling to Russell Sage's notion that a holiday to the business man is a waste of time, or at any rate that the hours spent on a vacation might more profitably be spent in pursuing business and the nimble dollar that comes with it. Looking, however, at the newspaper advertisements and the placards telling of a trip here, an excursion there, and a cheap rate to everywhere, and judging from the crowds of people, including hard-worked business men, to be found nowadays at the seaside, mountain and lake shore resorts, and the crowds, too, at the railway stations and boat wharves heading thereto, the people who believe in Russell Sage must be in a hopeless minority.

He claimed, we believe, that to take a vacation in a busy time (and, with such a man *all* seasons would be busy) was to lose one's grip on things, and have to begin again. But is not that precisely the logic of the whole situation? To loose one's grip on things, more strictly speaking, to loosen their grip on us—is not that, when all is said, the main object of a holiday? With long clutching of any object a man's fingers grow tired, eventually weak; he lets go, and when he takes hold once more, he finds it is with an increased vigor. He loosed his grip, merely to gain a new one, and a tighter. The tension was relaxed; is renewed; and is firmer than before. And if this be the case with the body, with a single limb, how much more so is it the case with the mind, with that delicate organ and director of all other organs, upon the health and due equipoise of which everything else depends?

The whole organism of the city man, both body and mind, the former harried with unnatural conditions of atmosphere and environment, the latter with business cares, cries aloud for renovation, for a change from accustomed sights to new ones, for a casting off of the very "grip" which Russell Sage values so highly. It is Nature against the financier, and there are but few instances in which Nature does not come out on top in the end.

Therefore, we say to our readers, the business men of Canada, hearken to the call of the woods or the green fields of the country, or the enticing murmurs of the seashore. Loosen the grip of office cares; leave them for a week or a month, and come back at the end of that time twice as fit to meet and conquer them.

* * *

FIRE INSURANCE COMPANIES AND THEIR PROFITS.

The fact that, in spite of the heavy losses in Toronto and Baltimore in 1904, British fire insurance companies were able, besides keeping their reserves unimpaired, and, indeed, augmenting them by £1,000,000, to make a net profit of £1,032,648, has caused some people to argue that these facts prove there should be a considerable decrease in rates charged on this continent. A better understanding of the business, however, would show such people the unfairness of such a contention. Insurance has to, or should have to, pay for itself, and it would be manifestly unjust for countries where building construction and fire protection are excellent, and where the people have been educated to guard against fire, to have to share in very large measure the burdens wrought by contrary conditions. Another thing which should be borne in mind is the fact that many of the old-established British companies are to-day carrying risks which they have had on their books for many years, and on which the loss ratio has been extremely low. We refer more particularly to business which is practically controlled by a number of these companies, such as mansions and similar properties belonging to old English estates. The business done by them in this country and that done by Canadian companies not having these advantageous connections cannot fairly be placed on the same level. Nor should it be expected that countries like Canada and the United States, where the average fire waste is simply enormous, even leaving out of consideration the disastrous conflagrations which periodically destroy great values, should be allowed to reap the benefit of such advantages on even terms.

It must not be imagined, however, that the British companies did not feel the result of such disastrous fires as those which took place last year. As compared with the highly favorable year, 1903, there was a very considerable diminution of profits. Their net losses at Baltimore were £1,786,192, and at Toronto £991,645, besides which they experienced very heavy losses in South Africa. The net profits for 1903 were £3,389,435, compared with, as stated above, £1,032,648 for last year.

Analyzed, the business of the British fire offices for the year 1904 shows that they received a net premium income of £22,668,110, as compared with £21,799,523 in 1903. The total claims, paid and outstanding—including the Baltimore and Toronto losses—were £13,472,800 (59.44 per cent. of the premiums), against £10,758,413 (49.35 per cent.), and the expenses and commissions amounted to £7,815,227 (34.48 per cent.), as compared with £7,548,784 (34.63 per cent.). There was thus a gross surplus of premiums over claims and expenses of £1,380,083, or 6.08 per cent. of the premiums, as against a surplus for 1903 of £3,492,326, or 16.02 per cent. The year 1903 was altogether exceptional, and the results for 1904, though inevitably below the average of ordinary years, are not so far below as might have been anticipated. Part of the surplus of last year was, of course, due to the increase in the premiums, and if we make the usual allowance of 40 per cent. of the increase in premiums as a measure of the additional reserve necessary for unexpired risks, we arrive at a net profit for 1904 of £1,032,648, as compared with a corresponding net profit for 1903 of £3,389,435.

It may be remarked that the companies which do a purely home business show up particularly well, which shows the truth of what we contended for above, namely, that fire losses in the United Kingdom have been for some time past comparatively light.

Another feature which the general public do not take into sufficient consideration is the fact that the actual premium earnings of most fire insurance companies are by no means their only source of income. Indeed, with many of them their financial management in the past has been on such a good and conservative basis that interest on reserves and on paid-up capital has very largely provided the means for the paying of dividends, independently of earnings. Another thing to be remembered is that several of the companies have life and other departments, which contribute their quota to the fund from which dividends are paid. For example, last year the British fire companies paid dividends amounting to £2,048,266, of which £1,459,936 was contributed by the increment from interest, life and marine departments, etc., contributed £236,000, and the actual amount added to the dividend fund from premiums in the fire branch was only £352,330.

The Accident and Guarantee Company of Canada has been elected a member of the International Association of Accident Underwriters.

MODERN TRADE UNIONISM.

The origin of trade unions is very obscure, and, although we find comparatively early traces of them in England, yet it is not definitely known whether they are the successors of the trade guilds of the Middle Ages or whether they have an independent origin. The better opinion is, however, that they have no connection whatsoever with these guilds, and they are so essentially different in character that this view is probably correct. The trade guilds were organizations of different crafts or trades at a time when manual skill was all important, and they safe-guarded the interests of their particular crafts by their system of apprenticing and other means of this kind. They existed solely to better the work done by the artisan, and did not in any way endeavor to interfere with capital—for capital, as we know it, did not exist in those days.

With the advent of machinery, however, which supplanted human labor in almost every case, the function of the guild was at an end, and they gradually decayed. As the machinery used for manufacturing was very expensive, the craftsman was debarred from using it, and so it developed that this machinery naturally fell into the hands of capitalists, who directed the efforts of the laborer. It was probably the attempt of the hitherto independent craftsman to retain his control over this manufacturing machinery that gave birth to our trades unions as we know them to-day, though, of course, at first they were undeveloped.

When first we hear of the trade union in England it is purely as a social or friendly organization, meeting in secret, because it was not recognized by the law, and the members would have been punished for conspiracy had their organization been discovered. These small bodies were confined at first to local organizations, and the union in any particular place and in any particular trade was completely distinct from all other unions in every other trade.

In these early days the unions suffered greatly by reason of the fact that they were under the ban of the law—they were unincorporated, and hence, not being legal entities, could not sue or be sued. One of the greatest difficulties they had to contend with was occasioned entirely by this fact—the funds of the unions were constantly misappropriated by their officers, and in many cases the union was thus absolutely impoverished. They could not prevent this, however, as they could not expose their organization to the public, and even if they did they had no legal status to prosecute these defaulters. It is interesting to note that one of the reasons why the unions to-day are so strong is this very same fact of non-incorporation — and they have practically to-day placed themselves beyond legal responsibility for their actions because they cannot be sued. The great struggle waged by capital this past twenty years has been to make them in some way legally responsible for their actions. In Canada, in our last case on this subject, Metallic Roofing Co. vs. Sheet Metal Workers, in which the question of the ability to sue a union as such was carried to the Court of Appeal in Ontario, it was distinctly decided by that court that it could not so be sued, as it was not a "persona" known to the law. It was suggested, however, that it might be possible to sue it in a "representative action" under one of the technical rules of practice, and the Metallic Roofing Co. are now trying this means of getting at the union, with what success it will probably take some time to determine.

During these early days of trade unionism, although they had to struggle hard for existence by reason of their internal troubles, yet the increased control of the machinery or capital in a few hands drove them to make greater efforts to perfect their organization, and they gradually evolved from their social basis into business organizations, with the object of resisting the control of capital and getting better wages. From this time on until the present day their organizations have been gradually extended, the first step being the welding of all the unions in any particular trade into one solid body. Subsequently, as the grip of capital tightened, these larger bodies were amalgamated into a national union, so that the business of the whole country could be stopped if necessary by means of their ability to enforce a sympathetic strike, which was practically their only weapon of self-defence. To-day we not only have the national organization of all labor into one huge body, but we have yearly a trades congress of the world, at which representatives from all the national organizations of all the industrial countries of the world meet and discuss the labor conditions of the various countries interested, and this body, to a large extent, directs the local labor situations. At the present day, therefore, we have an almost perfect organization of labor, the apex of which is this world-embracing Trades Congress.

(To be continued.)

⁂

PATENT RIGHTS AND TERMINABLE PRIVILEGES.

Many companies are organized for the use of patent rights and other terminable privileges which, of themselves, are of uncertain value. It is an interesting question what considerations should govern auditors in the investigation of records and balance sheets where these are taken into account as assets.

The patent may be practically superseded by other patents of improved processes or construction; it may require the use of very large capital for its operation; the success may be contingent upon uncontrollable conditions, or it may be untrammelled except as to termination by a time limit.

The organization of such companies is generally arranged by some very eloquent individual, who draws pictures of immense profits by comparing the cost of raw materials to be used with the gross prices of the commodities to be sold, ignoring the intermediate expenses and contingencies. This person usually approaches three or four prominent people, to whom he offers free shares and other advantages in exchange for the use of their names. These people do not invest any money, consequently are not in danger of losing any. The natural consequence is that the patent right appears on the books of the company versus the shares and cash which the organizers receive for it. In this manner the companies are generally overloaded from the start, and many of them are inevitably doomed to either liquidation or reconstruction unless such profits be realized and such reserves retained as will provide for all contingencies and avert the catastrophe.

If a patent has, say, ten years to run, it is a very simple matter to write off 10 per cent. of its cost at the end of every year, but this process does not determine its value, which should appear in the balance sheet by the permission and with the approval of the auditor, because the auditor is responsible to the shareholders for a true statement of the values of assets and liabilities, as well as of the accounts.

In order to stimulate thought upon this subject we will premise that the patent requires the use of a large capital for its operation, in which case the value of the patent is affected by the *risk* of the capital. In other words, the capital demands that the *risk* it assumes shall be taken into account as well as reasonable interest or fair expectations of dividends when valuing the patent right.

An auditor may be justified, at the end of the first year, in allowing the cost of the patent right, less a pro rata deduction for time, to appear in the annual balance sheet, if the statement is made plainly and unmistakably. But he may not be justified in continuing this method of statement for reasons already suggested.

Suppose the cost of the patent right to be $10,000, its life ten years, the actual capital requirement $90,000, making a nominal capital account of $100,000, the net profit during the first year $10,000, the dividend declared $7,000 and the reserve $3,000, less $1,000 written off patent right account. If the balance of the reserve is kept intact and the next year is similarly successful, $1,000 may again be a sufficient deduction from the valuation of the patent at the end of the second year; but should not a contingencies account then be created of a similar amount, so that the reserve may safely then be stated as $3,000?

The general disposition of such companies is to make the dividends eat up the net profits, the argument being that the result of the year's operations is an assurance of continuous prosperity. The shareholders always want dividends, the managers want commendations and increases of salaries, and so everybody is made happy without regard to the future; but the auditor is not relieved from responsibility unless he has plainly stated the facts and made protest against the improvidence of the accounting.

The value of a lease of other privilege for a limited period may be affected by responsibility for special taxes or by loss of use by reason of a fire or other catastrophe, so, therefore, a contingent account should always be maintained, outside of the reserve account, to provide against such drawbacks.

The fact of a reserve account may be made an argument for increased dividends; therefore it should not be depended upon as a provision against contingencies, as neither directors nor auditors should allow any neglect of or infringement upon the provisions made for the safety of the company and the avoidance of calamities arising from want of foresight in respect to assets of uncertain or decreasing values.

NOTES FROM MONTREAL.

Mr. F. W. Cowie, Government engineer, connected with the Department of Marine and Fisheries, was in conference a few days since with the president of the Montreal Board of Trade, in regard to the proposed damming of the lower end of Lake Erie. It is Mr. Cowie's opinion that should the United States be permitted to dam the lower end of the lake in this manner it would advance the season of high water, in fact, the best United States authorities admit this. This being the case it would naturally advance the season of low water, which would bring the lowest depths of the season in the early autumn, when ships are leaving Montreal with the heaviest cargoes, and when they want every inch that the river will give.

The half-yearly report recently issued by the building inspector's department at the City Hall, shows a very material increase for the six months ended June 30th, as compared with the corresponding period of 1904. The total number of permits issued was 559, and the estimated cost of buildings, $2,516,761, an increase of 220 buildings, and of $927,946 in value over last year's returns. The highest number of permits issued in any one month was 158; value $658,001, in April. Building operations in the city, however, are receiving a severe check owing to the strike of the carpenters and joiners now prevailing, with no prospects of immediate settlement. The men are out for an increase of wages, and contend that they have borne with their present "low" rate long enough. The worst feature of the strike is the effect it will have upon buildings in course of erection. In the city the season at its longest is but short, and it is, of course, necessary to have the buildings under cover before the cold weather sets in. It is to be hoped that a satisfactory settlement will soon be arrived at.

There appears to be every indication that Eastern Canada will have bumper crops this season. Such, at least, is the testimony of the reports which have been received from many points. Of course, it is somewhat early to form conclusions, as the cold and wet weather which was experienced during spring have made the season late, but with a continuance of the present warm, dry weather, a banner year may be expected. Trade conditions here have a slightly better tone than was noticeable a week ago, although business is unusually quiet. Prospects, however, favor an improvement in wholesale trade. Collections are fair.

"MOUNT ROYAL."

Montreal, July 5th.

FIRE IMPROVEMENTS IN MONTREAL.

An important private conference between Mayor Laporte, representative aldermen, and a delegation from the Montreal Board of Trade was held in the City Hall, on Tuesday, the 4th inst., to discuss the question of insurance rates. It is the Mayor's contention that the city has done enough in the matter of improving the fire brigade to warrant the fire-underwriters in reducing the insurance rates. A statement presented by Chief Benoit and Supt. Janin showed that during the last four years, the city had expended over $600,000 on the improvement of the fire protective service of Montreal. After listening to these reports the delegates referred to the list of improvements sent to the city some time ago, with the suggestion that until they were carried out there was small hope of the insurance rates being reduced. These suggested improvements are:—The installation of a high pressure water supply for fire purposes only; the placing underground of all light, telegraph, and telephone wires; the removal of the central fire alarm office from the City Hall to a fire-proof building; the strengthening of the fire department by a considerable addition of new men, new stations, and new appliances; the revision of the building by-law, and its enforcement; the strict enforcement of the by-law regarding the storage of explosives and inflammable materials. It would appear that the chief item in the foregoing is the installation of a high pressure water supply for fire purposes only; and about that there is a division of opinion. It was pointed out that the cost would be about $1,000,000, and it was the contention of many of the aldermen that the city did not need it. The matter was well discussed, however, and while the Mayor and aldermen could not promise to have such a system installed, they promised to improve the water pressure. Regarding the putting of wires underground, it was promised that everything possible would be done to force the companies to use conduits for their wires. The removal of the fire alarm department has already been provided for, as when the new fire station, on St. Catherine Street, is completed, it is to be transferred there. Regarding the strengthening of the fire brigade the delegation heard with pleasure that 68 new men had been taken on recently, and this with 48 more previously made a total of 114. Speaking of what had been done, a delegate said they were glad to hear of the improvements, but it is to be remembered that Montreal is a growing city, and these improvements to keep up with the expansion of the city must be continuous. The purpose of the conference was to put the facts of the case before the members of the Board of Trade, and the business men of the city, as some criticisms had arisen, and were to be discussed at a general meeting of the board. It was then that the Mayor suggested holding the conference first.

⁂

FIRE INSURANCE NOTES.

A peculiar state of things has developed in the St. Catharines Central Fire Department. A few days ago the chief and deputy chief were dismissed, and were replaced by the first paid fire chief. The other members of the corps refuse to accept the explanation given by the Fire Committee, and have notified the city council that they will resign at the end of sixty days.

Fire insurance circles will hear with interest and regret of the death of Joseph Beaulieu, supply officer of the Montreal fire department, and one of the oldest and best-known firemen in that city. He was almost the last link connecting the present department with the old volunteer fire brigade. In 1879 he met with a severe accident, and since that time has been engaged in buying horses, provender and other supplies for the department. He was the organizer of the Firemen's Benevolent Pension Association.

The Canadian Fire Underwriters' Association, at its meeting in Muskoka on the 26th and 27th June, decided to remove the 15 cent surcharge for conflagration hazard which was put on immediately after the Toronto fire last year. This, however, does not affect Montreal, Toronto, and other large cities, which were dealt with separately at that time. It is understood that a new rating for these will be drawn up very shortly, in which credit will be given and rates reduced for cases in which the insured have made improvements as suggested by the companies. Montreal, however, is not likely to be the recipient of any great favors until material improvement has been made in her water supply and fire protective service. The Association at its meeting also decided to change the 80 per cent. co-insurance clause of 15 cents on buildings, and 10 per cent. on contents, to 20 cents on buildings and 15 cents on contents.

Even in England, the home of successful municipal enterprises, the proposition to extend the principle of public ownership does not find unanimous support. Listen to the Review: "Now the London County Council is going to have a try at municipal fire insurance. We wish them joy. There are more things 'twixt heaven and earth in connection with the fire insurance business than the whole lot of county councillors put together have any conception of. Look at the unfortunate experiences of various American States, particularly Wisconsin. We should have thought no sane person would entrust fire insurance to a municipal body. Water, gas or electric light might possibly be construed as coming within the province of such bodies, but fire insurance is quite another thing, and, as we have said before, we wish the London County Council joy of their new enterprise. Of course, there is a favorable feature from one point of view—it will make a lot of jobs for friends of the London County Councillors. But whether it is desirable to encourage such a scheme, even in these days of heavy municipal finance, is a question very largely open to argument."

On Monday last the Goderich Elevator and Transit Company's elevator at Goderich, Ont., was totally destroyed by fire, including approximately 227,000 bushels of grain. The loss is estimated at over $250,000. The insurance is $88,750 on the building and machinery and $127,500 on the grain, apportioned as follows: Aetna, on building, $1,500; Anglo-American, building, $2,500, grain, $7,500; British America, building, $5,000; Commercial Union, building, $2,500; Equity, grain, $5,500; Guardian, building, $10,000; Hartford, building, $5,000; Home, building, $5,000, grain, $21,000; Insurance Company of North America, grain, $4,000; London and Lancashire, building, $2,000, grain, $30,000; London Assurance, building, $2,500; Montreal Mutual, building, $2,500; New York Underwriters, grain, $15,000; Northern, building, $6,250, grain, $12,000; Norwich Union, building, $2,500; Phenix of Brooklyn, building, $1,000; Phœnix of London, building, $11,000; Royal, building, $7,500, grain, $4,000; Sun, building, $5,000; Union, building, $7,500,, grain, $15,000; Western, building, $10,000, grain, $3,500. It is calculated that the elevator will cost something like $50,000 over and above the insurance to rebuild.

⁂

MERCHANTS BANK OF CANADA.

The figures presented at the annual meeting of the Merchants Bank of Canada, held on the 21st of June, indicate that that old-established institution is easily holding its own, and that its prospects for a continued, steady growth are very bright. The confidence which the public possess in its position and future is manifested in the fact that deposits now amount to $28,109,616, and the immediately available assets to $18,722,013, compared with $17,038,191 last year. The bank's total resources, including paid-up capital, notes in circulation, reserve funds, etc., aggregate the handsome figure of $41,477,589. As to the net profits for the year they amounted, after paying fixed charges, interest accounts, making provision for bad and doubtful debts, and so forth, to $649,237, or about $80,000 less than last year, but this is easily attributable to general causes, such as the lower rates of interest as a rule prevailing in the large financial centres. The decline in earning power was not sufficient to prevent the directors from adding $200,000 to the reserve fund, and from writing off $50,000 from bank premises. The balance carried forward to profit and loss account is $73,197, which should be satisfactory to shareholders.

⁂

BANKING AND FINANCIAL.

The Sovereign Bank of Canada has opened a branch at Formosa, Ont., under the charge of Mr. G. J. Lackner, formerly of the Toronto branch; and another at Teeswater, which will be under the charge of Mr. James Gallagher.

Many people will hear with regret of the passing away of Mr. W. J. Buchanan, who was general manager of the Bank of Montreal from 1881 to 1890, having joined the staff of that institution in 1853. Mr. Buchanan was chairman of the Canadian board of the Liverpool and London and Globe Insurance Company, and a director in other institutions.

T. W. Johns, cashier of the defunct Bank of Yarmouth, has been found guilty on the two counts against him, of wilfully making false returns to the Government, and was sentenced to two months' imprisonment. The judge made the sentence lighter than it would have been, because the Crown had requested that such be done, and because, in his opinion, the prisoner had only followed a system of reports ordered by his superiors.

Referring to Canadian securities in London, recent advices show that the majority of the movements therein are upward. There is no change to report in Dominion issues, but Manitoba 4 per cents. at 104, Hamilton 4 per cents. at 102 and Quebec 4 per cents. at 104 are all 1 better. Qu'Appelle and Long Lake Railway first mortgage bonds have further improved 2 to 75, and advances of 1 have taken place in Buffalo and Lake Huron bonds (to 140), in Quebec and Lake St. John first mortgage bonds (to 95), and in White Pass and Yukon 5 per cent. debenture stock and 6 per cent. debentures (to 93).

With reference to our remarks last week as to the borrowing powers of trust companies a correspondent writes as follows:—"You did not answer the most important question, namely, is there any limit to the borrowing powers of these trust companies? From your not doing so I take it that there is no limit whatever, consequently it is most dangerous. The fact of it is they have all the powers of a trust company together with greater borrowing powers than a regular loan company, whose powers are restricted in that respect. Individuals or trust companies who act as executors do not guarantee either interest or principal of deceased persons, they are simply bound to invest these funds carefully and get as good a rate of interest as they can consistent with the best class of securities. In fact I do not think that the Legislature when granting these charters ever intended that they should borrow money for the purpose of lending it in competition with the money of deceased persons for whom they are acting as executors."

* * *

LIFE AND ACCIDENT INSURANCE.

It is understood that the Dominion Guarantee Company will shortly erect a large new office building in Montreal.

The Metropolitan Life Insurance Company is said to contemplate erecting, in New York, the tallest building in the world. It will be put up, according to present plans, on the site now occupied by Dr. Parkhurst's church. The tower is proposed to be 560 feet in height.

Every man's life has a tangible value, based on his earning power. Life insurance anticipates the result of an average lifetime of productiveness and for a fixed annual payment guarantees to the beneficiaries a certain sum, which is the most reliable asset in settling an estate.

It is interesting to note that the annual report of the Kentucky Commissioner of Insurance contains a recommendation to the General Assembly that it should enact at the coming session a statute prohibiting from doing business in Kentucky any company which pays an executive officer in its employ exceeding $50,000 per year salary.

Life insurance is not for a day or for a week, but for all time. Its practice is based on a continuous arrangement and the future is the all-important period in its plans. The past and the present only serve to indicate the boundaries within which the future course of the business must be guided. Safe life insurance does not permit departure from tried and tested lines of procedure.—Monitor.

The Fidelity and Casualty Company, of New York, is opening an office in Toronto, the general agents for Toronto and a portion of Ontario being Jos. B. Reed & Sons, who have to their credit twenty-two years of good reputation in Toronto insurance circles. The company, whose surplus is over $6,000,000, has been in business in the States for over twenty-nine years, and has a very good record. It is one of the largest, if not the largest, writer of accident and accident and health policies in the world. It has also entered the field of burglary and theft assurance, with a new form of policy covering residences against not only burglary, but robbery by servants or sneak thieves. A deposit of $93,000 has been made with the Dominion Government.

Arrangements are being completed for the eighteenth convention of the International Association of Accident Underwriters, to be held at the Royal Muskoka Hotel, Lake Rosseau, from July 18th to 22nd. The meeting promises to be one of the most important the association has ever held. Among the subjects to be taken up, discussed and acted upon are the following:—Should any change be made in the period of time for which indemnity is allowed in case of accident? Should a special premium be charged for beneficiary insurance? Should any alteration be made in the combination clause, covering double benefits for injuries received while in a burning building? The growing importance of health insurance will bring out a discussion upon many vital points in connection with this line of underwriting. As has been announced before, Mr. A. L. Eastmure, of the Ontario Accident Insurance Co., will take charge of the delegates in Toronto.

DRY GOODS NOTES.

The Dominion Thread Company, of which Dr. Beattie Nesbitt, of Toronto, is president, purposes to establish in Stratford, Ont., a factory to employ a hundred hands. The council of that city will, on the 26th inst., submit to the ratepayers a by-law to guarantee the company's bonds. The latter agrees to expend $45,000 in building and plant.

A despatch last week from Sterling, Alberta, stated that there were gathered there practically all the sheep in the Territory, some 75,000 being herded there, for the shearing. These sheep include the flocks of Gray & Harvey, Harker Bros., P. North, the Perott flock, and some smaller bunches. A crew of forty men, under charge of Contractor J. Hardman, are piling up the fleeces, and it is expected that a month more will be required to finish the shearing.

Hon. Pierre Garneau, of the well-known wholesale dry goods firm of P. Garneau & Co., Quebec, died a few days ago at the age of eighty-two. He was one of the wealthiest and most respected French-Canadian citizens in Quebec Province, and was during his active career identified with many important commercial and political positions. Amongst other offices, he was a director of the Quebec Assurance Company, the Quebec and Lake St. John Railway Company, president of the Quebec Steamship Company, and vice-president of the Quebec and Levis Electric Light Company.

* * *

—The annual meeting of the Union of Canadian Municipalities, will take place in Winnipeg on the 25th prox. This body is doing much to create a common feeling among our towns and cities, and to strengthen the power of resistance to aggression, so that its discussions will be looked forward to with great interest.

* * *

—The Associated Boards of Trade of the North-West Territories held their convention at Regina as announced, on the 29th and 30th ult., and it was a very successful gathering in every way. About one hundred delegates were present, representing all the important cities, towns, and villages between Manitoba and the Rockies. We have not space in this issue for more than this brief notice, but hope to give a fuller account of the proceedings next week.

* * *

—At the present time there seems to be a genuine mining boom raging in the Temiskaming district, the chief attraction being cobalt. This mineral, from the nearness of its usual position to the surface is easily worked, and is regarded as a "poor man's proposition." The area in which most of the finds have taken place is almost confined to Coleman township. Claims are even now being held at very high figures, and a big rush of prospectors has already begun into the district. The new Government railroad passes through the country.

London	1,002,097	834,789
Total	....	$58,536,039

Merchants Bank of Canada.

THE ANNUAL GENERAL MEETING OF THE SHAREHOLDERS OF THIS BANK WAS HELD ON JUNE 21, 1905.

Very Satisfactory Report Presented.

Net Profits for the Year Reached $649,237.

Retiring Directors Re-elected.

The annual general meeting of the shareholders of the Merchants Bank of Canada was held in the board room of that institution on Wednesday, June 21st, at noon, when there were present:—Sir H. Montagu Allan, Messrs. Jonathan Hodgson, James P. Dawes, Charles F. Smith, Hugh A. Allan, Thomas Long, Charles R. Hosmer, Alex. Barnett, (Renfrew), E. F. Hebden, Charles Alexander, Lieut.-Col. Prevost, Richard White, Fred. W. Evans, M. S. Foley, James Moore, Capt. Benyon, Michael Burke, James Crathern, F. E. Meredith, K.C., B. A. Boas, A. D. Durnford, James Williamson, and John Morrison.

The proceedings were opened by Sir H. Montagu Allan, the president, taking the chair, and requesting Mr. C. N. Read, secretary of the bank, to act as secretary of the meeting.

THE ANNUAL REPORT.

The president submitted the following report of the directors:—

The directors beg to present to the shareholders the annual statement of the bank's business as at 31st May last.

It will be observed that the earnings have fallen somewhat short of the previous year. This has been due in large part to the generally lower rates of interest prevailing at New York and other loaning centres.

The directors have nevertheless been able, through recoveries realized in some of the securities formerly written down, to add $200,000 to the reserve fund, in addition to writing $50,000 off banking premises, and making the usual contribution to the officers' pension fund, carrying forward a balance to the credit of profit and loss account of $73,197.20, which they hope, will be gratifying to the shareholders.

The office of general manager having become vacant through the retirement of Mr. Thomas Fyshe, Mr. E. F. Hebden, the Superintendent of Branches and Chief Inspector, has been appointed acting general manager.

The various offices of the bank have been inspected during the year.

All respectfully submitted.

H. Montagu Allan, President.

The statement of the result of the business of the bank for the year shows:—

The net profits of the year, after payment of charges, rebate on discounts, interest on deposits, and making full provision for bad and doubtful debts, have amounted to	$649,237 66
Recoveries from other securities	90,000 00
The balance brought forward from last year, ending 31st May, 1904, was	18,959 54
Making a total of	$758,197 20
This has been disposed of as follows:—	
Dividend No. 72, at the rate of 7 per cent. per annum	$210,000 00
Dividend No. 73, at the rate of 7 per cent. per annum	210,000 00
	$420,000 00
Written off bank premises account	50,000 00
Contribution to officers' pension fund	15,000 00
Added to rest	200,000 00
Leaving a balance to be carried forward to next year of	74,197 20
	$758,197 20

Liabilities.

1.—To the public:—

		$41,477,589 43	$39,682,572 61

E. F. Hebden, Acting General Manager.

The usual motions were submitted and carried unanimously after which it was moved by the president:—

"That Messrs. John Morrison and James Williamson be appointed scrutineers for the election of directors about to take place."

A vote of thanks was tendered the president for his conduct of the business of the meeting: and shortly afterwards the scrutineers reported that the following gentlemen had been duly elected as directors:—Sir H. Montagu Allan, Mr. Jonathan Hodgson, Mr. J. P. Dawes, Mr. Thomas Long, Mr. C. R. Hosmer, Mr. C. F. Smith, Mr. Hugh A. Allan, Mr. C. M. Hays, Mr. Alex. Barnett.

The meeting then adjourned.

The new board of directors met in the afternoon, and Sir H. Montagu Allan was re-elected president, and Mr. Jonathan Hodgson, vice-president.

NORTH OF ENGLAND LETTER.

The consummate tact of our Imperial ruler has come to aid at the critical moment. The command to Windsor of the C.M.A. delegates was the first of a series of smashing blows to the imputation that Englishmen looked on the tour as a piece of espionage. And now 270 Canadians have the best cause to feel that Edward VII. is not only to be revered as a monarch, but sincerely to be admired and respected as a man. The impetus of a royal send-off is carrying the visitors handsomely into and through all social circles, and if no tangible business results, that will be because the delegates are spending, in seeing the sights, their golden hours of English June. It is hoped that an enduring impression upon our leading financiers will be made, and that some of our surplus funds for investment may be diverted into Canadian channels. There seems to be no good reason why sound industrial enterprises in the Dominion should not attract support from here. If the visit of the delegation fails in this effect, it will rest with Toronto to inveigle a party of Stock Exchange men into spending a month in Canada. It may be argued plausibly that this is the logical corollary to the commercial visits exchanged, and, granted that the right men were selected, Canadian industry must soon feel the benefit of their coming.

Do Canadians in their foreign trade schemes take account sufficiently of India? Last year the exports from the United Kingdom added up to the highly respectable total of $375,000,000. Because India is technically a Possession and not a Colony there is an absurd tendency to disparage tacitly its immense importance. As a mere market it is of more consequence to our traders than Canada, Australia and the Cape combined. And if Canadians are anxious to dispose of foods, cotton goods, railway material, cutlery, portable machinery, spirits, oils, paints, glassware, and a thousand cheap oddments, they ought to keep Bombay and Calcutta well in mind. The commercial organization of Manchester and London is peculiarly adapted to the transaction of Indian affairs, and for those who prefer not to trade directly there are merchants in plenty in Great Britain who know their India like a book. There is competition, of course, from this country, from Belgium, Germany, Austria, and also the States, but perhaps Canadians do not need to run away from that. It may not be out of place to add a note of caution against a too easy acceptance of offers from irresponsible native houses. The business can be done with people of unchallengeable worth.

Two State departments run newspapers, the Board of Trade has its weekly journal and the Board of Agriculture its monthly. Then there is daily the London Gazette containing names of bankrupts and official notices. Now, the London municipality considers the proposal of founding its own journal, to which those wanting appointments or contracts might be led to look. In the ultimate its promoters dare to think that they will be able to dispense with all other forms of advertising. Thus, we may live to see the municipal newspaper competing for advertisement business with private newspaper owners. The Board of Trade Journal unwarrantably does so, presuming on its official connections to secure a degree of confidence it could hardly inspire on its independent merits.

Many trades are now feeling the pinch of competition by trading municipalities. Plumbers, electricians, milk-dealers, chemists, bankers, and insurance agents have, perhaps most cause to grumble. Parcels express companies are the latest to the list of victims. The communal tramway departments are taking upon themselves all the duties of expressmen. In one Yorkshire city it is literally possible to send a parcel to Toronto, Honolulu, or whatever place you choose to name, by simply handing over the package to the conductor of the nearest car. The corporation is agent for an international carrying firm.

Shippers of provisions are necessarily interested in the veracity of analysts' certificates. Questions as to the purity of butter and cheese perpetually arise, and are referred to the chemist for examination. A recent case suggests that analysts are by no means infallible. A borough analyst certified a sample to contain 20 per cent. of foreign fat, and a Government analyst declined to vouch for the presence of more than 12 per cent. That discrepancy is more than a little. But when a third, independent, analyst comes up with the asseveration that the butter is perfectly pure, the limits of credulity are reached. An equally sure method of examination would be to show the sample to a cow for her approval or condemnation. Yet all three are duly trained and theoretically competent and able men, and the word of any one of them is enough to pass or damn a consignment.

One of the troubles of the Canadian cotton industry is reported to be labor scarcity. We have hardly cause to make that complaint in Lancashire, although cause may come if all the eggs now incubating hatch out. There are completed, in erection, or in project, forty-eight new spinning mills, that should employ 10,000 additional workers, and will certainly cost $25,000,000. Then there are weaving developments needing 5,000 extra operatives. These great additions cannot be eyed with uncompromising favor. Certain branches of the industry are equipped already to the full, and it is not certain that all the mills can enjoy continued prosperity in unison. Dissatisfaction is tempered by the reflection that machinery is constantly being built, and must be erected somewhere. Perhaps it is better that the risk of its employment should be taken in Great Britain rather than upon the Continent or in the States. In one or another part of the world, Canadian cotton manufacturers will presumably have to reckon with the new batteries of cotton-spinning artillery.

Some quaint superstitions in England are linked with Canada. For instance, there has arisen mysteriously a wild report that hens die of drinking melted Canadian snow. A caller at the Emigration Offices in London desired to have his mind set at rest on that important point before deciding to go out in search of a farm. A lady, born in Quebec and resident in England, assured me quite gravely a little while ago that any Canadian returning to his own land after long residence in Great Britain would infallibly die of consumption. To his evident astonishment and relief a prospective emigrant, an English greenhorn, learnt that in the Dominion nearly all families are "Christian." Quite a number of others like him consider it vital to know whether the bacon-box in which his clothes are ought to be nailed down or screwed. In settling such points as these the Government officials are kept quite busy in the emigrant season. But perhaps the exhibition of ignorance is not to be taken as fully typical.

North Country.

Manchester, June 23rd.

GOOD ROADS.

As each succeeding convention of the Eastern Ontario Good Roads Association makes itself heard, one looks around in an endeavor to see what benefits have followed each preceding function of that useful body. The progress made, it must be confessed, is disappointing, seeing the ultra-important nature of the subject to the well-being of every Canadian citizen, be he a resident of city or suburb or country. At the same time, while progress is slow—slower by far than it should be in an up-to-date, business community—it seems to be none the less sure.

The fourth annual session met in Brockville on the 28th ult., and there was a good attendance, including a sprinkling of representative believers in good roads from across the line. Among the more suggestive of the many admirable addresses delivered was that by Mr. A. W. Campbell, Ontario Good Roads Commissioner, in which he gave in interesting language a brief history of the movement. The amendments made at the last session of the Legislature, whereby no Government aid would be granted except for a county system, was severely criticized, but Mr. Campbell maintained that in order to make any headway trunk lines have to be constructed, and the township improvement is sure to follow.

J. H. McDonald, State Highway Commissioner, of Hartford, made a typical address, in which he told of the tedious process of getting the public awakened to the necessity of and the benefits to be derived from good roads. A sufficient amount of costs, he said, had been wasted on the roads to pay off the national debt of every country in the world.

Mr. McEwing, Warden of Wellington, gave an interesting talk on the experiences of that county in building stone roads. He made the very interesting statement that Wellington expended $20,000 a year on county roads, but issued no debentures, and did not owe a cent for roads or anything else.

INSTITUTE OF ACTUARIES.

The Institute of Actuaries, London, has elected the following officers unanimously: President, Henry Cockburn; vice-presidents, George King, Ernest Woods, Frederick Schooling, Thos. Gans Ackland; treasurer, Geo. Hemmington Ryan; honorary secretaries, Geo. Todd, M.A., S. G. Warner. At the fifty-eighth annual general meeting, held last month, it was announced that during the year there had been an increase of twenty-five in the number of members. Among the papers of particular interest submitted during the past twelve months were the following: "On the Retrospective Method of Valuation," by Mr. F. Bell; "On Staff Pension Funds," by Mr. George King; "Changes in Pure Premium Policy-values consequent upon Variations in the Rate of Interest or the Rate of Mortality, or upon the introduction of the Rate of Discontinuance," by Mr. G. J. Lidstone; "Bonuses in Model Office Valuations and their Relations to Reserves," by Dr. J. Buchanan; "On the Importance and Practicability of a Standard Classification of Impaired Lives," by Dr. S. W. Carruthers; "Social Conditions as affecting Widows' and Orphans' Pension Funds," by Mr. S. J. H. W. Allin.

In October next, Mr. George King will deliver a course of lectures on actuarial subjects comprised in the syllabus for the examinations in Parts 3 and 4 of the examinations.

FROM THE MANUFACTURERS ON THE ATLANTIC.

Off the Banks of
Newfoundland, 12th June.

The excursion of the C.M.A., per turbine steamship "Victorian," is a large, pleasing, and, up to this point, successful fact. Already the spirit of friendliness has permeated the party; acquaintances are making and ripening with surprising quickness. Of course, the little maple leaf enamelled badge worn on the lapels of the men and the deck-caps of the ladies assists to make introduction needless. And the daily walk on deck *au large*, as well as the nightly assemblage for men in the smoking-room produces comradeship fast.

The party is a large one, the passenger saloon list numbering 292, of whom probably 108 are women. I have discovered on board 32 persons who were with us on the railway excursion to the Pacific in 1903. Of the 278 C.M.A. members and their ladies, 40 come from Montreal; 10 from the Maritime Provinces; 12 from Manitoba and the North-West; 31 from Hamilton; 76 from Toronto; 10 from Brantford; 15 from London, and so on—more than two-thirds of the whole party being from Ontario, the Province of Quebec furnishing only four persons outside those from Montreal. Every Province is represented except Prince Edward Island.

It may not, I hope, appear invidious for one who was on the Pacific trip to say that we miss on this occasion such men as C. N. Bell, of Winnipeg, Drummond and Gurney, for the more serious affairs, and that we miss the Brantford Major and Frank Simson and John Taylor for fun-making or excitement. But we have abundance of good material on board—the president and first vice-president, Mr. George and Mr. Ballantyne; also Mr. McNaught and "Senator" Harris. And we have excellent representatives of the great and growing West in such men as E. F. Hutchings, of Winnipeg, and John Hendry, of Vancouver. And as for fun-making, there is abundance, as an evening in the smoking-room will show. Music we have, too, from the old French *chanson* to the latest aria from the Conservatory.

Although one may make valiant resolutions while on shore that till he reaches Britain he will rest his eyes and will not read a thing, there are times and reasons (on shipboard in a fog) when reading is a welcome resort. For an hour to-day I read "Industrial Canada" with great interest. It is an admirable book, this latest special issue, of which thousands of copies are taken over for distribution in the United Kingdom. There is in its pages a resumé of each of the broad divisions of Canada's production—fisheries—farming—lumbering—steel production—mining, by such men as Prince, of Prince Edward Island; Gibson, of the Bureau of Mines, and C. C. James, of the Ontario Department of Agriculture.

The manufacturers on board represent a wide variety of interests; and if one may judge from chance conversations, are going across prepared to see and to learn. Whatever may be the ultimate result of the trip in modifying our ideas of what we shall find in the Old Country, the present result of this mingling of Canadians from various parts of our own big land is in the highest degree educative. To listen, for example, to a man like Hutchings describing the growth of Manitoba in the quarter century, the wonders already found underneath the city of Winnipeg, the extent and resources of Lake Winnipeg, to us in the East unknown—it is like a modern fairy tale. And to get a modest Maritime Province dweller talking about his particular shore, its scenic beauties, its attractions of boating, fishing, shooting, is enough to make an Ontario man ashamed that he knows so little of his own Atlantic seaboard. Again would I counsel the Canadians of the St. Lawrence and the Lakes, as I have so often done before: When you wish to go to the Atlantic shore in the hot weather, go to the watering places of your own country rather than to those of the United States.

The care of so many hundreds of lives and of so valuable a ship and cargo makes captain and officers careful. Including a crew of over three hundred, 130 each in second cabin and steerage, there are more than 900 persons on the ship. So one does not wonder that we went slowly while in a fog on the Banks; 361 miles was our best run in twenty-four hours. A storm on Wednesday—perhaps, however, a sailor would not call it a *real* storm—half-emptied our dining tables, but with this exception the weather has been good, and the ship is a steady one, well appointed, with service which, with some exceptions, makes a reasonable person comfortable. The number of avenues, from pools on the run to the sale of newspapers, through which one can pour money into the coffers of the Sailors' Orphanage

at Liverpool, proves surprising to a landsman. The little daily paper, "On-the-Go," finds its hundreds of readers every day, who buy it at five cents each. The chief engineer, like the big-hearted man he is, has fitted up an electric motor, which runs the big Gordon press we brought with us from the Montreal office of the Toronto Type Foundry.

J. H.

OUR HALIFAX LETTER.

The wholesale and retail hardware firm of Douglas, Prowse & Co. has gone out of business, having been bought out by Stairs, Son & Morrow, Limited. They were in business here for about two years, and had worked up a good trade. Captain Douglas, the head of the old firm, is likely to go on the board of directors of Messrs. Stairs, Son & Morrow, and the employees of the old firm will probably be retained.

H. Cabot & Sons, dry goods, have sold out to W. H. Cabot. R. S. Faulkner, who has been doing a flour and feed business at Stellarton, N.S., for a good many years, and was thought to be doing well, has assigned. The feed business has been a pretty hard one to handle successfully in Pictou county during the past few months, as that was one of the counties where the crops were an almost complete failure.

Blanchard & Co., dry goods, Windsor, N.S., who have been advertising their business for sale for some time, have disposed of the same to The Two Barkers, Limited.

J. S. Wilson, druggist, Sherbrooke, N.S., is making preparations to move to Sydney, C.B.

Geo. E. Munro, general merchant, Westville, N.S., is a candidate in the Conservative interest for member of the Provincial Legislature.

The Port Hood Coal Co. has gone into the hands of the Eastern Trust Co. as receivers, and the latter concern has been authorized by the court to raise $50,000 on the security of the company's property to resume work. There does not appear to be any reason why, with proper management, the company should not succeed, as the coal is of a particularly good quality, and, if properly pushed, should find a ready sale.

It is understood that as soon as the Dominion Steel Company begin to roll suitable plates, the manufacture of pressed steel cars will be begun at Sydney by the Rhodes-Curry Company. The rail mill at Sydney is now in good working order, and a shipment of thirty tons of steel rails was recently made to Montreal for the Grand Trunk. There appears to be no reason why the Dominion Iron and Steel Works should not prosper and be a great boon to the country; but it has, like so many other large enterprises, been a tool for stock manipulators to such an extent that there is danger of its legitimate function as a manufacturing enterprise being almost lost sight of.

Dominion Day, the date appointed for the departure of the troops, has come and gone, and still there is no sign of a move. There are a few Canadian troops in garrison here now.

An American syndicate has leased the valuable plaster areas at Amherst Point, Cumberland county, and will shortly begin operations on an extensive scale. A tramway will be built to the Nappan river.

The plant of the Sydney Cement Works is completed, and they will shortly be turning out cement.

Work will be begun at once on the construction of the Nova Scotia Eastern Railway, the money having been secured in London. The first section to be built will be from Cross Roads, Country Harbor, to the terminal at Deep Water. The completed line is to run from Halifax to Mulgrove, with a branch to Country Harbor, and another to join the I.C.R. at or near New Glasgow.

Hon. Arthur Drysdale has been made Attorney-General of the Province: W. T. Pipes has been made Commissioner of Works and Mines. This is a reorganization of the local Government, caused by the appointment of late Attorney-General Longley to the bench.

The military station at Camperdown is now in communication with Sable Island by wireless telegraphy.

The annual meeting of the Provincial Medical Association takes place at Lunenburg on Wednesday. The annual meeting of the Canadian Medical Association will be held here in August, when three or four hundred doctors from all parts of Canada are expected to be present.

Halifax, N.S., July 3, 1905.

* * *

THE GROWING WEST.

By Allen West.

(Continued.)

A Hard Problem to be Solved.

"In order not to fill the yard with truck frames and things, it had to be arranged to have an equal number of broad gauge cars from the East, to change a like number of standard gauge cars from the West, so I had to have the consist of each train telegraphed men daily before they arrived and have my plans made accordingly. It was a case of work from seven in the morning till twelve at night and I never left the yard till I had everything figured out so that it would go smoothly till I got back again after a few hours' sleep. I was not figuring on wages for overtime, but on getting my work done. I wanted to serve the road the best I could and get ahead. That must be the spirit of any man who hopes to succeed in the railroad business. He has got to think of what is best for the road, and what is best for the road is best for him. I have in mind a man who once told me he didn't think he cared to take a certain position at an advance of salary because it meant sacrificing some of his personal comfort. I told that man the story of when I was agent for the Grand Trunk at London. I had a free house, free light, and free fuel, and other little perquisites, including a horse and carriage, maintained at the expense of the company, which I could hitch up any afternoon and take a drive without neglecting my business.

"I had nothing to worry me, and no night work. I was ordered to Toronto. The salary would be so much—a bald, naked salary, and nothing else; no free house, fuel, or carriage. I said to my wife: 'If I accept we shall be worse off financially,' but we didn't either of us dream of not going. We knew it was one rung further up the railroad ladder. After I told this story the man said he would take the position. A man wants to look ahead and say to himself that if there is any position another man fills he can fill it, if he has the health. If there are things he don't know, he can learn them, and he ought to do so as quickly as possible.

"After a year and a half at Toronto I was offered the position of superintendent of the Central Division of the Grand Trunk, and so on till my present position.

His Door Is Always Open.

"Now, in my present position my door is always open for the farmer, and that means a lot of work. It is work I can't delegate to anybody else. I have always felt that my duty to the company consisted in making those who come in contact with the company feel as well pleased as possible.

"A man should always put his whole personality into the balance to make success for the road, in making it supply the demand of those who do business with it, and that means willingness to consult or talk with any one who wishes to know anything in our power to tell, no matter whether that man is rich or poor, a small farmer, a workman, or a millionaire shipper.

"On the other hand, an employee of a railroad must serve just as faithfully when it is a case of doing unpleasant and unpopular things. Here is a case in mind. From Emerson to Winnipeg the Government built a highway for all railroads to get into Winnipeg under a Provincial charter granted by the Province of Manitoba. The C.P.R. was built by Dominion charter. That Provincial railroad had to cross one of our tracks The road was a popular move.

Bankers—Great Britain—The National Ban of Scotland. New York—The American Exchange National Bank. Montreal—The Q ec Bank.

The citizens of Winnipeg, the majority of whom were my personal friends, were deeply interested in it. They were determined that it should go through, no matter what the rights of the Canadian Pacific were. I wrote the facts to Sir William Van Horne, indicating the state of the public mind, and the unpopularity that would come to us if we stood for our rights. Sir William wrote me: 'Must not be allowed to cross our road.' I wrote back that they were determined to have it. He sent me a curt letter: 'Whyte, I thought I could depend on you to carry out any order, no matter how difficult it might be.'

"I proceeded to prepare for trouble.

"I sank two engines in the mud up to their axles at the place where the Provincial road was to cross our line.

They All Volunteered.

"I called for volunteers from the men in our shops, and out of them all—they all volunteered—I selected fifty. We took a wrecking car and my own car and went to the scene of expected trouble. I knew the Government officials, all fellow-townsmen of Winnipeg, would come out in their own train, and attempt to attach a cable to our engines and pull them out of the mud. I called for a volunteer to cut the rope, and every one of my fifty men volunteered. I said I would stand beside him, and protect him.

"In my remarks to my men, I said: 'We are strictly within our rights; as long as we are upon our right of way I will protect you.' When the members of the Legislature and the leading citizens arrived, they looked the ground over and concluded to arbitrate.

"The Provincial Treasurer, who was also the Mayor of Winnipeg, came into my car, and we went into my private room. I sat down on the bed, and said to him: 'You are not only Provincial Treasurer, but the Chief Magistrate of Winnipeg. But you are not here to preserve law and order, but to lead a rabble. Whatever happens, will happen within the city of Winnipeg, and will not be upon my head, but upon yours. If there is bloodshed, you are responsible.'"

The War at "Fort Whyte."

Then continuing, he touched upon those events which are history, how Mr. Whyte himself was rumored to have been shot, which seemed to bring the people of Winnipeg to their senses, and how he afterwards encamped troops on his right of way, all of which was discussed in order to illustrate the point Mr. Whyte was making—that when a man is working for a railroad, and especially if he knows the road is right, he must be willing to sacrifice anything necessary to the success of what he is doing for it, even though it means war with his neighbors.

"A man should not study his own comfort. Let him sacrifice comfort if necessary in order to serve those that employ him, remembering that no man can make himself valuable without benefiting those he serves, and that is benefiting himself."

Anent the incident of the right of way battle, that point is called on the Canadian Pacific time table, "Fort Whyte."

Defying the Lumber Lords.

Another case where Mr. Whyte showed a strong spirit of C.P.R. responsibility was when he defied the lumber lords of the West.

"The Retail Lumbermen's Association once undertook to raise the price of lumber, and thus work a serious injury to the settlers of Canada," he said.

"Two things are absolutely essential to the success of the settler in our country—cheap lumber and cheap fuel. When we found that the lumbermen's combine would not sell to anyone outside the combine, and the result was likely to deter immigration, we said to the Association that the Canadian Pacific would start a big saw-mill and furnish cheap lumber if the Association would not agree to fix the price of lumber at a fair figure, and have its figures tacked up at every station on the line.

"That announcement brought to my office every lumberman from Fort William to the Pacific.

"We had a meeting.

"The lumbermen finally decided they would let us tack up the notices and not encourage us to go into the lumber business. We made immediate arrangements to have the notices put up, and kept up, and the prices kept down. As a result the lumbermen retired from the Association."

(To be continued.)

* * *

IMPROVEMENTS IN HALIFAX, N.S.

Permanent pavement has just been placed on two blocks of Granville Street, Halifax, by the Warren Bitulithic Paving Company, the merchants on the street bearing a proportion of the cost. They have also placed a man in white duck uniform on the street with a broom and receptacles to keep the street clean. The result has been so effective that the business men situate on other streets in the city will probably follow suit shortly. This is only one result of a new spirit which has sprung up in Halifax recently, boding well for the prosperity of the city. The beginning of this renaissance dates from the starting of the Forward Movement in the Board of Trade a year or more ago, and was further spurred on when it was announced that the Imperial forces were to be withdrawn from Halifax, and with them a large part of the city's revenue. With the departure of the romantic element, and the disowning of the title, "Dear, dirty, old Halifax," forever, the spirit of progress began to animate the city. It is seen in even such small things as the application of paint, which is being put on wholesale, much to the improvement of its appearance. By the time our friends from the West come to visit us at the Dominion Exhibition next year we hope to have not only an interesting, but a clean city to show them.

The FIVE per cent. Debentures issued by this Company afford the following advantages:

- The investment can be converted into cash at any time after two years by giving sixty days' notice.
- The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.
- The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.
- The Debentures issued by the Company will be a first charge upon the assets.

The Western Oil & Development Company, operating in Alberta, has, we hear, struck a good flow of oil at No. 3 well, near Pincher Creek. It will continue active development work on other wells owned by it, we understand.

Mercantile Summary

The Dominion Government has granted a charter to Drummond Mines, Limited, with a capital of $100,000. It will acquire mills and carry on the business of smelters and refiners. G. E. and W. H. Drummond, of Montreal, are among the charter members.

The Lake Superior Corporation will probably within a near period reopen the car shops at Sault Ste. Marie, Ont. Since the fall of 1903, they have been used only for repairs. It is expected that the building of freight and box-cars for the C.P.R., the Algoma Central, and Temiskaming Railroads would in itself be sufficient to keep the shops running for six months.

The following is a list of patents recently granted to Canadian inventors in Canada and the United States: Canadian—93,836, Charles A. Juengst, Croton Falls, N.Y., machine for wire stitching signatures and sheets in book-binding; 93,873, Ernest C. Thornschmidt, Brooklyn, barrels; 93,838, Ernest C. Thornschmidt, Brooklyn, devices for heading and hooping casks or barrels; 93,850, Ulric L. Gaudreau, St. Damase, cutting system; 93,852, John Sheppard, Minto, Man., oil can and the like; 93,858, Messrs. Gutteridge and McConnell, Hamiota, Man., concrete mixer; 93,876, Dr. August Voelker, Berlin, Germany, incandescent electric material; 93,919, Frank E. Holt, Vancouver, electric water heater. United States—792,777, Patrick Kenehan, Montreal, wagon attachment; 793,184, David Finlay, Killarney, Man., coupling device.

The Canadian White Company, Limited, which has been incorporated to carry on business on similar lines to the widely known houses of J. G. White & Company, Incorporated, of New York; J. G. White & Company, Limited, London, England, and the Waring-White Building Company, Limited, London, England, will undertake a general contracting and engineering business as well as all kinds of civil, mechanical, electrical, hydraulic and building work. It will be fully equipped to handle large construction contracts for steam or electric railways, and will be prepared to design, build, equip, and operate electric lighting plants and power installations, gas works, water supply, sewage systems, piers, docks, harbor works, office buildings, apartment houses, hotels, etc., in this country. It will, we learn, have upon its board, strong representative business men well known throughout Canada, and will have the benefit of being allied with the above-mentioned New York and London companies. Mr. H. P. Douglas, formerly vice-president and general manager of the Canadian Otis Elevator Co., Limited, will be treasurer of the company. The Canadian company intends making a feature of building construction and is prepared to contract for the better class of building work, such as office buildings, apartment houses, hotels, industrial plants, warehouses, etc.

Mercantile Summary.

The Western Construction Company, Ltd., Toronto, capital $4,000,000, will carry on a general contracting and construction business. Among the charter members is A. P. Murray, Montreal.

The asphalt plant belonging to the city of Winnipeg was last week badly damaged by fire, at a loss of $10,000. It was destroyed by the same cause last February.

Joseph Wilson's wood-yard in Point St. Charles, Montreal, was destroyed by fire, which is supposed to have started from a Grand Trunk engine. Loss, $3,500, mostly insured.

The Temiskaming and Northern Ontario Railway Commission are sending out a surveying party to look over the country between Lake Abitibi and James Bay, with a view of reporting upon the practicability and advisability of extending the line to the latter point.

An interesting experiment is being made by the Allan Steamship Company, in co-operation with the Dominion Railway and Marine Department, in the hope of beating the record in New York with delivery of transatlantic mails. The "Virginian," the new turbine steamer of the Allan Line, will sail from Liverpool for Canada. On her arrival in the Straits of Cabot, forty miles from Sydney, she will be met by the Government cruiser "Canada," which will take off the mails and steam at full speed back to port. The "Canada" can easily make twenty-two miles an hour, so that in less than two hours she should be in Sydney Harbor. On her arrival there the mails will be transferred to a special Intercolonial train, which will at once set forth for the Upper Provinces. The experiment is being looked forward to with considerable interest, and it is hoped will be followed by practical results.

On the 1st inst., the Act making a city of Peterborough came into force. It was incorporated as a town in 1850, and since then has made rapid progress. The present assessed value is over six millions. The increase in customs collections indicates great commercial activity. The custom collections for the year ending June 30th, 1905, total $335,634, as against $272,751 for the same period last year. The collections for June of this year show a gain of $32,082 over last June. The city is at the high-tide of prosperity; more residences are being erected this year than in any two of her most prosperous years. Two large factories have come, the Peterboro' Cereal Works and the Shovel & Tool Company. The Lock Works have purchased a site and have plans prepared for new buildings, doubling the capacity of their works, and the Canadian General Electric Company will, early next year, erect new buildings, and increase their capacity from one-half to two-thirds. The ratepayers defeated a $50,000 by-law to supplement $50,000 previously voted to build a $100,000 collegiate institute,

A Change in the Trusteeship.

The Dominion Government has awarded the contract for building the breakwater at Port Stanley, to Messrs. Haney & Miller, Ottawa, the price approximately being $100,000.

Mercantile Summary.

The shareholders in the Nova Scotia Eastern Railroad will meet in Toronto next week to ratify an issue of bonds and preferred stock.

The Western Canada Cement and Coal Company, capital stock of $1,250,000, and chief place of business in Ottawa, has been granted a Dominion charter. It will carry on the business of manufacturers of and dealers and workers in cement and its by-products, and artificial stone and other articles composed in whole or in part of Portland or other cement, or the by-products of the same; of coal miners, colliers and quarrymen. Among the incorporators are A. F. MacLaren, and W. A. Fleming, of Ottawa.

Andrew Onderdonk, general manager of the New York Tunnel Company, died last week from heart trouble, following a general breaking down from overwork. He was well known in Canada from having between 1880 and 1885 built the western division of the Canadian Pacific Railway, four hundred miles through British Columbia, the contract amounting to $18,000,000. In 1898 he contracted for the difficult part of the Trent Valley Canal for the Dominion of Canada, involving one of the largest rock cuts ever attempted in this hemisphere. He also constructed half of the Victoria Bridge at Montreal, and built a double-track railway tunnel at Hamilton, Ont.

At a meeting of the directors of the Lake of the Woods Milling Co., in Montreal last week, it was decided that an interim distribution of three per cent. be declared on the common stock of the company, to be paid July 15th, 1905. The declaration of the full dividend on the common stock for the year will be decided upon after August 31st, which is the end of the company's fiscal year. It was decided that the company proceed to increase its elevator capacity in Manitoba and the North-West, where a number of the most up-to-date elevators will be constructed. The company's capacity is also to be increased, and a new mill with a daily output capacity of 3,000 barrels will be erected at once, probably at Winnipeg, and perhaps another at some point on Georgian Bay.

. The second annual convention of the Canadian Seed Growers' Association was held on the 27th and 28th ult., at Ottawa. The objects of the Association are to advance the interests of seed growers and other farmers by making regulations respecting the growing, selecting, and preserving of seeds of various kinds of farm crops for the guidance of its members, causing records to be kept of the history of seeds produced by members; fixing standards for seeds that may be eligible for registration; publishing information as to standards; issuing certificates of registration to members, by which hand-selected seed or the product therefrom may be known from other seed. The subject is one of great importance to farmers.

WHY DISLIKE GERMANY?

It is of no use disguising the fact that in Great Britain, and to a certain extent in her colonies, there exists, at the present time, and has existed for some years past, a strong feeling of antagonism to Germany. Whether this be fairly based or not, there is certainly another side to the story, and this side was voiced by W. L. Alden recently in the Pall Mall Gazette, of London. Speaking of the feeling of irritation held by Britons at the idea that the Germans should attempt to build a powerful navy, this writer says:—

"The complaint that Germany is building a powerful fleet is simply childish. Germany is a great power, with large colonial possessions and a growing commerce. She needs a powerful fleet for the protection of her interests. Since when has it been a crime for a great nation to build a fleet without first asking the permission of England? The United States is building an immense navy, for which they have no use except for purposes of aggression, since no one dreams of attacking them; but England does not regard this as an act of hostility. Englishmen find no fault with France or Italy when they build new battleships and cruisers. It is only Germany that cannot build a man-of-war without being accused of dark designs against England. Is this quite worthy of a great and intelligent people? The German mercantile marine is rapidly growing. Statistics show that during the years 1903 and 1904 the Atlantic steamship line which carried the greatest number of saloon passengers between England and America was the North German Lloyd, while the greatest number of steerage passengers on the same route was carried by another German line—the Hamburg-American. The reason is not far to seek. The North German Lloyd Company has the fastest ships on the Atlantic trade, and the great ships of the Hamburg-American company offer exceptional accommodation to third-class passengers. Is there in this any reasonable cause for complaint against Germany? Let the English companies build faster ships than the German companies, and the former will carry the greater number of saloon passengers. Let the English companies furnish as good accommodation to steerage passengers as the German companies furnish, and the English ships will gain the greater share of the emigrant traffic. Much the same is true of the Australian trade. The North German Lloyd company is gaining the greater share of the Australian passenger trade because it has placed on the route twin-screw ships of great tonnage, on board of which especial pains are taken to make passengers comfortable, instead of conveying to them the impression that they are simply tolerated. Let the English companies build better ships than the Germans build, and show at least as much consideration for their passengers as the Germans show, and they will have nothing to fear from German competition. Would it not be wiser to do this than to complain that the Germans are wickedly trying to gain a share of the ocean passenger trade? What has become of the British spirit of fair play, and the old maxim, 'May the best man win?' "

UNITED STATES FINANCES.

Henry Clews & Co., in their special letter, dated July 1st, 1905, say:—

Although there was some evidence of a reactionary feeling during the closing days, the stock market during the greater part of the week gave still further response to the favorable technical situation. This was particularly the case in regard to the standard securities and reflected to a measurable degree actual investments by those about to receive their usual half yearly distributions on their securities. Such evidence of confidence was not at all singular. This year's July distributions are between $5,000,000 and $6,000,000 in excess of those of last July, and there is a very natural disposition under these circumstances to reinvest in the properties that have given such satisfactory results. Of the increase in the current disbursements railroad dividends have contributed about $1,000,000; industrial dividends a similar amount; railroad interest payments 2¾ millions, and industrial interest payments about ½-million, the remainder being made up of smaller increases by the traction stocks, banks and other financial institutions.

The sudden appearance of gold exports this week produced a momentary hesitation in the upward movement, but their influence was soon expended. As a matter of fact, under current conditions the efflux of the yellow metal should not be given too great prominence. It is a seasonable movement, and is this year coincident with an unusually heavy volume of trans-Atlantic travel, involving not alone the large amount carried abroad by tourists for their personal expenses, but also the payment of passage money in both directions, the return voyage usually being prepaid on this side in order to secure comfortable return accommodations.

An analysis of Western bank conditions indicates, with few exceptions, most satisfactory husbanding of resources for crop-moving purposes this season. The fact may not be lost sight of, however, that the larger the harvests the larger the demands for funds. And while it is quite true the Western banks have ample resources, a considerable part of these resources are now on deposit with New York financial institutions, and are thus contributing what may almost be termed fictitious ease in the New York bank situation.

General trade conditions are in the main satisfactory, although the iron and steel industry gives as yet no indication of resuming activity, which, however, may be considered more or less seasonable. Railroad earnings are still satisfactory, and railroad officials generally are looking forward to a very large tonnage as soon as the agricultural products begin to move to market; and as this class of tonnage will make comparison with a very lean year, the traffic statements in the near future seem to promise a series of favorable market influences.

Tenders for Debentures

Sealed tenders addressed to the undersigned, marked on envelope "Tenders for Debentures," will be received up till noon on the 10th day of July next, for the following debentures, payable at the City of Windsor:—

Block 1. **$13,157.20** City of Windsor Local Improvement Debentures, dated June 1st, 1905, payable in ten annual instalments, interest half-yearly.

Block 2. **$72,523.54** City of Windsor Local Improvement Paving Sinking Fund Debentures, dated July 1st, .1905, payable in ten years, interest half-yearly.

Block 3. **$20,500.00** City of Windsor General Improvement Debentures, dated June 1st, 1905, payable in twenty annual instalments, interest half-yearly.

All bearing interest at 4½ per cent.

Block 4. **$20,000.00** City of Windsor General Paving Debentures, issued under Chap. 108, Statutes of Ontario 1900, dated 1st Sept., 1905, payable in ten annual instalments. Interest at 4% half-yearly.

Tenders for the whole or for any one of said blocks will be received. Payment and delivery at City of Windsor.

STEPHEN LUSTED,
CLERK.

Windsor, Ont., 27th June, 1905.

TORONTO MARKETS.

Toronto, July 6th, 1905.

Chemicals, Drugs, etc.—Since last week's reports, there has been but little change in the situation of either of the staple drugs, opium and quinine. The same remarks apply with more or less force to other branches of the drug trade. Locally, business is fully up to expectations, and prices keep at a steady level. New York advices speak of dullness in the trade. Referring to chemicals in the British market, recent advices say the expectations of a quiet month have been fully realized, especially in the home trade, and with Whitsuntide so late this year, and the end of the half-year so closely following, it is not surprising that transactions have not been numerous or large. This state of things is expected to continue for some weeks at least, but values are well maintained, and the general tone is hopeful. In the heavy alkali branch there is nothing specially noteworthy. Bleaching powder continues quiet, consumers being slow in taking large quantities, and some parcels are rather pressed for sale. Caustic soda is unchanged. Ammonia alkali has a steady demand, and is firm. Chlorates of potash and soda are quite steady, though enquiries are not plentiful just now. Exports of bleaching materials show a further increase in weight and value during May, and soda compounds show a further increase in value but again a decrease in weight. In general chemicals there is steadiness as to values, but no large weight of business.

Dry Goods.—The demand for dress goods, and in fact, for all lines of seasonable articles in dry goods lines is quite active, and in fact has shown material improvement since the really warm weather started. Staple goods are held at firm prices, and in this respect there is little change to note since the conditions of a month ago. Payments are fully up to the average expectations, though a little on the slow side in the West.

Flour and Grain.—The tendency in flour is towards lower prices, and in several cases as low as $4.15 has been accepted for ninety per cent. patents in buyers' bags, eastern or western freights. Shorts is firm, while bran is quite dull. Prices for Manitoba wheat show a sharp advance, owing to reports of wet weather in the north-western States, and to fears of rust from the same cause in Manitoba. Oats are firm under apparent scarcity. Corn (Canadian) is also firm. Peas are scarce with a fair demand. Barley is experiencing quite a stiff market, and reports of scarcity are extant.

Fruits and Vegetables.—Heavy lots of strawberries have been coming into the local market. But the demand continues brisk, so prices keep up well. Cherries are in good demand, those of good quality, but many offerings are not so. A feature in the market for tropical fruits is the scarcity of lemons, which have again advanced. There is a good and growing demand, as is also the case with oranges. We quote: Strawberries, 7 to 10c.; cherries, sweet, per basket, 50c. to $1.25; California peaches, per case, $1.50 to $1.75; California plums, $1.50 to $2.50; California apricots, $1.50 to $1.75; cantaloupes, per crate, $2.25 to $5; watermelons, each, 30 to 35c.; bananas, per bunch, $1.25 to $2; bananas, red, $2.50; lemons, per crate, $4.50 to $5; oranges, per crate, $4.50 to $5.50; pineapples, per crate, $3.25 to $3.75; tomatoes, per crate, 75c. to $1.25; cucumbers, hamper, $1 to $1.25; Canadian cucumbers, per dozen, 75c; peas, per basket, 25c.; potatoes, per barrel, $2.50 to $2.75; onions, Bermudas, $1.15 to $1.25; beans, per basket, 50c.; squash, hamper, $1; cabbage, per case, $1.75.

Groceries.—Considerable improvement has set in in the general groceries trade, and now it may be described as quite active. The demand for sugars for preserving purposes is in full swing, and the movement in that commodity now leaves nothing to grumble at. Prices now may be considered to be on a normal basis. In dried fruits not much business is now passing, but this is nothing new for this period of the year. Payments are fairly good.

Hardware.—Ever since navigation opened in the spring, wholesalers have been doing a rushing business in practically all the season's lines. Prices keep just about as they were, and there is hardly any feature at the present moment peculiar to the trade. It is expected that the present activity will keep up to the standard. In metals, the movement is good. Pig-iron is in normally active demand. Reports from Great Britain say that after the heavy

fall in prices of pig-iron during May the market had become steadier, and since the end of last month there has been little alteration in values, Scotch iron having fallen about 6d. per ton, and Cleveland iron advanced about 3d. per ton. Business has been quiet throughout this month, being almost entirely for immediate requirements, but now there is a better feeling, and some expectation of improvement after the turn of the half-year. Copper has been gaining steadily, being now some 35s. per ton dearer than it was a month ago, and is steady but not active at present. Tin also has improved steadily, being nearly £3 per ton dearer during the last four weeks, and is firm with a fair demand. Spelter is some 7s. 6d. per ton dearer, but is now rather easing. Lead is slightly dearer, and is steady.

Hides, Skins, and Wool.—A very strong tone pervades the market. The demand is greater than receipts can supply. Tallow is easy. Not much new wool so far has come into this market as it has been snapped up by country buyers at high figures. Dealers here claim these are too high.

Provisions.—Creamery print butter is wanted at good prices. Other kinds are meeting with a fair demand. Cheese prices continue firm, and promise to remain so. Live hogs are 25c. lower than they were a week ago, but dressed hogs are as before. Smoked meats keep steady. Lard is a trifle firmer.

Leather.—A firmer tendency is visible in the market, and it is believed, in view of the present position in hides, that prices for leather must go up.

* * *

MONTREAL MARKETS.

Montreal, July 5th, 1905.

Ashes.—The market remains quiet and the undertone is easy; but prices show no actual change. The supply coming forward is ample to fill all requirements at present, which are limited. Sales of first quality pots have taken place at $5.15 to $5.25, and seconds at $4.70, while pearls are quoted at $7.50 per 100 pounds.

DELAYS ARE DANGEROUS.

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. G. C. DINNICK, Managing Director.

Cement and Firebricks.—There has been no important change in this department of the trade, prices having ruled steady. The demand has been good, and some fair-sized lots of cement have been placed on both local and outside account. The trade in firebricks is also fair for the season. Quotations are steady at $1.80 to $2 for Belgian; English, $1.90 to $2; American and Canadian, $2.30 to $2.40, less the usual rebate for returned packages. Firebricks are quoted at $17 to $22 per thousand.

Dairy Products.—A feature of the cheese situation since our last has been the stronger feeling in the market, and prices have advanced 1-4c. per lb. This has been due chiefly to the higher prices realized at the different country boards of late. The volume of business transacted on spot has been small, as exporters claim at present prices there is little demand from English importers, but in spite of this fact, the shipments for the season to date are much larger than those for the corresponding period a year ago. The make in progress is heavy, but in the face of this prices here are fully 1c. per lb. higher than a year ago. The receipts for the past week were 103,777 boxes, as against 87,105 for the same week last year. The total since May 1st to date has been 510,587 boxes. Some business has taken place in finest western goods at 9 7-8 to 10c., and easterns at 9 5-8 to 9 3-4c. The demand for butter continues good from both local and export buyers, and the undertone to the market is strong with prices tending higher. Sales of choice creamery have been made at 20c., and undergrades at 19 1-2c. to 19 3-4. The re-

ceipts of butter for the past week were 34,593 packages, as compared with 39,628 for the same week last year. The total arrivals since May 1st to date have been 192,572 packages, as against 181,132 for the same period last year. The exports of cheese last week were 100,554 boxes, as against 83,751 for the same week in 1904, and the shipments of butter last week were 40,004 packages, as compared with 15,479 for the same week last year.

Groceries.—In this department only a fair volume of business has been done for the season and the market presents no new feature of importance to note. The demand for sugar is still somewhat limited, owing to the continued unsettled condition of the primary markets for the raw article. Local prices for refined have ruled about steady, and at the factory granulated in barrels is selling at $5, and yellows from $4.50 to $4.85 per 100 lbs. The trade in teas continues quiet, and prices show no important change. Molasses is quiet. Sales of several hundred puncheons of new crop Barbadoes have taken place at 33c. per gallon, ex-wharf, and other sales of mixed stock are reported at 32c. to 32 1-2c. A moderate amount of business has been done in Valencia raisins at 4 1-2c. for selected stock. The supplies of all grades in first hands are now claimed to be small, and the undertone to the market is firm. The demand for canned goods in a jobbing way is fair. The opening prices for British Columbia canned salmon this season are as follows: Fraser river, sockeye, $5 per case of four dozen, 1-lb. tins; Northern river, sockeye, $4.65; red spring, $4.40; cohoes, $3.75; humpback, fall pack, $2.75, f.o.b., coast.

Hides.—The anticipated advance in the price of lambskins, referred to a week ago, has taken place, and dealers are now paying 30 to 35c. each, but the prospects are they will go still higher in the near future. Beef hides and calfskins have ruled steady. Beef hides, No. 1, 10 to 10 1-2c.;No. 2, 9 to 9 1-2c.; No. 3, 8 to 8 1-2c.; calfskins, No. 1, 15c., and No. 2, 13c.

Leather.—There has been no special change in the situation. The demand is fair, and prices rule steady. We quote: Sole, 27 to 28c.; oak sole, 29c.; Western splits, 21c.; Quebec, do., 17c.; junior splits, 16 to 16 1-2c.; glove grain, 12c.; Scotch grain, 15 to 16c.; pebble, 12c.; buff is dearer at 13c. for medium, and 14c. for heavy; harness, 32c. for best.

Metals and Hardware.—A fair volume of business continues to be done in heavy iron goods, and general hardware, there being a steady demand for most lines from both local and country buyers. The tone of the market is firm, and prices show no special change. No. 1 Summerlee pig iron is quoted at about $19, with best brands of domestic at about similar figures. Bars are $1.75 in car lots, and $1.80 in a jobbing way; for nails, both wire and cut, $2.20 is still the figure, and wire is unchanged. Canada plates are quoted at $2.30 for fifty-two's, and galvanized Canadas, $3.85 to $3.90; black sheets, $2.15; Terne plates, $6.50; coke tins, $3.65, and $3.90 for charcoals, of standard brand and weight; galvanized sheets, $4.15; antimony, 11 1-2 to 12 1-4c.; tin, 32 1-2 to 33c.; copper, 16 to 16 1-4c.; lead, $3.45 to $3.55; spelter, 6 1-4 to 6 1-2c.

Oils, Paints and Glass.—There has been no important change in this market for any line. The demand is fair for the season. Turpentine is about steady at 92c. to 93c. per gallon, and linseed oil at 52c. for raw and 55c. for boiled. The tone of the market for glass is very firm.

Glen Mawr
651 SPADINA AVE., TORONTO
RESIDENTIAL AND DAY SCHOOL FOR GIRLS

Thorough in all its departments. Gives careful individual attention, and the best physical, mental and moral training.

Offers great advantages in Music, Art and Languages, Native French and German Teachers. Large staff of experienced Residential and Visiting Professors and Teachers.

THE HUGH C. MACLEAN CO., Ltd,
Winnipeg, Vancouver

Established 1882
THE COMMERCIAL
The weekly financial, commercial & general trade newspaper of the Great West

A small baker at Quebec, by name, Napoleon Lamothe, has abandoned his estate to his creditors. He owes $3,000, and shows assets of about $800.

Mrs. Helen Laberge, who conducted a hotel business at Ottawa, for the benefit of her husband who was unsuccessful in business several years ago, has assigned.

R. C. Wright's cheese-box factory and planing mill at Thorndale, Ont., were on the 3rd inst., destroyed by fire at a loss of $6,000, insured for only $1,000.

The Universal Ideal Coal Company, of Montreal and Portland, Me., purposes to erect a peat manufacturing plant near St. Hyacinthe, P.Q., where some excellent peat lands exist.

The creditors of J. A. Bourget, a small store keeper at Lac aux Sables, Que., and whose failure has already been noted, have received an offer of 60 cents in the dollar for their claims, which they have accepted.

Two small failures which occurred last week are those of Delphis Coulombe, general store, of Villroy, Que., who assigned to V. E. Paradis, of Quebec, and of Louis Deslandes, confectionery, of Granby, Que. His assets are to be sold on July 7th, and estate wound up.

From Quebec it is learned that Elzear Cote, a currier and leather merchant, has compromised $7,000 of liabilities at 20 cents in the dollar, cash. His assets are stated to be about $5,000. He has been in business a number of years, but always in a moderate way.——L. V. Dion, who conducts the St. Louis Hotel, also at Quebec, has consulted his creditors lately with a view to obtaining an extension of time.

The assignment of the Canada Paper Box Co., which occurred on June 27th ult., was not altogether a surprise to those in the paper trade. The business, while not an extensive one, was believed to be yielding fair returns, and the firm's difficulties are attributed to unprofitable outside interests of one of the partners. The estate is in the hands of the curator, who is preparing a statement.

For a man of 30, L. J. Giroux, hotel keeper of Berthierville, Que., has had a rathered checkered career. He commenced business in 1894 on small capital, but failed in March, 1903, for $22,149. His assets were about $4,500. He resumed in the groceries, liquors, and hardware business in his wife's name, but sold out at 80 cents in the dollar the following year. In the spring of 1904 he started his present business, but having had no previous experience in this line, his failure of last week was not a surprise. He is said to have suffered by fire in 1901.

* * *

LAW AND ORDER IN CHICAGO.

A correspondent of ours in Chicago sends us particulars of an incident which took place on 29th ult., in that city, in which a negro special policeman shot and killed a lad named Mejedly, aged 15 years. Several boys, it seems, headed by young Mejedly, began calling the policeman names as he was passing Leavitt Street on an Eighteenth streetcar, and several workingmen on the car joined in the tirade. The negro left the car and started south in Leavitt Street. He was followed by the boys and several men, and soon a mob of 500 persons had joined in the chase. The officer fired once in the air and the mob closed in on him. Then, he declared, in order to protect himself, he fired a bullet directly at his pursuers. It took effect in the boy's right side and he fell to the street. The shooting enraged the crowd and more serious trouble was averted only by the arrival of a wagon load of officers. The mob was dispersed, the negro officer was arrested. The fatality is interesting as being illustrative of the extraordinary methods adopted by the civic authorities in Chicago for dealing with any difficulties that confront them, and this incident is by no means the first that has occurred of a similar character. Knowing so well the feeling of contempt in which persons of color are held by the populace there, any man of average common sense would regard it as a very doubtful and dangerous experiment to enlist and put in police uniform any negro. Yet this has been done, and no fewer than two hundred such men have been engaged within the last few weeks, and placed in authority as guardians of the peace of the city. The result might easily have been foretold, and needless sacrifice of life avoided by the exercise of ordinary care on the part of the city authorities. The strike still continues, although with very much abated force, and for the present at least, both sides seem disposed to shirk the responsibility of bringing matters to a final issue. With a feeble city government it is little matter for wonder that matters have been allowed to drift, and the law brought into contempt.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office--Waterloo, Ont.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Company,

Temple Building, - Toronto.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE BUDGET.

The Hon. Mr. Fielding's Budget Speech this year, the ninth of his series, was interesting because, for one thing if we may so express it, of its lack of startling interest. It was well understood, before its delivery, that there would be no startling changes in the tariff. Those that were made seem on the whole to have met with general approval. For instance, the duty on rolled oats is raised to 60 cents per hundred pounds, as heretofore the duty on the raw material was actually higher than that on the finished article. The duty on dry white lead, the raw material of paint manufacture, is raised to 30 per cent., owing to the encouragement given to lead mining in British Columbia, and to the establishment of an industry to use that product in Montreal. Mr. Fielding repeated that at as early an opportunity as possible the whole question of the tariff will be carefully investigated by a commission which will take evidence in public on both sides, and referred again to his proposal to enact a three-fold system of duties, maximum, minimum, and preferential.

A pleasing feature of the budget was Mr. Fielding's statement that for the fiscal year ending June 30th last, the surplus had been, as foreshadowed by him, over $15,056,000, the largest in Canada's history. The actual average surplus during the last eight years had been about $7,054,000. The actual expenditure for 1903-4 was $55,612,000, or an increase of $6,637,000, while even with the brightest prospects there would prove to be but a very moderate increase in the revenue. Of course, as the minister stated, in a growing time it is necessary often to increase a person's or a nation's expense account; nevertheless there is no doubt that Canada's expenditure has of late been going up with leaps and bounds, and it is evident that great watchfulness will be needed to prevent it going beyond due limits. Mr. Fielding himself alluded to this, but with all due respect to that gentleman, it may be intimated that something more than allusion is required—the point is one that will have to be most carefully borne in mind and acted on. This is emphasized when the fact is recalled that in the near future the country will be called upon to borrow something like $100,000,000 for the new railway, besides a very large amount to provide for expiring loans. It is estimated that for the current year the total appropriations on consolidated revenue account would amount to $71,889,000, and Mr. Fielding is optimistic enough—we do not dispute he may have warrant for his optimism—to believe that the revenues would still be sufficiently large to leave a million or so to the good. Probably we have now reached a time when we must expect to see very considerable sums chargeable to capital account devoted to railway construction.

Another important announcement made by the Minister of Finance was as to his determination to attempt to rid the country of the present flood of American silver, though as a matter of fact we believe this has not yet attained to any such large proportions as was the case some twenty-five years ago. The plan now proposed is for the banks to take the silver at par, as a discount might interfere with trade. The banks would be paid a small commission by the Government of three-eighths of one per cent. for their trouble, and the Government would pay express on the coin sent abroad. Incidentally Canada would receive a material profit on the transaction by the substitution of Canadian for American silver, for while there is no profit in coining gold, as the intrinsic and the face values are the same, yet silver is not worth nearly so much as the stamp on the coin indicated. The loss by deportation would be met ten times over by the profit on Canadian coinage which would replace American silver. The Government propose making this arrangement for one year, when perhaps American silver in Canada will be so small as to render its continuance unnecessary. It may be suggested, however, that this plan, while it would no doubt, get rid of the United States money already in the country would do little to prevent its continued entry. What would appear to be wanted is some scheme for placing it under a sort of disability in the eyes of the Canadian public.

* * *

A REFLECTION ON BANKING PRACTICE.

There is just a possibility that incorrect or misleading reports have become extant regarding what the judge actually said in connection with his sentence on Johns, the cashier of the defunct Bank of Yarmouth. According to these reports, Johns was given a comparatively light sentence because, though the judge could not see how the law could be so interpreted as to permit it, "the evidence seemed to show that many bankers had adopted the practice, and therefore that the prisoner had some justification for making returns as he had done."

It seems strange, taking the truth of the reports for granted, that any judge either should let a falsifier of returns off so lightly on any such ground, or that he should make such a statement as to bank practice, a statement which is not warranted by facts. We are not now engaged in calling into question the mildness of Johns' punishment; perhaps there were other circumstances not explicitly mentioned to render such a course advisable. We do call into question, however, the learned judge's statement (if he really made it), as to the manner in which bank officials send in their returns to the Government.

If dishonest bills and drafts are to be treated as ordinary accounts, and entered as current loans and discounts, then a bank's true position may never be known. Of course, in the case of a client having one or more of his bills on customers returned to the bank unpaid, and for renewal or presentation at some future time, it would perhaps not be unbecoming for the bank to treat it in the manner suggested. But this would be only for a strictly limited period, and merely to save confusion, and the bank would have a thorough understanding of the position of his client. When, however, the amount,of dishonored bills on one firm reaches an aggregate of over $350,000, or equal to 60 per cent. of the bank's total discounts, the case takes on an altogether different color, and to say that such is the practice of many banks is apt to create grave misapprehension.

The position of the defunct Bank of Yarmouth shows a sufficiently deplorable state of affairs, without adding to it the idea in the public mind that there is any system of Government returns carried on which is not strictly legitimate, and absolutely accurate. Our efforts to obtain confirmation or otherwise of the statement in question, have not as yet been attended by success, but we still hope to learn that the judge's remarks were misrepresented, as they tend to give rise to misleading conceptions of banking methods.

* * *

THE STOCK MARKET.

This is the time of the year when one is apt to take the bearings of the stock market and note how it compares with the beginning of the year, and with the previous one. During the last four or five weeks there has been a distinct revival in stock exchange business, and the prospects for a continuance of such are favorable. That is to say, the promise for large crops is at present good, but of course this feature, upon which so much depends, may change for the worse at any time. At any rate, the undertone to the market is quite strong. In Wall Street, which sooner or later affects all markets, the tone during the last two or three weeks has been distinctly buoyant, and it is a matter for conjecture why the Canadian centres have not become more so than they actually have done. It would appear that the New York market has been largely of a professional character. Compared with a couple of years ago the general public is practically outside altogether. Certainly, this applies very closely to the Canadian Exchanges. Another feature which distinguishes the present situation is the absence of new securities of an industrial or other character.

In keeping with these general considerations, values are found to be, as a rule, on a higher level than was the case last year. For one thing, owing to the elimination of the above-referred-to "undigested securities," the supply of money available for stock transactions is larger, and good securities do not have to be thrown away to protect the less worthy. In Montreal, the aggregate amount of trading for the first half of the present year was 623,015 shares, and $2,893,800 odd of bonds, compared with 262,000 shares and $1,305,000 of bonds for the first half of 1904. In Toronto the aggregate number of shares for the first six months of 1905 was 410,266 and $592,500 worth of bonds, compared with 209,193 shares and $728,100 of bonds in 1904.

Notwithstanding the "Lawson disclosures," the tendency in stocks has been distinctly upward. Canadian Pacific, for instance, since the early part of the year, has gone up from 132 to 151, Dominion Coal from 62 to 79. Bank stocks have as usual kept within a narrow range as a rule. The traction stocks, such as Twin City, have tended strongly upward. Bonds have been favorite investments.

It would not be wise to attempt to prophesy as to the probable course of the stock market. With good crops, there is a chance that the volume of business will show a gradual increase; at the same time, to counteract this tendency, the large requirements for moving the crops is apt to bring about a stringency in the money market, with which any very large amount of speculation does not usually coincide.

* * *

MUTILATED COINS.

It will please many to note from the budget speech that there is a chance of something being done to obviate the large circulation in this country of United States money. There is another matter relating to the coinage, however, which, it seems to us, might well have been taken up by Mr. Fielding. We refer to the loss on punched or defaced silver coins, the resolution of the Toronto Board of Trade concerning which appears in this issue. These coins no one willingly receives; in fact, they are not legal tender, and the result is that the loss accruing from the accidental possession of them generally falls to such unperceptive mediums of circulation as church collection boxes and street car fare boxes. Yet why should not the Government take some means for redeeming them? Silver coinage is not worth its face value. True, but paper currency is worth intrinsically even much less. Yet the Government takes up the latter, without hesitation, so long as that face value remains undoubted. Why then should silver coins go to the jeweler's melting pot, returning to their owners only half their supposed value. Many people would like to have seen Mr. Fielding take up this matter in conjunction with the other.

* * *

THE FATAL INSURANCE DEFECT.

It is understood that ever since the Royal Arcanum decided to place its rates on a more rational plane the management has been inundated with protests from indignant policyholders. Yet what can these expect? For a fraternal or any other association to go on constantly paying out more than it has received is on a par with perpetual motion as an absurdity. It is not system or management or any accidental occurrence that is at fault but the whole principle upon which the business is worked.

Assessment insurance disregards the fact that an increased mortality is sure to come as the ages of the members increase. As the young men who formed the organization in its infancy grow older the assessments to meet the increasing mortality necessarily grow larger, and this increase is particularly rapid from fifty-five or sixty on—so rapid, in fact, that it becomes an impossibility to keep the mortality at a low point by fresh entrants of young age.

With the necessary increase in the assessments comes the same result to all organizations, that is, as the death-rate begins to grow, it is very difficult for them to increase their membership, and even hold the membership they have, for the reason that young and healthy lives will not join a company with a high death-rate, and the young and healthy lives already insured begin to lapse their contracts as they begin to have the warning that their insurance is going to cost them more and more from year to year, and they cannot tell how much they will have to pay in the future.

Perhaps it takes something like a generation to prove the truth of the underlying principle that no system of insurance can live that does not establish a fund sufficiently large to enable it to meet all its obligations at maturity without a change in its rates. Certainly, people are becoming convinced of it now, as has been manifested during the last few years by the collapse or change to better methods by one fraternal society after another. The root of the matter is well stated by Mr. S. H. Row, formerly Insurance Commissioner for the State of Michigan, in some comments upon a recent judgment by Judge E. D. Kinne, upon the protest of a policyholder against a similar increase of premium rates by the C.M.B.A. It may be remarked here parenthetically, that most of the assessment concerns seem to be in the same box, that is to say, they have either gone or are going out of business, or are increasing their rates in such a manner as to drive most of their patrons out. Mr. Row puts the matter thus:—

"The theory and practice of assessment or fraternal organizations won their way to popularity by a decreased premium, claimed to be actual cost. For instance, a person, say thirty years of age, could be insured by any fraternal organization for $1,000, payable at death, for $10 per annum. Each pays alike, and the heirs of each are to receive $1,000 at death. Supposing this fraternally insured party lives and pays premiums for forty years? His age at death is seventy years. He has paid $400, and is to receive $1,000. All pay alike; all receive alike. It has never been answered yet, who pays the difference between the $400 paid in, and the $1,000 to be received at death. Now, it is a very simple mathematical problem that the assured who pays in the full $1,000 which each is to receive would have to live to be about 200 years old."

Judge Kinne said also that the "contract" must be lived up to, otherwise it would be "a novel, if not a dangerous proposition of law, that one party to a contract, when urged by wisdom or driven by necessity, could change the contract at will, without the consent of the other party." And leaving the law out of the question, it certainly seems absurd that any man should enter into a contract—if his action can be dignified by such a term—with a party which refuses to tell him how much he, on his side, will have to pay, or, if it does promise such and such a premium rate, sooner or later breaks its promise and wants more. However, the public is beginning to realize where it stands. Assessment societies may be appropriate enough for temporary insurance, for sick-benefits, and so forth, but for anything more than such they are really worse than no insurance at all, for they leave the insured deluded and bereft just at the time he most needs their aid.

* * *

SUMMER FIRE DANGERS.

While it is true that the winter and spring are the period of the year when the risks from fire are most abundant, and when usually the greatest loss occurs, it is well to bear in mind that the summer has its peculiar dangers also. On national holidays, such as Victoria and Dominion Days, the hazard is quite perceptibly increased owing to the presence of the ubiquitous small boy with his squibs and crackers, the unenthusiastic attitude of the authorities towards these potent joys of youth not being as yet sufficiently respected by the former.

There are other summer dangers, moreover, which should not be disregarded or forgotten. Some that are remembered in winter, are forgotten in summer, because they are only a source of danger during short intervals of time. For instance, in winter, people look to the kitchen stove and make sure it is safe for the night. In warm weather, however, when it is only in use perhaps an hour or so per day, one is apt to become careless, with the result that before long there is a blaze, and perhaps a conflagration.

We are reminded of this danger by some recent remarks by the Fire Marshal of Ohio, who gives what seem to us to be some very useful hints as to the placing of cook-stoves and ranges. Nearly all cook-stoves and ranges are too near the woodwork. A wooden, or lath and plaster wall if the plastering be broken, needs metal protection when the stove is placed within three feet of it. With a sheet of zinc on the wall the stove may be put within a foot and a half. If the distance is but a foot the metal must extend to twice the height of the stove. The floor under the stove should be covered with metal to a distance of twelve inches in front of the ash pan. A large range, if under a ceiling of combustible material, should have, he suggests, a metal hood with a ventilating pipe passing to the outer air through a sleeve or asbestos packing. A kitchen stove-pipe should have no openings, such as result from forcing together misfit pieces. It should not pass through a floor or partition, or through any space in which it cannot be seen, for in such a situation it may part a joint or form holes by rusting. The ash dump must not be in a wooden barrel or box, nor against the side of an outhouse.

Small gas stoves, he goes on to say, should not be set upon wooden tables or floors without a piece of metal directly under them. Rubber tube connections for gas stoves are prohibited by ordinances in some towns, and should be in all because of the loss of life and property chargeable to them.

Another matter should be given attention to, not only in summer, but of course at all times of the year. In the bedrooms it should be seen that the gas brackets are so placed that a jet cannot come in contact with the dresser or with lace curtains. Swinging jets should be protected by globes and no brackets should be within a foot of a window. The plugs in unused stove-pipe holes are often misfits as shown by the wall around them being smoked, and some times the paper hanger covers such holes with the plug out. The choking of flues from disintegrated mortar is a common danger where natural gas is used. Floor sweepings left under furniture or in closets constitute a danger from spontaneous combustion or flying sparks or match-heads.

⁂

THE HALF-YEAR'S FIRE WASTE.

The fire loss in the United States and Canada, as compiled in the office of the New York Journal of Commerce and Commercial Bulletin, was more than a million dollars in excess of the same period in 1904, though when one looks at the total for the half-year the result is more gratifying, showing a very great reduction. However, this was owing to the great conflagrations in Toronto and Baltimore which took place last year. As a matter of fact, the loss for the first half of the present year is nine and a half million dollars greater than for the same period of 1903. The figures for the present year up to date are summarized as follows:—

	1903.	1904.	1905.
January	$13,166,350	$21,790,200	$16,378,100
February	16,090,800	90,051,000	25,591,000
March	9,907,650	11,212,150	14,715,400
April	13,549,000	23,623,000	11,901,350
May	16,366,800	15,221,400	12,736,250
June	14,684,350	10,646,700	11,789,800
Total six mos..	$83,754,950	$172,534,450	$93,111,900

⁂

THE SUGAR SITUATION.

The preserving season having started in earnest, and the prices of sugar having previously fallen to a more normal basis, there is every prospect for a good consumptive demand for sugar in this country. The only change of recent note is the decline of Acadia granulated to 5 cents per quintal lower than Montreal granulated. The movement now both from Toronto and Montreal is quite fair; in fact, the usual average would now appear to have been reached. As we go to press, tidings reach us of a 10 cent decline in all grades of granulated sugar in New York.

In Europe the feeling is still weak and prices last week went down to 10s. 11¼d., for the July option, the lowest we believe which has been reached this year. Since the decline, however, a measure of comparative firmness set in, due to reports of excessive temperature on the continent. No reports of actual damage therefrom, however, have yet come to hand.

According to advices from New York, the only new features in the situation worthy of mention are the continued absence of the principal buyers from the market, the increased demand for refined, which has been brought about by the recent reduction in prices, and the course of the European beet market. In view of the heavy premiums that have prevailed for some time on August beets and the poor demand for refined, the principal buyers have been operating very cautiously for the past two months, and their attitude has not changed much, although the above premium has been considerably reduced. Owing to the small purchases made during the past two months, refiners' stocks have decreased, and are now smaller than they were last year at the same time. The recent reduction in refined sugar has brought the difference in prices between raws and refined to a very reasonable figure. The Cubans still refuse to part with the balance of their crop at present prices. The New York refiners have succeeded in getting their quotation down to 4¼c., but their stocks are becoming low, and it looks as if they will have to buy soon. It is believed that the elimination of the unsettled and speculative element, which has distinguished the sugar market for so long, has been accomplished, and that now healthier conditions will prevail. This will affect the Canadian as well as the New York market.

It is understood that the Canadian sugar refiners in Montreal have discontinued the allowance to West Indian exporters of the one-half of the preference of 33 1-3 per cent. allowed by the Dominion Government on raw sugar from those Islands. It would appear that the refiners have gained more from the preference than either producers or consumers.

⁂

THE MANUFACTURERS' TRIP.

The path of the Canadian Manufacturers' Convention through the British Isles reads like a sort of triumphal march, where the pick of the land, from their Majesties the King and Queen, and the leaders in politics and thought, down to the general populace, delight to show honor to their relatives from across the seas. Now they have gone to France, and the citizens of Calais and Paris seem as anxious to show the trippers the sights and give them a right royal good time as those in England and in Scotland.

We wonder what impression they, or rather the presentation of their views in the person of Mr. George, made on Mr. Chamberlain and the other distinguished exponents of tariff matters, and we wonder what impression the British tariff reformers made—*really* made—on the Canadian manufacturers. Neither side can complain as to lack of opportunity to make the other thoroughly acquainted with its views. These views, however, generally require a period of "soaking in" in order to become thoroughly digested, and properly appraised in due relation to contrary ones. Perhaps by the time the conveners return to their native haunts the process will have been completed, and we shall know more about it. In the meantime we rejoice, in common with other Canadians, that their opportunities for gaining information and pleasure have been so immense.

THE PROPOSED ERIE DAM.

The members of the International Waterways Commission convened for the Montreal session in the council chamber of the Board of Trade on Tuesday, the 11th inst. Mr. James P. Mabee, K.C., chairman of the Canadian section, presided, and when the meeting was called to order the council chamber was filled with the several bodies interested in the effect upon local waterways of the construction of a dam at the outlet of Lake Erie for the purpose of raising the level of that body of water. The several delegates who addressed the commission were unanimous in expressing a fear that the construction of such a work as was proposed would have the effect of interfering with the St. Lawrence route, upon which so many million dollars have been expended, by decreasing the volume of water at a season when we required it for navigation purposes, and increasing it at a time when we already had enough. Some of the delegates also endeavored to show that the United States would benefit at the expense of Canada by the proposed works. It was pointed out, however, by both the American and Canadian sections of the commission that no definite plan had been formulated, that it was simply an idea that something could be done at the outlet of Lake Erie which would be of mutual benefit to both countries, and assurance was given that nothing would be done to in any way injure the St. Lawrence route. Further, it was explained that no such work as that under consideration could be undertaken except by the mutual consent of both countries and a treaty between Great Britain and the United States.

Mr. W. I. Gear, president of the Montreal Board of Trade, addressing the commission, referred to the value of the exports that passed through that port, to the many millions spent on our waterways, and took up the question of how valuable the St. Lawrence route was to the Americans, both railways and individuals. He said the levels of the St. Lawrence could not be interfered with, even in a matter of inches, for it would entail the expenditure of millions to get those inches back again. The benefits which would accrue from the damming of Lake Erie would be almost wholly American. It would greatly decrease the amount necessary to give deep water in the Detroit river and other American ports on the lakes. In concluding his address Mr. Gear said: "I must protest on behalf of the Montreal Board of Trade and the city of Montreal against any works which will interfere, even to the fraction of an inch, with the flow of the St. Lawrence."

Col. Ernst, chairman of the American section of the commission, who was introduced to the delegates by the chairman, said it was with much surprise that he found, on hearing the addresses that morning, the idea was afloat that American engineers were favoring some plan of work in Lake Erie which would injure the St. Lawrence route. Nothing, he said, could be further from the truth. They had no plan, but they had an idea, and that was that something could be done at the outlet of Lake Erie which would be of mutual benefit to both the United States and Canada. The idea was not a new one; it was an old one. It would not have lived one day if it had carried with it the notion that it would injure the River St. Lawrence, which belonged not only to Canada, but to the United States, to the world, to mankind. Some years ago a board of engineers made a report, which had been enlarged upon at this meeting, but it had never been adopted by the American Government, nor had it the endorsement of any great body of United States engineers. "I voice the opinion of my colleagues, American as well as Canadian," concluded Col. Ernst, "that to do anything in Lake Erie to injure the River St. Lawrence would be a crime against mankind, to which I would never make myself an accessory."

The chairman thanked the different bodies for the interesting information they had presented to the commission, and assured them it would receive very earnest consideration from the commissioners.

FINANCIAL ITEMS.

The Toronto Stock Exchange has elected officers as follows for the current year: President, R. H. Temple; vice-president, A. P. Burritt; secretary, Norman Macrae; treasurer, W. H. Brouse.

The Eastern Townships Bank has opened a branch at Vancouver, B.C., under the management of Mr. W. H. Hargrave, formerly assistant manager of the Montreal office.

The last sale of a seat on the Montreal Stock Exchange, which was bought last week by Mr. George Smithers, fetched $20,000, or a decline of $3,500 from the one previous; or of $7,500 from the price paid early in 1903. In Wall Street a similar decline has prevailed.

The Sovereign Bank of Canada has issued its third annual report in the form of a brochure. We have before referred to the excellence of this bank's showing during the past year, and will content ourselves in this place by remarking that for typography, general excellence of make-up, etc., this pamphlet is one of the most creditable we have seen for a long day.

For the month ending June 30th the succession duties in Ontario totalled $52,848.61, and for the half-year also ending to-day the total is $322,803.66. For the first six months of 1904 the amount was $231,127.94, so that compared with the corresponding period of last year the increase for the first six months of 1905 is $91,675.72. The revenue for 1905 does not include the amount receivable from the Gooderham estate.

During the month of May deposits in the Post-office Savings Bank amounted to $863,945, besides what was transferred from the Dominion Government Savings Bank at Chatham, N.B., viz., $246,651 in principal and $6,122 in interest. During the same month the withdrawals were $1,084,075. Balance to the credit of depositors on May 31st was $44,201,352, or $13,657 below the amount on deposit last year at the same time.

Subscriptions for the new Japanese 4½ per cent. loan are now being received, the Bank of Montreal being the medium in Canada. The list will close on the 17th inst. Payment for bonds allotted is to be made as follows:—$25 on application, $25 on August 3rd, and $393.97 on October 16th per £100 bond. Payment in full may be made August 3rd, at 3 per cent. discount.

The Government report on unpaid dividends, unclaimed balances, and unpaid drafts and bills of exchange in Canadian chartered banks for five years prior to December 31st, 1904, shows that the unpaid dividends for 1904 amounted to $3,816 + £46 4s. 0d., the unclaimed balances to $509,407 + £26 4s. 9d., unpaid drafts or bills of exchange to $22,397 + £747 5s. 9d. + 110 frs. In 1903, unpaid dividends were $3,794 + £48 4s. 0d.; unclaimed balances, $496,018 + £35 6s. 3d.; and unpaid drafts and bills, $21,254 + £719 16s. 9d.

At a council meeting of the Toronto Board of Trade on Tuesday last an important matter to the business community came up for discussion in the shape of a resolution on worn money. It read as follows: "Whereas the attention of this council having been called to the fact that no law exists to-day whereby worn silver can be redeemed; and whereas the business community and public at large are experiencing loss and annoyance under present conditions; therefore be it resolved that the Dominion Government be petitioned to provide for the redemption of worn silver, and that the co-operation of the various boards of trade throughout Canada be asked in this important matter." The motion carried.

A bill is before the Senate to amend the Companies Act by rendering stock warrants negotiable. At present when a new company is started, the purchase money is deposited in a bank which gives a receipt. This, however, is not negotiable. The party might want to borrow money between the time of the purchase of the stock and the issue of the certificate from headquarters, but would have no security to offer. The stock warrant proposed, or interim receipt, would be prepared by the company, and issued at once by the bank, so that it would be immediately available as security. The warrant would be merely a temporary affair, to be surrendered when the stock was issued. The opinion is expressed by some that such a step would open the door to speculators manipulating the warrants in such a manner as to injure the interests of the original shareholders.

It may interest our banking readers to know that, since the passage of the gold standard and refunding act of March 14, 1900, which made the organization of National banks easier and more profitable on smaller capital, 2,550 of those institutions have been established in the United States. This is nearly one-half of the entire present number. That act permitted for the first time the organization of National banking associations with capital below $50,000, and as low as $25,000, in places of not more than 3,000 inhabitants. Of the newly organized banks in these five years 1,653 are of this class. The New York Journal of Commerce, commenting on this fact and on the smallness of the capital possessed by some of them, says that the United States banking system is subject to two prime weaknesses, inadequate capital for the business undertaken and insufficient reserves held against deposit liabilities.

Every now and then the proposition comes up to make the payment of bank dividends quarterly instead of half-yearly. It is pointed out that many of the chief railway, traction and industrial properties have in the past few years decided to make quarterly payments, and the change has been greatly appreciated by investors. Stockbrokers in particular claim that such a change would work very considerable benefit. No doubt it would—from the broker's point of view. Also, from the investor's, because it is always better to have money coming in at the end of three months (or one month!) instead of having to wait six months. From the banker's point of view, however, we fail to see where the advantage comes in. The work of the clerical staff would be greatly increased, but except in very small degree, where the change might be appreciated by a section of the stockholders, it would be without adequate return in benefit.

Fuller accounts are now to hand regarding the Hudson's Bay Company operations for the year ending May 31st last. The trading profits amounted to £102,969 in 1905 and £98,934 in 1904, or an increase of £4,035, while the land profits were £187,364 in 1905, £179,047 in 1904, an increase of £8,317. The total profits, 1905, £290,233, and in 1904, £277,981, or an increase of £12,352. The dividends paid last year amounted to 56s. per share, or 29 per cent., as compared with 35s., or 17½ per cent., in the previous year, in which year £1 per share capital was returned to the shareholders. The average price for farm lands has been steadily increasing, as follows: 1899, $4.88; 1900, $4.98; 1901, $4.90; 1902, $5.08; 1903, $5.66; 1904, $6.15; 1905, $6.17. The company, under an arrangement made in 1902, reserved 1,500,000 acres of land, providing that the proceeds of sales of any land in excess of the reserve should be distributed as a dividend. The company holds nearly 2,500,000 acres in excess of the reserve referred to. It is believed by shareholders that, owing to the heavy immigration into the North-West now going on, the profits from land sold will show a largely increasing profit. It should be borne in mind, however, that the amount of sales should not be confused with receipts, as payments are generally spread over a term of years.

* * *

FIRE INSURANCE ITEMS.

The Phœnix Fire Insurance Company have appointed Messrs. Ridout & Strickland as their Toronto agents.

Mr. E. S. Clouston and Sir Alex. Lacoste have been elected president and vice-president respectively of the Manitoba Assurance Company.

Mr. Lansing Lewis, Canadian manager of the Caledonian Fire Insurance Company, Edinburgh, Scotland, has returned to Montreal after a visit to the home office.

Mr. E. S. Clouston has been elected chairman of the Canadian board of directors of the Liverpool and London and Globe Insurance Company in place of the late Mr. W. J. Buchanan.

The resignation is announced of Mr. P. M. Wickham as Canadian manager of the Alliance Assurance Company, which some time ago absorbed the Imperial. He will be succeeded by Mr. T. D. Belfield, of New York, who was formerly American agent for the Imperial, and is known as an energetic business man. Mr. Wickham had had long experience in the insurance business, and has the good wishes of all who know him. It is understood that Hon. Mr. Thibaudeau, one of the directors of the Alliance, also retires.

The report of the Montreal fire alarm department for the first six months of the present year shows an increase of six fires, as compared with the corresponding period of 1904, an increase of eleven alarms, and a falling off in the number of malicious false alarms by nine. The loss of life was fortunately much less than last year, only six having died as a result of fires, while during the first six months of last year fifteen lives were lost. During the six months the brigade used 516 streams and 508 hand extinguishers. The steam fire engines were used sixty-four times, and the chemical engines only three times. The water tower worked at two fires, and buckets of water were sufficient to extinguish forty-nine small fires. During the first six months of the year there were 430 fires, 216 alarms, 90 false alarms and 11 automatic false alarms; total, 747.

The Royal Insurance Company announces an important change in its Toronto agency. Messrs. John Kay and A. F. Banks, who for the past thirty years have been general agents of the company, have been retired on a liberal pension, and Messrs. Maguire & Connon and Parkes & McVittie have been appointed general agents of the company in Toronto and vicinity. All these gentlemen are well and favorably known in insurance and business circles. Mr. Maguire has been associated with the company for many years as special agent, and Mr. Connon has been city agent of the Ottawa Fire Insurance Company for a number of years. For some time past Mr. Parkes has been associated with the Royal Insurance Company as general agent, and Mr. McVittie for fourteen years has been connected with the British America and the Manitoba Assurance Companies.

The Firemen's Record draws attention to the unsatisfactory nature of specific policies on pianos. The sentimental value added by the young lady owner to the actual cost of the instrument should not be considered by the agent in fixing the amount to be written on a piano; but there are so many instances of a piano purchased on the instalment plan for $450 and interest, to be paid up in three years, being covered for the total instalment cost and interest, that were it not for the good moral hazard of the honest owner, half of the pianos on books, written specifically, would, it declares, melt into loss claims. Where a piano is covered in with the other contents of the dwelling the adjuster can apply cash value or cash repairs, there being no specific sum for the claimant to keep her eye on. Where a specific sum is written on a piano, the amount should not exceed 70 per cent. of the cash value, not instalment cost, for the reason that in renewing, year after year, a reduction of the amount would not be kindly agreed to by the insured, and it is always better to start right.

* * *

TRADE NOTES.

The Hamilton Dry Goods Company have acquired another site adjoining their present premises in Montreal, and will remodel their buildings and render them 50 per cent. larger.

The Western Canada Cement and Coal Company, Limited, Ottawa, capital $1,250,000, headed by A. F. MacLaren, of Ottawa, will manufacture and deal in cement and products thereof, artificial stone, etc.; also generate electricity for the company's purposes.

Several office men in Toronto have been granted a charter, under the name of the Vancouver-Fiji Sugar Co., empowering them to take over and extend the business of the Fiji Sugar Company in the Fiji Islands and elsewhere, and to carry on the business of sugar planters, refiners, lumbermen, etc. The capital authorized is $1,000,000, and among the names mentioned is that of J. S. Lovell, accountant.

As we go to press we hear of a decline of 10 cents per hundred in all grades of granulated sugar in New York.

Mr. P. B. Ball, Canadian commercial agent at Birmingham, points at the excellent opportunities which would seem to exist this year in England for the marketing of Canadian plums. The crop in England, usually heavy, promises this year to be a very light one, owing to the severe frosts. The chief difficulty is the transportation, but this probably could be overcome by converting it in this country into jam, of which the British people are great consumers.

Toronto, Montreal, London and Hamilton capitalists are applying for a Dominion charter for the Canada Produce Company, Limited, capitalized at $250,000. It is expected that this company will establish the largest creamery concern in Canada. It will operate a creamery near Montreal having a daily capacity of 20,000 pounds of butter. It will export butter largely to Great Britain, and will ship also eggs and poultry. The company will introduce the system of collecting cream at a centralized creamery, and cream will be expressed by farmers within a radius of 100 miles. The head office will be in Montreal. Most of the capital stock, we understand, has been subscribed, and the company will probably commence operations soon after receiving a charter.

AN INSURANCE PROBLEM.

The following problem has been suggested to us as a study for the students of the Insurance Institute, Toronto:

"A" and "B" are separately insured, each "on his undivided one-third interest in a three-story frame building, occupied as hotel, situate," etc. "C," the owner of the other one-third interest, is not insured. "A's" policy is for $500. "B's" policy is for $1,000. The damage is $1,860. What are the liabilities of the insuring company? To "A" $500, to "B" $620, to "C" nil, leaving an unsatisfied loss of $740, with a salvage to the insuring company of $380? Has statutory condition "9" any bearing on the case? Is there anything in Steel v. Phœnix Ins. Co., Bd. Rep. 715, 22 Insurance Law Journal 7, 2 C. C. A. 463, to throw any light upon the subject?

Enquirer.

ANSWERS TO ENQUIRERS.

Editor Monetary Times:

Sir,—I see in your issue of June 30th the question is asked, "What limit is there, if any, to the borrowing powers of trust companies?" but you do not answer the question. It seems strange that companies of this kind are to be allowed to borrow money by way of deposit receipts to an unlimited extent, while loan corporations are restricted. An answer to the question in your next issue would interest many of your subscribers.

One of Your Subscribers.

[We attempted to give a brief summary of the law affecting trust company investments in the issue referred to. The enquiry, however, is a difficult one to answer satisfactorily, for the reason that some assert that the powers of trust companies in the direction referred to *are* limited, while others take a contrary view. The law on the subject is contained in Chap. 206, R.S.O. 97, Vol. 2. 2142.—Ed. M. T.]

—Mr. John Lorne Macdougall, Dominion Auditor-General, has resigned his office, to take effect on the 1st prox., and claims also superannuation from that date.

* * *

—The editor begs to acknowledge with thanks the receiving of an invitation to be present on August 2nd and 3rd next at the fiftieth anniversary of the opening of Saint Mary's Falls Canal, to be held at Sault Ste. Marie, Mich. With the card of invitation also comes a handsome book of characteristic views of the Soo.

THE
NORTHERN BANK.

HEAD OFFICE: WINNIPEG.

Provisional Offices: Merchants Bank Building, Winnipeg.

Now opened to complete organization.

The following have consented to act as Directors upon election:

JAMES H. ASHDOWN, President, J. H. Ashdown Hardware Co., Chairman of Provisional Directors.

D. C. CAMERON, President Rat Portage Lumber Co.

G. R. CROWE, President Northern Elevator Co.

H. M. HOWELL, K.C., Messrs. Howell, Mathers, Howell & Hunt.

SIR DANIEL McMILLAN, Lieutenant-Governor Province of Manitoba.

CAPT. WM. ROBINSON, Steamboat Owner, President Dominion Fish Co.

HON. R. P. ROBLIN, Premier Province of Manitoba.

FRED. W. STOBART, Messrs. Stobart, Sons & Co.

E. C. WARNER, President Midland Linseed Oil Co., Minneapolis.

A. STAMFORD WHITE, Messrs. A. S. White & Co., Chicago, and Liverpool, Eng.

Note—The list of Directors is subject to the vote of the Shareholders at their first meeting, who may then increase or decrease the number.

General Manager:

J. W. de C. O'GRADY, Late Manager Bank of Montreal, Chicago, Ill.

Solicitors:

Messrs. Howell, Mathers, Howell & Hunt.

AUTHORIZED CAPITAL, $2,000,000.

In 20,000 Shares of $100 Each.

Of which it has been decided to issue at present, 10,000 shares at $110 per share, being one-half of the authorized capital.

TERMS—$5 per share of the par value on application, $15 per share on allotment, $30 per share on the first day of the month immediately succeeding the date of allotment, $10 per share every three months thereafter, on the first day of the month, until the whole amount, including the premium is paid.

Interest at the rate of 4 per cent. per annum up to the date fixed for payment will be allowed on payments made in advance.

Forms of application for stock, prospectuses, or any further information may be obtained from

S. S. CUMMINS,
Secretary for Organization.
At the Provisional Office, Merchants Bank Building,
MAIN STREET, WINNIPEG.

Owing to the death of the late Dr. James Thorburn, vice-president and medical director of the North American Life Assurance Company, the directors elected Sir William R. Meredith, K.C., as first vice-president, Mr. E. Gurney as second vice-president, and Mr. James Kerr Osborne as chairman of the Executive Committee. Mr. Michael J. Haney has been elected a director, as also Mr. John N. Lake and Dr. James D. Thorburn. The last-named has been appointed medical director to succeed his father.

* * *

—More than usual interest attaches to the notice concerning the organization of the Northern Bank, insomuch as it will be the only Canadian bank having its head office west of the Great Lakes. Among the gentlemen who have consented to act as directors we note the names of Sir Daniel McMillan, Lieutenant-Governor of Manitoba; Hon. R. P. Roblin, Jas. H. Ashdown, D. C. Cameron, G. R. Crowe, H. M. Howell, K.C., Capt. W. Robinson, F. W. Stobart, E. C. Warner and A. Stamford White. The general manager will be Mr. J. W. de C. O'Grady, late manager Bank of Montreal, Chicago. The authorized capital is $2,000,000, in 20,000 shares of $100 each, of which one-half will be issued at once.

* * *

—A misconception seems to prevail in certain quarters as to the meaning of the new commercial tax recently enacted by the Quebec Legislature. It may be as well to state the clause again:—"If a person not residing in the province acts as a commercial traveller by soliciting or taking orders for or selling goods, wares, or merchandise other than intoxicating liquors, or by advertising or offering such goods for sale by sample, catalogue, or price list for a person, firm or corporation having no place of business in Canada," such person must pay a tax of $300 per year. Even now, however, the clause is by no means clear. It would seem to apply to the person, and at once raises the question, Would a foreign firm be obliged to pay the tax providing they appointed a traveller resident in Quebec to act as their agent in that province? It was thought in some quarters that the Act might be so twisted as to be made to apply to travellers representing Ontario firms handling imported goods almost exclusively. Some clearer explanation of the new regulation is evidently needed.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, July 13th, 1905, as compared with those of the previous week:

	July 13.	July 6.
Montreal	$26,672,428	$27,831,677
Toronto	21,407,873	21,071,225
Winnipeg	7,245,874	7,802,733
Halifax	1,913,787	2,241,909
Hamilton	1,347,326	1,340,078
St. John	1,160,571	992,148
Vancouver	1,710,319	1,852,700
Victoria	694,491	808,577
Quebec	1,709,041	2,156,855
Ottawa	2,526,633	2,254,067
London	1,088,929	1,002,097
Total	$67,477,272	$69,354,066

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

The Western and Manitoba Retail Hardware and Store Dealers' Association will hold a convention in Winnipeg on July 26th and 27th during the Exhibition.

The Kaministiquia Power Company has now been granted a Dominion charter. Its capital amounts to $2,000,000, and among those prominently interested are: H. S. Holt, C. R. Hosmer, of Montreal. It will develop electric power on a large scale.

H. J. King, F. Harcourt, and others, of Toronto, have organized a company, with a capital of $195,000, to manufacture and deal in all kinds of stationery.

A. L. Wright & Co.s lumber mills, at Little River, near Salisbury, N.B., have been burned down at a loss of $20,000, with insurance of about one-half.

—The United States Bureau of Navigation reports that 141 sail and steam vessels, of 37,191 gross tons, were built and officially numbered in the United States during the month of June. It also states that 1,054 sail and steam vessels of 263,064 gross tons were built in the United States and officially numbered during the year ended June 30th, as compared with 1,092 sail and steam vessels of 349,573 gross tons during the preceding year. This shows a falling off in construction this year of thirty-eight vessels, and a gross tonnage of 86,509 as compared with 1904. During the year ended June 30th, 247 unrigged vessels of 63,149 gross tons were constructed in the United States, as compared with 216 unrigged vessels of 51,844 gross tons during the preceding year.

THE GROWING WEST.

By Allen West.

(Continued.)

The West Is Like a Family to Mr. Whyte.

"To me the West is like a family.

"Eighteen years building railroads out there and seeing the settler's hut grow to a house, the house to a hamlet, the hamlet to a town, and some of the towns grow to cities, each time I go over the road, noting the progress of each place, is like a father watching the growth of his child from infancy to youth and to full energy."

"What has the C.P.R. done for settlers?"

"We have done a great deal more than give them cheap rates. But cheap rates have done their part. When I first went West I found that settlers would like to come East once in a while, and so we established the system of lowering the rate toward the Christmas holidays to less than one fare for the round trip. We have benefited greatly, both directly and indirectly. These people take advantage of the opportunity to visit their homes, and to give glowing accounts of Western Canada."

When the Settler Comes to Winnipeg.

"What does the Canadian Pacific do for a farmer?"

"Well, a farmer comes to Winnipeg looking for land. He hears, perhaps, that the Canadian Pacific has large interests in land. He enquires for the Land Office. He is directed there. He enters the office, and says he wants to take up new land."

"'Any particular locality?'

"'Yes, at such and such a point,' he replies.

"He is shown samples of wheat, oats, vegetables and grasses. He is shown field notes of various localities. Every possible information is furnished to enable him to purchase intelligently."

"You enable the farmer to study Western Canada, but do you study the farmer?"

"Of course."

"How?"

"By asking him what kind of farm he had and why he left it. If the answer seems to lead one to think that he did the best he could under the circumstances, some consideration, some special encouragement is given, not in the price of the land, but in helping him."

No Lazy Men Need Apply.

"If not so?"

"If we find a man is lazy, that he got into debt and made a failure where other people made a success, though he may take up land he will require watching to see he makes his payments. Of course, every man doesn't run in luck. He may have as fine a looking field of wheat as one would care to see, and to-morrow a hailstorm destroys it. Then he would probably be unable to meet his next payment. We could, of course, cancel his contract, and he would be the loser, forfeiting the money paid.

"But we would not do that.

"We are not a land company, but a transportation company. So we do what we can to help the man along. We don't press him for his next instalment.

The C.P.R. is a Shrewd Philanthropist.

"We have also, when wheat has been low, bought farmers' wheat, paying more for it than he could get from any wheat or milling concern, storing the wheat in our elevators at Fort William, hoping for an advance in the spring. Sometimes the advance comes and sometimes it doesn't.

"That is the terrible part of it.

"There are for the farmer elements of uncertainty which cannot be wholly eliminated, and, realizing this, we stand ready to do everything we can for the farmer who deserves to succeed.

"For instance, we experiment in all different kinds of wheat—Red Fyfe wheat we found to be best. There are two kinds, red and white, but the red is highest in the gluten, which all bakers want.

Sir William Van Horne as a Farmer.

"In the early days of Manitoba, when little land was cultivated, frost was a menace, and we used to seek wheat that would mature early and escape the frosts of late summer and early autumn.

"Sir William Van Horne and myself used to drive out among the farms, getting farmers to take and hold for seed stronger and heavier wheat that had matured early. It was the habit of farmers to sell their best wheat and save the poorest for seed. Of course, it is poor policy for a farmer to plant seed that will be slow to germinate and productive of an unprofitable crop. So we have given considerable attention to educating the farmer to a knowledge of seed, and have been aided materially by Dr. Saunders, manager of the Agricultural Experiment Farm at Indian Head.

C.P.R. Seed Bulletins and Free Seed Hauling.

"The C.P.R. issues bulletins to farmers, suggesting they seek earlier heads to pluck and maintain for seed; and also, the road hauls seed wheat for the farmer free of charge.

"We encourage thrift among farmers. Thrift is indicated by the appearance of the buildings.

"When I see a farmhouse and the outer buildings nicely painted I know that I will find that farmer's implements and machinery well taken care of. Money invested in paint and in keeping up the property is just as good as money in the bank.

"When I see a farmer neglecting to paint his house I feel sure he is neglecting other things.

Rusty Machinery, Mortgages and Overworked Farms.

"The farmer that lets his machinery and farm implements rust from neglect is the kind who lets a mortgage settle on the place, while the thrifty farmer has money in the bank earning interest.

"The farmer who works his land to death is as bad as the farmer who works his horse or his wife to death.

"Every farm should lie fallow one year in three, or a third of it should be idle one year in three. That is necessary to keep it in good health. It must have one summer to recuperate its energies after two summers of work. A farm is no different from a man in needing rest.

"The land takes its energy from the sun, and the sun must be given a chance to pour its vitality into the soil and fill it up with energy just as water must be poured back into a reservoir when it has been pumped out. There is no success in a played-out farm or a played-out man.

The Superficial Farmer is Not a Success.

"Another kind of farmer who does not succeed is he who farms superficially.

"Success does not lie on the surface, where it is easy to get at. A farmer has to dig down into the ground to find any success that is worth having. He must put brains and toil into the soil as well as seed in order to take anything out of the soil that is worth while.

"The farmer is a failure who just turns the sod over and tries to get a crop without deep plowing. He has done the worst possible for his land. The turned-over sod keeps the sun and the rain from penetrating the ground. Heat will penetrate a porous soil, but not a solid soil. The more land is cultivated, the more heat and moisture it will take in, and heat and moisture make profitable production.

The Bigoted Britisher and the Watering Carts.

"Another farmer who finds it hard to succeed is the man who comes from the Old Country set in certain ideas as to farming—ideas which were good hundreds of years ago, but are now out of date or not adapted to Western Canada.

"Some of these men are so bigoted they will not

intelligently apply themselves or their resources to the solution of their problem, whether raising grain or cattle; and I have seen men go to Western Canada with large capital who failed because they would not adopt new methods adapted to that country.

"One man, who persisted in establishing a modern wheat farm in a ranching region we told would make a failure of his venture, but he stuck to his own ideas.

"A drought came in the middle of the summer, and he sent down to Winnipeg for a supply of watering carts, and tried in that way to save his crop.

"If you have ever figured how much the water would weigh that would be necessary to cover 100 acres an inch deep, you will know why it was that all the watering carts in Winnipeg couldn't save that man's wheat. I believe those watering carts are still rusting on that man's place, and I doubt whether anything less than that experience would have convinced him of his ignorance.

"We want people to know all about Western Canada in order to select the best section for locating, and then to learn all about that section in order to succeed, for the success of the C.P.R. in developing the West is dependent upon the success of the settler."

What the C.P.R. Does to Secure Success in Cattle Raising.

"In order to make success for the cattle men we not only transport sires, whether bulls, boars or rams, but we have said to the farmer: 'If you take care of this sire, and supply service to a certain number of your neighbors free of charge, we will make you a present of him.'

"We do that to improve the quality of the stock so the farmer can get more money for the stock produced. In fact, an animal of low breeding, whether cattle, pig or sheep, will eat more food and show poorer results than well-bred cattle will. So it is more economical to raise well-bred stock, and it will bring a higher price.

"This plan produces no more cattle for us to ship, but it gives the farmer more money to live better, dress better, and to buy things which we can transport. The underlying object first, last and all the time with us is to make the settler a success, because there are few men who haven't friends, and if they are successful, their friends are influenced thereby.

Cheap Fuel for Settlers Everywhere.

"In order to make the farmer successful one thing is absolutely indispensable, and that is cheap fuel. The Canadian North-West is not in the banana belt. The Canadian Pacific has a determined policy of furnishing fuel to settlers at the lowest possible price. It charges just a fraction above the cost of the service of carrying fuel.

"It has developed coal mines extensively for the benefit of the settler.

"The coal of Lethbridge, 750 miles west of Winnipeg, is a high-grade lignite, a free-burning coal, but not in self-feeders. Regina, Brandon, Portage la Prairie and all the places along that section use Lethbridge coal, while west of Medicine Hat is a district which now has gas in sufficient quantity for all fuel purposes."

"How cheap is this coal?"

"The average is $6 to $7 per ton. It is expensive to mine, but we haul it cheap.

(To be continued.)

⁂

JAPAN'S STANDING AND COMMERCE.

The position among the nations occupied at the present time by Japan is of special interest to all the world, and not the less to Canadians who, in the future, should find large markets in that country for many of her products. A recent report, therefore, by Mr. A. H. McLean, Canada's Commercial Agent in Japan, is full of facts our readers would probably like to know.

In 1895, the Japanese national debt stood at $210,000,000, with $7,500,000 paid on principal and interest; in 1900 it was $255,000,000, with $15,500,000 paid; and in 1904 it was $540,000,000, besides the $150,000,000 which was raised abroad, and the $50,000,000 domestic loan.

On the other hand, during the last twelve years, Japan's foreign trade has increased in value by 230 per cent., bank deposits by 360 per cent., savings by 200 per cent., the sum of money invested in official and private enterprises by 220 per cent., the horse-power used in factories by 50 per cent., the railway mileage in operation by a little less than 80 per cent., and navigating craft by 240 per cent. in number, while marine and mining industries also added conspicuously to Japan's output. There is, therefore, found to be an increase of domestic investments that, upon a per head distribution, would go to make a substantial set-off to this increase per head of the public debt. While admitting the significance of these statistics, it is well to point out that Japan's wealth has not kept pace with the increase of her national debt, and that many people in Japan believe it to be the duty of the Government to pursue a policy of strenuous economy while the war continues.

According to the official returns, a number of Japanese steamers, aggregating 71,000 tons, were taken off the list during the last year, for war purposes, while an addition of 204,000 tons was made, including 27,000 tons built in Japan and 177,000 tons purchased from abroad, making a net increase of 133,000 tons. At the end of last year the tonnage of Japanese steamships aggregated 791,057, showing an increase of 132,788 as compared with the previous year. Since the beginning of the year a number of steamers have been purchased, and many more will be purchased before the war is ended. Naturally the question is being asked in shipping circles how this greatly increased number of ships will find remunerative employment after the restoration of peace? There is a great field, however, for shipping enterprise in north and south China, Hong Kong, French China, the Philippines and Java, while the trans-Pacific trade with South America is very promising.

Before the Japan-China war the growth of the shipping trade of Japan had been very slow, despite encouragement given by Government. At the end of 1893 the aggregate tonnage of the Japanese mercantile marine was only 200,000. At the outbreak of the war in 1894 a large number of steamers were requisitioned as transports, resulting in the complete disorganization of the coasting trade. In consequence the Government and private companies purchased or chartered many foreign vessels to meet the requirements brought about by the war. The result was that the total tonnage of steamers at the end of 1895 had increased to 331,000 from 167,000 in the previous year. This sudden acquisition of a large number of merchant ships by Japan caused a panic, and much difficulty among ship-owners for a time on the restoration of peace. It, however, gave a great impetus in developing the carrying trade abroad. This perhaps may be what will happen again.

⁂

THE NORTH-WEST CONGRESS.

The convention of the Associated Boards of Trade of the North-West, at Regina, was carried through in a manner that speaks well for the future of the two great Provinces which bid fair to become possibly the most important section of the Dominion. It was conducted in a manner befitting business men who had business of a serious nature before them,

and yet who, notwithstanding the fact that things of practical and immediate import had to be threshed out, yet had sufficient imagination in their make-up to see that the present bears but little proportion to the future, and that therefore broad-gauge ideas were a necessity. As a rule, politics were kept out of the discussion, though the influence of the great event which takes place this month in the history of the North-West, naturally could not altogether conceal itself. Quite naturally, too, the feeling of resentment against the past comparative indifference of the East, could not altogether be obliterated. On the whole, the feeling of the meeting was altogether in favor of the Associated Boards continuing to represent the North-West in its present united form, though the proposal came up to divide the body into two, owing to the establishment of two administrations. Finally it was recognized, however, that for many years to come the interests of the two provinces would be practically identical, so that it would be best to continue the organization as it exists now.

Government ownership of telephones was one principle which the delegates present cordially endorsed. In the great distances and earnest, strenuous life of the West, telephones are peculiarly necessary to the well-being of the community. A suggestion which was received with much favor was that the Dominion Government should control the trunk lines, leaving to the respective municipalities the control of their own, and connecting the two if necessary.

An important resolution on the question of insolvency was put forward by Mr. A. L. Johnston, president of the Winnipeg Board of Trade. It called for the appointment of a committee to prepare legislation embodying the good points of Ontario and Manitoba statutes on the subject, for submission to the new governments, and it was carried unanimously. Another resolution by the same gentleman, however, was turned down. He moved that the Government be asked to enact that merchants who had made up their minds to sell out of their respective businesses should be compelled to give thirty days' notice to their creditors. The object of the motive was to secure the wholesale trade from attempts by dishonest traders to "skip out" and defraud them. It was recognized by the convention, however, that such legislation would bear most unfairly on the honest retailers. They would be under control of the wholesale houses, and would have no redress against such of their own customers as were dishonest. The motion had little support.

Probably the most important of the social functions in connection with the convention was the banquet tendered to the visiting delegates by the Regina Board of Trade, the chair being occupied by Mr. H. F. Mytton, the president. Mr. F. W. Peters, of the C.P.R., made the interesting statement that the railway company expected to move out no less than 28,000,000 bushels of wheat to Fort William between harvest and the close of navigation. They anticipated having 4,000 extra cars and 68 extra locomotives to meet the rush. A bright speech was made by the Hon. F. W. G. Haultain, Premier of the North-West Territories, who trusted that the new governments would deal with the questions of the future with the same lack of partisan feeling and the same zeal for the best interests of the whole country that had distinguished the old Assembly. The spirit of Mr. Haultain's remarks indeed may be said to have characterized the entire proceedings of this important congress that has now come and gone, and to be able to say this means much for the future of Canada.

* * *

FORESTRY MATTERS IN ONTARIO.

An important part of the 1903 report of the Ontario Director of Forestry, the issue of which was delayed through the great fire in Toronto, is where Mr. Thomas Southworth recommends the establishment of municipal forest reserves in the Province. His words on this point are as follows:

"As a preliminary and experimental measure looking toward the creation of small municipal reserves in settled districts possessing considerable areas of non-agricultural or inferior land, I would suggest that the Assessment Act be amended so as to allow townships to hold, in perpetuity, lots purchased at tax sales. If it were considered advisable, the power to hold such lands for a longer period than seven years might be restricted to such areas as the municipal council might by by-law set apart as forest reserves, subject to such regulations regarding their management as might from time to time be enacted by the Provincial Administration. The small value attaching to such waste and partially denuded areas as the abandoned clearings which are sold for taxes, enables the community to reclaim at trifling expense a large portion of the territory which should never have been allowed to pass into the hands of private owners, and the communities more especially interested ought to be permitted to take advantage of the opportunity thus presented to restore to useful production by reforestation such lands as have proven unfit for agricultural development."

It may be remarked that even now, New Ontario is more or less rapidly being denuded of trees. Without a doubt the Province should retain control, if not the ownership, of the areas thrown open for settlement to ensure the preservation of an adequate proportion of wooded land so as to maintain favorable conditions of climate and water supply for the development of the districts in question. The ideal system to secure the maximum of productiveness, both as regards agriculture and the industries dependent upon wood as a raw material, would be the maintenance of a number of small local timber reserves interspersed throughout the cultivated districts under some form of efficient public control. While it might not, for various reasons, be possible to at once establish such a system on as comprehensive and scientific a basis as could be desired, a beginning should at least be made by the setting aside before the country is opened up for settlement such small tracts of land as are obviously better adapted for the growth of timber than for tillage. And this, as we understand it, is what Mr. Southworth proposes to do.

THE COLD STORAGE PROBLEM.

The dairy branch of the Dominion Department of Agriculture is going to investigate the cold storage question in a thorough and practical way. Anticipating the adoption of cold storage warehouses at local centres to preserve from loss the large crops of apples that frequently are not marketable at the time they are picked, the dairy branch will conduct a series of tests this summer as to the suitability of different forms of construction of cold storage buildings.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

Nine small buildings are being built in Montreal, in different styles of non-conducting walls and roofs. In these buildings, as soon as they are completed, will be placed a certain weight of ice, and the non-conducting powers of the buildings will be tested by the weight of ice melted and the degree to which the buildings are cooled. Hardly any more important matter, from a farmer's and fruit-grower's point of view could be looked into with a view to the taking of practical measures, than this one of cold storage. We would remind those interested, however, that cold storage for their products at home is of little value without some really reliable method of cold storage in transit. This part of the question cannot yet be said to be effectively settled.

* * *

LIFE INSURANCE ITEMS.

Mr. J. G. Rainnie has been appointed Halifax agent for the Provident Savings Life Assurance Company.

Mr. Frank H. Russell, manager of the Railway Passengers' Assurance Company, Toronto, is on a business visit to British Columbia and Manitoba.

Howell—Don't you wish you could live your life over again? Powell—Well, I should say not! I've got a 20-year endowment policy maturing next month.—Judge.

Mr. R. I. Griffin, manager of the Employers' Liability Assurance Corporation, has just returned east from a trip to Manitoba and British Columbia, where his company is finding an increasing field.

Mr. Wm. H. Leacock has been appointed inspector of agencies in the life department of the Royal for the Province of Ontario. He has been connected for some time with the New York Life, but is well known in Canada.

The Orange Mutual Benefit Association of British America has decided, after January 1st next, to adopt what is known as the "Hunter Rate," which was prepared by Dr. Howard Hunter, Inspector of Insurance for Ontario, as a basis on which the permanency of assessment companies might rest assured.

The Imperial German supervisory office for private insurance companies has demanded of the Equitable Company, of New York, that they declare by August 1st in what manner they propose separating their premium reserves on German policies from the general reserves, and how they intend to invest them. The amounts affected are $7,500,000 in the case of the Equitable Life and $5,250,000 in the case of the Mutual.

An agent says that many of the evils which latterly have been showing their heads in the life insurance business are mainly traceable to the refusal or neglect of the policy-holder to examine the contract offered him, and study its character and adaptability to his own requirements. Instead of this he accepts the agent's statements and hence come all the deceptive practices of the latter. The applicant should study his contract for himself, should trust no one else to do it for him.

Accident insurance companies are beginning to realize the extent of the annoyance and the loss liable to come to them through the miscreants who follow "the profession of getting hurt," and then claim substantial damages from the companies, either for sham injuries or for injuries not worthy of notice. Of these people there seems to be in the United States, and, we suppose, elsewhere, a more or less well-organized combination. Insurance men now propose to form an organization for hunting these criminals down at all costs in a way similar to that carried on by bankers. This is the only way to protect the rights of honest policyholders.

How often do we hear of the collapse of a plan on which someone had labored long and earnestly without success, while another, beginning where the first withdrew, carried forward the work to victory? The lesson of persistency is a peculiarly valuable one to the insurance solicitor. Cleverness and tact are prime qualifications, but stick-to-it-ive-ness is the supporting frame of the tower of success. A little more effort here, a word or two of the right kind spoken at the proper time, and apparent defeat becomes a glorious achievement. "No surrender" should be the motto of the insurance solicitor, and nothing less than a peremptory and decisive negative from a prospect should deter him from continuing his efforts to secure his application.

It is announced that the affairs of the Mutual Life Insurance Company, of New York, are to become the object of a searching investigation at the hands of Mr. Hendricks, New York, Superintendent of Insurance, on the same lines as were followed in the case of the Equitable. It is to be undertaken, it is said, at the special request of Mr. Richard A. McCurdy, the president of the company.

The Imperial Guarantee and Accident Insurance Company of Canada held their organization meeting in Toronto on Thursday of last week, and elected the following board of directors: Hon. F. T. Frost, Frederic Nicholls, Elias Rogers, J. J. Kenny, H. C. Cox, G. A. Morrow, R. Bickerdike, M.P., Hon. Geo. A. Cox, P. G. Goldsmith, M.D., and A. L. Davis. Mr. A. L. Davis was elected president and general manager, Hon. Geo. A. Cox vice-president, and Mr. E. Willans assistant general manager and secretary. The company will carry on all lines of personal accident, sickness and guarantee insurance, for which purpose $100,000 has been deposited with the Dominion Government. It commences business, it is understood, with a surplus of $50,000 over and above the paid-up capital.

A recently enacted Wisconsin law prohibits deferred dividends on life insurance policies for a longer period than five years on all policies issued on the lives of citizens of the State of Wisconsin from and after June 24, 1905, and life insurance companies transacting business therein must distribute, apportion or make an accounting of surplus annually, or once in two, three, four or five years. It is not contended that distribution, apportionment or accounting means paying over, but that each policyholder shall be credited with his equitable share of the surplus, and such apportioned surplus carried as a liability, which, in the event of a death, shall be paid to the beneficiary with the face of the policy, and in the event of lapse shall be given to the insured in cash or insurance. In other words, there must be essential distribution, for once an equity is acquired in surplus distributed or apportioned, there can be no confiscation or such acquired equity.

* * *

—It is stated in a letter from Newfoundland that the new taxation scheme of the Government to tax cable companies so much per live wire is likely to result in four or five transatlantic cables now landing on the island going direct to North Sydney. They believe that such a move would mean a large saving to the companies. The Newfoundland Government propose to lay a new cable from Port au Basque to Canso to connect with the recently acquired telegraph system. This will probably be operated by the Commercial Cable Co., connecting at Canso with the C.P.R. land wires.

* * *

—Among the transportation items in the list of supplementary estimates just brought before the House by the Ottawa Government we note the following: $352,379 to the Grand Trunk Pacific for survey, etc.; $1,000,000 for construction of the National Transcontinental; $1,000,000 for terminals and right of way; $70,000 (in addition) for Ottawa and Georgian Bay surveys; $25,000 for Deep Waterways Commission; $50,000 for steamship service between Canada and Mexico; $175,000 for another ice-breaking steamer on the lower St. Lawrence and Northumberland Straits; $65,000 for maintaining patrol vessels on Hudson's Bay; $28,000 for completing surveys on Trent Canal; $100,000 for improvements of east branch of Holland river to Newmarket; $40,000 for electric lighting and power plant on Welland Canal; $761,000 for old contract on pile work and dredging in Meaford harbor; $21,000 for dredging Midland harbor; $75,000 for a steamer for hydrographic survey work on the Atlantic coast and in the St. Lawrence.

WILLIAM F. BULLEN,
Manager.

London, Ontario, 1905.

This year only five small railways in the United States, aggregating 270 miles of track, have so far defaulted in interest obligations, and been placed in the hand of receivers. Last year at this period, there were somewhat more.

Mercantile Summary

Napanee, Ont., ratepayers have voted for a by-law to raise $35,000 for a municipal electric light plant.

The Corrugated Concrete Tile Company, of Canada, Limited, Montreal, capital $50,000, has been incorporated. It will carry on a general building and contracting business. V. E. Mitchell and Douglas Armour, of Montreal, are interested.

The Allan and Donaldson lines of steamships have, we hear, started a small rate war in steerage fares coming westward. On Friday last the latter reduced their rate to Canada to $17.50, and on the following day the Allans met the cut by reducing their price from $26.50 to the same level.

Last week the Ontario Power Co. had a section of its power-house running and turned power on a transmission line. The water was let into the great mile-long steel and concrete conduit from the head gates, ran down to the table rock, plunged down through the penstocks a hundred and fifty feet, set the ten-thousand horse-power turbines spinning and escaped into the river again. No hitch occurred and the operations are said to have been a complete success.

A somewhat startling policy is announced on behalf of the Canadian Pacific Railway in British Columbia, in connection with the million and a half acres of land which recently came into its possession, owing to the transfer to it of the E. & N. The company are beginning an active campaign for immigration, issuing illustrated pamphlets and placing the whole campaign in the hands of a Minneapolis advertising agency. The company, it is said, will clear the land by means of steam stumpers and logging engines, and expect to sell it for about $70 per acre.

Among enquiries recently received at the Canadian Government office in London, respecting trade with this country, are the following:—A London firm already holding the agency for a Canadian house is seeking additional agencies. Enquiry is made for names of Canadian manufacturers of leather-boards by a London firm. A London representative of foreign firms is desirous of getting into touch with Canadian houses willing to take sole buying agencies for such goods as toilet soaps, Dutch gin, etc. A produce firm in London is seeking the representation of Canadian exporters. A firm in the wholesale grocery trade interested in placing on the English market all kinds of food stuff, especially fruit and vegetables in tins and glass bottles, is looking out for the agencies of Canadian exporters. A Montreal firm in the dry goods trade are desirous of taking up agencies for ladies' mantles, ready-made suitings, waterproofs and trimmings such as laces and braids.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

Ottawa city council, at a special meeting on the 7th inst., decided to offer the Consumers Electric Company the sum of $200,000 for its plant, etc.

The Brunswick-Balke-Collender Company, Montreal, have just erected a new factory in Toronto for the manufacture of pool tables, bowling alleys, bar fixtures, etc.

It is said the Plymouth Cordage Co., Boston, has an option on a large site of land in Welland, Ont., and will build an immense factory there for supplying the Canadian market.

Mr. W. Hutchinson, Canadian Exhibition Commissioner at Liege, Belgium, reports that the Canadian exhibit is the most attractive and comprehensive at the whole exhibition. It is expected to cause a tide of emigration from that country to Canada.

At a meeting held at Newington, attended by the county councilors, the municipal representatives of Stormont County decided to recommend that $30,000 be levied by the county council to build permanent county roads. This sum will be supplemented by an Ontario Government grant of $10,000.

Final arrangements are being completed for the erection of a flour mill, etc., in St. Boniface, Man., by the Western Canada Flour Mills Company. The plant there will comprise a 4,000-barrel flour mill, a 500,000-bushel storage elevator, and 70,000-bushel storage warehouse. All machinery is to be of the latest design. Tenders are being called for the construction of the various parts. The company has made a guarantee to the town to expend at least $250,000.

In view of recent disastrous forest fires along the line of the Temiskaming and Northern Ontario Railway, the Government has decided to dispose of the timber for a quarter of a mile on each side of the track. The railway runs through about forty miles of timber lands. It takes the ground that it would be a great deal better to clear the line and sell the timber, which is principally pine, than have it burn down. As soon as possible tenders will be advertised for and keen competition among lumbermen is expected.

The following Canadian patents have recently been secured:—92,708, Joseph Charles Roy, Point St. Charles, spoke extractor; 93,892, Emile Guillaume, Paris, France, process and apparatus for distilling and rectifying alcoholic liquors; 93,916, Louis Cote, St. Hyacinthe, proportional divider; 95,965, Patrick J. O'Brien, Mobile, Nfld., non-refillable bottle; 93,976, Theophile Taillefer, Montreal, butter cutting and measuring device; 93,984, Louis N. Beauchemin, Montreal, nailless horseshoe; 94,023, James P. Ewing, Drayton, traction wheel; 94,057, Joseph S. N. Guindon, Montreal, fire-alarm apparatus.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

Through the breaking of a dam in Westport, Ont., the woolen mill and electric light plant there were put out of business.

The B. A. Pyrite mine near Queensborough, Ont., is said to be showing up very well just now. Development work, according to a recent report, is proceeding apace.

The Chicago Pneumatic Tool Company has, we understand, bought a plant in Montreal and will extend it and carry on business on a large scale in this country.

A dispatch from Titusville, Pa., states that the Queen City Tannery, the largest sole leather manufactory in the world, has been sold by Lucius Beebe & Sons, of Boston, to the United States Leather Co. The formal transfer was made in Philadelphia, and is said to involve about $1,500,000.

The Supreme Court of Kansas has decided that the proposal to establish a branch penitentiary, with a State Oil refinery in connection therewith, and in opposition to the Standard Oil, would be unconstitutional. The Standard Oil thus continues on its way unhurt, from the blow from which so much was expected.

Reports from surveying parties in New Ontario which have been received by the Department of Lands and Mines state that an excellent tract of land south of the great clay belt has been found. The land lies in the bend of Mattagami River, about 200 miles north of Sudbury, and is believed to be admirably adapted for agriculture.

The Canadian Pacific Railway Company announce that Mr. Archer Baker has been appointed their European manager with general supervision of the company's transportation business in Great Britain and on the continent. Mr. Robt. D. Morrison is appointed Deputy Secretary of the Company in London, and Mr. E. F. Tremayne, registrar, in London.

The ratepayers of Wingham, Ont., have voted in favor of raising $12,000 by debentures for the object of extending the waterworks system and improving it for fire protective purposes. They also voted to fix the assessment of the Canada Furniture Manufacturers at $20,000, for ten years, and this company, in return, will erect a large addition to their factory in the town.

The Western Counties Electric Company has been incorporated with a capital of half a million. Its object is to acquire and develop water-power, to generate and dispose of electric, pneumatic, and hydraulic energy, to carry electric wires across the Niagara River into the United States, there to connect with wires of another electric company. Among the incorporators are S. F. McKinnon, J. N. Shenstone, and C. Greville Harston.

Mercantile Summary.

The Robb Engineering Company, Amherst, N.S., are building a 150-horse-power boiler for the Good Shepherd Asylum, Quebec.

The Hœpfner Refining Company's old factory in Hamilton, Ont., has been destroyed by fire at an estimated loss of $12,000.

Alfred Gingras, dealer in souvenirs, etc., and A. Thibaudeau & Co., milliners, both of Montreal, have assigned during the week. The former owes about $1,500, and the latter about $2,000, with assets of $489.

Henri Mercier, general storekeeper of St. Ephrem d'Upton, Que., whose troubles have already been referred to, has made a voluntary assignment to Lamarche & Benoit, curators, of Montreal. A statement of affairs has not yet been prepared.

The Loan & Savings Co. (Limited), Montreal, a company incorporated in February, 1901, with an authorized capital of $250,000, and whose intentions were to do a general loan and savings business on mutual principles, do not appear to have met with very much success. Scores of suits have appeared against the company during the past several months, and now a petition for liquidation has been made.

For the fiscal year ended June 30th last, the customs revenue collected at the port of Montreal shows a total of $11,591,656.70, as compared with $12,437,927.93 for the previous twelve months, or a decrease of $846,271.25. Three causes are assigned for the decrease. Less revenue on sugar, a decline in the importation of locomotives, and the C.P.R. Atlantic line billing much of its import trade through to its western destination, where the duty is collected.

The Business Educators' Association, of Canada, which comprises among its members most of the leading business colleges throughout the Dominion, held its annual meeting in Toronto last week, Mr. W. H. Shaw, the president, in the chair. The reports of the various executive officers showed the Association to be in a satisfactory condition. The voting for officers resulted in the election of W. E. Gowling, of Ottawa, for president, and T. F. Wright, of St. Catharines, as secretary-treasurer.

The Canadian Westinghouse Company, Ltd., at the recent convention of the Canadian Electrical Association, had a neat and attractive exhibit. The headquarters were in Room 4 of the Hotel Windsor. Distributed at various places in the hotel were reproductions of the company's trade-mark formed by electric light combinations. The company had on exhibition a line of their induction motors, direct current motors OD transformers, series and multiple AC arc lamps, lightning arresters, fuse blocks, portable testing instruments, etc.

A. E. KIRKPATRICK, MANAGER

Tenders for Debentures of the Moose Jaw, N.W.T. SCHOOL DISTRICT.

Sealed tenders will be received by the undersigned up to 18k. (6.00 p.m.) on 1st August, 1905, for the purchase of Fifty-five Thousand Dollars ($55,000) of Debentures of the Moose Jaw Public School District No. 1, N.W.T., as authorized by the Department of Education. Debentures are in denominations of One Thousand Dollars ($1,000) each, and bear interest at five per cent. per annum.

HAROLD JAGGER,
Secretary-Treasurer,
Moose Jaw, N.W.T.

Philip Duchesneau, grocer, St. Tite, Que., who offered creditors 20 cents on the dollar in April last, lately increased the figure to 60 cents, 35 cents cash, and 25 cents at four months, endorsed by a brother, and this has been accepted.

Zepherin Daoust, who has conducted business in the dry goods line at Montreal for several years, and who has experienced more or less uphill work, has assigned. He was unsuccessful in February last, but resumed business in a small way.

A new and second-hand furniture dealer at Montreal, R. D. Lessor by name, for a few years apparently did fairly well, but some months ago he moved to a new locality. The move would appear to have been an unwise one, and his failure was recorded a few days ago.

I. Lashinsky, who started a small clothing and dry goods business at Montreal but a few months ago, under the rather pretentious style of "Cash and Credit Co., of Canada," but who was believed to be merely acting for another party, has already assigned. It is thought that creditors will likely get little for their claims.

The assignment of Howard & Guile, lessees of the Savoy Hotel, at Montreal, which occurred on June 30th last, did not come altogether as a surprise, as the hotel has never been a paying venture, and they took it over two years ago without having any capital, merely assuming the heavy liabilities of a former occupant. The list of creditors filed up to the present time indicate liabilities of $34,558.19.

Factory at BRANTFORD.

The Quebec Auto-Car Company has been incorporated. It will build and deal in automobiles propelled by steam, electricity, compressed air, or other motive force. J. G. Scott, of Quebec, is interested.

Three small failures reported during the past week, are those of George Bergeron, grocer, at Quebec; Napoleon Lamothe, baker and grocer, also of Quebec, and Miss Alice Hebert, milliner, of St. Johns, Que.——J. A. Metivier, conducting a small tailoring business at Lake Megantic, Que., also assigned a few days ago, and is now offering to compromise.

The assignment of J. P. Coutlee & Co., retail dry goods, Montreal, is reported. They owe $10,000, and assets are nominally $7,000. Coutlee who has lately been doing business in his wife's name, has had a number of opportunities in business, but he does not appear to have ever been a success, and this is his second or third failure.

THE TRADE PAPER.

That a trade paper can be of great worth to the line of business it represents goes without comment, and its worth can be measured in proportion to its use. By this is not meant the total issue printed and circulated altogether, but the total number of its interested readers. This information cannot be easily obtained, but it is a well-known fact that a trade paper has vastly more readers than subscribers. There are several reasons for this. One reason is that a tradesman who thinks he cannot afford to subscribe for one of his trade papers will borrow of his neighbors. He is like a man without a watch. He wants to know the time, and to learn it he must consult the watch of another man. Another method by which extra readers are gained is through the proprietors or managers of establishments. They realize the worth of a paper akin to their business, and will often pass their trade papers around among their employees. Some of the firms go further and will subscribe for a dozen or more of these papers and distribute them among their employees. They do this because they want keen, bright, well-read men behind their line of business, and the trade reviews sharpen these virtues. The public libraries also realize their value and are among the great patronizers of the trade press issues, and supply their shelves liberally with them. They are read and re-read by a large number of trade people. Many expert tradesmen who have risen from the ranks will admit that they owe their success, in a large measure, to the keen interest with which for years they have followed the progress and policy outlined by the leading papers of the trade of which they were a part.—Trade Press List.

SEALED TENDERS addressed to the undersigned, and endorsed "Tenders for alterations, Custom House, Toronto," will be received at this office until Monday, July 31, 1905, inclusively, for alterations to the Custom House, Toronto, according to plans and specifications to be seen at the Department of Public Works, Ottawa, Ont., and at the office of Messrs. Curry, Sproatt & Rolph, 90 Yonge St., Toronto.

Tenders will not be considered unless made on the printed form supplied, and signed with the actual signatures of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, must accompany each tender. The cheque will be forfeited if the party tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GÉLINAS,
Secretary.
Department of Public Works,
Ottawa, July 10, 1905.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

HOW TO PAY SALESPEOPLE.

It has been our observation, remarks a paper devoted to the dry goods business, that when clerks are paid a commission on their sales they at once make extra efforts to sell goods, and they become more attentive and more accommodating to the customers. The clerks' functions are limited to showing the merchandise that the customer desires, making every possible effort to find what the customer wants, and, while doing so, to show every possible courtesy and attention. In this the American department store system is unquestionably at fault. The freedom allowed to customers is a most agreeable feature of this method, but the resulting evil that it creates, that of causing inattention and quite frequently discourtesy on the part of the clerks, more than overcomes the advantage. On the other hand, in those city stores where clerks are paid on commission, the activity of the salespeople is undoubtedly increased, but their conduct and deportment is anything but pleasant or agreeable to one entering a store.

In all stores where the clerks work on a commission basis, the system gives rise to a fierce competition which makes the clerks rob each other of good customers, and makes them hurry through one customer who is buying a small bill of goods, in order to catch some new customer whom they know is good for a large bill. This condition, as we well know, is not conducive to a stable, satisfactory business.

A system which we favor is one in which a moderate fixed salary is paid the salespeople, and then an extra inducement given in the form of a commission on sales in order to induce extra effort and attention on their part. By this method they are assured of a steady income through dull as well as busy seasons, yet during the busy seasons they are able to earn more than their normal salary if they exert themselves. We all know that a store can afford to pay an increase in salary when there is an increase in sales.

We also know that efficient, reliable and dependable salespeople are developed only after careful training, and that to keep a good sales person in one's employ, he or she must be assured of a steady income that will enable him to live in comfort. On the whole, we do not favor the purely commission basis, because we rarely find that it results satisfactorily. A moderate salary, with the addition of a low commission on gross sales, has given better results all around.

* * *

—According to a recent report of the British Treasury Department, only twenty persons in Great Britain were in receipt of incomes exceeding £50,000 a year. In all, 433,017 people paid the tax upon the gross assessment of £120,821,876, while 28,050 public companies paid on £233,070,021. The greatest number of those assessed, 138,462, paid on incomes between £160 and £200. Their assessment amounted to £25,905,194. The list declines gradually till the incomes are between £1,000 and £2,000, which are taxed on a gross assessment of £8,614,359. Only 428 pay on incomes between £5,000 and £10,000 yearly, and 200 on £10,000 to £50,000. The total assessment on the latter is £3,910,094. The Irish figures show that 19,855 Irishmen paid income tax on a gross total of £4,629,707; while 1,115 companies paid upon £6,232,873. Only one Irishman has an income of over £50,000. His exact income is estimated by the assessors at £78,823. Judging from the assessments the emoluments of Government, corporate and other public officials have risen by £20,000,000. In ten years the incomes derived from farming have fallen by £2,000,000. The incomes from property-owners have increased £31,000,000, and the incomes of the business, professional, and private employment classes have increased £30,000,000.

In times of financial stress it is often impossible to raise ready money on even the best class of security.

It is, however, always possible to obtain liberal loans on a Great-West Life Policy after it has been in force three years.

MONTREAL MARKETS.

Montreal, July 12th, 1905.

Ashes.—There has been no important change in the condition of this market. Business continues quiet, as receipts are small, and the demand for the same is limited. Sales of first quality pots have taken place at $5.15 to $5.25, and seconds at $4.70, while pearls are quoted at $7.50 per 100 pounds.

Cement and Firebricks.—A fair volume of business continues to be done in cement, there being a steady demand for car lots, but few large sales are being made. The recent advance in prices at American centres had but little influence on the local situation, as values show no change. The demand for firebricks is fairly good for the season. Quotations are $1.80 to $2 for Belgian; English, $1.90 to $2; American and Canadian, $2.30 to $2.40, less the usual rebate for returned packages. Firebricks are quoted at $17 to $22 per thousand.

Dairy Products.—The cheese situation is in a somewhat uncertain condition at present, and although higher prices have been paid in the country during the past week, there has been no actual change in spot values, which are quoted at 9¾ to 10c. for westerns, and 9⅝ to 9¾c. for easterns. According to late advices from Europe, prices here are regarded as altogether out of line, and the opinion is expressed that the high figures ruling are to a considerable degree due to shorts being forced to cover. In any event, exporters claim to be doing business at a loss, but in spite of this fact, the high prices at country boards continue to be paid for the goods, and it is just a question how long these conditions will last. Some in the trade are under the impression that as soon as the June make is off the market prices will reach a lower level, as there is nothing in the situation to warrant them with such a heavy make in progress. The receipts for the past week were 104,705 boxes, as against 112,873 for the same week last year, and the total since May 1st have been 615,692, as compared with 615,361 for the same period last year. The exports last year were 94,959 boxes, as against 104,252 for the same week in 1904, and the total since May 1st, have been 586,844, as against 525,430 in 1904. A much stronger feeling has prevailed in the butter market, prices have advanced ½ to ¾c. per lb. in sympathy with the high prices paid at country points, and the fact that there is a very keen demand from European sources for Canadian butter. This is due to the small make of home butter and the scarcity of Siberian and Copenhagen butter. Sales of fancy creamery have taken place at 21c.; choice at 20¾c., and good to fine at 20 to 20½c. The receipts of butter for the past week were 43,242 packages, as against 28,795 for the same week last year. The exports for the past week were 35,573 packages, as compared with 18,512 for the same week in 1904.

Groceries.—There has been no important feature in this branch of the wholesale trade during the past week. A fair volume of business continues to

be done in a jobbing way. In sugar the feeling has ruled steady in spite of the further decline in raw beet in the European markets, and the lower prices accepted for cane sugars in the New York market. The demand for refined in this market has been quiet at $5 per 100 pounds for granulated in barrels, and at $4.50 to $4.85 for yellows. The tone of the market for molasses is easy with round lots of Barbados quoted at 32 to 32½c. per gallon, ex-wharf. In teas trade continues quiet, the demand from jobbers being limited, while speculators seem to take no interest in the market at present. Business in dried fruit has been quiet. Prices for new crop currants have been received, which show an advance of ⅛ to ¼c. per lb. over those of a year ago. Valencia raisins on spot rule firm at 4¾c. for layers and 4½c. for selected stock. A fair volume of business is passing in new pack canned goods for future delivery.

Hides.—The feature of this market has been the strong feeling in lambskins, and prices show a further rise of 5c. with dealers now paying 40c. for city hides and 35c. for country. In beef hides and calfskins there is no change to note. Beef hides and calfskins have ruled steady. Beef hides, No. 1, 10 to 10½c.; No. 2, 9 to 9½c.; No. 3, 8 to 8½c.; calfskins, No. 1, 15c., and No. 2, 13c.

Leather.—This market has remained quiet, owing to the continued limited demand from all sources. We quote: Sole, 27 to 28c.; oak sole, 29c.; Western splits, 21c.; Quebec, do., 17c.; junior splits, 16 to 16½c.; glove grain, 12c.; Scotch grain, 15 to 16c.; pebble, 12c.; buff is dearer at 13c. for medium, and 14c. for heavy, harness, 32c. for best.

Metals and Hardware.—There continues to be a fairly good demand for all lines of general hardware and heavy iron material for the season of the year, and the market is fairly active. Antimony, tin plates, and tin rule very firm. Pig lead has advanced to $3.60, while ingot zinc is easier. No. 1 Summerlee pig iron is quoted at about $19, with best brands of domestic at about similar figures. Bars are $1.75 in car lots, and $1.80 in a jobbing way; for nails, both wire and cut, $2.20 is still the figure, and wire is unchanged. Canada plates are quoted at $2.30 for fifty-two's, and galvanized Canadas, $3.85 to $3.90; black sheets, $2.15; Terne plates, $6.50; coke tins, $3.65, and $3.90 for charcoals, of standard brand and weight; galvanized sheets, $4.15; antimony, 11½ to 12¼c.; tin, 32½ to 33c.; copper, 16 to 16¼c.; lead, $3.55 to $3.60; spelter, 6¼ to 6½c.

Oils, Paints and Glass.—The demand for all lines continues good for the season, but there is no important change in values to note.

* * *

The Electric Light Company, of Golden, B.C., have placed an order with the Robb Engineering Company for an 80 horse-power engine and boiler.

TORONTO MARKETS.

Toronto, July 13th, 1905.

Chemicals, Drugs, Etc.—No new feature has appeared in the local drug market. Business continues normally active. Prices show but little change. The staples, quinine and opium, have not changed their position since last week. No great change has occurred in the New York market since last report. British advices speak of a quiet tone reigning in the market. Ammonia is quite firm, and so is bleaching powder.

Dry Goods.—Considerable activity is being experienced in the dry goods trade now the weather seems to have partaken definitely of a more summery character. Special interest is being taken in cotton goods owing to the heavy upward movement in raw material, and in consequence of the revelations concerning the working of the Statistical Department of the Washington Government. On the 10th inst. an advance of $2 per bale was recorded on the New York market.

Flour and Grain.—The general quotation for ninety per cent. patents continues around $4.25, though some sales have been made at less. Manitoba flour is even more unsettled. Wheat (Manitoba), remains about the same since the advance last week, though perhaps the full amount of the same in the Winnipeg market has not been followed locally. As to mill feed, shorts are firmer, under a good local demand. For bran, however, the prices are easier. Oats are scarce. For barley there is an active demand for feeding purposes. Corn is firm, but rye is dull. Peas are scarce and in demand.

Groceries.—For this period of the year, there is a fairly satisfactory demand to be noted for general lines of goods. Fall orders are coming in in earnest. Sugars continue as last quoted with a normally good demand for the season. Molasses and syrups are also firm. Teas are dull, and coffee likewise. Canned fish and vegetables are receiving considerable enquiry just now. Tomatoes have advanced. Peas and corn

The Sovereign Bank of Canada.

QUARTERLY DIVIDEND.

Notice is hereby given that a Dividend of One and One-half per cent. (1½%), for the quarter ending July 31st, being at the rate of Six per cent. per annum, on the capital stock of this Bank, has been declared, and that the same will be paid at the Head Office and at the Branches, on and after

Tuesday, the 15th day of August next.

The Transfer Books will be closed from the 1st to the 14th prox., both days inclusive.

By order of the Board.

are scarce, but prices continue as before. The prices for salmon having been laid down, more interest is being taken in that. No large demand, however has yet set in.

Hides, Skins and Leather.—Hides are coming in somewhat slowly, and as the demand is good, prices are very firm at recent advances. In leather the trend of prices is higher, but at the same time quotations have not been fixed on a higher basis. Prospects of the trade look good.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

Fruits and Vegetables.—An active trade has been done locally in fruits. Strawberries are easier owing to the quantities coming forward. Raspberries also are coming in now, and so are blueberries. Potatoes are in good dmand. We quote: Strawberries, 9 to 10c.; cherries, sweet, basket, $1 to $1.25; do., small, 50 to 75c.; do., sour, 80c. to $1; raspberries, 12 to 15c.; blueberries, bkt., $1 to $1.25; red currants, basket, 75 to $1; gooseberries, basket, 60c. to $1.25; California peaches, case, $1 to $2; do., plums, $1.50 to $1.75; do., apricots, $1.50 to $1.75; Georgia peaches, $2.25 to $2.50; cantaloupes, crate, $2.25 to $5; watermelons, each 35 to 40c.; bananas, bunch, $1.25 to $2; do., red, $2.50; lemons, crate, $4.50 to $5.50; oranges, crate, $5 to $5.50. Vegetables — Tomatoes, crate, $1.50; cucumbers, hamper, $1 to $1.25; do., Canadian, doz., 50 to 75c.; peas, basket, 25c.; potatoes, barrel, $2.50 to $2.75; do., basket, 30 to 35c.; onions, Bermudas, $1.15 to $1.25; beans, basket, 25 to 35c.; squash, hamper, $1; cabbage, case, $1 to to $1.25.

Live Stock.—There was a heavy run of cattle at the Toronto market this week, and the only demand was for really choice stock. Of such quality there were only but few exporters, and while these fetched about the same prices as last week, the general tendency was easier. Good butchers' were picked up early, but there were not many. Trade in stockers and feeders was quiet.

Provisions.—Butter arrivals continue quite large, but a good deal is being put into storage, and the demand continues good. Guaranteed new-laid eggs are scarce. Local prices for cheese continue steady, though in some sections we hear they are a little easier. An English trade advice says: The demand for Canadian butter continues good. Arrivals are increasing, but they are going straight into consumption. London values for Canadian butter exceed those of Bristol and Liverpool, and it looks as if this year London would depend more than usual upon Canada for supplies. Choicest are quoted at 98s. to 102s.; finest, 96s. to 97s. For cheese the demand continues satisfactory. Values have advanced 1s. per cwt. for the week. Spot prices, however, are lower than c.i.f. quotations, so that there is no inducement to buyers to make purchases, and unless this position speedily alters by either spot values advancing or c.i.f. quotations declining, export business will come to a stop. Choicest are quoted at 54s. to 56s.; finest, 51s. to 52s. Bacon is quoted: No. 1, 51s., 54s. to 56s.; light, 46s. to 50s.; exceptionally good, 53s.; No. 2, 50s. to 53s.; exceptionally good, 55s. to 56s.; No. 3, 50s. to 52s.; exceptionally good, 54s. The market is steadier owing to improved Continental demand.

* * *

The Calgary Colonization Company is said to contemplate the erection of ten grain elevators along the line running south of Calgary, and twelve on the line running north. They will have an average capacity of 30,000 bushels.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00.

THE CANADA LIFE

holds Policy Reserves greater by $3,000,000 than the present Government requirement.

The business in force is three times as great as that of twenty years ago, while in the same period the Assets have increased four fold.

Each year with its increasing age, Canada's leading Life company

Shows Increased Strength.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

"HIGH FINANCE" AND THE LAW.

It is sometimes offered as an excuse or explanation for the reckless misappropriation of other people's money, such as goes by the name of high finance, that the same man who, as an individual, would be the first to shrink from the doing of any act which from any point of interpretation could be regarded as dishonest, or not sufficiently careful of the rights of others, does things as a member of a great corporation in total disregard of such principles. And the apology goes on to say that this is perhaps due to the fact that being a unit in a great aggregation of fellow human beings his sense of moral responsibility has become attenuated; or, in the case of one who, as officer, is mainly responsible for the action of such aggregation, he is apt to excuse action of a grasping character by the consideration that however much he, as a private man may object, it is his duty as a servant or agent of the corporation in question, to sacrifice such personal qualms in the interests of the great concern which has been committed to his charge.

It is possible that this attitude of mind is rendered easier to adopt owing to the way the law generally acts in such cases. Or rather, fails to act, for corporations cannot be imprisoned, and they can only under a few circumstances be fined to any adequate extent. The officials hide behind their corporations, and as the corporations are more or less impersonal, they do not feel themselves to be in any particular danger.

This explanation of an evil which seems to be growing to an extraordinary extent across the line, and bids fair if it persist, to eat into the very vitals of business morality, is perhaps better than no explanation at all, but it is a very poor excuse. With no greater impropriety, bank officials might hide themselves behind their institutions, and claim that banks, by divine appointment, can do no wrong. Practically this is what is done by some of the big corporations and financial institutions, and their officers, as a consequence, have money to spend in yachts and automobiles, and lengthy trips to Europe—money which quite often was given to said officers to be used by them for the best interests of the persons thus disposing of it.

No doubt they feel that the pressure of modern life, the necessity for constant scheming, the long chances offered by uncertain enterprises, naturally lead to a spirit of "don't care" which teaches them to make merry now lest to-morrow they die. Listen, however, to the words of Grover Cleveland:—

"We can better afford to slacken our pace than abandon our old, simple American standards of honesty, and we shall be safer if we regain our old habit of looking at the appropriation to personal uses of property and interests held in trust in the same light as other forms of stealing."

Meanwhile, as it seems to us, the remedy is for society to recognize that while the evils which menace it are corporate in name, they are individual in fact. Practically always, the "stealings" have been brought about by individual *men*, and these men should be punished—punished personally. The wrong doing of a bank official is followed by the punishment of that official, not of the bank. Corporate wrong-doing should be treated in the same way.

* * *

MORE NATIONAL EXPENDITURES.

Members of Parliament must surely think that the hoard of wealth possessed by this country is illimitable, and that they are as entitled to their share as the next man. Opinion as to the manner in which they have this week created a new Pandora's box—of expenditures—is divided. Divided, not so much in a sense of party being opposed to party, for of this there was a touching absence, but divided in the sense of some parts of the bill being heartily welcomed, and other parts called into question, that is, by the outside public who have to pay the piper.

Practically no one raises objection to the increase in the salary of Canada's Premier. For long it has been admitted as being altogether too low for the calls made upon the occupant of that high office. General concensus of opinion, too, is in favor of the country giving a salary to the leader of His Majesty's loyal Opposition, an office which, usually thankless as it is, is not very much behind the Premier's in importance. Whether such salary be constitutional or not is a question for doubt; but perhaps it will come under that category of problems to which the answer is "so much the worse for the constitution." As to the increased salaries for judges, it is a well recognized fact that they deserved it, and needed it, and the policy is a good one which teaches a country to give its public servants a due reward for hard and faithful service.

So far so good. When it comes, however, to allowing a pension to ex-Cabinet Ministers it is another story. There is already enough politics in this country to stock a fair-sized continent, without granting such an increase in the bonus list as this. But when we come to the next item on the list of increases, the increase of the indemnity to members by $1,000 per year, one realizes that the country has begun to get intoxicated with the sense of its own prosperity, and one can only say that the rapidity with which it went through speaks worlds for the sense of humor and the good feeling possessed by these members. They could scarcely act otherwise under the circumstances. No doubt they feel they are giving the country good service. Good service is certainly what the country may rightly expect from them for such a fee. Whether, however, it could not have applied its "hoards of wealth" to better use in this, its growing time, is a question, it seems to us, to which the answer is quite plain. To the question, however, where is all the money to come from, the answer is not quite so clear.

* * *

THE PRICES OF COMMODITIES.

While prices during the half-year ending with June 30th have fluctuated considerably, the general average on that date remained higher than at any other time during that period, though the increase was very slight compared with the end of December. The London Economist's Index Number stood at 2,163 on June 30th, compared with 2,136 on December 31st, and 2,130 on June 30th, 1904. The highest number previously recorded in a term of years was 2,234 in March last year. On the whole, taking the evidence of the index figures, it would appear that the general course of trade has been towards improvement. For example, the advance is distinct in the case of metals and other raw materials for manufacturing, and the higher prices must mean lerger demand, though in cotton, the contrary was the case, a plentiful supply and a reduction in price of the raw material having been attended by a great stimulation of the industry. Copper and lead are lower than at the beginning of the period, while tin shows an advance. Wool has been maintained at the high prices to which it had risen at the end of last year. Flax and jute are also somewhat higher, but hemp declined. Sugar began to decline early in the year, somewhat unexpectedly to the speculators who were interested in the high level of values. Tea recovered a little. Petroleum dropped considerably in May, but recovered almost completely.

Dun's Index Number of commodity prices stood at $98,312 on July 1st, against $97,759 a month previously, and $97,192 a year ago. This decline, although only slight, is rather surprising in view of the speculative features in grain and the textile raw materials.

* * *

THE "FRATERNAL" DILEMMA.

The letter which we print from a correspondent in another place in this issue shows up in clear colors the dilemma in which the assessment insurance societies find themselves, and illustrates forcefully also the point brought up by Judge Kinne, of Michigan, referred to last week. On the one hand these so-called fraternal concerns, which bear so strongly marked, in their general make-up the tokens of amateur or immature workmanship, find themselves in a position of shipwreck the only escape from the certain perils of which consists in increasing their rates. On the other hand, as the learned judge remarks, such increase of rate against the expressed wish of members is nothing but a breach of contract of the worst kind. What sort of contract is it that can be changed in its most important terms, at the behest of one party to it?

Certainly an increase in the annual fees, or a decrease in the amount payable by the society upon the payment of such fees, comes within the category of breach of contract. It may be perfectly true that such change in the terms of the agreement is absolutely indispensable to the welfare, nay, the very existence of the society ordering it, but this excuse can, strictly speaking, hardly be said to hold in law. The position is a painful one—the horns of the dilemma are sharp, but what is to be done? On the principle of the greatest good for the greatest number, no doubt, the better plan is, as is being followed by a large number of the fraternals, to blink at the letter of the law, and increase the rates until they shall have been placed on a rational basis. But all the same the position of the hundreds of thousands of people who, through lack of knowledge, both on their own part, and on that of their advisers, have been induced to place their money in schemes which now require that further sums be sunk merely in order to save the first, is one to be pitied. Our correspondent's letter, giving as it does a specimen of how these endless-chain schemes work out, is well worthy of attention.

* * *

FIRE PROOF CONSTRUCTION.

During or immediately following upon a great conflagration, everyone is perfectly ready to acquiesce in the necessity for fire-proof construction of buildings; but after a sufficient period of time has elapsed, the public recollection of such necessity becomes somewhat blunted. The root of the difficulty is the cost of the materials required in really efficient construction, and the consequence is that when builders begin to offer alternate plans of their own, a little cheaper, the owner of the projected building is generally only too ready to accept them as being good enough.

An address was delivered recently by Mr. Perez M. Stewart, formerly superintendent of buildings in New York, before the International Association of Fire Engineers, New York, in which he dwelt upon the necessity for being absolutely sure that the method of construction is in accordance with the most modern knowledge and requirements.

He insists that the ruins in Baltimore, Rochester and Toronto prove all that has been claimed for the latest improvements in building methods and materials. Good plans, good materials, and especially good workmanship, are essential to enable a building to resist fire from without and from within. The protection of the entire steel frame from the heat is particularly necessary, and for this purpose, he reports concrete to be the best material. It is of little use to make the walls fireproof if a conflagration can come in through the windows, and he refers to the Calvert Building in Baltimore, which caught on seven floors simultaneously. For window protection he urges wire glass set in frames of metal, or wood covered by metal. This he regards as better than shutters of iron or metal-covered wood.

Until very recently there has been little reduction in the amount of inflammable material used in the finishing and furnishing of buildings, and many a building has been burned out by its own doors, floors, and furniture. Concrete is increasingly used for floors, and we hear of a new hotel in New York, which contains absolutely no wood except the door-sidings, which are treated chemically to make them resist fire, and a strip three-fourths of an inch wide, buried in the concrete, to tack the carpets to. For doors and all the interior trim, experts now recommend two compositions, the basis of both of which is asbestos, and which are capable of being shaped by tools, and of receiving nails.

What with the use of fireproof materials, of metal-covered furniture, which we believe is now quite practicable, and of stand-pipes and automatic pumps and elaborate appliances for confining a fire to limited space, for announcing it and for putting water on it, it seems likely that the coming hotel, apartment house, and office building will be *really* fireproof, so far as human endeavor can count.

* * *

THE COTTON MARKET.

For some weeks past, in spite of a desire on the part of some to point to the fluctuations of raw material as a sign of coming easier conditions, it has been evident to the trade generally that chances were multiplying for an advance in cotton goods. This has now come. White and gray cottons have advanced, as before announced, but now the Dominion Textile Company has increased the price of yarns 2c. per pound; cotton ducks, 2c.; blankets, 2c. On print cloths, a second advance of ¼c. per yard is announced, in addition to the one which went into effect a couple of weeks ago. Roughly speaking, these advances are at the rate of about 10 per cent. The Canada Colored Cotton Co. also announce additional advances of 5 to 7½ per cent. in ginghams, sheetings, cottonades, Saxonies, etc. The Penman Mfg. Co. advise advances in men's and women's underwear, ranging from 5 to 10 per cent. Some other concerns have withdrawn quotations.

Even now, however, these advances are not on a par with those that are being made in raw cotton, and it is by no means improbable that should these continue a further rise in manufactured staples is to be looked for.

The increased prices, of course, go into effect immediately, so far as the wholesaler is concerned. Some retailers, however, we believe, are under the impression that they will not be affected for a long time. This can hardly happen, however, in the present condition of the trade. It seems to us more than likely that with the low stocks held, generally speaking by the wholesalers, they will speedily have to have recourse to fresh supplies, and these, naturally they will have to let go only at the revised figures. Not only this, but it is thought that the stocks of raw material now held by domestic mills are distinctly on the light side, so that every rise in value in that commodity will have full and immediate effect. Certainly, many wholesalers as well as many mill-men have been trusting to an easening off in values and thus neither put sufficiently large stocks in hand.

There is no little excuse for this attitude in the strange news which comes from Washington, where practically no doubt lingers that the Government Statistical Bureau has been made use of in the most faithless way by one of its prominent employees, to such an extent that it has furthered the interests of a nest of gamblers, by the most bare-faced manipulation of figures. For a long time, the figures and estimates given out have been received with doubt and suspicion; but the discovery of the action of the Assistant Statistician unearths a state of things which is worse than had been imagined. The consequence is that nobody knows aright respecting the probable state of the growing crop. Summing everything up, however, it does not seem likely that prices will decline in the near future. It may be said, however, that not since the high prices for raw cotton in 1903, when a price of something like 18 cents was recorded, has the cotton goods market reached a more disturbed and unsettled position than that occupied at the present time. Everybody appears to be at sea regarding the future price of cotton, and consequently it is not strange that the market for the finished product should be unsettled. It is a question with some if the future market for the staple has not been carried too high by speculative influences, but even so, we believe that our forecast above will be proved to be fairly accurate.

* * *

THE TRADING STAMP QUESTION.

The legislation introduced by the Dominion Government for the doing away of the trading stamp evil had the disadvantage of being put forward in a lukewarm manner. The Hon. Mr. Fitzpatrick indeed openly confessed that he was opposed to all such (what he called) paternal law-making. But, as Sir Wilfrid Laurier remarked, the people who are so gullible as to be taken in with such schemes, have to be protected against themselves in many cases. In other cases, needless to say, such protection is impossible, or at any rate not feasible. Mr. Borden went a step further and said the logical outcome of such legislation to protect the people would be some measure to abolish the bargain system of the departmental stores. True enough there is a good deal of the nature of a lottery in this, but we suppose most people would prefer to take their chances.

The case against trading stamps need scarcely be repeated here. There can be no doubt that the loss through their common use has extended both to the merchants and to their customers of the poorer class. It is perhaps not going too far to say that many a small struggling retailer has owed his failure primarily to the fact that competition has driven him to allow a large percentage of his legitimate profits to fall into the hands of the stamp company.

In many cases, too, the less prosperous classes, mechanics and so forth, or rather their wives, for it is the weaker sex probably who have been most bitten by the delusion, have been induced to buy goods beyond their means, or at any rate goods by no means necessary, merely through this insistent evil. That trading stamps should rightly come under the category of lotteries, other forms of which are forbidden in this country, needs little argument. People are induced to pay in good money on the chance of getting a prize.

Another hardship worked by the system of trading stamps was on the merchants who were not favored by the companies with the permission to buy stamps. In this manner they have been handicapped owing to their unequal footing compared with neighboring merchants, and as the latter also lose money by that very favor, the whole retail trade in some sections is thrown into a disorganized condition.

The fact that the Government has been waited on from time to time by large and influential deputations of business men, composed both of those who have and those who have not made use of trading stamps shows that the evil is one that has been in existence more than long enough. The bill which has now passed its second reading would appear to meet the case admirably.

NEW YORK BANKERS' ASSOCIATION.

The twelfth annual convention of the New York State Bankers' Association, held last week, was of interest to the banking and business worlds of other sections on account of the way several topics of absorbing modern interest were handled. One thing we are glad to note, seeing that sooner or later this country is affected by conditions, good or the reverse, reigning across the border, and that is that the general tenor of opinions expressed by the convening bankers was that the state of trade and business in the United States was quite satisfactory and that the general prosperity bids fair to be gradually augmented rather than otherwise so far as could be seen into the future. Mr. Charles H. Sabin, the president of the association, expressed the opinion that the position of the banks had been greatly improved by the general discontinuance of the practice of paying interest on commercial accounts. Parenthetically here we may perhaps be allowed to ask the question: *has* this practice been discontinued in New York City? The statement may be and no doubt is true of many of the banks in the State, but we are under the impression that in New York City the payment of interest on commercial deposits is by no means uncommon even now. Mr. Sabin's own opinion was that the custom of paying such interest had been brought about by the desire of bankers to keep on an equally favorable position with the trust companies and he displayed the olive branch to those institutions (if such it can be called when there has been but little open hostility) by inviting them to become members of the Association. We need not remind our readers that trust companies in the States occupy a somewhat different field from that filled by them in this country.

A very interesting address was that of Mr. J. M. Beck, formerly Assistant Attorney-General of the United States, on "Moneyphobia." Briefly, he took for his text the present disposition to look questioningly into the code of morals which prevails in commercial and financial circles. He believes that the several short-comings which have been discovered in recent years in this respect are not due so much to a growing laxity of morals, as to what may be styled the intoxication which has come about through the unprecedented growth of prosperity and the consequent enormous aggregations of working capital. His description of the large modern corporation, and his analysis of the *raison d'etre* for some of its evil concomitants, will strike the reader as being rather neat: "That artificial creation of the law—the corporation—with the legal fiction that it is a moral personality, has been a Pandora box, from which infinite good and evil have proceeded. A corporation with many thousand stockholders does an act which benefits itself while injuring the public, but the sense of individual responsibility of each stockholder for the wrong done becomes so attenuated as to lose any appreciable existence, while its officers, who in whole or in part are directly responsible, are too apt to feel that as trustees for the stockholders they must subordinate their personal views of what is right or wrong to the welfare of the corporation." No doubt, as he adds, the passing difficulty of adapting this mighty instrumentality of civilization to the moral needs of the age must be apparent. The solution of this problem surpasses all others in importance. Its just solution will require dispassionate consideration, not intemperate agitation.

ENGLAND'S NATIONAL FINANCE.

Mr. Edgar Speyer, the well-known banker, recently gave an address to the Institute of Bankers in London, England, on the financial conditions in that country, and in which some suggestive views were enunciated. The meaning of the unsatisfactory prospects in Great Britain, and the main cause for the growing excess of imports over exports he attributes to nothing more than national extravagance,—governmental, municipal and individual. This is worth noting because, for one thing, it bears out the contentions of Lord Avebury, to which, in connection with municipal matters, we referred in a recent issue.

In the past 10 years the country has expended a sum of £1,440,833,126, in contrast with £902,209,158 in the previous 10 years, a difference of no less than £538,000,000, or nearly 60 per cent. These figures are more eloquent than any comment.

Expenditure such as this was bound to seriously affect the country's capital fund and savings; but this is not all. In the past ten years an additional extraordinary expenditure of about £45,000,000 has, on balance, been charged to capital, chiefly for unproductive works, whereas in the previous ten years all expenditure other than about £3,000,000 has been charged to revenue. The national expenditure has in the past ten years exceeded that of the previous decade by about £581,000,000. In the decade ended with March, 1886, the net expenditure for purposes not reproductive was £728,000,000. In the ten years ended 1896 it was only £754,000,000. In the past ten years it was no less than £1,291,000,000. We must, of course, remember that a good part of this huge expenditure has been caused by the war. But even if we deduct war expenditure, which amounts to about £220,000,000, excluding interest on debt, the growth in the normal expenditure for the past ten years will be still over £300,000,000, or about 45 per cent. higher then in the previous ten years.

These enormous outlays, whether justified or not, have very seriously encroached upon the income which Great Britain would have received had these moneys been invested in reproductive works.

At 5 per cent. interest the annual loss at simple interest would be £26,000,000 per annum, and were allowance made for a normal growth in expenses, arising from increased population and additional expenditure upon education, the net loss of income to the nation from the excessive growth of the national expenditure is about £24,000,000 per annum.

But this is not all. The loss of income per annum is much greater, for, in addition to the Government expenditure, both municipalities and individuals have incurred very large expenditures which have swelled those figures considerably. The consequence of this general extravagance, has been that imports have been very largely increased, while exports have remained relatively stationary.

Mr. Speyer next shows that this extraordinary expenditure has been only rendered possible by the fact that the nation and individuals had been in receipt of great incomings from colonial and foreign investments. The annual income from this source in the year 1900-01 was over £60,000,000 compared with not quite £30,000,000 in 1880-81. But he points out these capital investments abroad have of late years practically stopped altogether, because Englishmen have spent all their money at home. Exports, therefore, have been relatively small, and imports have increased. The excess of imports over exports in 1903 reached the enormous total of £183,000,000, compared with £81,000,000 in the later eighties. It will be seen, therefore, that the large excess of imports over exports in recent years is due not so much, if at all, to any fiscal policy, but to great extravagance, and to the comparatively small amount of savings devoted to investments in foreign and colonial securities. It is here that reform should come in, for the comparative absence of reproductive savings available for investment in the colonies, in India, and elsewhere, is a very serious factor in the situation, and cannot be too clearly recognized. "I do not think," he adds, "that we realize sufficiently the importance of our colonial and foreign investments, or the great part they have played in bringing about the great prosperity of this country. We could not maintain a population of about 43,000,000 of people in the comfort in which they now live were it not for our colonial and foreign investments. Now what do these investments do for us? In the first place, they give much employment to our working classes. The capital we invest in colonies and in foreign countries is largely sent in the form of British produce, rails, bridges, and rolling-stock for the railways we build abroad, clothes for the workmen to wear, often food for them to eat. If we do not send out goods directly to the countries in which we are investing money, we do so indirectly.

* * *

OPPORTUNITIES IN HALIFAX.

The quarterly meeting of the Halifax Board of Trade was held on the 11th, being the first general meeting to be held in the new rooms of the Board, and considering the extreme heat, was well attended. The quarterly review of the president showed that satisfactory progress continues to be made. A large number of new members have joined during the quarter. A new and practical chairman of the Mining Committee has been appointed in the person of Mr. A. A. Hayward. The commercial and manufacturers' committees have been busy, with good results.

The special purpose of the meeting was the discussion of the question: "New industries for Halifax and how can they be secured." The subject was introduced by L. J. Mylins. He pointed out that there is now on the statutes of the city an act enabling it to offer tax exemption for the period of ten years from 1902 to any person establishing a manufacturing plant. He proposed that the city should offer free sites to industries guaranteeing a pay roll of $200.00 per week. The opinion of the citizens, as the speaker had been able to elicit it, was that a large number of small industries, employing from 20 to 50 people, should be striven for rather than larger industries. The speaker referred to several desirable localities in the city where free sites might be offered if the land were secured by the city. He enumerated the following list of industries which would have an excellent chance of prospering here. The list was prepared carefully and with the help of merchants and other distributors of the articles mentioned, and is as follows:—Factories for the manufacture of ladies' belts, neckwear, underwear and corset covers, whitewear, black sateen underskirts, men's neckwear and underwear, shirt factory, hat factory, children's wash suits, woolen mill, nail factory, carriage factory, canning factory, box factory, stove foundry, wire fencing, mattresses, and iron beds, tannery, axe and spring factory, brush and broom factory, boot and shoe factory, factory for the making of all kinds of office furniture, fixtures, and decorations. In all of the above lines there are either no factories or insufficient ones to supply a large demand.

The subject was spoken on by a number of those present and the sentiment of the meeting was very strongly in favor of offering every reasonable inducement to anyone who would undertake manufacturing any of the lines enumerated. The whole matter was finally referred to the commercial committee to take practical steps. This agitation to "Wake up Halifax" is one result of the void left by the withdrawal of the Imperial forces and the large sum they distributed there yearly. The necessity of securing something as good or better has created a new spirit in the place.

* * *

OUR ST. JOHN LETTER.

There have been some serious fires in outlying districts in New Brunswick during the past two or three weeks. The most serious was the blaze at Albert, Albert County, where twenty-two buildings were destroyed including three hotels and a number of stores. The village was one without an adequate water supply, consequently there was very little insurance, so the loss proved a heavy one. Another serious fire was at Little River, Albert County, which destroyed Wright's lumber mills. There is good reason to believe this fire was set by a tramp who had been arrested for stealing Mr. Wright's horse and escaped from the jail. The fellow has since been recaptured and may pay dearly for his act. To-day announcement is made that the general store and dwelling of W. A. Fowler at Springfield, King's County, has been burned with much of their contents. The Wright mill was insured for $10,000 and Mr. Fowler had $1,200 put on only a few days ago.

The lumber situation on the St. John river grows worse instead of better. An immense quantity of logs have been hung up and there is now only about enough in the booms to keep the St. John mills running a few weeks. Of course some operators are better off than others and will be able to run longer, but the outlook to-day is that all the mills hereabouts will be shut down in four or five weeks unless there are unusually heavy rains to bring on a summer freshet and get out some of the logs now hung up along the river and its tributaries. A recent visitor to the province was Colin H. Livingstone, of Washington. Mr. Livingstone is a former resident and is now associated with United States Senator Evarts and other wealthy Americans. They own a paper mill and are looking for new sources of pulp wood supply. Through Mr. Livingstone they have secured options on extensive tracts along the upper St. John. The company do not expect to cut off these lands at present but will keep them for a source of supply when their present timber lands in the United States are exhausted. The American lands do not renew themselves as rapidly as those in Canada.. Another American syndicate, The International Paper Company, of New York, has about completed arrangements for the purchase of the Wm. Richards Company lands on the Miramichi. This concern may build a pulp mill in the province.

A discovery of iron ore is reported from Black River, St. John County, and it is probable that the property will be thoroughly examined and if this ore can be used advantageously a company will likely be floated. There is also likelihood of a company taking hold of valuable iron ore deposits near Lepreaux in New Brunswick. Investigation work at this deposit has been going on for some time and it is reported that the property is an extensive one and that the ore is of a very superior quality, in fact of a grade that can be used in making the finest quality of steel.

Crop reports have never been so good as they are this year and it looks as if the farmers will have harvests that will fully compensate for any losses the lumbermen may sustain because of the laying up of their logs.

St. John, N. B., July 18, 1905.

THE ROYAL ARCANUM AND INCREASED RATES..

To the Editor of The Monetary Times:—

Sir,—I have read with general impatience the correspondence on this subject, especially that which has had for its object a protest against the exorbitant demands made by the officials of this society—not only upon the purses of the members, but also upon their credulity, for nothing yet written is to my mind nearly strong enough for such a gross act of injustice. It really looks as if (I give it its due) the cleverly planned attempt to evade liability was to be taken by the members "sitting down."

Reluctantly, therefore, I feel bound to enter my strongest denunciation of this dodge, and would ask you to allow me to cite my own case, doubtless typical of many others, as an example of its cruel injustice.

I joined the society in January, 1895, at the age of 55, and for the first three years paid 16 assessments of four dollars each annually. Owing to the increased demands occasioned by the war this was, in 1898, altered to 12 assessments of seven dollars each, an increase of twenty dollars per annum. If the squabble with Spain necessitated a call upon policy-holders of over 30 per cent. one may reasonably ask what would be the increase in case of a repetition of the terrible Civil War, or if the States were drawn into such a frightful international war as that now raging. Contemplation of such a position of affairs makes one gasp with awe at the splendid opportunity afforded the present brilliant officials to prove their financial capabilities. The present demand amounts, in any case, to $16.08 per month, or an increase of from $84 to over $190 per annum, the ostensible reason given being the great increase in the death rate. Readers of the official Bulletin must have remarked with grave dissatisfaction the extraordinary number of deaths of policy-holders of a few months' standing from that terrible scourge, consumption, and this if continued would of itself ruin any society; but surely this is a disease of no sudden growth, and one that is easily traceable. What, then is the value of the medical examination? A doctor who pockets his fee and yet deliberately allows the funds of the society to be so violently drawn upon may almost be classed in the same category as the dishonest insurer. This, however, is but a side issue, and one easily adjusted; the actual reason for the increased rates must be looked for elsewhere. Is it not an attempt to drive out the older members of the association altogether, and thus get rid of the prospective liabilities? Evidently the executive of the order are aware that the profits of the fraternal insurance business are derived, not from the polices which mature, but from those which lapse, and it is as plain as Mount Royal that this is nothing more or less than an attempt to grab a huge haul from this source.

The suggested new rates are, we are informed, advised by certain actuaries as being necessary to place the association upon a sound financial basis. This was exactly what they said in 1898, and it would seem that these gentlemen have displayed about the same amount of intelligence as their medical confreres, and are assisting, willingly or not, in what amounts in the end to a gigantic fraud.

I have paid nearly nine hundred dollars into this benevolent society, but I am not lunatic enough to shut my eyes any longer to this pleasant little arrangement. It works very prettily; something like this. I pay (under protest) the advanced rates in order to save what I have already sunk; in another five years they say: "Why! here's this fellow still paying; he's now 70 years old, and cannot be considered a good life much longer; let's fire him." So they get another actuary to advise them that the present (advanced) rates are unsound, and are sorry to have to ask for another increase of 100 per cent. "What! you're too old, and cannot afford such a rate! Well, look here, we'll reduce your policy from three thousand to one thousand, and you need only pay the same annual amount." What mercy! What charity! What virtue!

My object in addressing you is two-fold; first to advise my fellow members to follow my example and take their business to a straight office, and secondly to warn those who are considering the vitally important question of life insurance, a duty devolving upon every young fellow, to do likewise, and if their minds have turned to this beneficent fraternal (sic) body to change them at once.

G. A.

Montreal, July 13, 1905.

TRANSPORTATION MATTERS IN ST. JOHN.

The outlook is not good for the erection of a new deep water wharf before the coming winter. The government has placed $100,000 in the estimates for dredging and will have to spend nearly as much more, but no call has yet been issued for tenders. After the dredging is completed the city will build the wharf and warehouse. All this means time so it is doubtful if the work can be finished this season. The Government engineers are now figuring on plans and the call for tenders is daily expected. It may be difficult to secure in Canada a dredge suitable for the work, but it is believed some American firms will tender and that the Government will give permission for the free entry of their plant if they secure the contract.

The city expects a visit from the Government Transportation Commission. This important board was there when the late Mr. Bertram was chairman, but in view of the changes that have taken place in the harbor plans this second visit was deemed advisable. The members will be given every opportunity to look into local conditions and the members of the City Council and Board of Trade will endeavor to press on them the necessity of St. John harbor being thoroughly equipped to handle the Canadian winter trade, and so prevent it from going to the old world through foreign ports.

THE CALEDONIAN INSURANCE COMPANY.

More than usual interest attaches to the annual report of the Caledonian Insurance Company, which appears in another column, on account of the fact that it is the one hundredth which has been issued by that solid concern—the oldest Scottish fire office in existence. The net premiums received last year were $2,096,195, indicating the gratifying increase of $226,315. The amount carried to profit and loss account was $223,905, and the addition to reserve for unexpired risks, calculated on a basis of 44 per cent. on new premiums, $99,580. Out of the total profit and loss account a dividend has been declared of $5 per share, besides a bonus of $1 per share. Summarized, the funds of this well-conducted company are as follows: Capital paid up, $537,500; fire insurance funds, $2,272,325; balance profit and loss account, $462,640; life and annuity fund, $11,197,525, or a total (on December 31st last) of $14,469,990.

LIFE AND FIRE INSURANCE ITEMS.

The "Bulletin Life Table," for 1905, the receipt of which we hereby acknowledge with thanks, shows in convenient handy form the business financial standing of the life insurance companies operating in this country in the year 1904 as shown by the returns to Government.

There has been a steady increase for many years past in the favor with which accident insurance is regarded in Switzerland. In 1886 the premiums paid amounted to 1,438,551 francs, in 1896 to 7,231,561 francs, and in 1903 to 12,005,787. In fact all forms of insurance seem in that country to be making great progress.

Mr. John T. Stone, President of the Maryland Casualty Company, accompanied by Mrs. Stone, arrived in Toronto after an extensive trip through the western territory, visiting agents. They left Toronto almost immediately to be present at the annual convention of the International Association of Accident Underwriters at Muskoka.

The Accident Bulletin of the Interstate Commerce Commission of the United States, just issued, shows that during the first three months of the present year there were 28 passengers and 204 employees killed and 1,651 passengers and 2,062 employees injured in train accidents, making in all 232 persons killed and 3,713 injured in train accidents. Other accidents to passengers and employees, not the result of collisions or derailments, bring the total number of casualties up to 15,306 (909 killed and 14,397 injured). There was a decrease of 42 in the total number of persons killed as compared with the quarter ending December 31, 1904.

Mr. William Mackay, manager for Canada for the Royal Insurance Company, has returned to Montreal after a six weeks' business trip, in Manitoba, North-West Territories and British Columbia. Mr. Mackay reports business prosperous, with good prospects.

We note that the Chicago Underwriters' Association has decided to remove all restrictions as to rates and forms on the marine floater for automobile insurance, except where the fire risk only is covered. As the marine forms cover fire, theft and in some cases even the collision hazard, they are the ones in demand, and the result will be lively competition hereafter.

Sweeping reductions are announced in the salaries of officers and employees of the Equitable Life Assurance Society, aggregating an annual saving of more than $200,000. The cut will affect the earnings of all the officers of the society and many of the employees. The following are the reductions: Twenty per cent. decrease from all salaries over $15,000 per annum. Fifteen per cent. decrease from all annual salaries between $9,000 and $15,000, both inclusive. Ten per cent. decrease from all salaries above $2,500 and below $9,000 per year.

As we go to press, there is being held in the Royal Muskoka Hotel the eighteenth convention of the International Accident Underwriters' Association. The attendance is large, and the members are evidently trying their best to unite pleasure with business by seeing as much as they can of the beautiful Muskoka region. On several topics the discussion has been quite lively, for instance on the proposition to limit weekly benefits under benefit policies to fifty-two weeks. President Lott, in an admirable address, referred among other things, disparagingly to the indiscriminate raising of commissions paid to agents. There is something radically wrong with the business when underwriters (as some do) regard the agent's rightful share as 33⅓ per cent. of the entire premium. Other subjects discussed were the "Compilation of Health Statistics," "The Four Parties to a Waiver," etc.

* * *

TRADE NOTES.

Cables from Spain report that the crop of shelled peanuts is exhausted. Advices from Virginia state that stocks of Spanish shelled there are exceedingly light; with some holders asking 6½c. and some 7c. f.o.b. shipping point.

The offerings at the last London wool auction sales amounted to 13,471 bales. Fine merinos and scoureds were in good request for the Continent. Cross-breds realized full rates. Poor conditioned stock was in good demand at an advance of 7½ per cent. Americans bought greasy half-breds at 1s. 5d. to 1s. 5½d.

An estimate emanating from Winnipeg is to the effect that the total wool clip of the Territories this season will be about 700,000 pounds, of which Alberta will give about 290,000 pounds; Medicine Hat, 60,000 pounds; Walsh, 90,000 pounds, and Maple Creek, 220,000 pounds. The quality is described as very fine.

Opening prices for Canada on Fraser river sockeye salmon are somewhat higher than expected, being $5.00 per case for talls, and $5.50 for flats. Rivers Inlet talls, were quoted at $4.65. These prices are f.o.b. common shipping point. Reports received are to the effect that there is large demand in the Canadian market for Fraser river sockeyes at the above figures, and a general disposition on the part of Canadian distributors to protect their requirements.

The salmon fishermen at St. John, N.B., are said to be reaping big returns this season. It is no unusual thing for two men in a boat to make fifty or sixty dollars in a night, and this has been going on for some time, so that numbers of fishermen in the past three weeks must have cleared from three to four hundred dollars. Such a run of salmon has not been known for years. In the early nineties salmon

THE

NORTHERN BANK.

HEAD OFFICE: WINNIPEG.

Provisional Offices: Merchants Bank Building, Winnipeg.

Now opened to complete organization.

The following have consented to act as Directors upon election:

JAMES H. ASHDOWN, President, J. H. Ashdown Hardware Co., Chairman of Provisional Directors.

D. C. CAMERON, President Rat Portage Lumber Co.

G. R. CROWE, President Northern Elevator Co.

H. M. HOWELL, K.C., Messrs. Howell, Mathers, Howell & Hunt.

SIR DANIEL McMILLAN, Lieutenant-Governor Province of Manitoba.

CAPT. WM. ROBINSON, Steamboat Owner, President Dominion Fish Co.

HON. R. P. ROBLIN, Premier Province of Manitoba.

FRED. W. STOBART, Messrs. Stobart, Sons & Co.

E. C. WARNER, President Midland Linseed Oil Co., Minneapolis.

A. STAMFORD WHITE, Messrs. A. S. White & Co., Chicago, and Liverpool, Eng.

Note—The list of Directors is subject to the vote of the Shareholders at their first meeting, who may then increase or decrease the number.

General Manager.

J. W. de C. O'GRADY, Late Manager Bank of Montreal, Chicago, Ill.

Solicitors:

Messrs. Howell, Mathers, Howell & Hunt.

AUTHORIZED CAPITAL, $2,000,000.

In 20,000 Shares of $100 Each.

Of which it has been decided to issue at present 10,000 shares at $110 per share, being one-half of the authorized capital.

TERMS—$5 per share of the par value on application, $15 per share on allottment, $30 per share on the first day of the month immediately succeeding the date of allotment, $10 per share every three months thereafter, on the first day of the month, until the whole amount, including the premium, is paid.

Interest at the rate of 4 per cent. per annum up to the date fixed for payment will be allowed on payments made in advance.

Forms of application for stock, prospectuses, or any further information may be obtained from

S. S. CUMMINS,

Secretary for Organization,

At the Provisional Office, Merchants Bank Building,

MAIN STREET, WINNIPEG.

were plentiful in one season, and the men caught just as many as they are doing now, but the price was then not so high.

A New York report says that the salmon situation is an interesting topic in the grocery trade just now. Several days have passed since the time when sockeyes usually make their appearance in the Straits of Fueca, and still the report by wire to representative houses is that there is no run of fish yet. As the time passes the possibility of an entire failure of the sockeye pack becomes more of a possibility, but the worst that is anticipated as yet is that the season will be so shortened by the delay in the coming of the fish that the pack will be only of moderate size. At both Puget Sound and Fraser River canneries preparations have been made for a heavy pack, this being the year in a series of four when according to precedent the run should be large, and both on the Sound and in British Columbia arrangements have been made to carry over half of the pack so as to prevent the overstocking of the market this year and providing a supply for next season when, in the ordinary course, the run of sockeyes should be light. It looks as if these arrangements will come to naught.

* * *

BANKING AND FINANCIAL ITEMS.

The Catholic School Commissioners of Montreal have sold an allotment of $200,000 worth of forty years debentures to Mr. R. Wilson-Smith at $102.07, at 4 per cent.

We now understand that the matter of the redemption of defaced coins, which we referred to editorially last week, will shortly be taken up by Hon. Mr. Fielding.

The Bank of Toronto on the 18th inst. opened a branch at Winnipeg. Construction work has begun, too, on an imposing permanent building. The manager of the new branch will be Mr. J. R. Lamb, late of Barrie.

The City of Montreal has arranged a temporary loan of $700,000 with the Credit Foncier at 3¾ per cent. It will be used mainly for the retirement of call loans bearing a higher rate of interest. The money, we understand, will be raised in France.

The new Japanese loan met with striking success, the subscription lists in the United States and Canada only being open one day, instead of about a week as announced. The response of Canadians (through the Bank of Montreal was very liberal). These applications will be forwarded to New York and the allotments made on a par with those from the United States. The manner in which the issue was taken up, both in Europe and America, is a striking testimony of the faith of investors in Japan.

The Indian Government has passed a bill authorizing nickel coinage, and appointed a commissioner to make inquiries in connection with the decision. This gentleman, Col. Geoffrey Porter, R.E., Master of the Mint at Calcutta, is at present on this continent and is going to Sudbury, the centre of the nickel production of the world. He desires to see how far the nickel of the Sudbury mines can be used for the coinage which has been sanctioned. The matter is one that is likely to be of considerable importance to this country.

An interesting statement, which we noted in Mr. Fielding's budget speech, was his statement that while between the years 1888 and 1898 the amount of money orders issued in Canada and made payable in foreign countries was between $2,000,000 and $3,000,000 annually, in the year ending June 30th, 1904, they amounted to nearly $8,000,000. The increases were chiefly to the United States, Great Britain, Italy and Japan. This would seem to indicate that the people who had come to Canada had happily found employment, and were able to send money back to the country of their origin.

A few days ago Messrs. E. S. Clouston, general manager of the Bank of Montreal and president of the Canadian Bankers' Association; B. E. Walker, general manager of the Canadian Bank of Commerce; D. B. Wilkie, general manager of the Imperial Bank of Canada, and John Knight, secretary-treasurer of the Association, proceeded to Ottawa and discussed the American silver question with the Ottawa Government. Arrangements for collecting and shipping the silver to the States are now being made. When the Department of Finance is advised of the receipt of such silver from any one of the banks, instructions will be issued for payment to the bank shipping the said coin of an equivalent amount in new Canadian silver from the office of the nearest Assistant Receiver-General. The express charges are to be paid by the Department of Finance. The United States Treasury imposes conditions as to the make-up and contents of packages of silver sent to them for redemption, and all the Canadian banks will be duly notified by the Association as to the American regulations regarding the silver.

* * *

—The annual meeting of the Maritime Board of Trade will open at Yarmouth on August 16th. Among the subjects to be discussed are the following: Daily Steamers between New Brunswick and Nova Scotia, via St. John and Digby; Improvement in the Service to London; Export Duty on Pulp Logs; Co-operative Efforts on the Part of the Governments of the Maritime Provinces to Promote Desirable Immigration from Europe.

* * *

—Mr. Wm. Whyte, second vice-president of the Canadian Pacific Railway and manager of the western division, predicts that the wheat crop of Manitoba and the North-West will reach and perhaps exceed 100,000,000 bushels. His estimate is based on an acreage of 4,000,000 acres and an average yield equal to 1902, when it was 25 bushels to the acre. The C. P. R. is making great preparations to handle the crop. Mr. Whyte believes that 30,000 extra harvest hands will be required.

* * *

—The fifth annual meeting of the Union of Canadian Municipalities will be held in Winnipeg on the 25th to 27th inst. Among the addresses to be delivered are: "Civic Improvements by Day Labor," by Mayor Sharpe, of Winnipeg; "Municipal Financing and Accounting," by Hon. Louis Betz, St. Paul, Minn.; "The Ottawa Electric Fight," by Mayor Ellis, Ottawa; "Municipal Ownership in the Twin Cities of Port Arthur and Fort William," by ex-Mayor Dyke, Fort William; "Municipal Union in Manitoba," by Mayor Fleming, Brandon; "Municipal Needs of British Columbia," by Mayor Stevens, Kamloops; "How a Municipality Can Develop its Industrial and Commercial Interests," by Mr. John Hall, assessment commissioner, Hamilton; "Canadian Cities: Their Positions and Attractions" (lantern lecture), by Mr. Harry Bragg, editor of the Canadian Municipal Journal; "The Construction of Roadway Pavements on Clay Soil," by Mr. H. N. Ruttan, city engineer, Winnipeg; "Municipal Insurance," "The Dominion Telephone Committee," "Improvements in Legislation," "Rural Telephones," "Western Municipal Development," "Railway Level Crossings," "Good Roads," and "Parks and Playgrounds," etc.

OUR HALIFAX LETTER.

The wreck of the steamer "Salerno," salt-laden, off the mouth of Halifax harbor has aroused a good deal of complaint and indignation here, because it is felt that among outsiders it may leave a wrong impression. The "Salerno" was run on a reef right at the shore, and not more than a mile from the spot where the "Grecian" was wrecked two or three years ago. It was the same pilot, Fleming, who put both ships on the rocks, and he has now voluntarily resigned his papers as pilot, giving as a reason, advancing years. The pilot's reasons for stranding the ships would be impossible to fathom, as he had miles of clear water to star-board, and was running away from it! The wreck of both the "Grecian" and "Salerno" would appear to be a feat of sheer and incredible stupidity. The "Salerno" will be a total loss.

A new industry for Amherst will be known as the Dominion Carriage and Bearing Co., Limited. The Company will secure the plant and good-will of A. S. Fillmore, of Southhampton, and the carriage patents of the Hillcoat Bearing Co., Limited, and will make carriages, trucks, and all other kinds of horse vehicles. The capital is $200,000 with power to increase to half a million. A plant will be erected at once. The provisional directors of the Company are as follows:—Hon. W. T. Pipes, N. Curry, H. L. Hewson, A. S. Fillmore, C. J. Silliker, Harvey Pipes, F. S. Blair.

The Londonderry Iron Company's blast furnace at Acadia Mines is now running in good shape, and turning out about 110 tons of iron daily. The Picton Smelting Company of Pictou, N.S., are now making preparations to get their plant in running order, and expect the furnaces to be ready for blowing in in about two months.

The city will grant the sum of $10,100 towards the buildings for the Dominion Exhibition to be held here next year.

Rhodes, Curry & Co., of Amherst, have purchased the property of the Sydney Manufacturing Company, Sydney, C.B., consisting of a large block of land, buildings and woodworking machinery, and including the largest wharf and storage shed in Sydney. This firm, one of the most important in the province, has just handed over two new first-class cars for the I. C. R., the first of an order for twenty. They are painted bronze-green with gold bands, and will be put on the Ocean Limited. It is the intention to have the whole train made up in this color scheme as soon as cars are obtainable. The cars cost about $15,000 each.

Plans for the improvements to the Exhibition equipment, in view of the coming of the Dominion Exhibition, are proceeding satisfactorily. It is proposed to erect a mining building, octagon shape, fifty feet in diameter; a fisheries building of the same shape, 75 feet in diameter; and a woman's building. Some of the buildings will be erected at once.

The apple crop, owing to the severe frost in the early part of June, will not be quite so good as expected; but happily the greater part of the Valley escaped the frost. It is expected that should nothing further occur to interfere with the growth of the fruit, the crop will be about half a million barrels. This would be much better than an average yield, but, of course, it is not yet in the barrels! English fruit brokers intend, during the coming season, to have fruit shipped direct from Kingsport, which it is claimed, will reduce the cost of shipment forty cents a barrel.

* * *

NORTH OF ENGLAND LETTER.

While England is pardonably effusive in its manifestations of feeling towards its Canadian guests, there are some sinister whispers of unfriendliness or disloyalty in Canada. "No English need apply" is said to be a too common cautionary warning either expressed or implied for the instruction of those seeking work. Perhaps Canadians will be as surprised as we English to be informed that this attitude is at all common. But Canada of course has its foreign-born population and its percentage of disgruntled Britishers who curse the land that gave them so cold a welcome. Also the Dominion seems to have its share of dogs-in-the-manger, who resent the intrusion into "their" country of anyone from over-sea. This feeling manifests itself in such speeches as were made to a friend of mine in Montreal last yar. I bowdlerise the language, which was as strong as language ever ought to be when applied in the most righteous cause: "You—you gol-darned Englishman! What the blazes do you want here?" Equivalent phrases were used more than once and it was as displeasing to him, no doubt, as the huckstering insinuation of the Jew politician who has been stigmatizing his adversary as an "alien," because, forsooth, he was born in Canada, may well be to Canadians. Mr. Cohen, however, is among an infinitesimal minority if he be not ashamed of his tactics for even electioneering use.

Buyers of imported glass will be interested in the remarkable bargain concluded between British and Belgian glass-makers. The three principal firms (Pilkington's of St. Helens, Chance Bros. of Birmingham, and the Glasgow Plate Glass Co.) have arranged with their only serious rivals in Europe to partition the markets of the world. Belgian manufacturers are not to sell any rolled plate glass, muranese, tinted or embossed glass in Great Britain or in the British Colonies except to the order of the three firms mentioned. On their part the English makers contract to receive a certain proportion of the Belgian output. Thus a virtual monopoly has been created and "your glass will cost you more," as our Liberals say of foods. Already prices in England are high. In six months rolled plate has advanced a farthing per foot and the Belgian muranese and cathedral glass which cost between 2 pence or 2¼ pence last year is now at 2¾ to 4½ pence per foot. Continental prices have gone up similarly now that British competition has been disposed of and perhaps prices are not very likely to come down soon.

A parallel to this extraordinary compact in the glass trade may be found in the international agreements as to iron sales, which Canadians will know all about. Whether any further bargains may be expected is not known. It is being said, with some show of plausibility, that these developments are due to the delay in converting England to tariff reform. Unable to obtain state protection manufacturers are protecting themselves; as they doubtless would in any circumstances. We shall see with what tenacity the international terms are adhered to by contracting parties. Of many attempts to squelch insular competition few have succeeded. Pools and alliances, including men as well as masters, have all broken down. Seven years ago we came to the conclusion that no combination, short of complete amalgamation, could be satisfactory in its efforts. But even the combines have been a very partial success, some have succumbed to *force majeure*, some are wallowing in the trough of the sea and one or two do positively maintain prices. In the case of that watertight concern, the wallpaper combine, it is notable that importations have largely increased and the better trade and not the cheapest is affected most heavily by foreign competition. Nothing in the world seems harder to retain than a valuable monopoly.

A suggestion that, on the whole, has been well received is that the State should add to its multifarious other functions, that of public executor. A bill permitting testators to employ the public trustee (who is yet to be appointed) has passed the Grand Committee on Law. The emendations made in the measure by that body have aroused the feelings of bankers, whose business to a considerable proportion is with trustees and executors. The serious feature is that the bill would transfer all accounts in the public trustees' care to the Bank of England, thus removing them from the hands of the financiers who know the affairs thoroughly and who are usually disposed to go some way to accommodate the business at a frequently awkward pass. In a cogent letter addressed to members of Parliament the Manchester and Liverpool District Banking Company point out the needlessness of this provision and the injustice it must work to banking interests. Only the gravest reason can justify interference with the free relations of banker and customer and we have, as you have in Canada, strong companies performing

executors' functions on lines that leave no room for reproach.

The richest plum in the insurance world of these Islands has fallen to Mr. J. B. Gunn, manager of the Scottish Amicable office. He has been appointed in the room of M. A. H. Turnbull, manager of the Scottish Widows' Fund. To its last occupant the post was worth $25,000 a year, or considerably less than is paid in the United States to the heads of some companies.

A small life office, the Scottish Imperial, has been absorbed by the Norwich Union, which is paying 42 shillings for each £1 share. In the former company share-holding and policy-holding interests were in needless conflict. While quinquennial bonuses upon policies were being reduced from 26 shillings to 10 shillings per cent., shareholders were drawing first 7½ then 8¾ and ultimately 6 per cent. dividends. As in private concerns this method tends to keep an insurance office business small, and the criticism oftenest used against the Scottish Imperial was its operations were on too limited a scale to permit of all due economies. Hence the bargain is thought advantageous probably to both parties.

Within the last ten years street transport has made stupendous progress in this kingdom. The figures are not immediately to hand showing the position before the coming of the overhead trolley electric car. But now our electric trains cover 190 million miles per annum, carrying 1,800 million passengers. Some 75 municipalities own their own tramway services on which the traffic expenditure exceeds $105,000,000. The corporation cars run 113,000,000 miles with 1,100,000,000 passengers, or nearly twice as many passengers as three years ago. By cityfuls we are losing half the use of our legs and the temptation to ride is to be increased at the same time that foot-transit is made more dangerous. Engineers are arguing that loss of life through accident is so small that speed-limits might well be raised without fear of disastrous consequences. That sort of reform will come on slow legs, for misfortunes when they are induced do not come in singles. Of course we are still much in the dark. Nobody knows yet what is adequate depreciation to allow upon tramway tracks or plant. Nobody knows how soon the street standards and power houses may be doomed by the appearance of an economical auto-tram or motor car. But nobody doubts that our tram services as they stand are infinitely preferable to their predecessors on the road.

North Country.

Manchester, July 7.

THE GROWING WEST.

By Allen West.

(Continued.)

The Coal that Explodes Like Torpedoes.

"Another lignite coal, but not nearly as good, is just outside of Manitoba, on the south-western boundary of the Province, on the Souris river. There is some of this coal in Dakota, through which the Souris river flows under the name of the Mouse river. It is very high in moisture, and, therefore, if it is burned fresh mined you require certain conditions to get combustion. If the fire is low and coal is put on, the amount of moisture will extinguish the fire, but if it were allowed to dry out gradually, it makes a very good fuel. If it is exposed to the hot sun or the hot winds suddenly, the moisture comes out so rapidly that it disintegrates and goes all to pieces, and you will hear a crack like a revolver going off. Before we built out to these mines, I took a long wagon drive out to see them. I stopped at a little hut, where one of the miners lives, and while his wife was getting a meal for me I went into the mine and got out a piece of coal. It was 100 in the shade that day. I put the coal on the seat of the wagon, started to drive back, and the reports of the coal explosion were like a fusilade. That is how one gets knowledge—not second hand.

"The woman had let the fire go out. I asked her: 'Does this coal give off much soot?'"

"'Oh, no, Mr. Whyte.'

"'Your stovepipes are pretty cool. Do you mind if I stand on a chair and take off a joint?'

"'No, sir.'

"'How long have they been up?'

"'Since July.'

"I broke a joint. I found very little soot in the pipe, so I knew that coal could be used under certain conditions. So we built a line up there, and are now shipping that coal every day to the farmers. It is cheaper, because the source of supply is so much nearer than Lethbridge, and cheaper to mine. This Lethbridge coal, however, is very superior."

Coal at Four Dollars Per Ton.

"How much is Souris coal?"

"Delivered, it averages $5 a ton at Winnipeg, $4 per ton at places nearer the mines. We put in an adequate system of branches radiating from these mines to carry the coal to the farmers because we realized that cheap coal would assist in the settlement of the country, and in this undertaking the Manitoba Government extended its aid.

"You see the Canadian Pacific is not to be solely credited with the development of the coal fields."

Mr. Whyte then speaking generally, said that next to the wheat region is a large ranching property. It does not consume or produce a great deal, there being few settlers.

"That country we thought only suitable for ranges on account of the dryness of late years.

"In recent years we find that it can produce winter wheat, a soft wheat, and a considerable portion of range land has been taken up by farmers to raise winter wheat."

"Are they doing well?"

"Yes; winter wheat yields more bushels per acre than the wheat of Manitoba or Assiniboine. The yield is 30 to 40 bushels to the acre.

The Dairy Country Near Edmonton.

"North of the main line to Edmonton is the dairy country,—not what you would call wheat country. The growth is rank. This region is near the mountains and the precipitation is therefore considerable. There is great moisture both from snow and rain.

"Oats grow 7 feet high. I have known them to grow 80 to 100 bushels to the acre and weighing 40 pounds to the measured bushel. The standard is 45 pounds to the bushel.

"I came from that part of Scotland which is famous for oats—Midlothian—the scene of Sir Walter Scott's "Heart of Midlothian," and I used to think that nothing could compare with the oats raised there until I saw the oats raised in the region of which I am speaking.

"The oat industry of this section is bound to be a great feature of Western Canadian development.

"Oats is a food of great merit.

The Oatmeal Mills of Edmonton.

"There are oatmeal mills at Edmonton which are bound to multiply and prosper. It is no use to produce anything unless you have a market for it. This section is too far from Great Britain and the East, for neither oats nor oatmeal could stand freight that distance; but we find our markets in British Columbia. All these mining countries need the coarser grains, such as oats and barley, and also hay, and they also need butter, cheese and fresh beef.

"The next market is the Yukon. The mining activities there make a larger demand for the things produced in the Edmonton district. They produce nothing in the Yukon.

"The Orient also is a market for dairy products.

A Milking Machine that Solves the Labor Problem.

"Labor is necessary to the success of farmers. The scarcity of labor is a great drawback in that great mixed farming district.

"In Australia, I find that the labor scarcity is felt to a greater extent than in any country I know of and they have devised a milking machine. Other milking machines resulted in injury to the animal, but the Lawrence Kennedy milking machines used on the farms in Australia produce results without injury.

"The explanation is simple. There are two ways of milking. On is by hand—that is pressure. The other is the calf method, which creates a vacuum. The Lawrence Kennedy machine is built on the plan of the calf. The cow prefers being milked by this machine to being milked by hand. I have ordered some of these machines from Australia to be tried in our western dairying district.

"In my office in Winnipeg I have a statement that shows the number of tons of evaporated cream and condensed milk that are shipped to British Columbia, the Yukon and the Orient, and I find that the Eastern Canada and United States business in that line is pretty large.

Cream Industries and Condensed Milk Factories.

"There is no reason why cream industries and condensed milk factories should not be erected in what I have described as the dairy district when the markets are so good and so certain. Many are going into this undertaking.

"I believe that more of our settlers should go into mixed farming. If the farmer does not get a good season in one line of production he will in another and then again, mixed farming and stock raising will keep him profitably busy through the winter as well as the summer.

"The section of which I am speaking is beautiful country. It is not so rigorous as other sections. The winter is not so severe.

"It is more of a park country. The territory where the hard wheat grows has few lakes. On the contrary, in this dairying section pea vines grow two or three feet high. The land rises to bluffs green with trees. These trees yield all the fuel settlers require.

Drawbacks of the Prairie Compared with Uplands.

"The flat prairie has drawbacks especially for women folks. Looking out of the window they see the same view all the time. In the dairying country you see the light on the bluffs as the sun advances and each hour of the day is full of delights to the eye. This dairying country is within 100 miles of the mountains.

"The city of Edmonton is the centre of a very rich district, which has a large supply of lignite coal which is better than the Souris coal, though not as good as the Lethbridge coal.

"Edmonton is a beautiful residential region.

Calgary and the Irrigation District.

"You have heard of the Canadian Pacific Railway's large irrigation scheme, the largest on the continent? We have gone into it because in the original charter we were to be given certain lands fairly fit for settlement. We were entitled to the odd sections in each township except two for the Hudson's Bay and two for school sections. In developing this section, the government saw clearly we would need the land *en bloc* and it was arranged for us to have it in order to make our irrigation plan a success.

"The main irrigation canal is 60 feet wide at the bottom, 10 feet deep and 120 feet wide at the top.

"We have already 20 miles of irrigation canal which takes water out at the rate of 2,000 cubic feet per second. There is no danger of insufficiency. We are building a main canal and 100 miles of secondary canal. The land is fertile and the climate good for the production of crops. It takes soil, climate and moisture and this section lacks moisture. Year by year, however, sufficient precipitation is assured if supplemented by irrigation.

"The irrigation would not be sufficient for the one and a half million acres, but it is ample to supply the deficiency in the regular rainfall.

"Calgary is a large and important business centre.

(To be Continued.)

* * *

The Greenwood duck mills in New Hartford, Conn., which have been closed down for about three years, are now reopening, with about 650 hands.

* * *

—Mayor E. F. Dunne, mayor of Chicago, has now, it would seem, changed his views regarding municipal ownership somewhat since Mr. Dalrymple's visit. Absolute municipal ownership and operation he does not consider practicable. His present plan provides for the incorporation of a company, managed by five men, who command the confidence of the people. To this company is to be granted a twenty year franchise, covering the streets in which the rights of the old companies already have expired or soon will expire. The stock is to be sold at popular subscription. At any time the city may elect it can take over the property on an appraised valuation.

* * *

—We have received from the Medicine Hat Board of Trade a little pamphlet, the aim of which is to interest manufacturers in the natural gas which is to be found near that place, and in the opportunities it offers for the establishment of manufacturing enterprises there. It is compiled by W. Cousins, Dr. C. F. Smith and F. G. Forster. It is interesting to note that as early as 1883 the C.P.R., when boring for water some forty miles west of Medicine Hat, struck gas. This discovery, however, was not followed up until 1891, when a new well revealed gas at a depth of 660 feet. Still another well, bored down to the rock a depth of over 1,000 feet, is yielding over 1,100,000 feet per day.

* * *

—The firmness in the worsted yarn market continues, and business is being done for considerable quantities at late rates. Users are anticipating their future wants, and not only covering their yarn requirements of all the manufactured goods they have sold, but are trying to arrange for what they are likely to sell within the next two or three weeks. In this particular there is something approaching a speculative basis, which may in a measure be justified by the way spindles are employed and by the disposition shown by their customers to enter into negotiations for a future supply of goods. Prices cannot be quoted any higher than they were a week ago, but they are higher than at the beginning of the month, and each transaction is in favor of sellers. The chief business for immediate delivery is for mixture yarns, on which dress goods manufacturers are making an exceptional demand.

* * *

—On the 7th inst. the Vancouver Board of Trade listened to a highly interesting address by Mr. J. S. Larke, Canadian Trade Commissioner to Australia. Mr. Larke referred to the progress of trade between Canada and Australia since he left the Dominion, ten years ago. In that time it had increased tenfold. Canadian goods entering the Commonwealth were generally put down as American. According to the Australian statistics, Canadian exports, only amounted to £5,000, when the actual figures were £75,000. There was a splendid market in Australia, he said, for fish of established reputation. Some of the Skeena salmon had realized fine prices by virtue of its excellence. As to fresh fish, it was necessary first to have an organization which would arrange the distribution in the large cities; and secondly, to be able to keep up the supply throughout the year, which would mean freezing apparatus here and cold storage shipment. The shipment of herrings had been prejudiced by the use of defective barrels.

Harris Flanders, a Montreal furniture dealer in a modest way, is reported in trouble, and makes an offer of 40 cents on liabilities of about $2,500, payment to be made in two instalments at two and four months, secured.

Mercantile Summary

The Robb Engineering Company has received from Ahearn & Soper, Limited, an order for a 50 horse-power engine for the Dunlop Tire Company, Toronto.

M. Bedard, in the grocery line at Quebec since the spring of 1902, has assigned to V. E. Paradis. He owes about $2,700.

Plans are being completed for the extension of the Windsor Hotel in Montreal. The new building will be 130 feet in height, and work is to be started in September. New York architects are responsible for the design, but it will be mainly executed by Hutchison & Wood, of Montreal.

A meeting of the creditors of G. Labonte, St. Sauveur des Montagnes, Que., is called for the 26th inst. for the appointment of a curator. Labonte is a carriage maker, in which line he started about six years ago. Subsequently he opened up a small general store, looked after mainly by his wife, a venture which resulted disastrously.

M. Laurence, general merchant, St. Faustin, Que., has assigned to A. Lamarche, accountant, Montreal. He has been in business about twelve years, doing a fair-sized trade for the district, which is a comparatively new one. He has trusted out freely, carrying some $8,000 or $9,000 on his books and has generally been found pretty slow. His liabilities will reach, it is estimated, somewhere about $18,000.

J. A. Redmond, of Marie Joseph, N.S., carrying on a general business under the style of Redmond & McDearmid, makes a rather unique proposition to his creditors, namely, to pay them 20 per cent. of their claims at the end of the present month, like instalments in August and September, and the balance of his indebtedness when he is able. His indebtedness is figured at about $3,000.

G. A. Shand, a lobster packer of Pubnico, N.S., is reported as having assigned to E. H. Armstrong for the general benefit. He has followed the business for quite a number of years, but not apparently with any great measure of success. In May last his factory premises were destroyed by fire, his loss being estimated in the vicinity of $5,000, against which he had no insurance.

The C.P.R. is reported to be arranging with the West Kootenay Power and Light Company to supply power to run the boundary railway. This is in view of the proposed electrification of the entire system from Nelson to Midway. The operation of heavy ore trains by electricity will be first tested in Rossland. The latter company are now building a high-tension power line from the hydro-electrical works at Bonnington Falls, on the Kootenay river, near Nelson, eighty miles into the Boundary country, to supply mines and smelters which the Cascade power works are not equal to.

WRITE US FOR BOOKLET AND LATEST LIST OF OFFERINGS.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The assignment is noted of Elzear Gibeau, of Ste. Martine, Que., formerly a hotelkeeper, and for the past two years dealing in hay and grain. The liabilities are mainly local.

An explosion took place at Brownsburg, Que., at the Dominion Cartridge Company's works, whereby four men were killed and several injured. It was caused by a detonating plane exploding and igniting all the others.

The Canada Hay Company, Limited, has received a Dominion charter authorizing it to carry on the business of general hay dealers and agricultural products. Its head office is Montreal, and its capital stock $49,900. It will acquire the business now carried on in Joliette, P.Q., by Napoleon Allard.

Mr. R. A. Broomfield, of Pittsburg, Pa., secretary of the Dominion Natural Gas Company, Limited, which owns natural gas fields between Dunnville and Port Dover, Ont., from which gas is supplied to Dunnville, Cayuga and Dundas, is asking for an opportunity to enter Toronto, where he claims the company could supply the city with all the gas required at 45c. per thousand.

The Keewatin Flour Mills Company, Limited, of Ottawa, we understand, have contracted with the Macdonald Engineering Company, of Chicago, to erect at Keewatin, Ont., a large fireproof milling and elevator plant, costing $750,000. Both buildings are to be entirely of steel-concrete construction, and will have a capacity of half a million bushels storage, and an output of 5,000 barrels of flour per day. Work is to be commenced at once, and to be completed early next year. The contract includes the development of 2,000 horse-power on the water privilege owned by the company at Keewatin, to be used for driving the mill and elevator and furnishing electric current.

In a recent issue we reported the failure of Max Genser, a Montreal furniture dealer, an event which had given rise to considerable unfavorable criticism, as he showed some $27,000 of liabilities, with insignificant assets, notwithstanding the fact that he had been buying large bills up to within a few days of his assignment, not only of furniture, but also of dry goods, jewelry, etc. Some of the leading creditors have since been probing into matters, with the result that it has been discovered that goods had been surreptitiously removed from the premises, some to auction rooms and some to other stores run by connections of the insolvent, and altogether sufficient evidence has been secured and presented before the judge, with the result that Mr. Genser has been committed to stand his trial on a charge of fraud. The creditors seem determined to make an example in the matter, which will have a deterrent effect upon those disposed to follow in Mr. Genser's footsteps.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Walker House in Toronto has been purchased by G. Wright and M. Carroll, the price paid being in the neighborhood of $65,000.

The Western Counties Electric Company, Limited, Brantford, capital stock $500,000, has been incorporated. It will develop and sell and transmit electric energy. S. F. McKinnon and J. R. Shenstone, of Toronto, are among those interested.

The Jenckes Machine Co., of Sherbrooke, Que., will erect a large western factory in St. Catharines, Ont., on the new Welland Canal. The ratepayers of that pretty and at the same time progressive little town have by a large majority carried a by-law granting the company a free site and exemption from taxation.

The Ontario Transmission Company, Limited, Niagara Falls, Ont., capital stock $1,000,000, has received a Dominion charter to acquire water privileges, water powers, etc., and to operate and maintain plants for the generation of steam, electric or other motive power. J. S. Lovell and W. Bain, of Toronto, are among the charter members.

The shareholders of the Central Railway Company have authorized an increase of share capital and the issue of mortgage bonds, it being the intention of the company to build a road from Montreal to Georgian Bay, via Ottawa. Arrangements are almost completed for the early construction of the line, and in a few weeks construction would commence.

It would seem that construction on the western section of the G.T.P. is to proceed immediately, as tenders are to be called for this month. The route is definitely located westward to the intersection with the Regina-Prince Albert branch of the C.P.R., and provisionally to Edmonton. Construction will begin in the vicinity of Portage la Prairie, and the first contracts will cover a section 400 miles in length. The reason for starting so far from Winnipeg is said to be the fact that terminal facilities have not been settled definitely.

Satisfactory reports were read at the meeting in Montreal last week of the Dominion Iron and Steel Company. The rod mill is described as running to perfection, while the work being done by the steel rail mill is also good. It is understood that the company has orders for about 50,000 tons of rails on hand, and only a short time ago the management was obliged to refuse an order for 25,000 tons, as it could not be filled in the time required. The rail mill at the moment is only running at the rate of 150 tons a day, but the output will probably be increased. The tests made were highly satisfactory. It is interesting to record the fact that the Dominion Company rails came out better than English rails and the rails from another leading foreign concern that underwent the same test. Col. Pellatt, of Toronto, was elected a director.

Mercantile Summary.

The British Columbia Electric Company is putting on some new freight and passenger cars, which are described as being among the finest and speediest in Western Canada.

The Britannia Copper Company, Howe Sound, B.C., has purchased the steamer "Albatross," and will use her her on the run between their mines and Victoria.

A news item from Whitby, Ont., dated 16th inst., said that the Keystone Sugar Co. had purchased the Whitby Harbor Company's property for $60,000, and the factory will be built as soon as possible.

The company operating the Molly Gibson mine, in the Kootenay district of British Columbia, has been reorganized, and the sum of $70,000 has been devoted to further development work.

George Smith & Co.'s hardware establishment in Halifax, N.S., was on the 15th inst. damaged by fire to the extent of $35,000, covered by insurance. The fire is attributed to spontaneous combustion in a pile of cotton waste.

The St. Catharines (Ont.) tannery is to be enlarged, and a plant will be installed for the manufacture of high-grade leather shoe laces. For the latter purpose we understand that expert workmen will be brought from England.

The promoters of the proposed new steamship line between Liverpool and Quebec seem to be meeting with difficulties in arranging facilities with the Harbor Commissioners of the latter city. It is believed, however, that the scheme will carry through eventually.

A change is to be made in the boundary line of Quebec and Ontario. The interprovincial boundary line of Quebec and Ontario, which has been run to the forty-second mile on the Height of Land, is to be further extended for 100 miles. It is desired to prolong the line, which runs on the meridian, about 79½ degrees west longitude, to meet Spate's line of 1902, north of Lake Abitibi. This would leave about 130 miles more to James Bay. The construction of the Grand Trunk Pacific Railway renders necessary the settlement of the boundary.

Mr. D. D. Mann, of Tortno, has, we hear, purchased the St. Leon Springs property, including the hotel. It is understood that the properties will ultimately belong to the Canadian Northern Railway Company, and that many improvements are to be made to them. A new hotel will be constructed, it is said, and it is also stated that the company will soon own a number of hotels in different parts of Canada in connection with their railway system. An electric railway will connect the Springs with the Great Northern Railway, some six miles distant, if present intentions are carried out.

Tenders for Debentures of the Moose Jaw, N.W.T.

SCHOOL DISTRICT.

Sealed tenders will be received by the undersigned up to 18k. (6.00 p.m.) on 1st August, 1905, for the purchase of Fifty-five Thousand Dollars ($55,000) of Debentures of the Moose Jaw Public School District No. 1, N.W.T., as authorized by the Department of Education, payable to the bearer in thirty equal consecutive annual instalments.

Debentures are in denominations of One Thousand Dollars ($1,000) each, and bear interest at five per cent. per annum.

HAROLD JAGGER,
Secretary-Treasurer,
Moose Jaw, N.W.T.

An important event in the retail business world of the West took place last Saturday, when the T. Eaton Company's branch store in Winnipeg was formally opened to the public.

Guelph, Ont., city council has passed by-laws providing for a subscription of $48,000 towards the capital stock of the Guelph Radial Railway, and for the obtaining of a temporary loan for sewerage construction.

This week the SS. Angola sails from Montreal to Cuba and Mexico with practically all her cargo space taken. The cargo includes paper, flour, hay and paving blocks, while some fish, wood pulp and lumber will be added at Halifax.

The Cape Breton Coal, Iron and Railway Company is negotiating for the acquisition of the charter of the Cape Breton Railway Company, which has a line in operation from Hawkesbury to St. Peter's. Surveys have already been made as far as Sydney, and a very little additional construction would bring the road through the first-named company's coal properties.

A large real estate deal is reported from British Columbia. P. A. Paulson and associates, of Cranbrook, have purchased from the C.P.R. a tract of land in East Kootenay, on both sides of Kitchener, along Goat river and Meadow Creek. The land extends about eight miles up and down the valley, and, it is said, will make the largest hay ranch in the Province. It also contains much fine timber, and it is Mr. Paulson's intention to place a sawmill on it.

Mercantile Summary.

Mr. P. Davis, of Quebec, has received from the Harbor Commissioners the contract for strengthening the foundation work and walls of the Louise docks in that city at a cost of over $500,000.

A bridge over the Magpie river on the Lake Superior section of the C.P.R. was burned two or three days ago, and traffic thrown out of gear. Latest reports show, however, it is speedily being replaced.

On the 15th inst. a storm almost approaching a cyclone in violence swept over Winnipeg, and the Hoover-Town Manufacturing Company's building fell with a crash, killing four inmates in an adjoining house and injuring several others.

The mail test by way of Sydney, from which so much was expected, was something of a disappointment after all. However, the trial has shown that from May 10 to July 1, when vessels have to take the Cape Race route, time could no doubt be saved by delivery at Sydney; but after that date, when vessels come via Belle Isle, delivery at Rimouski is perhaps more expeditious. The Virginian's trip this time is nevertheless gratifying, inasmuch as the mails were delivered at Montreal a day earlier than would have been the case if they had gone via the White Star Line to New York. The run on the Intercolonial from Sydney to Montreal was a rather remarkable one. The total distance was covered in twenty-two hours and thirty-eight minutes, about ten hours faster than the ordinary time. The average speed was 43.62 miles an hour. Between Levis and Montreal an average of 44.67 miles was attained.

The two passenger ships now under construction for the Canadian Pacific are expected to be completed and delivered to the company, ready for service, in April and May, 1906. They will be 14,500 tons, 550 feet in length between perpendiculars, 65 feet beam, with accommodation for 300 first saloon passengers, 350 second cabin passengers, and 1,000 steerage passengers. Their speed will be 20 knots per hour.. This insures a sea speed of not less than 18½ knots per hour across the Atlantic. The distance from Moville to Rimouski via Cape Race is 2,457 nautical miles, and via Belle Isle, 2,289 nautical miles. The new ships will, therefore, make the run from Moville to Rimouski via Cape Race in five days and thirteen hours, and via Belle Isle in five days and four hours, showing a decrease of seventeen hours below the records so far made by the Allan ships. Assuming that mails are carried on the C. P. R. ships they will be delivered in Montreal from Moville in five days and twenty-three hours via Cape Race, and from London in six days and fifteen hours. Passengers from Liverpool will be landed in Quebec in six days and six hours, which should do much to popularize the Canadian as against the New York route.

TRADE MARK

CANADA PAPER Co.
LIMITED,
Toronto. Montreal.

SEALED TENDERS addressed to the undersigned, and endorsed "Tenders for alterations, Custom House, Toronto," will be received at this office until Monday, July 31, 1905, inclusively, for alterations to the Custom House, Toronto, according to plans and specifications to be seen at the Department of Public Works, Ottawa, Ont., and at the office of Messrs. Curry, Sproatt & Rolph, 90 Yonge St., Toronto.

Tenders will not be considered unless made on the printed form supplied, and signed with the actual signatures of tenderers.

An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent. (10 p.c.) of the amount of the tender, must accompany each tender. The cheque will be forfeited if the party tendering decline the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By Order,
FRED. GÉLINAS,
Secretary.

Department of Public Works,
Ottawa, July 10, 1905.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

CHEAP TRIPS TO CHARLOTTETOWN AND SYDNEY.

Special rates have been arranged for Home Comers' Summer Carnivals at Charlottetown, P.E.I., July 24th to 31st, and Sydney, C.B., July 31st to August 5th. Through tickets and full particulars can be obtained at the Intercolonial Railway office, 51 King Street East, King Edward Hotel Block, Toronto (N. Weatherston, agent), for these festivals, and also in connection with all eastern seaside resorts. Berths can be secured in advance.

The Intercolonial office has just been furnished with a new set of pictures, which the travelling public are invited to call and see.

Mercantile Summary.

The Heberlein process for the treatment of low-grade silver-lead ores, which has been under test at the Marysville, B.C., smelter for the past few weeks, is now pronounced a thorough success, and it is claimed that its use will effect a saving of at least $5 per ton in the treatment of such ores. It would appear likely that the other smelters engaged in similar work will find it expedient to adopt the same process. At any rate, its success is likely to mean a good deal for the mining development of the Slocan district.

It is stated that the Canadian Northern Railroad will resume construction operations on the Neepawa-Clan William branch, and will continue work until the line is tied on to the present main line at or near Kamsack. The line will make the route between Winnipeg and Edmonton 300 miles shorter than the route of the C. P. R., and will eventually become part of the main transcontinental road, which the company hope to have completed within the next five or six years. Neepawa will be a divisional point, and there will also probably be another divisional point at McCreary Junction on the Dauphin line.

An exchange speaking of the mining development going on around Kaslo, B.C., says that at the Cork mine, ore is being broken down for mill feed. In the lower workings a strike of two feet of concentrating ore was struck recently, which is in twenty feet of concentrating ore, and widening out. A cross-cut tunnel is being driven on the Vera, which is now in fifty feet, with twenty-five feet more to run before the lead is cut. A trail and bridges are also being built to this property. Adjoining the Vera, a company are working a group of three claims, which have the Vera lead. A tunnel is being run on the vein. T. Walton and some friends have taken a lease and bond on the Bell group, adjoining the Gibson, and have commenced work.

It will interest many of our readers to learn that the Havana Central Railway, in which many Canadians are interested, has awarded contracts for the construction and equipment of a great electric railway system in Cuba. The company is to operate a network of interurban lines radiating from Havana, and covering extensive territory in the interior of the island, which hitherto has been without transportation facilities. About 125 miles are to be constructed in the first instance, involving an expenditure of nearly $5,000,000. The road, besides catering for passenger traffic, will have a freight service for fruits, vegetables and other products. The power house will be constructed in Havana, and will operate 7,500 horse-power of electric energy at 19,000 volts. The initial rolling stock for passenger service will consist of twenty-four 30-ton cars, holding fifty passengers, and equipped with four motors, geared for a maximum speed of forty miles an hour.

THE LOSS OF THE GUIDING HAND

often means ruin to even the best organized undertakings.

The only way to compensate for such loss is by means of adequate insurance.

RAILROAD FORESTRY.

It is calculated that the railroads of the United States require 620,000,000 wooden cross ties, and every year 100,000,000 new ties must be cut. This strips annually 200,000 acres of perfectly wooded ground; it actually scars many times that area. With the tremendous demands of the paper-makers, the mining engineers, the builders, and a thousand more users of wood, it is no wonder that the railroads are forced to go farther and farther away from their lines to get their ties. In vain have they tried to substitute metal. To-day the great Pennsylvania system is forced to go to Virginia, West Virginia and Kentucky for white oak, and the southern supply of yellow pine is in hailing distance of practical exhaustion. As a consequence of these conditions, which promise to become worse rather than better, many large railroads are experimenting with the planting of trees to supply their own ties. Sometimes the trees are set out along the right of way, but in more important instances, on other land owned by the railroad or purchased especially for the purpose. Some of the roads, the Pennsylvania, for instance, is going into this work with a careful application of intelligent methods of forest management. In the middle west and south, roads like the Illinois Central, the Michigan Central, and the "Big Four" are setting out catalpa trees, which do fairly well in the right soil. The Pennsylvania after varied trials has found the yellow locust to be the best wood, more enduring even than the white oak. A white oak tie will last about ten years, and then goes out of use on account of the rail cutting into it, rather than disintegration. By the end of the year the Pennsylvania will have more than 100,000,000 locust trees set out over some 2,500 acres. A wonderful sight these plantations must be in the June blossoming time, and an excellent lesson to the community in the necessity for decent care in lumbering and forest management. But this single road will eat up the annual cutting from 39,000,000 trees, a fact that shows strikingly the absolute necessity for larger provisions for reforestation than these useful experiments of individual corporations. This all goes to show the absolute necessity of Canada taking good care of its forests—better care than she has taken in the past.

⁂

TORONTO MARKETS.

Toronto, July 20, 1905.

Drugs, Chemicals, etc.—While local trade continues about as good as can be expected at this time of the year, nothing of a particularly new nature has developed. For quinine and opium the demand experienced is about as described in recent numbers. Cod liver oil is more plentiful, and holders are easier in their views as a consequence. New York reports speak of average activity for the season prevailing in that market. Manchester advices say that not much change has occurred recently. The trade for home requirements is small, and of a hand-to-mouth order, while for export the conditions are a little better.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Dry Goods.—The intensely hot weather has brought about something of a lull in the demand for goods, though it is altogether likely that in the end it will be found to have increased it. No complaint has been heard during the last few weeks respecting the general outlook for trade. All seasonable goods, particularly in dress materials and similar lines, have been snapped up eagerly. The advance in cottons is likely in the end to increase the demand, because some retailers have for long past been hoping against hope that prices would fall, and now they have at last assured themselves they will not. Therefore, they will no longer hesitate to fill their wants. Woolen goods are in a similar position to those of cotton as to values. They are rising, or are at least very firm all the time.

Flour and Grain.—The prices of wheat still remain high, but, comparatively speaking, little business is being carried through; that is, speaking of Manitoba wheat. Ontario wheat is falling, and buyers are holding off until they have clearer ideas as to the crop prospects. Flour also is very dull, and some ninety per cent. patents have this week been purchased far below the current prices. Quotations range from $4.15 to $4.25. Rolled oats are now more steady than they were. Nothing new has developed in the demand for millfeed. Peas are wanted, but they are scarce. Oats and barley are both a little easier.

Fruits and Vegetables.—Receipts of fruit this week have been heavy. End lots of strawberries have now come in, with their quality not very high. Blueberries and raspberries are more abundant, and prices a little easier. We quote: Strawberries, 5 to 12c.; cherries, per basket, 50c. to $1.25; raspberries, 8 to 11c.; blueberries, basket, 75c. to $1.25; red currants, basket, 75c. to $1; gooseberries, basket, 75c to $1.50; California peaches, case, $1 to $2; do. plums, $1.25 to $2.50; do. apricots, $1.50 to $1.75; pears, $4; Georgia peaches, $2.25 to $2.50; cantaloupes, crate, $2.25 to $5; watermelons, each, 30 to 35c.; bananas, bunch, $1.25 to $2; do., red, $2.50; lemons, crate, $5.50; oranges, crate, $5 to $5.50; tomatoes, crate, $1.50; do., basket, $1 to $1.25; cucumbers, hamper, $1 to $1.25; do., Canadian, dozen, 25c.; peas, basket, 25c.; potatoes, barrel, $2.25 to $2.50; do., basket, 30c.; onions, Bermudas, $1.15 to $1.25; beans, basket, 25 to 35c.; squash, hamper, $1; cabbages, case, $1 to $1.25; celery, dozen, 50c.

Hides, Skins and Leather.—Prices hold quite firm, with few hides of good quality coming into the market. Tallow is without new feature. The leather trade is quiet, with little doing, though dealers "talk big" about coming higher prices.

Provisions.—Owing to the hot weather, and the consequent difficulty of bringing butter into the market, good qualities of that commodity are likely to become firmer. As to the English market, a recent letter says that with the higher c. i. f. quotations for Canadian produce, holders have been firmer, and have been able to

AGENCIES THROUGHOUT CANADA.

secure slightly higher prices, the quality of the arrivals being exceedingly fine. Copenhagen quotation has advanced three kroner for next week, but from the English point of view the advance is not warranted. There is still a scarcity of medium grades of butter, for which there is a demand. Cheese holds steady at 10½ to 10¾c. per pound. Mail advices from Liverpool for the week ending June 30th say: There is practically no alteration to report in the position of the market. There is a steady consumptive demand, which is able to keep arrivals cleared as landed. Buyers still show discrimination with regard to quality, and there are still complaints with regard to the bulk of the cheese coming forward being too green and stiff in character for the trade. Eggs are firm, and their quality suffers from the hot weather.

Wool.—The receipts in the local market of new-clip wool continue small, as the dealers in the country seem to have bought up all offerings. Quotations remain unchanged.

* * *

MONTREAL MARKETS.

Montreal, July 19, 1905.

Ashes.—The market tends to easiness, and some fair-sized lots are reported from the West, which have arrived in poor condition. First pots are quoted at $5.05 to $5.15, and seconds at about $4.60. Pearls would bring about $7.50, and are wanted.

Dairy Products.—Last week's receipts of cheese were the largest of the season, aggregating 119,103 boxes, with shipments of 99,084 boxes, as against 82,254 boxes for the same week of 1904. The grand aggregate of shipments to date is 685,298 boxes, as against 607,684 boxes at this date a year ago. The market is a steady one, with 9¾ to 9⅞c. quoted for fine Westerns, and 9½ to 9⅝c. for fine Easterns. Exportations of butter last week were pretty liberal, reaching 33,847 packages, the figures for the corresponding week of last year being 14,724 packages. Prices rule quite firm, holders of fancy light-salted goods asking 21½c.; regular choice creamery quoted at about 21c., and good to fine, 20 to 20¾c.; good dairy is in demand at 17 to 18c.

Dry Goods.—A fair proportion of orders are coming to hand from travellers, but city retail trade is dull. Following the circular of the 6th inst., issued by the Canada Colored Cotton Co., announcing an advance in various lines, comes another, just issued to-day by the same company, announcing an advance of from 5 to 7½ per cent. in ginghams, sheetings, cottonades, Saxonies, dernettes, etc. The Hamilton Cotton Co. has also advised the withdrawing of all quotations. From the Penman Manufacturing Co. is received advice of an advance in men's and women's underwear of from 5 to 10 per cent. Representatives of French dress goods manufacturers now in the city are quoting material increases in prices.

Groceries.—For the season the distribution in this line is a fair one, and refiners report a brisk demand for sugars. There was some sharp advance in raw sugars the end of last week, but prices hvae since gone off somewhat, and standard granulated remains at the even $5 in barrels, with yellows ranging up from $4.50. Molasses is dull, and direct importations this season have only amounted to from 3,000 to 4,000 puncheons, as compared with 10,000 to 11,000 puncheons generally. Jobbers are still quoting 37c. the single puncheon, though there have been some unconfirmed rumors of prices being lowered. Ceylon black teas are steady, and Ceylon greens are firmer, in sympathy with a stronger Japan market. Nothing special has yet been reported with regard to new crops of dried fruits, except that Valencia raisins are expected to show a good average yield.

Leather.—There has been an all-round advance established of one cent a pound on sole leather, and a cent a foot on measured leathers. The American market is also very strong, and most advices received from England today indicate an advance of twopence on some lines there. No. 2 manufacturers' sole is now quoted at 25c., and slaughter at 28 to 29c.; Western splits, 21 to 22c.; Quebec ditto, 17 to 18c.; buff, 12½ to 14c.; glove grain, 11½ to 13c.; Scotch grain, 15½c.; harness, 32 to 33c.

Metals and Hardware.—Business in both lines is very well sustained for the season. Iron quotations show no recent change. Summerlee pig iron being quoted at $19 net, ex wharf, and bars are steady at $1.75 to $1.80; nails, $2.10 to $2.15 for both cut and wire. Ingot tin is much firmer at 33½ to 34c., and lead at $3.75 to $3.90; the discount on lead pipe is still 30 and 5. Antimony continues to advance, London quotations having gone up to £60 a ton, and locally 13½ to 14c. is now asked; spelter, 6½ to 6¾c. For tinplates, galvanized sheets, etc., prices remain exactly as they have been for some weeks past.

Oils, Paints and Glass.—Few changes are noted in these lines. Linseed oil is quoted at 50c. for raw and 53c. for

THE HUGH C. MACLEAN CO., Ltd,
Winnipeg. Vancouver

Established 1882
THE COMMERCIAL
The weekly financial, commercial & general trade newspaper of the Great West.

—Among the many nice places in Ontario in which to spend a holiday, the Kawartha Lakes should not be forgotten. From Lindsay to Coboconk and Lakefield, it is eighty miles of as picturesque scenery and popular summer resorts as exist in this Province of lakes. Excellent steamboat service throughout in daily connection with G.T.R. and C.P.R. trains during the season. From June 1st to October 1st the steamer leaves Lindsay for Sturgeon Point and Bobcaygeon daily at 11 a.m. and 5.45 p.m., except on Saturdays, when the evening boat awaits the arrival of the G.T.R. and C.P.R. evening trains from Toronto and Port Hope. June 19th to September 30th, steamer leaves Lindsay tri-weekly (Mondays, Wednesdays and Saturdays) for Fenelon Falls, Rosedale and Coboconk; returning same day. June 19th to September 16th, steamer leaves Lakefield for Stony Lake points daily on arrival of all G.T.R. trains, connecting at Burleigh Falls with steamer for Buckhorn, Chemong and Bobcaygeon; and during same period 'bus connection is given between Peterborough and Chemong to and from Burleigh Falls, Bobcaygeon and intermediate points daily. For rates for excursion parties, time-cards, folders, etc., apply to the Trent Valley Navigation Company, Limited, Bobcaygeon, Ont.

* * *

—The statistics of pig iron production in the United States show a decrease for June of 171,000 tons. The Iron Age says that production of coke and anthracite pig fell off from the record of 1,964,000 tons in May, a month of thirty-one days, to 1,793,000 tons in June a short month. The greater part was due to the restriction of the operations of the steel companies, whose product declined 136,000 tons, while the output of the merchant furnaces fell off only 35,000 tons. The active capacity has undergone a sharp decline, having receded from 443,092 tons per week on June 1st to 408,617 tons on July 1st. The statement of stock of the merchant furnaces, which refers to a monthly product ranging from 650,000 tons per month, shows a further accumulation of 70,000 tons in June, added to 63,500 tons in May and 17,400 tons in April. During the last quarter, therefore, the stocks in the hands of merchant furnaces have accumulated to the extent of 151,000 tons, against a reduction in stocks during the first quarter of 83,800 tons. The records of the past few months show that while the iron industry possesses a wonderful capacity for adjusting itself to changing conditions, it was not possible to check the headway gained during the extraordinary demand which developed in anticipation of spring. The industry is well in hand now, and consumption is proceeding at a wonderful rate, which contemplation of the spurt in the spring should not obscure. After a lull extending over some time, car orders are again appearing in the market.

* * *

It would appear to be an acknowledged fact that the cultivation of fall or winter wheat in Alberta is a success. Its growing has reached such an extent during the past two or three years that it has attracted widespread attention, flour manufacturers and grain dealers in both the Dominion and United States being greatly interested in the important results. Mr. Doupe, deputy land commissioner of the Canadian Pacific Railway, who has visited Alberta several times of late says that the production of fall wheat in Alberta has passed the experimental stage, and may now be regarded as a staple industry. In fact, says he, he would not be surprised if in a few years it rivals in importance the ranching industry of that district.

* * *

The matter brought forward by Mr. McNeill, head of the fruit division of the Dominion Department of Agriculture, in his testimony before the Committee on Agriculture, is sufficiently serious from an Ontario fruit-grower's point of view: "Nine of the largest wholesale merchants in Winnipeg, who at present control the trade of the North-West, say they do not care to handle Ontario fruit at all. They will admit that our apples, pears and grapes are acceptable in the North-West, but almost without exception they assert that all other fruits are unprofitable to them, and that they would just as soon never see Canadian fruit in the market. The fruit from the United States is more satisfactory in the matter of grading, packing and packages, in keeping quality and in business methods of the men who handle the fruit. In the matter of grading, North-West merchants complain that Canadians are not particular enough in having only one kind of fruit in a package. The British Columbia packers, however, he says, are better in this respect, but the Ontario fruit trade is really in jeopardy, and this, considering the fact that intrinsically this fruit is better than that from the States, is an absurd state of things.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office...WATERLOO, ONT.

The Mutual Life
OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

SEVEN
TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00.

BUSINESS AND THE CROPS.

We wonder if many people have seriously set themselves to thinking of the full meaning of a crop failure in the West at the present time. Truly the dramatic is not found only in books of fiction, because, looked at with the light of imagination, but none the less from a basis of the hardest, driest kind of business fact, the past month has been, for Canada, permeated with the most intensely dramatic spirit that can come in a new nation's history. Hardly a day of that month has passed but what was surcharged with the possibility of brilliant success or on the other hand almost irrevocable set-back for hundreds of thousands.

There is no mere figure of speech in this, though few perhaps realize the truth in its full intensity as applied to the present. Everybody will admit in a general way that Canada's prosperity is based upon the land and the yield thereof, but probably there are not many, excepting those who have recently visited Manitoba and the Territories, who can grasp the facts in their full meaning, of the present situation. The fortunes of a large part of the population of Manitoba have been for months past hanging on a thread, though it be fortunately a strong one, and, with a collapse of their fortunes there would have been felt a quiver of reaction to the ends of the Dominion.

The fact is that many of the people in the West have every available cent of their possessions wrapt up in real estate, and for them to come out whole good crops are essential. Farmers have spread themselves, they have bought more land while it was cheap, sometimes when it had ceased to be; the consequence is, their store bills wait—they depend upon the year's crop. The merchants have been waiting for this money in order to pay *their* bills to the wholesalers, besides which they also have a pretty penny tied up in real estate. Result is, they, the wholesalers, are also awaiting returns from the crops. For the railways too the time has been an anxious one; huge investment of capital in superior facilities, rolling stock and so forth, might be rendered abortive, and the great army of transportation labor, in its ramifications throughout the whole country, find its earning powers seriously diminished. The banks also would find their business affected in every conceivable manner and direction. This is what a crop failure would mean and this is what hung on a few days' weather in the West.

Whether such a tense condition of dependence on a single crop, as evidenced more particularly by the financial shape of farmers and merchants in the West, be a healthy one or not we will not attempt to discuss. Suffice it to say that it is the state from which the country is just emerging—emerging, it appears now safe to say, satisfactorily. For all reports concur to almost unanimity in the belief that the period of anxiety is practically past. At all stages of growth the wheat has met excellent conditions; even the dangerous possibility of over-large supplies of rain in June stopped at the precise moment that they were beginning to go beyond the line of actual benefit; they have been followed this month by the hot dry winds and sunshine which mean so much to the maturity of the plants and their resistance against the dreaded rust. Now there only remain the finishing touches to what promises to be the biggest crop on record, not only in mere acreage but in quality or at any rate in yield, as well. Even now of course some disaster may come, but it is unlikely to be more than local. A general failure now is almost impossible in view of the West's present far-flung lines of settlement. The crisis has practically been weathered safely, the country can breathe safely too, and the wheels of business revolve steadily as before. In fact, a change of tone is already discernible; business men in the great centres begin to act as though another year's advance in prosperity were assured; the banks report great activity.

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian Banks for June, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.	June, 1905.	May, 1905.
Capital authorized	$100,746,666	$101,046,666
Capital paid up	82,199.900	81,792,536
Reserve Funds	56,408,680	55.862,330
Notes in circulation	$61,587,560	$58,136,070
Dominion and Provincial Government deposits	11,371.557	9,901,929
Public deposits on demand in Canada	134,804.501	130,198,398
Public deposits after notice	333.767.147	334.924.450
Deposits outside of Canada	44.039,320	43,138,066
Bank loans or deposits from other banks secured	953.525	1,199,354
Due to other banks in Canada	4.959.445	4,982,939
Due to agencies or other banks in Great Britain	6,905.066	6,117,468
Due to other banks in foreign countries	1,372,686	1,695.349
Other liabilities	10,228,488	9,044,675
Total liabilities	$609,989,375	$599,338,771
ASSETS.		
Specie	$17,190,791	$17,255.925
Dominion notes	36,595,713	37,891,097
Deposits to secure note circulation	3,359.472	3,328,771
Notes of and cheques on other banks	24,488,773	21,546,750
Loans to other banks, secured	960,281	1,160,808
Deposits with other banks in Canada	6,382,138	6,155.466
Due from agencies or other banks in Great Britain	11,787,907	10,231,212
Due from banks or agencies in foreign countries	18,982,891	17,361,880
Dominion and Provincial Government securities	8,479,903	8,479.147
Other securities	59.249.164	59.383,757
Call and short loans on bonds and stocks in Canada	41,746.702	39,487.563
Call and short loans elsewhere	43,067,508	40.285.841
	$272,291,293	$262,568,217
Current Loans in Canada	437,470,445	437.200,882
Current Loans elsewhere	23,793.189	23.128,257
Loans to Dominion and Provincial Governments	2,044,825	2,486,270
Overdue debts	1,689,487	2.286,239
Real estate	656,946	668,225
Mortgages on real estate sold	601,366	611.348
Bank premises	10,499.682	10,482,732
Other assets	8,941,110	6.990,190
Total assets	$757,988,531	$746.422,543
Average amount of specie held during the month	17,345.744	17,020,615
Average Dominion notes held during the month	37,115,816	37.459,927
Greatest amount notes in circulation during month	62,183,720	61,339.132
Loans to directors or their firms	8,708,649	8,550,748

The number of banks is this month reduced by one, the return from the Bank of Yarmouth being omitted, and the authorized capital thus reduced by $300,000. The total number of banks making returns is now 33; five years ago there were 38, those that have disappeared, in addition to the Bank of Yarmouth, being La Banque du Peuple and La Banque Ville Marie, which went into liquidation; the Halifax Banking Company and the Bank of British Columbia, which were amalgamated with the Canadian Bank of Commerce; the Exchange Bank of Yarmouth, absorbed by the Bank of Montreal; the Commercial Bank of Windsor, by the Union Bank of Halifax; and the Summerside Bank by the Bank of New Brunswick. On the other hand, three new banks—the Sovereign Bank of Canada, the Metropolitan Bank and the Crown Bank of Canada—have been added. Next month the People's Bank of Halifax will probably not appear, but the Home Bank of Canada will soon begin business, while the Northern Bank is endeavoring to complete its organization.

Circulation shows an increase during the month of $3,451,000, thus making up for the unusual reduction in May.

Public deposits in Canada still continue to increase, the figures for June being $3,449,000 larger than in the previous month. During the six months ending 30th June, 1905, public deposits in Canada have grown by $14,759,000, as compared with a growth of $24,018,000 in the corresponding period of 1904 and $18,830,000 in 1903.

Total liabilities have increased during June by $10,651,000, and during the year by $55,544,000, an increase of 10 per cent. on the liabilities of a year ago.

On the assets side we find that cash on hand has been reduced from $55,147,000 to $53,786,000, although the average amount held during the month, $54,461,000, is within a few thousand dollars of the average for May. Very few of our banks resort to what in England is known as "window dressing"; on the contrary, many of them frequently hold larger cash reserves during the whole month than they do on the date on which their returns to the Government are made up. For instance, the Bank of Montreal held on 30th June cash amounting to $9,984,000, while its average holdings during the month were $10,886,000. One or two of the banks, however, often show cash holdings at the end of the month considerably in excess of the average. In determining what their real strength is, it is the average holdings which should be considered.

While the actual cash held was somewhat less in June than in May, the other readily available assets were considerably larger, practically the whole of the increase in liabilities being either deposited with other banks and agencies, or put into call or short loans. Balances due from agents outside Canada increased by $3,177,000, call and short loans in Canada by $2,259,000, and call and short loans elsewhere by $2,782,000.

Current loans in Canada remain practically unchanged. Last year in the same month they increased by some $4,000,000, and in 1903 by $5,266,000. For the six months ending 30th June, 1905, current loans in Canada show a growth of $23,691,000, as compared with $28,973,000 in 1904, and $40,450,000 in 1903. Overdue debts have been reduced by $597,000, due principally to the disappearance of the $539,000 of overdue paper held by the Bank of Yarmouth. Other items show very little change.

The totals of the bank statements are not growing as rapidly as they have done during the last year or two, but the progress that is being made is quite satisfactory, while the banks are probably in a stronger position than they ever were. Crop prospects all over the country are, on the whole, better than they have been for years, and the North-West is looking for a wheat crop of anywhere from eighty to a hundred million bushels. Whatever the actual figures may be, a record crop is now practically assured, and the effect upon the general progress of the country cannot fail to be most satisfactory. On the Pacific coast, people are thinking more about the salmon run than the wheat crop, for after three seasons of comparative leanness, the "big year" is here once more. It is as yet a little too early to speak with any confidence, but latest reports indicate that there will be a bigger run than in 1901. The next week or two will decide the matter, and it is to be hoped that present indications will be borne out by results. A large salmon pack means a good deal to the Pacific Province. Unless all signs fail, 1905 will be recorded in history as a year of plenty, and the banks will certainly share in the increased prosperity which we may reasonably expect.

* * *

HEALTH AND ACCIDENT INSURANCE.

No more important convention has taken place for a long time than that of the International Association of Accident Underwriters at the Royal Muskoka last week, and though ample opportunity was given for pleasure-seeking in that paradise of pleasure-seekers seldom have a body of professional men discussed more keenly the very foundations of their calling. This makes the decisions which they came to on many fundamental matters a subject of more than usual importance. Not that there was any great degree of unanimity prevailing; in many instances the opposite to this state of things was fully emphasized, but Mr. E. S. Lott, the president and chairman, had a genius for harmony—and for getting the delegates down to business. There can be little doubt that the association has been a powerful factor in giving an upward trend to the health and accident insurance business, and that at no time in its history were the men who carry it on of a broader mould, or its agents more able. The result is seen in the extraordinary increase in policies written in recent years.

As an illustration of the remarkable manner in which accident insurance is making a showing for itself and a position in modern life, we cannot refrain from mentioning the significant fact that, of the twenty-two persons who were killed in the wreck of the Twentieth Century Limited in Ohio last month, no fewer than sixteen held policies in companies that are members of the association. The death benefits amounted to $278,000 in the aggregate, of which every dollar has already been paid to the beneficiaries. Companies have been notified in addition of nine non-fatal accidents to policy-holders arising from the same cause.

One of the points which brought particularly lively discussion was the proposition to limit weekly benefits under accident policies to fifty-two weeks and to discontinue the cumulative feature. It was held by one side that the two-hundred-week limit was too much for the money, tended to encourage fraud and did not help sell insurance. On the other side it was argued that it met a public need, will be not unduly expensive with proper restrictions, and that the companies should charge for it rather than drop it. Finally, to make a long matter short, an almost unanimous determination was arrived at to drop the long indemnity period of accident policies, but no agreement could be reached with regard to abandoning the accumulation feature.

It is evident to all interested in this important branch of the insurance business that while there is a practical uniformity in the insuring clauses and conditions of contract for accident insurance, together with a substantial uniformity in the premiums charged, there is an almost bewildering variety of contracts referring to sickness, as well as in the amount and ratio of the premiums payable. It may be truly said that the subject of health insurance is to-day in its infancy and that none needs a more careful consideration and revision. Not only do the forms of contract need further study than has so far been given them, but the premiums charged must be placed on a more uniform and adequate basis. The summaries from which results as to health insurance are to be tabulated must be placed on a very much more extended foundation, a work which we understand a statistical committee of the association is now engaged upon. This is a work the importance of which cannot be overestimated, but it is one on which we feel sure the association's labors, as manifested by the delegates' keen interest at the convention, will soon make a mark.

* * *

THE MUNICIPAL UNION.

The convention of the Union of Canadian Municipalities started in Winnipeg on Wednesday, with Mayor Urquhart, of Toronto, in the chair. The objects of this union are so admirable and come home with such force to almost every person living in a Canadian town or city that its deliberations are always listened to or read with more than the usual perfunctory interest. It is a gratifying tribute to the zeal on behalf of the public welfare of Canadians that the association is showing such vigorous signs of usefulness and life. Mr. Urquhart made a well-received suggestion for the improvement of the Union's organization, so as to render it more efficient in placing its views before both the Federal and Provincial Legislatures. The existence of provincial unions prepared to look over legislation in local assemblies and ready to act in unison through the Dominion Union would do much to simplify the problem of protection against encroachment.

Considerable discussion was aroused by a paper on municipal finance by Mr. Louis Betz. He urged that all bonded indebtedness should be limited to ten per cent. of the assessed valuation and should be permitted only for operating civic enterprises, acquiring real estate, constructing buildings, mains, sewers, and bridges.

Several papers were read by representatives of various municipalities giving their experiences, under one form or another, of municipal ownership, and so forth. Mr. F. Dagger, the telephone expert who has lately been conferring with the Dominion Government, read an exhaustive paper on the telephone question.

* * *

THE RESPONSIBILITY FOR FIRES.

The pleasing consideration that the fire waste up to date on this continent has been very much less than it was last year should not be allowed to blind us to the fact that, making all possible deductions, it is enormously greater than it ought to be under any normally careful state of public understanding. Primarily this public apprehension or carefulness depends on the individual and there can be no doubt that at the root of the trouble lies the average man's disregard for the inner meaning of this waste of his own and the country's wealth. What he should bear in mind is that the loss from a fire is not on a par with a loss through financial or commercial panic. In the latter case there is a great shrinkage of values, but the property is not obliterated; if it should be sold at a depreciation it passes into the hands of another member of the community, and after a time a revival may set in and the property is as valuable as before. A loss by fire on the other hand means complete annihilation. The value represented by it becomes no longer available for distribution through his enterprise or labor.

People think when a fire occurs in a building and the insurance company pays the damage that that is an end of the matter. Nothing of the sort, however. The company pays, but only directly, for it is with money taken out of the individual's or the community's pocket. Thus it is to the individual man's interest just as much as to the company's, that he should do his best to prevent fires, not only in his own premises but so far as he is able in the premises of others. He can report to proper authority any particular hazard that may come to his notice. His own best interests lie in such a course to a greater extent than he fancies. Many a disastrous fire might have been prevented if some ordinary citizen, not directly concerned, had drawn attention to some possible cause as soon as it came before his own eyes. The only way to put a stop to the appalling waste of individual and municipal and national wealth from fires is for each man to feel in himself the responsibility for it in greater or less degree.

* * *

THE LUMBER TRADE.

While no special feature presents itself at the moment in the Ontario lumber trade, it may safely be said that conditions in the industry are sound. Values are on a high basis, but this has been a steady growth based on demand and on the cost of labor and supplies. High they may be, but that does not mean that they are abnormal, considering all the circumstances. A strong aid to the continuance of steady prices is the good tone of the trades connected with building. In Ontario at any rate, troubles with the men have been few, while the demand for houses has been large, with the result that the supplies of lumber needed have been great. This state of things indeed may be said to have existed ever since the spring, and while it applies more particularly to the Toronto market is also particularly true of Montreal as well.

In the Maritime Provinces there is a pronounced shortage of logs and the shipping season is likely to close earlier than usual. As a result a stiffening of some degree is likely to be experienced in values before very long.

Generally speaking, the conditions in the British Columbia lumber market have shown considerable improvement of late, though the demand from the western prairies is smaller than usual at the moment owing to the farmers being engaged in operations requiring immediate dispatch. While the demand then is not particularly strong, mills have sufficient orders in hand to keep them fairly busy and to prevent orders accumulating.

A new selling organization has been formed in Vancouver, the main object of which is to provide against the cutting of prices through over-competition. This association, it is said, will market the product of 31 out of 34 mills, the production of which goes mainly to Manitoba and the new provinces.

Farnworth & Jardine's (Liverpool) recent wood circular, states that:—

The arrivals from British North America during the past month have been 32,583 tons register, against 29,442 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1903, 1904, and 1905, has been 192,343, 189,408, and 213,418 tons respectively. The business of the past month has not been of a satisfactory character. Imports on the whole have been large, and the deliveries fair, but some of the leading articles, notably spruce deals, showed a marked decline in value. The stocks generally are ample. Of waney, the new season's import, it says, is now arriving on fairly moderate lines, but the demand is very quiet, the deliveries small, and stocks are large; there is little change in value to report. Of square pine, about 9,000 cubic feet have been imported; the demand is limited, and the stock, though light, appears sufficient for present requirements; values are unchanged. A few parcels of oak logs on contract have arrived, amounting to about 18,000 cubic feet; the demand is exceedingly quiet, and stocks are adequate. Elm.—About 600 loads have arrived from Quebec direct by steamer entirely on merchants' account, of which a considerable quantity will, no doubt, go direct into consumption. The stock is now ample, and values rule high. The arrivals of pine deals show a reduction as compared with the two previous years, and there has been a fair consumption; but the demand is inactive, and stocks are still large. Red pine deals are dull of sale. Of New Brunswick and Nova Scotia spruce and pine deals.—The arrivals at the Mersey during the past month have been 19,370 stds. against 16,800 stds. during the corresponding month in 1904. The deliveries have been rather disappointing and stocks are increasing, though still about 5,500 stds. less than the same time last year; values have declined. There is no improvement in the demand for pine deals, and the stock is ample. Of birch logs the arrivals have been moderate, chiefly from Quebec; there has been a fair consumption, and the stock is not large; values are steady. Planks have also been imported moderately, and have gone freely into consumption, but the stock is now sufficient, and prices a little easier.

* * *

VICTORIA BOARD OF TRADE.

The twenty-ninth annual meeting of the Victoria, B.C., Board of Trade took place, with a large and representative attendance, on the 14th inst., President S. J. Pitts in the chair. The latter gentleman, in his annual report spoke optimistically of the manner in which the city and Vancouver Island had progressed during the past year. The fact that the C.P.R. had become interested in the island meant a good deal, and he hoped another trans-continental railway would be induced to do the same. An era of great prosperity and activity was in sight, he thought. He then briefly reviewed the proceedings of the board during the past twelve months. One subject referred to was the Assessment Act, for the purpose of enquiring into the workings of which the Provincial Government had appointed a commission. Briefly the board's recommendations had been that taxation should be made on net worth, and that the present rate paid by merchants was too high by at least one-half. It is interesting to note that the Act had been amended largely in accordance with these suggestions. Another subject taken up by the board was the taxation of commercial travellers by the Provincial Government, rather than by the municipalities. In reference to this we understand that the tax has been a very difficult one to collect; it has certainly come in for a considerable amount of opposition outside the Province.

There is some talk, too, that the Dominion Government will disallow the Act. The president's statement on this live question was to the effect that while the tax had met with great opposition from those affected outside the Province, the legislation, in veiw of the peculiar position occupied by British Columbia, appeared thoroughly justified. The president next gave some attention to wharf and shipping facilities in Victoria harbor, rendered necessary by the increasing size of ocean steamships. After some further reference to railroad matters, in connection with the V. V. & E. railroad, and the Grand Trunk Pacific, Mr. Pitts closed an able and very interesting address. The new president for the current year is Mr. W. T. Oliver.

* * *

THE WINNIPEG EXHIBITION.

Each annual exhibition at Winnipeg acts as a sort of milestone pointing out the marvellous progress the West has made in recent years. And as each exhibition comes in turn, and is visited by its crowds, the progress made during the previous year seems more marked than ever. That is, it is increasing in increasing ratio. Of course, it is on an agricultural standpoint that the Winnipeg Fair bases its strongest claims to the support of Westerners, and this year, we are told, the exhibits of stock have been not only on a very extensive scale, but the quality of those shown is evidently grading up from year to year. This, however, is only to be expected from such an enterprising body of men as the Manitoba and North-West farmers and cattle-raisers, who realize that a few extra dollars in time and money spent in scientific up-grading now mean millions later on. The "Farmers'" Day at the exhibition this year was an unqualified success, and the crowds fully as large as expected.

From the manufacturing standpoint, however, as well as the agricultural, this year's exhibition seems to be distinguished for its high-class and varied character. Last year being the year of the Dominion Exhibition, and manufacturers in every section of the Dominion being extra well represented in consequence, it was feared that this year's exhibition would show some falling-off of interest in this respect. So far as reports have come to hand, however, this has not been the case, and the interest in the manufacturing departments has held up well.

* * *

THE GROWING WEST.

By Allen West.

(Continued).

British Columbia and Its Natural Wealth.

"In natural resources, British Columbia is the richest province.

"The catching of salmon before it went to spawn has injured the salmon business. Both countries are responsible for this, and both are trying to make arrangements to prevent it.

"The Crow's Nest Pass Coal Company has immense resources of very fine coal, the high class bituminous kind and also coking coal, and while bituminous coal will coke it is not all good for smelting. It must be strong and of long texture.

"The Connellsville coke is the best in the United States and the best British coke comes from Wales.

"I have talked with men familiar with the Connellsville and Welsh coke and they say that the Crow's Nest Pass coal is equal to the best of that in Connellsville and in Wales. Of course, not all the veins are producing that quality of coal.

"Vancouver Island also produces coal which finds a large market in San Francisco. Speckels is using this in his sugar refinery and it is used by the Southern Pacific.

"Shippers at Vancouver use it on runs across the Pacific and along the coast. Our steamers use it to Japan and China. It produces a fair quality of coke.

"Immense timber limits exist and there is a market for timber inland on the great plains.

"The rich valleys of British Columbia produce all kinds of fruit, pears, peaches, apples, cherries, strawberries, and other such fruit. On the prairies, with the exception of strawberries, no fruit is grown. The summer heat on the prairies is very great and you can understand the craving for fruit; therefore, there is a market on the prairies for all the fruit British Columbia can produce.

Fruit Growing and Irrigation.

"Developing the fruit growing interests of British Columbia many irrigation enterprises are in operation.

"Hops grow there and are cheaper to haul to the Pacific Coast and around the Horn to England.

"Precious metals exist in great quantities.

"Abundant water power furnishes a great incentive to manufacturing enterprises.

"All these things are attracting the attention of the United States, which is sending us a large number of very desirable settlers. The success of early immigrants from the States has resulted in a steady flow of farmers, cattlemen, ranchers, dairymen, artisans.

Success of Large Land Deals.

"A few years ago we placed the sale of large tracts of Western land in the hands of men whom we had found to be eminently successful in handling similar enterprises for the great western railways of the States.

"Besicker, Davis Co., of St. Paul, and Colonel Davidson of the Saskatchewan Land Company are most excellent men, thoroughly reliable, with an organization perfected for reaching the best class of settlers and bringing them to Canada. They carried through their enterprise with the highest degree of satisfaction to all concerned.

More Than Scratch the Surface of the Land.

"They have brought in a class of settlers who do more than scratch the surface of the land.

"They till the soil to good purpose.

"They back-set it, harrow it and get a proper seed-bed.

"A poor man depending on the soil will do superficial farming, thus losing time and seed. These people from the States farm systematically and make it a success.

"The West is looking for men who will use sense, system, and intelligence in developing its opportunities.

"They apply their intelligence in selecting their locations. They know good soil when they see it. They find just what they want in this country of ours. The natural increase of population in the United States is so great that it has made it impossible to supply the people with adequate homestead lands.

The Sons of the States Come to Canada.

"So the American farmer wishing to locate his son sends him to Canada. He goes and looks over the country for himself and, being a judge of climate, soil and rainfall, sees that conditions are better in Canada than they are in the United States. He finds land selling at five and six dollars an acre that is better than can be bought for twenty-five or thirty dollars an acre in the States. And that farmer decides to locate in Canada himself. So he sells his place in the United States and comes here.

"He brings his experience with him—his stock, his money, and he adds a large asset to the wealth of Canada from the very beginning.

"He is a producer from the start.

"He finds that his new country is just as free as the States—even more so. He finds a good school system and a good judiciary. He finds a respect for the law that makes the most remote of Canadian settlements as safe to life and property as any place in the world.

The Far-Seeing Policy of the Canadian Pacific.

"He also sees that the great railroad enterprise that has built up Western Canada has looked far into the future. He sees that the Canadian Pacific has not only brought the settler to Western Canada, but has provided a profitable market for him. He sees that the Canadian Pacific has established a line of steamers to the Orient.

"When the Canadian Pacific first undertook to develop this trade, it leased steamers of the Cunard Line. The first steamer that left Fort Moody showed in her manifest a carload or two of shingles and the bones of a few Chinamen going back to be buried in their native soil. Now we have five large steamers and full cargoes for them all, both passengers and freight.

"It took big men to build the Canadian Pacific, and these are big men," his eyes sweeping the canvases on which are the portraits of Lord Strathcona, Lord Mount Stephen, Sir William Van Horne, R. B. Angus, and place for the portrait of the present president, Sir Thomas Shaughnessy.

"It Took Great Faith to Build the C.P.R."

"They did not wait to consider obstacles. The expense was enormous, especially around the north shore of Lake Superior, where it is as hard to build a railroad as around Lake Baikal on the Trans-Siberian. It took great faith to build the C.P.R., but these men had great faith and their faith has been justified.

"A great country has been opened up to settlement and development. That country is furnishing the road increasing traffic in the products of Western Canada shipped east, and the manufactures of Eastern Canada shipped west, and in the passengers the activities of the new nation attract.

"And the Canadian Pacific is doing its utmost to bring the attractions of the West to knowledge of the world and is furnishing every possible facility to favor and make profitable every opportunity offered by the new country.

"It is extending its lines into new territory as fast as settlement and development justify, and wherever it builds it builds substantially and on a permanent basis that it may satisfactorily serve its increasing constituency in the Empire of the West."

* * *

LIFE AND ACCIDENT INSURANCE ITEMS.

Mr. J. W. MacKenzie, chief agent in Canada for the Maryland Casualty Co., has been visiting his company's agencies on the Pacific Coast.

Mr. David Burke, manager of the Royal Victoria Life Insurance Company, Montreal, is on a business trip to the Maritime Provinces.

The Ætna Life Insurance Company has received from the Provincial Government a license to carry on business in Quebec Province. Mr. F. H. Christmas, Montreal, is agent.

Accident insurance has come to be recognized as a necessary instrument of modern civilization, enabling men to provide an indispensable protection against misfortunes likely to occur, and to contribute their fair proportion to the misfortunes of others.

A Canadian insurance man connected with an Old Country life company gives it as his opinion that as a general rule the business done in Canada by the British offices might be increased three or four times over if they would adopt the methods and be willing to incur the expense of their Canadian and United States rivals. The position of agents on this continent and in Great Britain is a great contrast, as a result of these two different methods.

It is all very well for insurance commissioners in the United States to talk so glibly about "Judases," and "Hydes and Jekylls," and the rest of the vampire tribe in connection with life insurance. Now, the cat is out of the bag. But why was it not discovered before? And what is government supervision for, if not to *prevent* the work of such traitors within the camp?

At the concluding session of the convention of the International Association of Accident Underwriters, at the Royal Muskoka Hotel, Lake Rosseau, the following officers were elected for the ensuing year:—President, Wm. Bro-Smith, Hartford, Conn.; vice-presidents, Geo. S. Dana, Utica, N.Y., and J. E. Roberts, Toronto; treasurer, Geo. C. Pratt, New Amsterdam, N.Y.; secretary, G. Leonard McNeil, Boston, re-elected; executive committee, H. G. B. Alexander, Chicago, chairman; Franklin J. Moore, Philadelphia, Pa.; S. Lott, New York City; F. E. Faley, Des Moines, Iowa; Walter C. Faxon, New York; A. E. Forrest, Chicago; Wilfred C. Potter, New York, and A. W. Martins, Chicago.

Toronto on Monday last was, so to say, crowded with insurance men, on their way back from the convention at the Royal Muskoka. They reported themselves delighted with that beautiful district, and with everything except the terrific storm which uprooted a hundred or more of the beautiful trees surrounding the hotel.

Fire insurance has become a habit, and a good habit it is. It has been in practical use about 350 years, while the public has been accustomed to accident insurance 41 years only. Everybody is trained to insure against loss by fire and neglect to do so is just cause for reproach. The at least equal necessity for accident insurance is better and better understood every year, as experience accumulates, and as such insurance becomes better and better adapted to the wants of the public.—S. C. Dunham.

Probably by far the most enjoyable feature of the Accident Underwriters' Convention was the trip on the "Island," which took the delegates for a sail to Hardy Lake, the bass and trout preserve of Mr. David Smith. On arriving there luncheon was served, which was a highly appreciated surprise. Then several dozen rods and small boats were provided for sport on the lake and those who took in this enjoyable trip are still telling stories of the size of some of the bass which were taken. Mr. David Smith gave the delegates a warm welcome to his lake and to Canada, and his health was drunk with enthusiasm.

The tremendous loss of life and of time in the railroad business is of itself enough to demand the attention of the people; as one in about every 250 persons employed in the railroads of this country is killed, and one in 175 is injured. When the young men of the country are called to go forth to war they march through our streets with flags flying and bands playing inspiring music. The people crowd the streets and applaud them as they march onward toward the battlefield. When the news of battle is received, the whole people are sad at the story of the young lives destroyed. Those who thus die are honored for their heroism, and monuments are erected to their memory. Be the war in which they are engaged worthy or unworthy, they properly bear no odium. Many of those who return are pensioned for injuries received. Not so with the army of young men who go forth daily to duty upon our railroads. One in every 80 of them will be disabled, and one in every nine of the injured will be killed; 37,430 railroad employees are injured in one year, of which 2,220 are killed. What a tremendous field is here presented for the beneficent principles of accident insurance.

* * *

FIRE INSURANCE NOTES.

The Traders Fire Insurance Company has been duly authorized by the Quebec Government to do business in that province. Mr. John Carson, of Montreal, is the chief agent for the province.

The American Surety Company, of New York, has received an extra-provincial license to do business in Quebec Province, with head office at Montreal and Mr. F. W. Evans as its chief agent.

This week there arrived and was tested in Toronto a fine new steam fire engine for the city brigade, made by the Waterous Engine Works Company, of Brantford. We understand it fully came up to the expectations of the fire department and those interested. This is the second of its class which the company has recently supplied for Toronto fire protection purposes, the contract price for the two being $13,340.

* * *

—The annual meeting and banquet of the Institute of Chartered Accountants of Ontario took place last week at Niagara Falls, Ont. The following gentlemen were elected members of the council for the ensuing year:—President, W. B. Tindall, F.C.A., Toronto; first vice-president, F. H. Macpherson, F.C.A., Windsor; second vice-president, J. W. Johnson, F.C.A., Belleville; secretary-treasurer, David Hoskins, F.C.A., Toronto, etc., etc.

FINANCIAL MATTERS.

To the thoughtful courtesy of the Crown Bank of Canada we owe it that we are now the proud possessor of a brand new leather ticket-case, which is very neat, and just the right size for our vest-pocket. We acknowledge receiving the same with thanks.

Messrs. Æmilius Jarvis & Co., bankers and brokers, Toronto, who have occupied offices under the Canadian Bank of Commerce, corner Jordan and King Streets, ever since they commenced business, have now removed to more commodious premises on the ground floor of the McKinnon Building, at the corner of Melinda and Jordan Streets.

An apt illustration of the financing of trusts—when the "trust" does not act well—is afforded by the report of the International Mercantile Marine Company,—the Morgan steamship combine. A poor report had been expected, but nothing quite so bad as the actuality. For the year ending December 31st last, the big company failed to meet its interest charges by $2,039,150. The gross voyage earnings during the year decreased $1,750,840, and miscellaneous earnings, $439,597, while net earnings declined $2,194,115. The cause of this poor showing is, of course, the steamship rate war and the exceedingly dull condition of the freight market, resulting to some extent from the failure of the grain crops placing breadstuffs above export limits.

The United States Steel Corporation has published its quarterly statement for the three months ending June 30th. It is much more satisfactory than for some time past. The net earnings were $30,305,116, against $23,025,896 in the previous quarter, and $19,490,726 in the June quarter last year. The unfilled orders on hand on June 30th amounted to 4,829,655 tons, against 5,597,560 in the previous quarter, and 3,192,277 June last year. The surplus for the June quarter, after charged and preferred dividends, amounts to $10,570,681, against $5,873,407 in the previous quarter, and $2,777,644 in June quarter last year. The company has declared the regular quarterly dividend of 1¾ per cent. on the preferred stock.

* * *

TRADE NOTES.

Late advices from Smyrna confirm previous reports to the effect that the crop of figs is making excellent progress, and that if no adverse conditions intervene it will equal in size that of last year, while the quality will be unusually good. The first shipment of layers, it is expected, will be made from Smyrna on August 26, arriving in New York the last week in September.

The Inland Revenue Department has completed the analysis of 212 samples of maple syrup and sugar collected in February last. Of this number it was found that 116 were adulterated, 88 genuine, and 8 doubtful. Two collections were made, one previous to the maple sugar season, and one after. In the first lot only 24.3 of the samples were found to be pure, while 63.4 were genuine in the next collection. Syrup was collected in all parts of the Dominion for the experiment. The adulteration was in each case done by means of foreign sugar.

Canadian manufacturers of women's coats, cloaks and skirts are most cheerful regarding fall trade conditions. This is not only because business is better than expected, says the Globe, Toronto, but mainly because Canadians are capturing the whole trade, and German goods find less and less market, except in children's lines. They had already been shut out of our markets in men's lines, but improvement in domestic work, and now with Canadians beating them in women's goods, there is a possibility that the decreasing volume of German business may force a complete withdrawal, for a good volume of business has been necessary to make this market profitable for German importations. This has been a good market for these goods in the past, but the surtax, for one thing, has been effective. Its effect was not to increase the cost, but to lower the quality. Popular prices had to be maintained, and a buyer going to Germany looked for goods which could be sold at the old price, even after the payment of the surtax. Canadian manufacturers, on the other hand, have been able to offer better quality at the same prices, and this has been recognized by merchants. Many houses, which in the past have been wedded to the idea of imported goods, are now abandoning it.

THE

NORTHERN BANK.

HEAD OFFICE: WINNIPEG.

Provisional Offices: Merchants Bank Building, Winnipeg.

Now opened to complete organization.

The following have consented to act as Directors upon election:

JAMES H. ASHDOWN, President, J. H. Ashdown Hardware Co., Chairman of Provisional Directors.
D. C. CAMERON, President Rat Portage Lumber Co.
G. R. CROWE, President Northern Elevator Co.
H. M. HOWELL, K.C., Messrs. Howell, Mathers, Howell & Hunt.
SIR DANIEL McMILLAN, Lieutenant-Governor Province of Manitoba.
CAPT. WM. ROBINSON, Steamboat Owner, President Dominion Fish Co.
HON. R. P. ROBLIN, Premier Province of Manitoba.
FRED. W. STOBART, Messrs. Stobart, Sons & Co.
E. C. WARNER, President Midland Linseed Oil Co., Minneapolis.
A. STAMFORD WHITE, Messrs. A. S. White & Co., Chicago, and Liverpool, Eng.

Note—The list of Directors is subject to the vote of the Shareholders at their first meeting, who may then increase or decrease the number.

General Manager.

J. W. de C. O'GRADY, Late Manager Bank of Montreal, Chicago, Ill.

Solicitors:

Messrs. Howell, Mathers, Howell & Hunt.

AUTHORIZED CAPITAL, $2,000,000.
In 20,000 Shares of $100 Each.

Of which it has been decided to issue at present 10,000 shares at $110 per share, being one-half of the authorized capital.

TERMS—$5 per share of the par value on application, $15 per share on allottment, $30 per share on the first day of the month immediately succeeding the date of allotment, $10 per share every three months thereafter, on the first day of the month, until the whole amount, including the premium, is paid.

Interest at the rate of 4 per cent. per annum up to the date fixed for payment will be allowed on payments made in advance.

Forms of application for stock, prospectuses, or any further information may be obtained from

S. S. CUMMINS,
Secretary for Organization,
At the Provisional Office, Merchants Bank Building,
MAIN STREET, WINNIPEG.

Late reports state that the sockeye salmon are now at length making rapid headway for the Fraser. Fishing operations, however, still continue irregular.

The surtax on goods imported from Germany seems to have been attended with what may be called striking results, particularly in some branches of dry goods. The trade in hosiery and gloves has continued large, but in skirts and cloaks, and other women's goods the increased duty has shown a distinct tendency to shut out importations. The German manufacturers would appear to have attempted at first, not an increase in the price of their wares, which indeed they would not have found possible to make, but a deterioration in the quality of the goods. This did not work well, however, because the domestic manufacturers, it is extremely pleasing to note, were able at the same time to put upon the market goods of no higher price than was asked for the imported German, but of considerable better quality. Altogether, the surtax has acted in a manner altogether satisfactory to those who believe in the Made-in-Canada idea.

Bitter complaints have been made by parties in Port Hope and Lindsay, that, in their vicinity the merchants were discriminated against in the price they had to pay for sugar. And they claim that this is due to the way the Dominion Wholesale Grocers' Guild have equalized (or inequalized) the shipping rates. The Port Hope Guide further says that the Government should be asked to step in to prevent an undue and illegal restraint of trade. So far as we can understand, the matter of a fair equalization of shipping rates is a very difficult one to deal with satisfactorily, and it does not appear probable that the Guild has done anything in the nature of unlawful monopoly. It is a fact that the profits of the wholesale grocers in sugar have, as a rule, been almost ridiculously small, compared with the considerable risk which existed of a heavy downward movement in that commodity.

—The business men of Vonda have organized a board of trade, with W. Grant as president.

* * *

—The fifth report of the Bureau of Labor has made its appearance over the signature of Mr. Robt. Glockling, the secretary of the bureau. It attempts to give a reliable idea of the condition of the labor and manufacturing interests, but these efforts are handicapped by the indisposition of both manufacturers and labor organizations to comply with the Government's request for full information.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, July 27th, 1905, as compared with those of the previous week:

	July 27.	July 20.
Montreal	$25,796,646	$25,876,291
Toronto	17,035,126	20,525,190
Winnipeg	6,719,042	7,634,183
Halifax	1,843,355	1,726,646
Hamilton	....	1,232,544
St. John	....	1,143,321
Vancouver	1,806,458	1,679,336
Victoria	682,490	799,474
Quebec	1,796,142	1,870,043
Ottawa	2,235,488	2,300,084
London	914,149	925,554
Total	$.........	$65,712,666

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

—"Say! Ma wants two pounds of butter. She wants it just exactly like what you sent the day before yesterday, and if it ain't that same kind she don't want any at all." The small boy had bolted in, discharging himself abruptly of his errand, pausing now only for breath. But the grocer, taking down the order of a new customer, did not mind the interruption. "You see, madam, how it goes," he said pleasantly. "My customers are particular, and it is my pleasure to give them exactly what they demand. Yes sonny," blandly to the boy, "you shall be attended to at once." "Ma says don't forget to send the same kind of butter," reiterated the boy. "Some of pop's relations has just come to visit, and ma says if they stay long it won't be her fault."

The mineral exports from Newfoundland in the year ended June 30, 1904, went chiefly to the United Kingdom, the United States, and Canada. The United Kingdom took, in 1903-4, $199,086 worth of copper ore, $56,575 of iron ore, and $88,750 of slate, as compared with $207,228, $92,935, and $57,700 respectively in 1902-3. The exports to Canada included $209,000 worth of iron ore in 1903-4, against $313,780 in 1902-3. The exports to the United States comprised, in 1903-4, $204,885 worth of copper ore, $63,680 of iron ore, and $311,162 of pyrites, against $170,813, $92,660, and $159,549 respectively in 1902-3. The exports to Holland consisted entirely of iron ore to the value of $197,030, as compared with $188,250 in 1902-3. There were no mineral exports to Germany in 1903-4.

OUR AUSTRALIAN LETTER.

The Trade and Customs Returns of the Commonwealth have been issued. The trade for a series of years has been:

Imports into Commonwealth.

	1885.	1890.	1900.	1904.
	£	£	£	£
U. Kingdom....	27,370,245	23,942,078	25,363,352	22,461,854
Brit. Possessi'ns	4,091,799	4,454,256	4,670,379	4,524.718
Foreign countries	5,345,656	6,771,837	11,354.299	10,034,270
Total imports.	36,807,760	35,168,171	41,388,030	37,020,842

Exports from Commonwealth.

	1885.	1890.	1900.	1904.
	£	£	£	£
U. Kingdom....	20,872,585	20,799,213	25,215,905	27,565,000
Brit. Possessi'ns	2,747,317	3,170,595	8,624,297	15,245,447
Foreign countries	3,026,873	5,351,523	12,116,680	14,678.769
Total exports.	26,646,775	29.321,331	45,956,882	57,489,216

These are remarkable figures. They show that while for twenty years the imports have been at a standstill the exports have been more than doubled. But there have been changes in the imports, and, making due allowance for foreign goods formerly credited to Great Britain, but now properly entered to the country of origin, it must yet appear that England has lost some of her trade to the gain of foreign producers.

Canada is a sufferer by the crediting of her exports to American and English ports. The Australian returns show the trade to have been:

Imports from Canada.

1900.	1901.	1902.	1903.	1904.
237,707	330,788	346,560	352,939	222,064

A Sydney newspaper commented upon the small trade with Canada, and the Canadian Commissioner called attention to the fact that the Australian figures did not at all coincide with the Canadian export returns of goods sent to Australia, the Canadian being two and a half times greater. He gave two instances. The Australian figures of imports from Canada and the Canadian figures of exports to Australia. These two lines were for 1904:

	Australian.	Canadian.
Agricultural implements	£26,926	£212,239
Paper	5,200	78,790

In an address before the Chamber of Commerce the Commissioner said by these returns the trade had increased more than tenfold since 1893, and he believed the true amount would be fifteen fold. The seasons over, the large portion of Australia promise well, especially for the pastoralist, though the early lambing has not been quite as favorable as anticipated; still it is good. Business men are more cheerful and the price of investment stocks show improvement.

The New Zealand Government has yielded to the pressure put on it by the newspapers respecting patent medicine regulations. It proposed to compel every vendor of proprietary medicines to place the formula on the label. This would have enabled local druggists to put up the prescription, and to thus utilize the advertising done by the proprietors. The Government abandoned this when the proprietors gave notice that they would stop advertising. Next, it required that the formula should be deposited with the Government, and if it contained a particle of deadly drug the label should bear the words: "This contains poison." Some medicines not only are largely made up of poisons, but with alcohol and narcotics. These should be stopped, but as in infinitesmal doses arsenic and strychnine are used in regular medical practice, there could be no sound reason why proprietary medicines containing these infinitesimal properties should be penalized. The Government has had to withdraw this requirement also.

The same Government has issued that the Act providing for the use of the metric system of weights and measures shall go into effect on the first of January next. It will not affect trade as the system will not be used even locally.

After some halting the Commonwealth Government has agreed to increase the subsidy to the Canadian-Australian line of steamships, but no arrangement has been made for the steamers to touch at a New Zealand port. The Postmaster-General would like to make the route a great mail service to Europe. The popularity of the line is certainly increasing. Even the much-abused "Miowera," which left a week ago, had to reject passengers, some of whom are awaiting for four weeks to take the next steamer for Vancouver. Many of the passengers are making the excursion trip to Banff.

In the list of the "Miowera's" passengers are: Mr. Larke, the Canadian Commissioner; Mr. Patterson, Australian manager of the Massey-Harris Company; Mr. G. E. Wise, one of the largest distributing merchants outside of Sydney, as well as interested in mining and Sydney businesses; Mr. Chutterbuck, of Adelaide, the head of a large Adelaide implement business, handling the Massey-Harris business for South Australia.

Mr. Larke cannot complain of the kindnesses of the farewells on his departure. Among other gatherings, the General Committee of the Chamber of Commerce and the living ex-presidents of that body had a meeting to wish him a pleasant journey and an early and safe return.

Mr. MacPherson, of the Toronto Gutta Percha and Rubber Company, is here looking after the interest of that enterprising company. Mr. H. Cockshutt, of the Cockshutt Plow Company, is in New Zealand, but is expected again in a week or so. He goes home via England.

As I have previously advised, Queensland did not want to lose the Canadian-Australian service, but it wanted the subsidy paid to the line, and now charged to New South Wales, and Queensland charged to the whole Commonwealth. It has been announced that this will be hereafter done. The company has also made the welcome announcement that in May next a turbine steamship of five thousand tons, now building, will be put on the route. It is an eighteen knot ship. If during the busy season the two sister ships, "Manuka" and "Moeraki," are put on everything would be up to date.

F. W.

⁂

THE C.M.A. IN PARIS.

Paris, July 14th, 1905.

Dear Monetary Times;—

This is a fete day, the anniversary of the Republic, and Paris is especially smiling and gay. There is not the usual roar of traffic in the streets because so many warehouses are closed, and so many people are gone to Longchamps, to Versailles, to Neuilly, and different places to see the review of 30,000 troops, and other lesser sights out of town. Half-past ten finds me at the railway station for Dover, with an hour to wait; so, as I see no members of the C.M.A. to talk to, I may talk to you, for the first time in five weeks.

When, as soon as our party had reached the Gare du Nord in Paris last Tuesday—special boat and special train—we found the station decorated with groups of Canadian flags; when we presently heard French and English people inside the waiting-room singing "God Save the King;" and when, in addition to the formal welcome by the Chambre de Commerce delegation, we found our hands grasped by many who made smiling and eager attempts to express themselves in English, we began to believe that we were, as they assured us, *Les Bienvenus*, the truly welcome. The notice was short and the time inadequate for preparation, but we were royally treated. Drags were provided to take both women and men, 140 in number, whither they willed or drifted. Industries were thrown open to us, and unusual

HATS AND CAPS

Our samples for 1906 comprise a great variety of English, American and Canadian Goods.

Our two leading lines of "**HENRY CARTER**" and "**WILKINSON**" Hats are of exceptional beauty and value, their exquisite colors and rare quality will be unsurpassed.

Light Weight Hats are our specialty.

courtesies were extended in the admission to public buildings. We were given a brief reception at the Conseil Legislatif, and a pronounced welcome at the beautiful Hotel de Ville, where, surrounded by the work of Constant and Lefebvre and Puvis de Chavannes, we could hardly listen with attention to even French persuasive eloquence. The Paris Chamber of Commerce gave us a collective lunch one day and dinner the next, and were always and everywhere attentive. At the dinner, held at the Palais d'Orsay last night, the Minister of Commerce was in the chair. Such a room! Such a military band! Such a brilliant gathering. 350, I should think. And such speaking—it made one fairly tingle, so graceful and so fervid was it.

Do not expect any description of the English and Scottish trip this morning. It would be too great a task for this hot day, and anyhow, one is too full of Paris to describe anything or any place else. Mind you, the receptions we had everywhere we went in England and Scotland, beginning with the first delightful surprise from royalty at Windsor and ending with Edinburgh, were something to be treasured in memory, for no travelling party, surely, was ever so warmly treated. Only, I cannot write of it all adequately at present.

For leisureliness, French railway arrangements can easily take a prize. Last night at the hotel I was told: "Monsieur had better order a cab for ten, as his train is at eleven, it is required twenty minutes to drive and there may possibly be delay, is it not? for there is always the Fete, which may derange him somewhat." When the lazy coachman, with his still lazier horse, drove me to the station *in fifteen minutes*, I found the train was not until 11.30. And again, when I had shown my ticket (a special one from London and back, every thing gilt-edged and weather guaranteed for 58s. 4d.), I was told that the 11.30 train was not good enough for me, but I must please derange myself so far as to await the next one, at noon, which has a restaurant attached and smoking places besides. Slowly this train backs in at 11.15, the man who punches tickets smokes a five-minute cigarette, sitting on a box the while, and then slowly draws back a wooden gate to make a two foot opening. Some passengers pressing forward to go through, Mr. Railway Official says: "No, no; it is necessary to wait, I am not yet ready." Then he pulls down his vest, dusts his boots, feels in a pocket for his punch, and with a bow and a wave of the hand declares his wicket open. Porters lounge about, train-hands, with one foot on the step and one on the platform, jabber at one another; the seller of fruit and candy calls his wares, and the dame who sells papers and books stands up to give an occasional nod or smile. Slowly the minute-hand of the clock reaches 12—there is no army of prompt porters, guards and attendants to hasten people into their seats, no succession of calls or whistles as with an English train. The whole procedure savors of slowness, even of solemnity, but at last we are off.

Sitting on the end of my suit-case, at a square table, with multitudinous human surroundings, I find that my note book is locked in my bag; my presentation gold-mounted fountain pen is in my trunk on the Strand; paper, I have none, except such stolen scraps as I write on. So I am in straits, as you may see. Hence brevity and compression, both of words and writing. It is to be said of the English Chamber of Commerce in Paris that its relations with similar bodies in the Empire enable it to do something for British trade with France. Canadians will remember that several energetic gentlemen of that Chamber were at the Montreal gathering of 1903, and went across the Continent. Recalling them, and recalling the eloquent words of the Minister of Commerce yesterday, it struck me that he must have derived in some degree from this Chamber his information and his forecast respecting an increase of trade with Canada. It is a curious thing that our trade with France is not double its present extent. And it looks as if that country as well as the United Kingdom were content with *laissez faire*, while the American and the German and the Belgian exporters "hustle" for our trade, and make us goods of the kind and pattern we want instead of telling Canadians pointedly: "Young people, ours are the best, or the tastefullest goods in the world; we have been making them thus-and-so for 50 or 150 years; you are foolish and misguided to prefer other people's goods to ours; there *must* be something wrong with your taste." And still we buy Uncle Sam's merchandise, or Kaiser William's, and pay higher duty on them than on John Bull's! There are some things that our dear English folk in the little isle set in a silver sea are slow to perceive.

The names of Mr. Hector Fabre, the Canadian Commissioner in Paris, and of Mr. A. Poindron, the commercial agent, seemed to be familiar to every one we met in business circles. But there is a good deal of arousing, of a practical kind, to be done before our trade with France grows as it should do. In the Avenue de l'Opera we saw the prominent sign of the Sun Life Assurance Company of Canada, just as we have seen the Canada Life in various cities of the United Kingdom. And we found traces, in more than one English town of the Midlands, of the stirring up that the recent visits of Senator Cox and of Mr. J. J. Kenny had caused in "Western" and "Canada" circles of assurance.

I observe from a sudden movement in this chattering crowd of railway station hangers-on that we are soon to be moving, and I abstract myself long enough to look around for some of our C.M.A. party. But I seem to be alone on this train for Calais, and so say good bye, till I can collect my notes and my thoughts in that great London which is the centre of the world.

James Hedley.

⁂

THE INCORPORATED SOCIETY OF ACCOUNTANTS AND AUDITORS (ENGLAND).

The "Incorporated Accountants' Journal," the latest number of which is to hand, gives the full report of the proceedings at the twentieth annual meeting held in London (England). At this year's meeting Canada and Canadian accountants occupied the bulk of the attention given to Colonial inter-relations with the home body. No doubt, the presence of Canadian and British delegates at the "Accountants' Congress" of the St. Louis Exposition tended to draw together the different institutes and societies. It also strengthened the progressive movement fostered by the British "Incorporated" Society to obtain from Parliament and Legislatures "statutory recognition" as a "close" profession; with legalized restrictive penalties against unauthorized practitioners. The annual report shows this tendency and states that the society's delegate after the close of the St. Louis Congress visited Canada, and met with a hearty welcome from many of the leading members of the profession.

Much interest was then expressed in the Incorporated Society's operations, and especially in the Inter-Imperial work in the "British Dominions beyond the Seas." Mr. John Hyde, F.C.A. (Halifax), who at the Congress of Accountants represented the Dominion Association of Chartered Accountants, had been since admitted to the Fellowship of the home society, and his example and co-operation have been followed by several other leading accountants in Eas-

tern Canada. Inasmuch as the Canadian Chartered accountants are, more or less, secured in professional privileges legalized by Statutes of the Dominion and Provincial Parliaments (much in advance of any recognition secured by Statute of the Imperial Parliament) the English Society's Council expresses great gratification at the active interest shown by their Canadian confreres in the status of English accountancy generally. The other leading reference to Colonial interests is the following:—"The Transvaal Accountants Ordinance, 1904, promoted by the Society's Transvaal Branch, passed the Legislative Council on the 12th August, 1904, and received the assent of Lord Milner on the 15th August. From the date of the passing of the Ordinance no person is permitted to describe himself or hold himself out as an accountant, or as a public accountant, or as an auditor, or use any name, title, addition or description, or letters indicating that he is an accountant by profession, or a public accountant, or an auditor, whether by advertisement, by description in or at his place of business or residence, by any document or otherwise, unless he is registered as a public accountant in pursuance of the Ordinance. Any person not registered as a public accountant in pursuance of the Ordinance, and describing or holding himself out as such, in contravention of the foregoing provisions, is liable to a fine not exceeding £100 for each offence, and in default of payment to imprisonment for a period not exceeding three months."

The report congratulates the members upon this, the first creation of a statutory roll of public accountants within the British Empire, and also upon the practical success (through the energetic action of the Society's Transvaal Branch), which attends the efforts of the Executive Council of the Society to obtain legislation. The South African Committee generally, and the Committees in Victoria and Sydney (Australia) are actively co-operating with the home council in advancing the interests of public accountancy in those important dominions within the Empire. During the year under review the Council Committees have dealt with many important public movements affecting accountants. The Board of Education was informed of the society's concurrence with the suggested system of "school-leaving certificates" in the proposed plan of co-ordination of school teaching throughout the country; and of its willingness to accept the "advanced" certificate as an equivalent to the society's preliminary examination test. In the House of Commons no progress could be reported with the society's bill for the establishment of a Register of Professional Accountants in the United Kingdom, and this bill continues to be opposed by some of the prominent members of the English Chartered Institute, although favored in larger measure than heretofore by the Scotch and Irish chartered accountants. Two members of the society were deputed as "witnesses" to the public "enquiry into the incidence of Income Tax," appointed by the Chancellor of the Exchequer. The council submitted the names of members and students suitable for service in the Royal Navy in the formation of the reserve of "Accountant Officers" for service in the Royal Navy as "assistant paymasters" in the event of emergency; and some of the candidates were selected by the Lords of the Admiralty for training. The society was represented at the banquet and functions of the Fiftieth Anniversary of the oldest organized body of chartered accountants—the "Society of Accountants in Edinburgh" at which Lord Rosebery was only one of many brilliant public men present as guests. The council expresses its regret that no steps have been taken in the Imperial Parliament by the Government to carry out the terms of the report of the Joint Select Committee of both Houses of Parliament on Municipal Trading, and in connection therewith "the reform of the Audits of Municipalities' Accounts." In addition to the Scottish Examination Centre, recently removed to Edinburgh, an examination centre for Irish students was organized in Dublin.

In many directions elsewhere the report shows a continuance of well-intentioned and unselfish work on behalf of British professional accountants and public accounting. The Canadian Public Accountants, who are also members of the Incorporated Society, include Mr. Henry Barber, F.C.A., Mr. E. R. C. Clarkson, F.C.A., Mr. H. O. L. Gordon, C.A., Mr. James George, F.C.A., Mr. Harry Vigeon, F.C.A. (of Toronto), Mr. Arthur K. Fisk, F.C.A., Mr. A. F. C. Ross, F.C.A. (of Montreal), Mr. John Hyde, F.C.A. (of Halifax, N.S.), and Mr. Edmund Woodroffe, C.A. (of London, Eng.).

* * *

THE PRINCIPLES OF CANADIAN BANKING.

Mr. H. B. Shaw, manager of the western branches of the Union Bank of Canada, on the 8th inst., delivered an address before the North Dakota Bankers' Association at Grand Forks, which we would like to reproduce in full, but from which the exigencies of space only allow us to make a few brief extracts.

Mr. Shaw started by giving a brief but interesting history of the Bank of Montreal and the Quebec Bank, the pioneers in Canadian banking. The ups and downs of the former great institution, in its early days, make an interesting chapter in Canadian history. Shortly afterwards a French bank was established in Montreal, under the name of La Banque du Peuple, and from this time forth, new banks have been established from time to time as new requirements have developed. Failures, as Mr. Shaw points out, have not been numerous, and have been due in most cases to poor management; in all but two cases, and these unimportant, the bank notes have been redeemed and depositors paid in full.

Canada has a banking system which past experience in trying times shows to be admirably adapted to the country's needs. Mr. Shaw's remarks on the subject of how this system is based and worked out are adapted to make the matter clear to those who are not bank experts, and we will therefore quote his own words:

"In order that a banking system may fulfil the requirements of a growing country, it is necessary that the notes of a bank be perfectly secured, and they should be sufficiently elastic to meet the fluctuating requirements of trade; and I think our system is able to meet all these requirements. In the first place it is necessary before obtaining a charter to have a subscribed capital of $500,000, half of which must be paid up and lodged with the Treasury Board of the Dominion Government for a short time. The reason for making this amount so large is because it is most essential to prevent banks starting without legitimate intentions and strong financial backing, as the charter carries with it the privilege of issuing bank notes not secured by a special pledge with the Government, and also the power of carrying on a general banking business, the opening of branches, etc. A bank in Canada starts out with full power to circulate its own notes to the extent of its paid-up capital, which notes constitute a prior lien upon all its assets, and they are further secured by what is called the Bank Circulation Redemption Fund; this fund is formed by each bank contributing to the Government 5 per cent. of its average maximum monthly circulation, on which it is allowed 3 per cent. interest. Should a bank fail, its notes bear 6 per cent. interest until redeemed from the date of suspension; and if it is unable to redeem them, this redemption fund is drawn upon for any deficiency. In no case has this fund been drawn upon, but in the event of such a thing happening, an assessment would be made upon all the banks for a sufficient amount to maintain the fund at its required 5 per cent basis. The Bankers' Association, which has the supervision of this fund, has an officer whose duty it is to check up the circulation fund of each bank; he has full power to enter any bank at any time, and make a full inspection of its circulation. Large fines are imposed for a bank overstepping its circulation powers. With the foregoing precautions, a bank starts with the ability to create a circulation which is accepted absolutely without question. The bills of a bank in New Brunswick, for instance, are accepted without any more question in the city of Vancouver than if they were passed across the counter in St. John.

CONDITIONS IN BRITISH COLUMBIA.

Mr. C. G. S. Lindsey, K.C., general manager of the Crow's Nest Pass Coal Co., has returned from a five months' visit to the Pacific Province. He says that mining interests in British Columbia are much improved. Metalliferous mining is developing, as indicated by work at the Granby smelter, which is now treating 1,900 tons of ore daily and will before the end of the month be treating 2,800 per day. The Crow's Nest Pass Coal Company has contracted with the Granby smelter to deliver its entire requirements of coke for one year. It will require 400 tons per day. A large production of ores is expected as a result of the organization of the Montreal and Boston Company. It is also hoped that the transfer of the War Eagle, Centre Star and St. Eugene properties to the new syndicate will largely increase the tonnage of these mines and consequently enhance the worth of the Trail smelter. The business conditions of the Province generally are good. The lumber industry particularly is thriving, and the railroads are carrying large quantities into the Territories for building purposes. As a result the railroads are doing a large and profitable business. The difficulty we have experienced in getting cars brings this home to us rather forcibly.

The Crow's Nest Coal Company are now shipping coal from our mines to Seattle, then 600 miles across the Cascade Mountains, for use on the Northern Steamship Company's two new steamships, Minnesota and Dakota, the largest in the Oriental trade. The Dakota makes her maiden voyage on July 24.

The expenditure of the Crow's Nest Company and subsidiary companies on capital account for improvements this year will be $250,000, which amount does not include the cost of the new tipple. A new office building at Fernie, which cost $28,000, will be completed by the end of September.

In reference to the prospects for British Columbia attention is directed to a statement made recently by Mr. C. E. Goodale, a mining engineer and metallurgist of considerable reputation, who says:—

"I am deeply impressed with the possibilities of the mining industry in British Columbia. There is every reason to believe that the output of the big mines of the boundary district will ere many years rival that of Butte in regard to tonnage. Nature has not been so considerate at Butte. The values in its mines are higher, of course, running from $9.36 to $12.85 per ton, but they have to bring out lime for fifty miles at a cost of a dollar a ton. Taken altogether, and remembering that they have to roast our ores, we have more complicated problems to deal with than exist in the Boundary district."

* * *

MONTREAL LETTER.

A meeting of the Quebec Cabinet was held at the Provincial Government offices in this city on Tuesday, the 25th inst., at which the minister received a delegation from the Montreal Hardware Men's Association, composed of Messrs. Geo. A. Kohl, J. B. Learmont, and T. H. Newman. Those gentlemen protested against the special tax imposed upon the commercial travellers of foreign firms, and declared that such a tax seriously interfered with their trade. Several foreign travellers had come here, and on finding the new tax in force had refused to pay it and returned or gone to Toronto, and declared that any business they did with Montreal merchants must be conducted by mail, so as to avoid the tax. The direct result of this case, said the hardware men, was to drive the trade to other provinces, and in proof of this assertion they produced letters from several English manufacturing firms, stating that no more travellers would be sent to this province, and if the Montreal firms wished to do business with them it must be through their agents at Toronto. The delegation was carefully received by the Premier and his colleagues, who promised to give this complaint their careful consideration.

Mr. Daniel Bergevin has been appointed stock-tax collector for the Province of Quebec, with headquarters in Montreal, in connection with the new law which will come into force on August 1st. He has opened offices in the Board of Trade building. Besides seeing that the law is duly observed. Mr. Bergevin's duties will include the sale of stamps. The new law places a tax of two cents per hundred dollars on the par value of every sale, transfer or assignment of shares, bonds, debentures, or debenture shares issued by any corporation or company, made or carried into effect in this Province, failure to pay the tax making the sale illegal. The vendor is compelled to pay the tax, and where the transaction is done through a broker, the latter is called upon to see that the stamps are properly affixed and cancelled by writing the date in ink upon them, securing repayment from the vendor.

On Monday, the 24th inst., the chartered accountants in Montreal celebrated their twenty-fifth anniversary as an incorporated body. It was in the year 1879, that a number of the leading accountants in Montreal held conferences with the object of forming an association, and also for the purpose of establishing accountancy as one of the learned professions. The result of the conferences was that an application was made to the legislature of the Province of Quebec for an Act of Incorporation, and a bill was passed and received assent of the Lieutenant-Governor of the Province on the 24th July, 1880. The aim and object of this Association has always been to maintain a high standard of efficiency amongst its members, and the result has fully realized the expectations of its incorporation. The Association will hold an anniversary dinner on the evening of September 22nd, in the Montreal Club. Representatives of the Scotch, English, and American Accountants' Association have been invited to attend.

The new issue of the preferred stock of the Ogilvie Flour Mills Company, Limited, being the balance of the $400,000 remaining in the treasury, has all been taken up by the shareholders to whom it was offered. The first payment of $25 a share is due on July 27th, the next payment of $25 a share on August 27th, and the last payment of $50 a share on September 27th. The new issue is to devoted to additions to the company's plant.

Chief Benoit, of the local fire brigade, in discussing proposed improvements in the Montreal fire department, stated that when they shall have procured two more aerial trucks and four more 1,000-gallon steamers, and an extra 5,000 feet of hose, Montreal will surpass any city of its size in the whole of North America, so far as fire equipment is concerned. Members of the Fire Underwriters' Association do not, however, appear to take such a rosy view of the matter. Speaking to a contemporary the other day one of their number said: "There are too many losses by fires, considering the present equipment of the fire department in the city, and while I do not care to discuss the condition of the brigade, or the fire protection facilities the city possesses, I can assure you that so long as the losses by fire are as great as they were last year, there will be no reduction in the present high rates, whatever the fire committee or the brigade may do." Several insurance men have reported that the present year has been a light one on fires up to now, but November and December usually proved to be bad months.

"MOUNT ROYAL."

Montreal, July 26th, 1905.

* * *

—The striking teamsters in Chicago deserve all they now seem to be getting. After a fight, which was foolish and treacherous in its beginning, and been in its course attended by the most disgraceful scenes of riot, the men have ended in most complete failure and abject surrender and are now trying to get back to work on any terms. It has deprived them of $500,000 or more in wages, cost the business men of the city millions, caused nearly a thousand arrests and proved the severest blow to labor for many years.

WITH MORE THAN

$24,000,000

Of carefully invested funds, we are giving our Depositors and Debenture-holders a security from which the element of risk is eliminated. That this is appreciated by the investing public is evidenced by the fact that during the year 1904 the funds placed with the Corporation for investment increased from

$15,040,540 to $15,892,546

SEND FOR PAMPHLET CONTAINING LAST
ANNUAL REPORT, FINANCIAL STATEMENT, ETC.

Canada Permanent Mortgage Corporation,
TORONTO STREET, TORONTO.

WHY lock your money up in a bank to bear an insignificant rate of interest when you can purchase our Debentures, which are issued for one, two, three, four or five years, and bear interest at five per cent. per annum. Half-yearly interest coupons, made payable to bearer, are attached to these Debentures. . . . . .

The Debentures are transferable. Remember your money is safe here. There is absolutely no chance for loss. Write us for further information. . . . 6

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

It is understood that the Dominion Government is distinctly averse to allowing the United States Steel Corporation a share in the bounty granted on steel, should that corporation decide to establish a new plant in Canada as reported.

Mercantile Summary

The Winnipeg Bag Works were last week badly scorched by fire, at a total loss of $15,000.

M. A. Cardinal, a dealer in dairy supplies at Montreal for the past four years, has become involved through endorsations, and has had to assign.

An important convention has been in session in Toronto this week, that of the American Boiler Manufacturers' Association of the United States and Canada.

J. B. Audet was formerly storeman for a Levis, Que., grocery jobbing firm, and a year ago last spring started business for himself as a retailer in the adjoining village of Lauzon. He has already failed.

A hotel-keeper at St. Hyacinthe, Que., J. B. Gaucher by name, has assigned. He was a farmer, and only recently bought a hotel property at what was considered a high figure, being assisted in the deal by his father.——Auguste D'Amour, who also began hotel keeping at Hull, two or three years ago, is also reported insolvent, as well as Joseph Lamarche, in the same line at Montreal. Lamarche had been unsuccessful in the sawmilling business some years ago, and subsequently had attempted butchering for a time before taking to the hotel business.

A winding-up order has been issued by the Court of Sherbrooke, Que., in the matter of the Drummond Cotton & Bleaching Co., of Drummondville, Que., upon the petition of the Eastern Township Brick Mfg. Co. This concern was promoted last year under a bonus agreement with the town of Drummondville, whereby the company was to get a cash bonus of $15,000, payable six months after actual operations had begun, free water-power and tax exemption for a term of years. The chief promoter was Mr. G. Bothamley, formerly chief chemist of the Dominion Cotton Mills Co., and reputed a good practical man, but considerable difficulty has been experienced in attracting the required capital.

The Toronto-Niagara Power Company is mapping out a plan of extended operations with St. Catharines as their centre. So far as we can learn it is the intention to build electric lines between that place and Stony Creek to connect with Hamilton, and eventually Toronto, while the main line will run from Stony Creek to Buffalo, touching at Allanburg. A line will also be built south from here to Pelham township, and the town of Welland. In order to get into St. Catharines from the west, the company will construct a high level bridge for railway, foot and vehicle traffic over the old canal. The power line is to be extended westward as far as London, touching at Brantford, Paris, Woodstock, Ingersoll, and other points, while branch lines are to be built to Galt, Hespeler, Guelph, and other towns.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Henderson Roller Bearing Company have taken out a permit to build a $30,000 brick and stone factory in Toronto.

An assignment has been made to W. A. Cole, by James Pratt & Sons, leading boot and shoe dealers of Ottawa. The business is an old established one, but under the management of the sons has of late years shown signs of dry rot, and several suits have been followed by insolvency proceedings.

Joseph O. Dowd, a Montreal grocery retailer, has assigned voluntarily, and shows nominal assets of $1,500, as against liabilities of $2,500.——A. Lafleur, also in the grocery line in the same city, has assigned, and has since proposed a compromise at the rate of 20 cents, secured by his father.

The dredge "Sir Wilfrid Laurier," which sank nearly three years ago while being towed from Polson's Ship Yard, Toronto, to Montreal, has been located in some eighty feet of water between Newcastle and Port Hope. Measures are to be taken, we understand, to raise the dredge, which cost $65,000.

A meeting of the creditors of Ludger Boulanger, St. Samuel de Gayhurst, Que., is called for the 4th of August to appoint a curator, he having abandoned his estate. He was formerly a blacksmith at Chartierville, and started storekeeping at his present address in 1903, also becoming interested in a baking business with one Martin. His liabilities are reported at $5,500, principally in Quebec.

An offer of compromise, at the rate of 25 cents on the dollar, is made by Abdella Sayre, a Syrian, who for several years past has carried on stores at Adamsville, Beersville, and Richibucto, N.B. His Beersville establishment was destroyed by fire recently, and he claims to have had goods there to the amount of $7,000, with only $1,500 insurance. His liabilities amount to about $8,000, and there does not seem to be any general disposition to accept his offer.

It is reported from Nelson that a strike rivalling in importance anything yet made in the Poplar country for richness and extent has just been made on the Swede claim. It is stated that quartz has been discovered of indefinite extent, proved for about a hundred feet, and uncovered for about half that length, averaging about two feet in width and assaying richer than anything seen anywhere else in the province. The lowest assays run over $5,000, and the best over $100,000 to the ton. A directors' meeting has been called to form a new company to operate the Swede. Good strikes have also been made upon the Smith, Rogers and Chisholm properties near the Swede. Last week good ore was found at a depth of 700 ft. in the long tunnel being driven on the Silver Cup, which is 400 feet below the former workings.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

OSBORNE & FRANCIS,

54 King Street West, Toronto.

Mercantile Summary.

Listowel, Ont., ratepayers defeated a by-law to borrow the sum of $16,000 on debentures for constructing permanent steel and concrete bridges.

The Unuk River Smelting and Transportation Company have purchased the Ceperley and Rounsfell silver properties on Vancouver Island, the price being $60,000.

The Ontario Transmission Company, Ltd., Niagara Falls, Ont., capital, $1,000,000, has been granted a Dominion Government charter to acquire water privileges, and develop electric and other motive power. S. G. Crowell, of Toronto, is among the charter members.

J. R. Ouimet, of Montreal, with considerable experience as a dry goods clerk, began business for himself last September, but has already failed, and Kent & Turcotte, accountants, are in charge of his estate. He owes some $20,000, with apparent assets of $15,000.

Copper-gold ore, running $90 to the ton, is reported to have been struck in the Jane workings of the Britannia Copper Syndicate. The values, over and above the average of $20 encountered in the main ore shoot of the Jane, are said to lie principally in gold in the new strike. It is further asserted that stringers of native copper have been uncovered in the tunnel in the Mammoth Bluff where work was carried on all last winter by two men.

The Rossland Miner speaks of rumors concerning a new mining merger in Rossland district. It is said to include the White Bear, the California, the Giant, the Cariboo, and possibly the St. Paul, and one or two other properties in that neighborhood. The merger is said to be arranged by people who are closely affiliated with the Great Northern Railway for the purpose of increasing the business of the Red Mountain Railway, which has materially fallen off during the past year, owing to the decrease in the shipments from the Le Roi, and the fact that none of the other mines of the camp is now shipping ore to Northport.

The total ore shipments from the Boundary district of British Columbia for the first six months of the present year amounted to over 450,000 tons in spite of the fact that the "Brooklyn," a large shipper, has been partially idle. The Granby Company, the largest shipping company in British Columbia, will have its two new furnaces in operation shortly after the first of August, which will give an additional output of these mines alone of some 20,000 tons monthly, or say 100,000 tons for the remaining five months of the year. All this is in addition to the average Granby output of about 50,000 tons monthly. Under ordinary circumstances, this assures a Boundary tonnage of more than a million tons of copper gold ore for 1905, which at say $5 per ton, will make the respectable total of $5,000,000.

PORT ARTHUR & FORT WILLIAM.

Post Office ddress. — — Port Arthur, Ont.

Mercantile Summary.

The C.P.R. has awarded a contract for double-tracking the main line between Fort William and Winnipeg to Messrs. Foley Bros., of Minneapolis. The distance is over 400 miles, and the work is to be finished within three years.

It is said the Grand Trunk Railway Company intend to build a spur line on the west side of the Welland Canal to reach the 2,000,000 bushel elevator at Port Colborne, now being built by the Government.

The Grand Trunk Railway Company is erecting a forty-stall round-house at Turcot. The new engine house is being built to relieve the round-houses at Point St. Charles, and also as a part of a scheme to construct large classification yards at Turcot.

The Quebec Transportation Company propose to put on a semi-weekly service between Quebec and Liverpool, and ask the Quebec Harbor Commission for freedom from port dues and wharfage for ten years. The latter have made counter propositions which are still in abeyance.

The American Bank Note Company, Ottawa, is opening a branch office in Toronto, with Mr. P. B. Toller as manager. In addition to doing work for the Dominion Government the company make bank notes for the chartered banks of Canada, with special safeguards against counterfeiting, as well as bonds, stock certificates and securities of all kinds.

The Chilliwack, B.C., Power and Light Company, Limited, held their first annual meeting last week and elected officers as follows: President, Mr. George R. Ashwell, Chilliwack, B.C.; first vice-president, Mr. H. W. Vanderhoof, Sumas, Wash.; second vice-president, Mr. E. C. Rose, Rossland, B.C.; treasurer, Mr. W. L. Macken, Chilliwack, B.C.; secretary and general manager, Mr. J. Burtt Morgan, Chilliwack, B.C.

The Spider Lake Mining Company, Windsor, Ont., capital, $1,000,000, has been incorporated, H. D. Keeler and A. H. Rochey, are interested.

⁂

BRITISH TRADE.

The returns of the British Board of Trade for the total foreign commerce of the United Kingdom during the first half of 1905, show that there has been remarkable activity in the export trade in almost every branch. Even under food and drink we find an increased export of nearly £800,000. Under raw materials there is a net decrease in exports of £472,000, attributable to a decrease in exports of coal of £715,000. When we turn to exports of manufactured articles we find general increase almost everywhere. Apparel, ships, and manufactures of wood and timber are the only three items not showing increase. Exports of iron and steel have increased by nearly £1,000,000; of other metals by £500,000; of cutlery, hardware, etc., by £80,000; of telegraph cables and apparatus by £160,000; and of machinery by £700,000. Under textiles we find an in-

crease in exports of cottons by £5,100,000; of woolens by £1,730,000; and of other materials by £74,000. Exports of chemicals increased by £232,000; of leather manufactures by £400,000; of earthenware and glass by £12,000; and even paper has a small increase to show. Evidently the depressed condition of the home market has not found a reflex in the markets of the world, but we could wish for a renewal of activity in the domestic trade. Though the net increase in imports for the half-year is only £1,177,000, it is noticeable that the smallness of this figure is chiefly due to a considerable decrease of £1,664,000 under articles of food, drink, and tobacco. Under raw materials there is a net increase of £1,220,000, despite a falling off in the value of wood and timber imports of £856,000, of cotton of £711,000, and an extraordinary decrease of £1,509,000 under oil seeds, nuts, oils, fats and gums. The principal increase is found under wool, £2,360,000, but hides and undressed skins increased by £478,000. Turning to imported manufactures, it is remarkable that the net increase of £1,603,000 includes an increase of no less than £1,210,000 under the heading miscellaneous. There has been an increase of £448,000 in the value of cotton goods imported, and of £589,000 in the value of imported woolens; an increase of £158,000 under machinery, and £239,000 under apparel. Imports of cutlery, hardware, etc., were less in value by £241,000; imports of leather manufactures by £471,000; and of earthenware and glass by £192,000. A decline of £123,000 under manufactures of wood and timber is not to be wondered at in view of the depressed state of the building trade.

⁂

TORONTO MARKETS.

Toronto, July 27th, 1905.

Chemicals, Drugs, etc.—A fair volume of trade is being carried on on a normally remunerative basis. Opium and quinine remain in about the same position as last reported, with no great amount of movement in either. Camphor and carbolic acid are easier, as also is cod liver oil (Norwegian). From New York comes report that the drug trade is on the slow side. According to reports from Manchester, British trade for home requirements is quiet while export business is improving.

Dry Goods.—No complaint is to be heard from the wholesale dry goods as to the volume of business passing. That is, for this period of the year. Sorting orders are coming in with gratifying frequency. Travellers in the country districts report prospects good. For staple goods the demand continues good with no probability of any decline in prices, as far as one can foresee. Cotton (raw material), seems to be held even more strongly than it was, while all reports from the woolen centres unite

Pork Packing Business Wanted.

Advertisers would be glad to hear particulars of a Pork Packing Business for Sale. Modern Machinery and a first-class equipment absolutely necessary.
State terms.

Address, Box 345,
Monetary Times, Toronto.

Sale of Assets of the Oshawa Wire Fence Company,
Limited.

Tenders will be received up to noon of the 30th day of August next, addressed to the undersigned for the purchase of the following assets of the above named Company:—

Parcel No. 1.—Real Estate, including Three Story Brick Factory, having railway siding and centrally located in one of the best manufacturing towns in Canada.

Parcel No. 2.—Patent Rights, Fixed and Movable Machinery, Tools and Office Furniture.

Parcel No. 3.—Partially Manufactured Goods and Raw Material.

No tender necessarily accepted. This offers an excellent opportunity for a profitable investment in a steadily increasing business. Lack of capital the only reason for selling.

Further particulars, terms and conditions of sale, with full description of the several parcels, will be mailed on application, or may be inspected at the Company's Office.

L. K. MURTON,
Secretary of said Company, Oshawa.

Oshawa, July 22nd, 1905.

in the opinion that no decrease in firmness is likely for a long time to come.

Flour and Grain.—While the so-called "corner" in Manitoba wheat continues, business can only be described as dull. Ontario also is dull at the moment. For oats and other grains the market presents only dullness. Peas are firm. Canadian corn is firm. Ninety per cent. patents are quoted at $4.15 to $4.25 in buyers' bags, east or west. Not very much change has taken place in millfeed.

Fruits and Vegetables.—The feature of the fruit market, of course, is raspberries, which sell at 8 to 10c. per box. Other domestic fruits are fairly plentiful. Lemons are scarce, and in demand. We quote: Red currants, 65 to 85c. per basket; black currants, basket, $1 to $1.25; blue berries, basket, 60 to 90c.; cherries, large basket, sweet, $1 to $1.20; do., sour, 65 to 75c.; Gooseberries, large basket, 75c. to $1; bananas, bunch, $1.40 to $2; California peaches, case, $1 to $1.25; California plums, $1.25 to $1.50; Georgia peaches, $1.25 to $2; California apricots, $1.50 to $1.75; watermelons, 30 to 35c. each; cantaloupes, crate, $1.25 to $2; lemons, crate, $6 to $6.25, and oranges, from $4.75 to $5.50 per crate; tomatoes, 85c. to $1 per crate; potatoes, barrel, $2.25; cabbage, case, $1; onions, Bermudas, $1.15 to $1.25.

Groceries.—No further change has taken place in sugar, but the movement is on a healthy basis, in keeping with the requirements for preserving purposes. Interest is largely centered in canned goods, particularly in salmon, prices for which have now been made. Good news comes to hand respecting the movement of the fish. Teas and coffees are both somewhat dull. It is believed that the present more satisfactory state of business throughout the country is quite likely to continue.

Hardware.—There is practically no feature to report under this heading. Prices for all lines of general hardware continue much the same. Articles required in the building trades continue in gratifying request. The demand for farmers' implements has now slackened with the hastening forward of the season, but fencing and such goods are being called for in large quantities.

Hides and Skins.—The demand for hides is good, and not much supply coming forward. Calfskins and lambskins are also somewhat scarce.

Live Stock.—Firmer conditions prevail in the market for several lines of live animals. Strictly first-class beeves are not abundant. Buying of butchers' was at this week's market very active, and prices went up from 10 to 20 per cent. Milch cows also were in strong demand. Medium weight cattle of good class are in demand. There was no great demand for short-keep feeders. The market for hogs is firm, and a 25c. advance in prices has taken place. For sheep and lambs prices were better.

Provisions.—Prices for butter are about the same. Receipts are moderate. Eggs are quiet. Prices for cheese are firmer. Only a few dressed hogs are coming in, and values keep steady. Lard is in normal demand.

Wool.—More fleece is now coming forward, but prices are nominally the same. A dull market is experienced for tallow.

MONTREAL MARKETS.

Montreal, July 26th, 1905.

Ashes.—The market is again easier, and $5.10 would now be the outside limit for first quality pots of good tare, the general quotation being $5 to $5.10.

THE ESSENTIAL ELEMENTS

of a good investment—profit with security—are embodied to a marked degree in the Endowment Contract of The Great-West Life Assurance Company. The accumulating profits are high, the premium payments low, and the security undoubted.

Seconds are quoted at about $4.60, and pearls, in which no recent business is reported, at from $7 to $7.50.

Dairy Products.—The cheese market on Saturday last took quite a decided upward turn, which some are disposed to attribute more or less to manipulation, though there has been increased British enquiry. Local quotations for fine Western makes are now from 10⅜ to 10⅝c., with fine Easterns ranging from 9⅞ to 10⅛c. In butter there has also been a marked advance since this day week, with active English demand reported from Britain, where stocks are evidently light. Some holders are asking as high as 23c. for choice light salted creamery, and ordinary choice is quoted at 22 to 22½c., with undergrades at 21 to 21½c.; fine dairy is scarce, and is quoted at 19 to 20c. Cheese shipments last week were 66,947 boxes, about 13,000 less than the same week of 1904. From New York the shipments were only about 1,700 boxes, showing how Montreal has entirely captured the export trade. Exports of butter were 19,422 packages.

Cements and Firebricks.—There is a steady demand for cements, and a pretty active fall business is looked for. Owing to the recent advance by American manufacturers the importation of English cements is increasing. For Belgian cement we quote $1.80 to $2; English, $1.90 to $2.10; American and Canadian, $2.30 to $2.40, less rebate for returned packages. Firebricks remain at $17 to $22 per thousand.

Dry Goods.—Travellers are reported as taking a fair number of fall orders, but the majority of buyers seem to be exercising some degree of moderation, in placing their demands, and business on the whole cannot be called brisk. General collections are hardly so good as early in the month.

Groceries.—The rumors of a decline in molasses referred to last week have since taken definite shape, jobbers' prices being down two cents, to 35c. for single puncheons, with first hands quoting 32½ to 33c. for lots, though a bill of 400 puncheons is said to have been sold a few days ago at something under the inside figure. Both refineries report a very brisk demand for sugars, with quotations steady at $5 for standard granulated, and yellows ranging from $4.50 to $4.90. Cheap grade coffees are firmer. Local currant stocks are reported very light. The new crop of Valencia raisins is reported as progressing well. Of walnuts it is estimated there will be only half a crop.

Hides.—The market is a strong one, and dealers are now paying 10½c. for No. 1 beef hides, and in some cases a fraction higher, it is said. Lambskins have also shown further advance, being now quoted at 50c. each. In calfskins there is practically nothing doing, receipts for the season being about over.

Leather.—The volume of fall orders for boots and shoes is reported comparatively small as yet, but it is thought the higher prices being asked may have something to do with this. Quebec manufacturers are said to be even slacker than Montreal, and there is consequently no active buying of leather at the moment, but prices are stiff all around.

Metals and Hardware.—Since last writing there have been several further marked advances in ingot tin, for which 36c. is now asked locally in a jobbing way, and lead is also somewhat stiffer; copper is steady at 16½c., and there is no receding of prices for antimony, which is still held at 13½ to 14c. In iron and steel products there have been no recent changes, and all kinds of sheets and plates remain at old figures.

Oils, Paints, and Glass.—Travellers are again getting out, and a good fall business is looked for, but business at the moment remains quiet, and variations in prices are few and slight. Turpentine holds pretty steady at 90c. in single barrels. The general quotation for linseed oil is 50 and 53c. for raw and boiled respectively in ordinary lots, but business is reported at shaded figures; castor is quoted at 7½ to 8c.; fish oils are dull and neglected. Glass remains very firm, with reports of combination between English and Belgian makers. White lead, $5.25 for pure.

* * *

ECONOMIZED ON HIS INSURANCE.

A young man about to be tied up to a peach of a girl decided that he must provide for her future. Now, he was an economizer. When a boy he was just such another proposition as the millionaire biographed last month in Success, when that worthy went bare-footed, way down on the farm. But he is not yet a millionaire.

To make short this moral tale, it is enough to say that he let go as much of his dough as would induce two assessment societies to promise to pay his wifie the sum total of six thousand dollars at his demise. This payment was to be repeated yearly as long as he lived, and if he stopped at any time all he had unbelted previously would be lost, and the protection would cease.

But he thought the scheme was cheaper than being insured in a regular company, which would legally guarantee the protection which the others could only make a bluff at. And besides, the regular would have given him some return in value, even if he had ceased paying his premiums after a time. In fact, certain of its policies would have been a most profitable investment for him as well as full protection for his dame.

Well, as time mosied along, first one and then the other of these cut-rate societies began to run short of new blood to replace the old that was petering out. The death-rate of both commenced to hump it at an alarming pace. The older of the two increased its assessments largely on two occasions before going into the soup. And when the courts wound up its affairs, all the members had to pay a large assessment to help settle outstanding claims.

The other struggled on longer, and finally had its business reorganized and

Travelling
Representative
WANTED

We have a vacancy on our staff for a first-class advertising representative covering larger manufacturing and wholesale trade only.

Salary to start, fifteen hundred or two thousand with opportunities for advancement.

Applications invited from high-grade commercial travelers, or other competent men. The position and territory are particularly desirable, and all communications will be treated as strictly confidential.

Address,

H. CAGNER, LIMITED,
Board of Trade Building, Toronto, Ont.

Publisher "The Clothier and Haberdasher," "The Wine and Spirit Journal," "The Trader and Canadian Jeweler," "The Cigar and Tobacco Journal," etc.

put on a regular insurance basis. But this meant that the policy of our economical friend was subjected to a very heavy lien, in addition to his premiums being nearly doubled.

So that at a time of life when his insurance was most needed he was deprived of nearly all of it. Nor could he now insure in the regular company. At this time his health did not permit his being accepted by it, and if it had, he was of an age when premiums would be very much higher than if he had chosen the sure thing when a younger man.

Moral (drawn by the Insurance Times).—If you will buy eggs at bargain-day rates don't kick later on.

* * *

WEALTH, AND WHERE IT COMES FROM.

It is contended by J. Laurence Laughlin, professor of economics in the Chicago University, that the amassment of great wealth could not have been successful if the "captains of industry" had not, in one way or another, created a vast store of additional wealth for the nation, out of which they took a part; and he attributes the greater portion of the invective against wealth to the same envious spirit that animates the dog in his "yawp" at the express train which he cannot outrun. The American Investor fears he is not entirely disingenuous; perhaps his view is obscured because, in the nature of things, he does not come actively in contact with the concrete phenomena. It is as great an error to ignore the protests of the idealists and practical men who are attacking the conditions with disinterested motives as it is to accept the dicta of demagogues, who magnify the evil from motives of another kind. Reasonable men do not begrudge the successful inventor the wealth he acquires through the benefits he thereby bestows upon the race, even though the patent monopoly aids him; nor do right-minded citizens deny the legitimacy of very large rewards to those who reap them honorably in great successful enterprises. But many thousands of reasonable and right-minded men condemn the acquisition of an inordinate share of the wealth product by means which, even if not strictly unlawful, are immoral; the utilization of advantages, illegitimately and unconscionably, is held to be an intolerable abuse by intelligent, conscientious citizens. Examples of such methods of acquiring wealth are so numerous that it is surprising that they have been tolerated so long. The adulteration of foodstuffs; the arbitrary enhancement of the cost of necessaries of life, rendered possible by machinations involving abuse of power; the evasion of taxation; the influencing of legislation unfavorable to the public interest are a few which are commended to his thoughtful consideration.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular, dated July 22nd, 1905, said:

With such a protracted period of intense heat the absence of any considerable speculative activity on the stock exchange was this week quite natural. But the fact that, in the face of this inactivity, prices have been so well maintained strongly indicates that the supply of floating securities is smaller than usual at this season; and the amount of resistance that has been shown to concerted operations for the decline should be given full importance in considering the technical position of the market. The factor of prime importance at the present time is the corn crop; the weather now current is certainly ideal and promises, in view of the increase of more than 2,000,000 acres in the area, to furnish a harvest that has not heretofore been exceeded in this country. But it will be fully the middle of August before the crop may be considered out of danger. Meanwhile the prospects certainly favor irregularity in the stock market, for it is quite improbable that the crop will proceed to maturity without a number of setbacks of more or less importance. As has been repeatedly pointed out in these advices, many of the standard investment stocks are on such a high basis that quotations can hardly be said to be justified either by their present dividend distributions or by any distributions their directors may consider it conservative finance to declare within the next year or so. There are, of course, the lower priced stocks that are susceptible of marked improvement should they be placed upon the dividend paying list or should their small dividends be increased. Except for the latter class, it seems fair to assume that any further material advances must be dependent, not upon the value of the securities as a source of investment, but upon the development of a period of arbitrary inflation such as frequently accompanies pronounced and general prosperity and activity among the industrial, commercial and agricultural classes of the country at large. Indications are not lacking of a trend towards such inflation—indications that might almost be considered promises were it not for the single adverse threat contained in the international monetary outlook. Our country is essentially an agricultural country; and if the present promises of the harvests are fulfilled we may look for one of the strongest buying movements, industrially, that this country has ever witnessed.

TRADE PAPER ADVERTISING.

There is no exaggeration in the claim that the trade journal provides the cheapest and most effective means of introducing an article, says the "Fourth Estate." Every-day experience makes it good; but this is not to say that the average merchant who is well stocked is going to buy immediately because he has seen an advertisement which interests him, nor that he will do more, as a first step, if he needs goods of the class advertised, than to submit the usual enquiries for samples of further information, which, if found satisfactory, will justify his taking up with a new thing.

The desirability of keeping an advertisement continuously before the trade is obvious. Goods already well known are kept to the front in this way, and perhaps the most liberal ad-

ESTABLISHED 1858.
Managers and Underwriters.

vertisers in trade journals are manufacturers, who have nothing new to offer, but who appreciate the importance of competition, and who will not permit competition to obscure, by their own neglect of advertising, the merits of the goods they offer.

To establish the sale of a new article, though aided by the intelligent recognition of novelty and improvement on the part of the retail merchant, surely calls for patience and liberality in dealing with the organs devoted to trade

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office - Waterloo, Ont.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

announcements, but which is justified by results, as the success of well-conducted journals make abundantly manifest.

* * *

—The man who can be depended upon to carry things through is the one who writes history. The fate of many a country has hung upon a single battle, and that battle has been won by a single man who was equal to the occasion. The reason there are so many failures about is that there are so many men who quit just before they get there. They fail at the critical point. They hold a piece of property just long enough to help someone else to make a fortune; they get in sight of the port and throw up the helm; they are within touch of the goal and they turn yellow. The world is full of those that can be kicked into success, if they can get anybody with a good square toe and a good muscle to boost them. The man of whom you can say: "Give him anything to do and he is sure to do it" is like hen's teeth, few and far between. When you find one, you have one of God's aristocracy. "As the cold of snow in the time of harvest, so is a faithful messenger to them that send him, for he refresheth the souls of his masters."—"Solomon," in Shoe and Leather Journal.

—The Reid-Newfoundland Company lately offered to sell to the Newfoundland Government their coastal fleet of steamships, and the company's rights and franchises, valued originally at $12,000,000. Of the price named, viz., three million dollars, about one million would represent the cost of the steamers, another million the cost of the rolling stock and improvements due by the Government, leaving one million for the purchase of the unexpired coastal steamship and inland railway transportation lease. It is stated, however, that for some reason the offer has been refused by the Government.

—H. A. Fuller, toastmaster at the annual banquet of the Pennsylvania bankers' convention in Wilkesbarre last month, introduced the banker who responded to the toast, "Our Depositors," with the following story: "A depositor in a neighboring trust company is an eccentric farmer of middle age. This farmer, though he is wealthy, overdrew his account one day to the tune of $500. Notification of the overdraft was at once sent to him. He replied: 'You tell me I have overdrawn my account $500. Well, I know it. So what is the necessity of bothering me about it? Why not trust me as I do you? Do I go to you when I have money in your institution and shout: "You have $500 of mine?" Such statements are superfluous either way.'"

* * *

James T. Walsh, of Barrie, Ont., soda water manufacturer, has made an assignment to Mr. W. A. Boys, assignee, in trust for the benefit of creditors. A meeting of the creditors was held on the 24th of July for the appointment of inspectors and the giving of directions for the disposal of the estate.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00

ADVANCE IN LEATHER.

For a long time past, as has been noted before in these columns, the leather market has possessed a strongly upward tendency. In fact, values were nominally raised several weeks, or months ago, but it is always difficult in such a business as this, which is carried on largely by a number of small jobbers, for all to arrive at a settled policy and stand by it. Besides this, the values of leather, the raw material, are rendered less elastic by the conservative nature of the trade in the finished article made from it. That is to say, the price of boots and shoes, to take as illustration the chief manufactures from leather, is as it were fixed by retail custom to such an extent that it is difficult to change them at will, even when all the conditions,—price of leather and trimmings, cost of labor and so forth, emphatically call for revision. It is true that boots and shoes, like leather, were nominaly advanced some months back, but also, similarly with leather, the new values remained largely nominal.

But this state of things could not last for ever. If leather be the raw material of boots and shoes, hides are the raw material of leather. And these have held a remarkably strong position for a long time past. To such an extent indeed that tanners have claimed there was no profit in *their* business, owing to the lack of parity between the value of leather and that of hides, and boot manufacturers have claimed the same for theirs, on the ground that the prices of *their* products were away below a parity of those for leather, even though it was acknowledged by all that neither was sufficiently high.

It may be said that while all the allied trades were in this position, the one related with the other, it only needed some strong immediate far-reaching incentive to put the whole on a more reasonable basis.

Strangely enough this incentive, around which all the varied interests could rally and be induced to arrive at a settled policy, has been supplied by Japan. The Japanese Government has given a very large order for boots and shoes to the American Hide and Leather Company, and this cause, conspiring with the small stock of hides in the United States and the stringency brought about on the stocks in this country (it will be remembered that hides are on the Canadian free list), has been sufficient for the leather men to make the needed advances in prices with reasonable certainty of their being adhered to. Sole leather is not affected but most other lines are increased on an average of about 10 to 15 per cent., the former figure being the one officially decided upon at a meeting on Wednesday of the tanners' branch of the Toronto Board of Trade. That is, so far as Ontario is concerned. The Quebec tanners, when we last heard, had cancelled all quotations. We may add, as further reasons for the strong market, the falling off in the export of hides from Australia owing to drought and the depletion of South Africa of its herds as a result of the war.

In Chicago the values of leather and leather goods are equally strong, if not stronger than they are here, and a further advance is anticipated all along the line. It looks as if something similar, which in fact has been long anticipated, will have to take place here.

Late advices from England speak of the leather trade in that country being "flat," with little or nothing doing, so the boom here and in the United States is not universal. At the same time it is believed that the dullness is only temporary, and even now, notwithstanding the dullness, prices keep their firmness. There is a good supply of heavy sole leather, but only a limited demand, and one result is that prices have weakened slightly. Offals are in good demand at high prices, but the supply is very scanty. In light-weight sole, prices are still hardening because of limited supply. In upper leathers, too, there is a decided tendency to better prices. Manufacturers are showing caution in their buying and are only purchasing what they require for immediate use. Although business is a little slack at the present time, yet there are encouraging prospects for a good trade.

THE ONTARIO LOAN CORPORATIONS.

The importance of Ontario's loan companies among the large and deservedly popular financial institutions of the Dominion is amply attested in the recently issued report of Dr. J. Howard Hunter, Registrar of Loan Corporations for the Province of Ontario. The report amply indicates as well the voluminous nature of his labors. The information given is very extensive and deals with loan, savings, mortgage, trust, building, debenture and investment companies. The oldest of these dates from as far back as 1843. The great mass of tabulated statements on the whole shows steady progress since that date. Including the various kinds of loan companies, and the trust companies, there are now 78 companies in Ontario.

The total mortgages aggregate $108,327,499.84, in addition to $1,341,941.52 on land now offered for sale, or an increase for the year of over $4,000,000. The loans on stocks and bonds at the end of the year amounted to $20,068,862.49, an increase of almost $1,000,000 over the preceding year. The deposits held by the companies amount to $20,150,486.05, also an increase of about $1,000,000. The total assets of all the companies for 1904 amount to$171,966,429.68, or an advance on 1903 of over $7,000,000, the total for that year being $104,932,523.86.

The companies have been separated into four groups, loan companies having only permanent stock, those having terminating stock, as well as permanent, or having terminating stock only, loaning land companies and trust companies. The total authorized capital of these is $121,715,571.28, a decrease of nearly $500,000 from 1903; the permanent capital subscribed is $74,598,994.15, a decrease of about $450,000; and the terminating capital subscribed is $15,825,780, a decrease of over $2,000,000. The total liabilities to shareholders are placed at $65,805,637.68, and to the public, $81,848,419.19, while the contingent liabilities come to $24,312,372.81, balancing the assets already given. The repayment of trust funds shows a decided increase over 1903, being $16,129,361.30, while the previous year was $13,679,791.11.

There is also given a mass of details of a miscellaneous character. Such are the loans written off or transferred to real estate, $358,849.09; debentures maturing during 1904-05, $11,886,205.90; average rate of interest paid on deposits, 3.759; on debentures, 4.296. The average rate of interest received on mortgages of realty was 6.102, and on other securities 5.869. The amount of mortgages enforced was $345,937.21.

An interesting and monitory feature is an appendix giving particulars of proceedings under the loan corporation act, and pointing out the fraudulence and instability of "credit companies," bond-investment schemes, "home-building" projects, and other illegal devices, the methods of which are indicated at length.

ABOUT BUSINESS SYSTEMS.

We remember hearing or reading the story of a western rancher who was so unmethodical in his business that he yearly wasted a small fortune through having no perfect system of accounts nor regular routine for each day's work. Yet, in spite of this drawback, he made a pile of money; he had, we suppose a natural bent or genius for the rearing and disposal of cattle which was more than sufficient to overcome defects in certain of the details.

Another man came along, a smart business man from the East, with his head full of profits and losses and systematic account-keeping. He was quick to see what a good investment was presented by ranching in that favored locality, and if only the leaks could be prevented and the profits and losses both systematized, there was, he saw clearly, a sure prospect for an enormous fortune.

So the Easterner started in and began ranching near to No. 1. The latter went on in his old way, with money pouring in fast, but with large amounts wasted through his rough-and-ready methods. The former on the contrary was much more careful. Every dollar was not only fully accounted for, but was (one may say) tagged and initialed half a dozen times over, on each of its rounds. There was no chance of a dollar or a cent possibly going astray, each one was so carefully booked. It was the same with each animal on the place: a careful system looked after, not its health particularly, but its entry in a set of books.

Five years came and went and comparison was often made between the two ranchers. The first went on in the even tenor of his way, making money hand over fist. The one from the East prospered too and made money but when everything was reckoned up it was found that the element of cost, the sum needed for keeping up the endless routine used in his business, had been so large that it had eaten up a considerable proportion of the profits, and that the net earnings of his ranch were actually a long way behind those of his more easy-going neighbor.

There is an allegory in this for many other business men, though it does not by any means prove that they should not be careful and systematic. Method is good, is essential, but it must be kept in its place. Some of us mistake the means for the end. As we take it, the *raison d'etre* of system, or routine, is only to expedite the carrying on of business in an accurate way. But too many are in the habit of regarding the system as the first consideration, whereas rationally it is only a mere crutch with which the better to gain certain results. The instant it becomes cumbersome, or more nuisance than it is worth—and many complicated pieces of red-tape are of this nature—it should be thrown away like a crutch by a well man. To retain it after that stage has been reached is to handicap one's free movements and to buy an aid to success at the price of the success itself. System is good, but it should not be stereotyped; the system that is one man's strength is another's weakness. A carefully thought-out method for reaching an object is important, but not nearly so important as the object itself. The only question to be asked of any man's honest method of conducting his business, however much it may differ from another man's, is: does it do its work speedily, accurately and economically? If it takes more time than it saves, let it be discarded.

UP-TO-DATE LIFE INSURANCE.

If we knew no better we might imagine that the promoter, founder, supervisor, and managing director of the Monarch Life Insurance Company, of Toronto, recently "incorporated by special Act of the Parliament of Canada" had a name to conjure with in the realms of finance and insurance. Certainly he himself must be under that impression, so full is the prospectus of "T. Marshall Ostrom." Mr. T. Marshall Ostrom appears, indeed, to such an extent in that interesting document that we caught a friend to whom we showed it trying to find some anagrammistic connection between the all-pervading manager's name and that of the company itself. We started this article by saying "if we knew no better," we simply meant that, so far as has come to our ears, the name of Mr. Ostrom, in spite of his "thorough acquaintance with the intricacies of the management of life insurance business" and "his remarkable faculty for taking hold of inexperienced agents and educating them to the art of the profession," and so forth, does *not* suggest strong memories of any high-class insurance company of brilliant success. Yet, if as we are told, the Monarch Company is ultimately to find its place as *first* among the Dominion's financial institutions, he really must be a man of more than usually good ability.

Perhaps he is, and for the sake of shareholders sanguine enough to take stock in his somewhat peculiarly worded scheme, we hope this may be the case. For, as the advertisement now before us very truly remarks, the success of a life insurance company depends upon the management and it not only requires experience but men especially adapted for the business. We readily understand that such a business as that of the Monarch is proposed to be, does strongly need management specially adapted thereto, but perhaps this is only another indication of what the directors felt when they induced Mr. Ostrom to "accept the office of managing director" after they had concluded that "new times demand new methods and new men." Mr. Ostrom has our congratulations on so exactly filling the bill.

Meanwhile, we will content ourselves with asking: Who is Mr. T. Marshall Ostrom? What is his past history? What credentials does he possess warranting the public to believe that he can carry to success such a high-sounding enterprise? Has he any actuarial experience or what certificates from actuarial societies?

We do not know the exact nature of the special T. Marshall Ostrom copyrighted policies, which are such a feature of this up-to-date company and which give it such "superior advantages over all other." The Government, however, has a more or less stereotyped form for the charters it now grants life insurance companies. Has this one succeeded in obtaining extra privileges, or are these peculiar features nothing more than other companies already possess under an ordinary name? Or, if Mr. Ostrom *is* empowered to make use of his unique facility for inventing new contracts, are those contracts of any value, not of course from his own point of view, but from that of people who are plucky enough to dash in and sign them?

Into all life insurance there enters the element of *cost*. This is based upon the mortality table and on the rate of interest, and these standards are fixed by the Dominion Government. An insurance company must use at least as stringent a table of mortality as that of the British Institute of Actuaries (Hm.) and a 3½ per cent. rate of interest, because that is the table and that is the rate of interest named in the Insurance Act. We repeat, has Mr. Ostrom's company any special privileges in its charter? If not, why all his moonshine talk about patent methods of insurance? True, a few particulars are given about the T. Marshall Ostrom House Endowment System. So far as we can make out the house pays one's insurance premium, and the insurance pays for the house—on a kind of endless chain or perpetual motion process, so to speak. This should sound very pleasant in a working man's ear for instance, and will no doubt meet with eager response from those who have not been led to suspect all home-building schemes by a perusal of the recent report of the Registrar of Loan Corporations, etc. Referring to home-builders' schemes in general and to the National Land Company of old days in particular, the report says: "O'Connor's visionary scheme has in our day been revived under various disguises, but the excuse of insanity" [for O'Connor, its promoter, was afterwards incarcerated as a madman] "cannot be offered for the promoters in our time, it is the subscribers that are insane."

Looking, however, from a more general standpoint, at this new company which asks for a slice of the public's money, the question recurs: What hope of success *can* it have to warrant the colored talk of the promoter? And Mr. Ostrom must certainly possess the glib tongue of the arch-promoter in no uncommon degree, even though his name does *not* resound across the continent as a great insurance manager. Otherwise, how account for the fact that his company already has been entrusted with even enough money to advertise its prospectus? Recent history shows that life insurance companies started in this country even under good auspices have had a by no means easy row to hoe. During the last eight years there have been, if we remember correctly, at least eight life insurance companies started under Dominion or Ontario licenses, and of these not more than one has so far paid a dividend to shareholders out of profits. Mr. Ostrom may be new and different, but can he convince investors that his luck will be different? We have given to this proposition more space than it probably deserves, but it is necessary in the public interest that the fair repute of the life insurance business should be retained intact, and that investors who are asked to put their money into such schemes should know what they are doing.

THE "CORNER" IN MANITOBA WHEAT.

A very interesting state of things on the Chicago model developed in the Winnipeg grain market during the last few days, when there was practically a corner in July options, the first of its class. For several days the market was erratic, though it was not voluminous, the high prices frightening off actual bids. Nevertheless at one stage it reached $1.35. The option market and its intricacies are difficult to explain satisfactorily, and some people are inclined to condemn the whole system indiscriminately. The best opinion, however, leans, to the view that, while it is open to grave abuses, something of the sort is a needed equalizer of prices both from the traders' and the farmers' points of view. Of course the dividing line between gambling and legitimate trading is a very fine one but the question is, what would be the natural result, apart from the existence of an option market, of the enormous shipping by farmers of their wheat at certain periods if there were no means of taking care of prices in some more or less artificial manner? In this case there would appear to have been a real attempt to obtain a monopoly of July wheat for speculative purposes, but as usually happens the "corner" was topheavy and fell of its own inherent weakness. And it looks in any case as if the prime movers in the attempted deal will have to unload at a figure which will net them a greater loss than the profits of the corner will balance up.

Some of the persons taking part in the manipulation are reported to have taken legal action against the consequences of the deal in which they had their share and in which they were eventually "squeezed" pretty hard, but as they entered it for the purpose of making money but at the imminent risk of losing it, it is not quite clear what they expect to gain. Thus ends the first corner in Manitoba wheat, an interesting episode in the Canadian grain trade.

* * *

CANADA'S TRADE FOR 1904-5.

A comparative summary of the export and import trade of the Dominion of Canada for the fiscal years ending respectively, June 30th, 1904, and 1905, is presented as follows:—

	1903-4.	1904-5.
Imports for consumption ..	$251,460,737	$261,911,435
Domestic exports	198,414,439	190,854,946
Foreign exports	12,641,239	10,617,115
Coin and bullion	2,467,557	1,844,811
Totals	$464,981,972	$465,228,307

The details of the trade are shown in another table as follows:—

	1903-4.	1904-5.
Imports—		
Dutiable goods	$148,902,381	$150,914.668
Free goods	94.684,043	100,688.332
Coin and bullion	7.874.313	10,308,435
Totals	$251.460,737	$261,911,435
Domestic exports—		
The mine	33.626,739	31,932.325
Fisheries.	10,759,029	11.114,318
Forest	33.091,922	33.235,683
Animals and their product..	63,812,117	63.337,458
Agriculture	37.138,875	29,994,150
Manufactures	19.864,049	21,191,333
Miscellaneous	121,708	49,675
Totals	$198.414,439	$190,854,946

This shows that while the total trade of the country increased during the fiscal year just closed by about $247,000, there was a distinct falling off in the domestic export branch of over $8,000,000, besides a reduction of about $623,000 in coin and bullion. The manufactured exports, however, it is some satisfaction to be able to note, were not among the items responsible for the decrease, for on the other hand they increased by approximately a million and a third of dollars in value.

We would like to make an analysis of the articles exported from and imported into Canada, *by countries*, but the detailed figures for the complete fiscal year have not yet been issued. For the eleven months ended with May 31st, 1905, however, the total value of domestic goods exported from the Dominion to Great Britain was $86,290,028, while to the British Empire, inclusive of the above, it was $96,526,905. To these may be added the foreign goods which went to various parts of the Empire through Canadian ports, which would bring the aggregate up to $100,740,035. To the United States the value of goods exported in the same period was $59,572,035 or, including foreign goods by way of Canadian ports, $65,009,468. To Argentina the total value of goods shipped from Canada was $1,321,411; to Belgium $1,218,214; to France $1,276,956; to Germany $967,536; or a grand total of $175,923,102.

Coming to imports, for the eleven months ending with May 31st last, the free and dutiable goods entered for consumption in Canada and coming from Great Britain amounted in value to $53,639,659, or from the Empire $64,030,060. From the United States, the value was $145,030,111; Belgium sent us $1,536,802 worth; France $6,385,806; Germany $6,120,079; Japan $1,787,371; Switzerland $145,030,111, or a grand aggregate of $233,274,627.

The conclusion to be gained from a study of the figures is that while there has been a slight reaction in the degree of the Dominion's increasing prosperity, compared with what one had become accustomed to in the last few years, yet the country is holding its own well.

* * *

A SCOTCH VIEW ON FIRE INSURANCE PROFITS.

Mr. Douglas Kinnard, a lawyer and insurance expert of Edinburgh, Scotland, who was recently on a visit to America was asked his opinion on the way the insurance laws work in the United States. His reply was that in England not many years ago they had gone through much the same experience with the insurance business as the American companies are now contending with. They discovered there that governmental interference in private business, even when that business is as universal as insurance, does not pay. There must be legal safeguards to prevent irresponsible companies from swindling the public, but it will not do to perpetually nag the reliable companies. His view is that the insurance business in Britain had just such a period of meddlesome legislation as some of the States are now suffering, but that now, with wiser counsels, they have no such absurd laws on the statute books as obtain in some of the latter.

Mr. Kinnard's specialty, however, is fire insurance profits, and his reply to the direct question: "Are not fire insurance profits high in the United States, [and in Canada] was as follows:—

"It is a common error to suppose that rates are abnormally high. The reason is that people are misled by a partial instead of a full understanding of the case. Let us consider the dividends paid by the Hartford, Philadelphia and New York companies, for example. They pay dividends on their capital stock ranging from 10 to 30 per cent. Enormous, people are ready to exclaim. But in considering this question, let us keep two important things separate. I said the dividends of 10 to 30 per cent. were paid on their capital stock, that is one thing. No such dividends are paid on their assets. That is another thing. If this distinction is kept clearly in mind, people can understand many things about fire insurance that now puzzle them."

Another thing to be considered in this connection is the age of the companies enjoying these dividends. Some of them are thirty to one hundred years old, and such are the peculiar necessities of the insurance business, that one of these companies, organized years ago, with, say a capital of $200,000 may have to-day assets aggregating six or seven million dollars. These assets, representing the accumulations of a long period of years, are invested in securities, safe, reliable, gilt-edged securities that can be converted into cash when an emergency call is made upon the strong box of the insurance companies by a great conflagration. A conservative, well managed insurance company is bound to accumulate money, just as a successful business man or corporation must accumulate money in the course of years. Hence it is clear that an insurance company, having a large amount of securities can earn a large dividend on the small amount of capital employed at the time of incorporation.

In other words the most profitable department of the insurance business is its banking branch, on which The Monetary Times dwelt in a recent issue. It is the interest on its securities which enables the companies to pay these dividends on a small capitalization, and not the profits on the actual underwriting.

Mr. Kinnard furthermore expresses the opinion that no bank, no individual, could do business on such a small margin of profits as the average insurance company on this continent has to content itself with. But it has behind it its assets, invested in good securities and readily convertible into cash.

OUR ST. JOHN LETTER.

Some St. John aldermen are anxious to have the city try an experiment in municipal ownership. Their pet idea is to buy and operate the Carleton Electric Light plant. This is a service in St. John west, owned and operated by a private company, and now supplying light to private residences as well as lighting the public streets under a contract. The company are willing to sell, and the aldermen think the city should buy. It is contended that if the city does buy it will have an exclusive franchise in that section, and that if the experiment proves successful the service can be extended to the east side and to the outlying districts. The project was before the city some months ago, but was shelved. Now it is being revived again. On the east side the lighting is controlled by the street railway company, and its officials declare it has the right to go to Carleton, and that the city will not acquire any exclusive franchise by the purchase of the Carleton plant. Of course, there are many who doubt first the wisdom of municipal ownership under any circumstances; and second, the advisability of buying a second-hand plant.

The Government of New Brunswick has become the owner of the Central Railway line running from Chipman to Norton on the I.C.R., a line that it is believed the Grand Trunk Pacific will use in coming to St. John. It is greatly in need of improvements, and tenders were recently called for the new work, which is quite extensive, including new bridges, improvements to trestles, culverts, etc. Only two tenders were submitted, and neither party put up the required deposit. The Government is now called to meet to consider the situation, and it is believed that an arrangement will be made to have the alterations made by day work.

It begins to look as if the contractors for the water extension work being carried on at St. John, will have difficulty in completing the work before winter. Some unexpected difficulties in the nature of heavy rock cuttings have been met with by one of the contractors, while the other has tapped a subterranean river that flooded his workings fourteen feet deep in one night, and covered the tools of his workmen that had been left in the trenches. These are insurmountable difficulties, but they are serious in a work that should be finished before the frost comes. There are some indications that this work will cost the city a large amount in extras, and that the total cost of making the improvements in the water supply will exceed half a million dollars.

The destruction by fire recently of two spans of the long bridge across the St. John River at Fredericton, has caused serious delays in transportation. The bridge was the means of communication between Fredericton, St. Mary's, Gibson, and a large country. The Government has come into the gap and is maintaining a temporary ferry, while the engineers are making temporary repairs. The bridge, which is upwards of a mile long, is of wood, but there is a likelihood that it will be replaced by a steel superstructure, that will be put up when the ice comes.

The town of Moncton is enjoying a great building boon at the present time. Upwards of fifty buildings have been completed since the first of the year, and others are building. The majority of the new buildings are dwelling houses, a pretty good indication that the population is increasing. Reports from other sections of the province also indicate that considerable building is going on.

Messrs. T. E. Babbitt & Sons, mill owners, of Gibson, York County, are to erect a new saw-mill at St. Mary's, York County.

THE MUTUAL RESERVE INVESTIGATION.

The result of the investigation into the Mutual Reserve Life Insurance Company, by the Superintendent of Insurance for the State of New York, has been published in pamphlet form. The examination covers not only the company's condition on December 31st last, but was further extended to an investigation of its affairs in connection with a previous examination in 1899. Among other interesting items, the report declares that whereas the company in its last annual statement claims a so-called surplus of unassigned funds amounting to $359,211.58, the present examination fixes this item at $38,492.16, the difference being due to reduction in real estate values on appraisal, rectification of reserve data from which policy or certificate valuations were made, and further to the reduction in various credit assets by bringing the net amount of the same within the respective reserves charged against the policies upon which these credit assets rest. Referring to another item the examiner remarks that he is constrained to believe that the unsatisfactory manner in which it is stated could not have been the result of inadvertence, and must certainly have constituted a concealment of facts sufficient to render the company's sworn statement for 1904 materially inaccurate. A hard judgment truly, but not more so than the way he speaks of the dilatory methods employed by the company in payment of its claims on account of policyholders. "It is quite clearly in evidence that the company has adopted a settled policy of delay in with-holding its admission of satisfactory evidence of death," and he adds, "the company is properly subject to the severest criticism in the treatment of these beneficiaries, many of whom must be subjected to no little suffering and distress by the seemingly inexhaustible procrastination on the company's part in the payment of its just debts to policyholders."

* * *

THE SURVIVAL OF THE FITTEST APPLIED TO PATENTS.

Dissimilar as the two principles appear on the surface, a parallel can be drawn between Darwin's law of Natural Selection or the Survival of the Fittest, and what takes place in the world of inventions. Mr. Egerton R. Case, of Toronto, an authority on the patent laws, attempts to draw this parellel in a copyright article in the Patent and Trade-Mark Review, of New York, and his remarks are so suggestive that we are glad to take advantage of his permission to make use of excerpts from it.

Darwin, he begins, defines Natural Selection as the preservation of individual differences and variations that arise, and are beneficial to the being under its conditions of life, and the destruction of those which are injurious.

There are gradations in the state of perfection in the development of an invention, as truly as there are gradations in the state of perfection in the development of organic beings; and it is only through a thorough knowledge of such "states of perfection" that an inventor can reach the highest success. As is well known, all the modified descendants from a widely diffused species, belonging to a large genus, will tend to partake of the same advantages which made their parents a success in life; the same way with inventions belonging to the same class. Therefore, the law of the development of Industrial Arts implies the preservation of those elements and process-steps that are beneficial to the invention; the discarding of those elements and process-steps that are injurious thereto, and the combining with the beneficial elements or process-steps new elements or process-steps that will make the invention a modern success.

The inventor would naturally take up the art he is most familiar with, and pick out therefrom some invention (and there are many of them) that has failed for want of some improvement, to be most valuable. By studying carefully the state of the art relating to this invention, the inventor will have before him the elements that have made each succeeding invention a success over the immediately preceding ones, and will then have the foundation for the development of further steps. In other words, he will possess the genealogical succession, so to speak, of the beneficial elements. If he is careful, he will combine with the elements chosen from the prior state of the art, new elements that will make the invention a modern success, and thus follow after an industrial manner, the law at work in nature whereby organic beings are developed and equipped so that they can best exist under the then existing conditions of life. By following further this law, it is apparent that new genera and species of inventions will of necessity be developed from time to time, as are new genera and species developed in organic beings.

The charge may be laid against this plan that it would tend to make inventors less original, that is, cause them to copy too closely the existing inventions in the prior art. But careful thought will dispel this belief, as above noted. Even if an inventor determines to work upon original lines, he must acquaint himself with the prior state of the art, in order that he may successfully keep away from the beaten paths of prior inventors.

It is well known that for every generic invention, there are many secondary inventions. So it is perhaps in connection with secondary inventions that a knowledge of the law set forth in this article will be most useful.

When an inventor goes blindly to work, that is, without any knowledge of the prior state of the art, he spends much time and money in travelling well-beaten paths made by the patient toil of previous inventors; whereas, if he followed out the plan herein set forth, he would soon acquaint himself with the successful and unsuccessful steps made by his predecessors, and act accordingly; this is an indisputable fact.

Because an inventor finds that all through an art certain elements therein have been retained, it does not follow that he need combine these elements in the same manner; the requirements of the case will, of course, determine this, coupled, of course, with the inventor's mental capacity.

I do not say that, between my statement of the law to be observed in developing inventions, and Darwin's Law above cited, there is a complete parallel. The inventor, of course, has more immediate freedom in his choice of combination of elements that if he were working through a process so slow as that of Natural Selection. But it would seem that he is bound to recognize and adopt those elements in prior inventions that have contributed to, or that have been the sole cause of, the success of same.

It is well known that inventors oftentimes find great difficulty in making improvements or fully developing their inventions in order to make them commercial. When these periods or states of non-development are taken into account, it appears to me that there is quite a parallel between the development of an invention (particularly a complicated one), and the Law of Natural Selection. When the inventor cannot at once make the step or improvement he wishes, it naturally follows that he cannot draw upon his past experience, and his knowledge of the prior state of the art, in order to supply that defect; consequently a mental process (which may be termed Mental Natural Selection—Inventing) must be gone through before the inventor can arrive at the result he is aiming at. The more fertile the brain in which the idea has lodgment, the quicker will the mental powers absorb, so to speak, that idea, and give birth to it in concrete form. So likewise in the development of the organic being; the more suitable the conditions, the quicker will a genus or species be developed that can best exist under the then existing conditions of that period of life.

Darwin states it is notorious that specific characters are more variable than generic. In machines, the main or essential elements we will consider as being the basis for the generic claim. Although they may be modified, these main elements are not subject to the same amount of modification or variation as are the minor elements that are made use of in combination therewith. As is well known, these minor elements are often claimed as means or mechanism for the very reason that they are subject to great variation; that they may be constructed in many different ways and yet be capable of use in combination with the essential elements.

As Natural Selection will never produce in an organic being any structure more injurious than beneficial to that being, it follows that when an inventor proceeds along the right lines of development, he will naturally use elements that will always contribute to the success of the invention. Natural Selection tends only to make each organic being as perfect as, or slightly more perfect than, the other inhabitants of the same country with which it comes into competition. Consequently the properly-directed efforts of an inventor must essentially produce as good or better an invention than those prior thereto, and with which it must inevitably come into competition. The chances are greatly in favor of a better invention being produced, as all inventive effort is exercised for that very end.

THE TORONTO FAIR.

Larger and better than ever seems to be the motto of the management of the Toronto Fair, or to give it a more dignified appellation, Canadian National Exhibition, this year to be held from August 26th to September 11th. The arrangements for holding it and for making it what everybody hopes will prove to be a gigantic success, are now being rapidly completed, and many are the excellent new features.

The special building provided for a display of processes of manufacture will be fitted up this year for the accommodation of binder twine making, the manufacture of many different specimens of pure food, the weaving of carpets, and other forms of textile manufacture, such as cotton and cheese cloth, boot and shoe making, from the raw material to the finished article, Canadian tweeds and other cloths, and a number of other articles, making in all one of the most interesting features of the great exhibition. The demonstrations and the lectures in the Dairy Building at the Canadian National Exhibition will this year, as formerly, be conducted, by experts from the Royal Agricultural College, Guelph, and the various Dominion Experimental Farms. It is also likely that several dairy authorities from the United States will give addresses and conduct demonstrations.

The management is spending close upon $40,000 upon such special attractions, including the famous band of the Irish Guards, considered by many to be Britain's greatest band, the Windsor Plate, a collection of art treasures loaned by wealthy city of London corporations, the great universities, royal residences, etc.

It is announced that specially reduced rates will be granted by all railroads connecting with Toronto, and besides this there will be special excursions run two or three times per week from points within a radius of 300 miles from Toronto.

THE FUTURE OF LIFE INSURANCE.

Fortunately, Canada has had no such experience of grafting or of utilization of trust and insurance funds for private purposes as has recently been divulged in the United States. Mr. M. M. Dawson's advice, however, usually is suggestive, and we therefore give a resumé of what he says to agents in an article in the Insurance Chronicle: In these disturbed times the life insurance agent who can accommodate himself to the new conditions, will achieve a lasting success; for all others, failure is reserved.

As Mr. Dawson says, they will succeed who resolutely face the future, apologizing for some things in the past and condemning others. They will fail who cling to the false motion that old methods, old nostrums, old fallacies will longer win and that they can be defended successfully.

Life insurance is not merely as good as it ever was; it is better. And it will be better yet, from now on. It will be more secure, it will be more economically administered, it will yield larger returns. The worst is over as soon as it is at hand; and the wise agent will draw the attention of men from that view to its lessons, thus made known to all, and to the glorious future of life insurance set free forever from these defects.

These are not the days for pessimists. The future will be built up by those who with no faintness of heart look upon the ills of the present as warnings for the guidance of us all in times to come. The grumblers and growlers, the fair weather solicitors who "pick up" business here and there, which others have "talked up" usually, will have no part or lot in it.

Men are not likely to go without life insurance, because there has been "grafting" in some companies. They will not need it less on that account; and their confidence in the soundness and reliability of legal reserve companies is not shaken. The exposures themselves show the unimpeachable soundness of the legal reserve system, and never in the history of life insurance was there greater confidence in that than at the present moment.

The wise agent will make that confidence the foundation for his labors. He will not flinch from the truth, by whomsoever spoken, for the truth about legal reserve life insurance is good enough if the whole truth is known. It will be that agent's business not to speak to suppress any part of it, but to make it all known.

The policy with dividends annually or at furthest every five years is to many agents a new article to explain and sell; but it is the coming contract, unless all signs fail. The resourceful man will waste no time sighing for the deferred dividend policy which he understood so well, but will bend his energies to master the new.

He will resolutely face the "to be" and turn away from the "has been."

* * *

OF INTEREST TO ACCOUNTANTS.

The question is continually arising in the course of an accountant's practice, as to whether it is necessary for the auditor to check in detail the day-book postings in order to make an audit thoroughly effective. In the Incorporated Accountants' Journal we see a discussion on the point, which brings up some interesting points.

It will be admitted by most practitioners that there is a slowly-rising tendency to confine the work of the auditor to what may be called the higher branches of accountancy. It is not suggested that the tendency is by any means universal either on the side of the public, or of the profession, but the fact is forcing itself home that an accountant's training fits him for something more intellectual than calling over postings. And business men pause and ask whether there can be any advantage in letting two accountants' clerks check this class of work instead of having it done by their own staff. A consideration of the pros. and cons. of the case is both interesting and useful.

For present purposes it is necessary to deal with businesses where the book-keeping is conducted entirely on the self-balancing principle, because in those cases it may safely be assumed that the professional auditor will not undertake this detail checking. But where this is not carried out, is the auditor safe in adopting other means of proving the postings, or is he justified in relying on the checking of the staff?

THE

NORTHERN BANK.

HEAD OFFICE: WINNIPEG.

Provisional Offices: Merchants Bank Building, Winnipeg.

Now opened to complete organization.

The following have consented to act as Directors upon election:

JAMES H. ASHDOWN, President, J. H. Ashdown Hardware Co., Chairman of Provisional Directors.
D. C. CAMERON, President Rat Portage Lumber Co.
G. R. CROWE, President Northern Elevator Co.
H. M. HOWELL, K.C., Messrs. Howell, Mathers, Howell & Hunt.
SIR DANIEL McMILLAN, Lieutenant-Governor Province of Manitoba.
CAPT. WM. ROBINSON, Steamboat Owner, President Dominion Fish Co.
HON. R. P. ROBLIN, Premier Province of Manitoba.
FRED. W. STOBART, Messrs. Stobart, Sons & Co.
E. C. WARNER, President Midland Linseed Oil Co., Minneapolis.
A. STAMFORD WHITE, Messrs. A. S. White & Co., Chicago, and Liverpool, Eng.

Note—The list of Directors is subject to the vote of the Shareholders at their first meeting, who may then increase or decrease the number.

General Manager.

J. W. de C. O'GRADY, Late Manager Bank of Montreal, Chicago, Ill.

Solicitors:

Messrs. Howell, Mathers, Howell & Hunt.

AUTHORIZED CAPITAL, $2,000,000.
In 20,000 Shares of $100 Each.

Of which it has been decided to issue at present 10,000 shares at $110 per share, being one-half of the authorized capital.

TERMS—$5 per share of the par value on application, $15 per share on allottment, $30 per share on the first day of the month immediately succeeding the date of allotment, $10 per share every three months thereafter, on the first day of the month, until the whole amount, including the premium, is paid.

Interest at the rate of 4 per cent. per annum up to the date fixed for payment will be allowed on payments made in advance.

Forms of application for stock, prospectuses, or any further information may be obtained from

S. S. CUMMINS,
Secretary for Organization,
At the Provisional Office, Merchants Bank Building,
MAIN STREET, WINNIPEG.

Frequently, the auditor will dissect the cash and raise his own adjustment account for each ledger, thus practically bringing the system into line with the self-balancing principle. In some businesses, the counting-house staff agree the ledgers by means of a monthly digest. Where statements are rendered monthly, it is not a difficult matter to make a digest of the postings in the ledger at the same time; and these, of course, should correspond with the totals of the day-books, the returns being agreed in the same way. The weak point in these systems, however, is, that in each case, although it may be ascertained that the total amount posted to the ledger equals the total amount passed through the journal, there is no guarantee that the individual items have been posted to the correct accounts. The rendering of monthly statements will probably, in some degree, have acted as an automatic check, but the notification from a customer of a mistake in his account cannot be considered a very satisfactory method of discovering such errors. It should be noted, however, that the checking of the postings by the auditor after the statements have been sent out, will, ot course, be of no avail as a preventative.

What utility, then, can there be in spending the days which are so frequently occupied on this work? In practically all cases, the checking of day-book postings is of little assistance in insuring the accuracy of the statements rendered. As a general rule, too, the work consists simply of proving that a certain amount in the day-book has been correctly entered in the ledger. An omission from the day-book cannot be discovered in the course of this process, and in many businesses, especially where labor forms a considerable portion of the account, this is an important point to be remembered. The checking of the entries in the day-book from the original sources, such as time sheets, dockets, invoices, etc., would in some cases be of more advantage than tracing entries from day-book to ledger.

On the other hand, however, it must be remembered that, in addition to being a watch-dog and a financial conscience, an auditor is expected to possess the qualities and qualifications of a detective; and, by the use of the faculties of observation and deduction, he may gather much useful knowledge in the course of a detailed examination of the day-book. Again, there must be considered the question of the moral effect produced upon the book-keeping staff by the knowledge that every entry in the books is checked by the auditor. These might be considered very abstract advantages by a superficially-minded layman, but the practical auditor knows that they are of real value. But, perhaps, the main test of the usefulness of an auditor's work lies in its efficacy to discover fraud. And on this point it is extremely difficult, if not impossible, to say how far the checking of day-books may assist towards the desired end. Probably an accountant never unearths two frauds which have been perpetrated in exactly the same way, and it often happens that the first suspicion is raised in the most unlikely quarter. But if the checking consists simply of calling a figure from the day-book to see that it tallies with that in the ledger, then it is futile to suggest that any serious fraud is likely to be brought to light. Here, too, arises a question as to which is likely to be the more effective—checking by the permanent staff or checking by accountants' clerks.

⁂

FINANCIAL MATTERS.

The total incorporations in the Eastern States during July of companies with a capitalization of $1,000,000 or over was very small, amounting to only $61,315,000. There is usually, however, a lull in the filing of incorporations during the summer months. Last July the figures were very similar.

The general statement of the Dominion Bank for the six months ended June 30th, 1905, shows that the profits during that period amounted to $237,777, after making provision for bad and doubtful debts. The total liabilities to the public stood at $32,660,861, and the assets at $39,646,407. Two dividends of 2½ per cent. each have been paid during the six months.

Our St. John correspondent informs us that the Province of New Brunswick has just negotiated with the Credit Foncier a temporary loan of half a million dollars. This loan is made in preference to floating bonds in the present condition of the money market, as it is believed a better arrangement can be made later. The new loan is to retire debentures falling due, and to meet other expenses of the Government.

The Canadian Pacific Railway has issued its statement of earnings and expenses for the month of June last, and for the fiscal year ending June 30th last. The gross earnings for the month were $4,430,026, an increase over the same period in the previous year of $13,161. Working expenses were $2,927,093, a decrease of $39,859, thus making the net profits $1,502,932, or an increase of $53,021. The gross earnings for the fiscal year ending June 30th, were $50,481,882, the working expenses $35,006,758, and the net earnings $15,475,088, compared with $46,469,132, $32,256,027, and $14,213,105 respectively for the previous year.

The fact that the bill incorporating the Monarch Bank has passed the Banking Committee of the House of Commons—though not, it may be remarked, without the encountering of one or two "snags,"—has inspired some of the papers to refer to the prospects of the concern's forthcoming entry into active business. We refer to its founder and all-pervading factotum, Mr. T. Marshall Ostrom, in another place in this issue in connection with an insurance scheme, and consequently need not say much about his bank at the present time. One feature to which public attention is drawn is that it will remain open day and night.

⁂

—The Phenix Insurance Company, of Brooklyn, N.Y., has heretofore held a license in this country for the transaction of fire insurance. This license has been renewed, but it now empowers the company to carry on the business of tornado insurance as well as fire. The chief agent for Canada is Mr. A. M. M. Kirkpatrick, a well and favorably known insurance man having his office in Toronto.

—Few men probably will be listened to with greater respect in this country on the subject of Australia, than Mr. J. S. Larke, Canada's trade agent in the Antipodes. Recently he was in Toronto. Mr. Larke referred most encouragingly to the possibilities of Canadian trade with Australia. He pointed out some matters that worked to the country's disadvantage. Canadian shippers and manufacturers tried to do business with them on the same principles as with a firm in Hamilton. He objected to Canadians selling goods to Australians on thirty days' sight, as one example of too exacting detail. Improved transportation facilities are needed. The C.P.R. gives a cheap rate, but the bulk of Canadian goods for Australia go by way of New York. "We must have," said Mr. Larke, "a line of our own from Montreal and Halifax."

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, August 3rd, 1905, as compared with those of the previous week:

	Aug. 3.	July 27.
Montreal	$27,837,802	$25,796,646
Toronto	18,520,503	17,035,126
Winnipeg	7,847,951	6,719,012
Halifax	1,967,152	1,843,355
Hamilton	1,289,026	1,382,368
St. John	1,076,602	1,132,304
Vancouver	1,669,761	1,806,458
Victoria	3,116,956	682,490
Quebec	1,718,360	1,796,142
Ottawa	2,674,438	2,235,488
London	1,005,282	914,149
Total	$68,713,833	$61,343,568

OUR NORTH OF ENGLAND LETTER.

The speeches by Lord Avebury and Mr. Edgar Speyer on English extravagance have been taken as the keynote by speakers innumerable. Bankers in great number are holding their annual meetings, and few are the chairmen who find nothing to deplore in our local and national fashion of finance. The half-year has been a trying one, and the next half is not likely to be inordinately profitable. Yet, in the opinion of canny Sir Michael Hicks-Beach, an ex-Chancellor of the Exchequer, our traders have not yet learnt the fine art of "squeezing" banks in the matter of loan rates. Such a hint from the Board of the London Joint Stock Bank makes an arresting item. Whether it is really desirable to squeeze the banks is a nice point. They are far from likely to take the punishment passively, and their retaliatory measures might be unpleasant for some traders, if not for many. Our northern banks, and notably the Yorkshire ones financing the wool trade, make no secret of their intention to draw in their horns. As one of these bankers said significantly to me; "Accountants will be busy this autumn." But the wool trade is carried on to a greater extent than most others by the aid of bank funds.

The insurance expert of the London "Daily News" has been throwing bouquets at Canadian management. Says Mr. W. R. Dovey, F.F.A., "In no part of the world is life assurance being more energetically or successfully carried on at the present time than in Canada. The bulk of its business is in the hands of native officers, who combine the excellent traditions of English management with the indomitable energy characteristic of this young and developing country." From thence Mr. Dovey proceeds to an examination of the status of the Canada Life, "an office larger than most English ones," in "an impregnable position," and having "a great future before it." These commendatory remarks, given in a perfectly disinterested way, are made in course of a cursory survey of all British offices in turn. Doubtless the insurance world of Canada will be gratified to know that its triumphs are not lost to English sight.

A catchy phrase has been turned to advertising account by an emigration agent. He says simply, "Canada; the Land of Opportunity;" a *cliché* that other people might adopt with good effect.

Further particulars are forthcoming of the progress of Canada's Asiatic rival. In Siberia, butter production began in 1894, and in 1902 some 2,130 dairying establishments were at work. These produce about 40,000 tons of butter per annum, but there is a clear prospect of doubling this output soon. Milk fetches 22½ cents per 36 lbs., and the estimated value of a year's milking is now 11¼ million dollars. Records show that Siberian butter is not yet all that might be desired. Out of 133 samples tabled at Kurgan, 13 were adjudged good, 52 satisfactory, and 65 unsatisfactory, Russia is striving, however, to rectify this severe disproportion. Even so, the business remains lucrative, and from its profits Siberia has increased her purchases of agricultural machinery from $270,000 in 1897, to $5,000,000 in 1903.

Mention of harvesting machinery and thoughts of transport difficulties, remind one that even Australia is shipping her Sunshine Harvesters via Liverpool to Buenos Ayres. About 450 tons are reported in one cargo, and a shipment of such dimensions is probably deserving of Canadian recognition.

As Canadians have some reason to know, insurance is one of our leading lines of "export," and our consuls now and again give us hints as to openings for insurance business over sea. For instance, the Faroe Islands are named. The Scandinavian companies, who pay particular attention to the Danish possessions in the North Atlantic, have doubled the fire rates, which are now $50 per thousand. Our Consul avers that fires do not occur despite the prevalence of wood in building construction, and the huddle of forges, bakers, oil-dealers and dwelling houses. Perhaps this is due to the lowness of the roofs, and their customary roofing of sods of turf. The companies give no discriminatory powers to their agents, and dangerous and relatively safe risks are upon one footing. It is suggested that an office willing to hearken to reason in this regard might gain a footing for fire as well as life and marine business. On the other hand events might repeat recent experience in the island of Curaçoa. A Dutch company intervened and upset ruling rates without great benefit to itself.

The Lancashire horizon is clouded by the menace of a strike. Cotton weavers have obtained their advance, and spinning operatives want 5 per cent, now for themselves. No doubt the concession would have been made but for the alarming disturbance in cotton prices, which is already making mill-masters talk of the expediency of running short-time in order to check consumption and spoil the speculators' game. Hope is strong that neither a strike nor a voluntary diminution of hours will be forced on us, and a new grimness has been added to the determination to enlarge the area of supply by cotton-culture on British soil.

More than one of the apologetic reports made by directors of industrial companies serve to recall that bitter jest. "Have you floated your business yet?" to which the cynic replied; "No, she isn't sinking." Perhaps the common practice of showing the average profits over a term of years, instead of the detailed profits, accounts for the decadence of concerns which looked well on the prospectus. Certainly, some of our captains of industry have developed a marvelous nose for the exact moment for selling-out, and a newspaper might be filled with the names of companies, great and small, that have all worsened their position since the shareholder assumed the risks.

However, it is satisfactory to be assured that capital is still accumulating. Bankers are of that opinion, and the success of attractive issues of shares seems to bear the opinion out. The money-rate is low, and consuls at round 90 are cheaper than at any time during the South African war. A revival in the demand for securities is predicted to take place on the signing of peace in the East. The tip has been so often bandied about that nothing is to be said for its originality. Indeed one may question the power of the peace to do more than give a temporary impetus to financial affairs. Not without numerous set-backs, business as between retailer and consumer seems to have improved materially. We have a legion out of work in manufacturing centres, and the course of prices in some raw materials obstructs progress. The visible, palpable boom in commerce is still deferred. Withal, commodities have changed hands during the summer with enough freedom to permit one to forecast improvement later in internal trade, and Canadians with selling projects may take it that prospects might be worse.

Manchester, 21st July. North Country.

PRINCIPLES OF CANADIAN BANKING.

By H. B. Shaw.

(Concluded.)

The depositors of a bank are to a large extent secured by the fact that each shareholder is subject to what is known as a double liability, which means that "In event of the property or assets of a bank, after its failure, being insufficient to pay its debts and liabilities, each shareholder of the bank shall be liable for the deficiency to an amount equal to the par value of the shares held by him in addition to any amount not paid up on such shares." No transfers of stock sixty days before a bank failure avoid the double liability of the original shareholder unless the transferee is able to meet the liability. The shareholders, in turn, are largely protected from their liability by the strong reserve fund which every bank strives to maintain, and to which it is constantly adding. A list of shareholders in all banks is published annually by the Government, which gives full inspection to the public of the changes in bank holdings during the year. Canadian bank charters only last for a period of ten years, at the expiration of which time they come up for approval, and the principles and working of the Banking Act in all its details is thoroughly gone into by the Dominion Government and the Bankers' Association. The Government has recognized

the fact that the best means of insuring a satisfactory and safe banking system is to practically leave the entire management in the hands of the general managers, who a few years ago formed themselves into an Association incorporated under the title of "The Canadian Bankers' Association;" though, of course, the Government has at all times, through its Ministers of Finance, a perfect knowledge of what is being done. Each bank is required to send in a very complete statement of its affairs, showing its exact position, every month to the Finance Department; and it is especially required that the total loans made to the directors of the bank be shown in a separate column. Banks must keep 40 per cent of their reserves in legal tenders.

Mr. Shaw then proceeded to give a minute and detailed account of the Canadian system of branch banking, always a matter of so much interest to United States bankers. The following quotation from his remarks touches incidentally on one point which in the eyes of some of the bankers in the United States is a weakness in the Canadian system, i.e., the fact that a manager of a branch has not the same individual interest in the town or village in which he may be located as is the case with national banks in the United States.

"Having shown our country managers their position, they see at once that they are of as great importance as the managers of our largest branches, and they loyally accept the responsibility. We encourage our branch managers to closely identify themselves with every progressive movement in their town or village. The result is that the people in a far western settlement, many miles from a railway, come to look upon the branch of our bank there as a local institution, with local hopes and interests. They realize, however, that there is behind it a powerful machinery which can, if necessary, call money from the great money centres of the Dominion thousands of miles away, to supply capital for some legitimate enterprise for which they have the proper assets, but not the necessary ready money. This is one of the strongest features of our Canadian Banking System. By our branch banks we are able to distribute money over a vast area of country. We have the older settled portions of Canada, rich with the accumulated savings of years, and again we have a great area of country full of possibilities, but lacking the necessary capital to develop it. By opening agencies in this new country where settlement and prospect warrant it, we transfer the money from the settled districts, and apply it to the country's new enterprises. By these means we are able to supply the money with so little difference in the rate of interest that we find merchants, farmers, and ranchers in small towns far out in the North-West enjoying identically the same facilities for banking as the largest wholesalers and financial men in the business centres of Canada; and paying the same interest, or not more than 1 per cent. or 2 per cent. more for their money."

* * *

OPENINGS FOR NEW INDUSTRIES.

While no doubt the recently issued report of the Bureau of Labor leaves much to be desired in the way of statistical information, yet it presents several good suggestions for the starting of new industries in various towns. The number of the latter in which good openings are said to exist, is a striking indication of the industrial awakening that has taken place in Canada during the last few years.

The report shows that special advantages and inducements are open for canning factories at Armow, Ameliasburg, Toledo, Ancaster, Bath, Beamsville, Grimsby, St. Catharines, Bothwell, Biddulph, Chesley, Clarksburg, Dutton, Fonthill, Gordon, Harrow, Kincardine, Millford, and Sterling. Woodville, Wyoming, Wingham, Stouffville, Sudbury, Paisley, New Liskeard, Milverton, Little Current, Kincardine, Gananoque, and Cobden, are desirous of having foundries established within their borders. The attention of hardwood and furniture manufacturers is called to the immense amount of raw material to be had at Blind River, Beeton, Bruce Mines, Baysville, Bowmanville, Bala, Carleton Place, Thorold, Dunchurch, Emsdale, Exeter, Goderich, Lindsay, Markdale, Minden, Milton, Moonstone, Mattawa, North Bay, Pinkerton, Pembroke, Sundridge, Teeswater, and Whitevale. What are believed to be excellent openings for cheese and butter factories can be had at Antrim, Bolton, Blezard Valley, Brudenell, Calabogie, Carterton, Desboro, Lombardy, New Durham, Pembroke, Shenstone, Slate River, Seabright, Tillsonburg, Thamesville, Uxbridge, Vanburgh and Waterdown. Thessalon, Tilbury, St. Clement's, Slate River, Sundridge, Parkhill, Penetanguishene, Presque Isle, Orrville, North Bay, Napanee, Norwich, New Liskeard, Mattawa, Milton, Minden, Marmora, Milverton, Jasper, Hillier, Eganville, Dresden, Drayton, Dutton, Collingwood, Cherry Valley, Brighton, Bonfield, Bruce Mines, Bobcaygeon, and Aylmer invite manufacturers of barrel staves, cheese boxes, and similar products, and offer an abundance of raw material at their doors. Excellent water powers are open to manufacturers at Streetsville, Whitevale, Tillsonburg, Bracebridge, South River, Otterville, Newburg, Iroquois, Frankford, Eganville, Dryden, Calabogie and Antrim.

* * *

Among the enquiries relating to Canadian trade received at the Canadian Government Office, 17 Victoria Street, London, during the week ending 21st July, 1905, were the following: An English firm offering good references is desirous of obtaining the representation of Canadian shippers of tallow, oil seeds, canned fruits and provisions, and fruit pulp. A Copenhagen house is seeking the representation in Denmark of a good Canadian oatmeal mill. The makers of a successful form of agricultural motor which will haul 3-furrow ploughs, moving machines, reapers and binders, and in addition drive threshing machines, chaff-cutters, mills, pumps, dynamos, etc., desire to sell their patent rights for the manufacture of the motor in Canada. A New Zealand agent and manufacturers' representative at present in England has asked to be placed in communication with the best Canadian firms manufacturing white printing paper and white paper in reels for printing newspapers, roll-top desks, letter-filing appliances, and similar lines.

THE STERLING BANK OF CANADA.

That the organizers of the Sterling Bank of Canada know what is fitting is admirably indicated first by their choice of a name, which for euphonious terseness of meaning is certainly hard to be matched; and secondly, by the contents and neat appearance of their prospectus, now to hand. One of the leading spirits in this new banking enterprise is the Hon. John Dryden, Minister of Agriculture for the Province of Ontario in the late Government, whom business men of both parties hold in great respect for his sterling integrity and grasp of anything he undertakes. The other provisional directors are Wm. Dineen, Hon. S. C. Wood, J. C. Eaton, Geo. B. Woods, Hon. W. J. Hanna, K.C., M.P.P., G. T. Somers, H. Wilberforce Aikins, M.D., etc., David Dexter, and Sidney Jones. The Bank of British North America will act as bankers and agents. The head office will be in Toronto, while it is the intention to open branches in various centres of the Dominion. The authorized capital is $1,000,000, of which five hundred thousand dollars worth of stock is now offered to the public at a premium of 25 per cent., this premium being calculated to provide a handsome Rest, thus giving the bank an advantageous position from the start. The proposed bank undoubtedly starts under good auspices.

* * *

LIFE INSURANCE NOTES.

The National Life Assurance Company of Canada, Toronto, expect to remove into their commodious new offices at the corner of Adelaide and Toronto Streets within about a month. The work of rebuilding and renovating the premises is making good progress.

Mr. A. E. Huestis has been appointed general agent for the city of Toronto for the Imperial Guarantee and Accident Insurance Company of Canada, with offices in the Canada Life Building. This company, incorporated last May, has now secured a Dominion license for the transaction throughout Canada of guarantee, accident, and sickness insurance.

The Provident Savings Life Assurance Company, of New York, of which Mr. C. T. Gillespie, of Toronto, is the general manager for Canada, are in the gratifying position, we understand, of having received over $100,000 more in applications for new insurance in Canada up to July 31st, of the present year, than were issued during the whole of last year, and that more insurance has been accepted and issued than was the case during the entire year of 1904.

Preliminary steps have been taken to form an association of British policyholders of the Equitable Life Assurance Society of the United States. A provisional committee has issued a circular setting forth the aims of the organization, namely, representations of British policyholders in the directorate, mutualization, an annual audit by British accountants, and the distribution of the surplus of policyholders. No proceedings will be advocated which are likely to prove harmful to the society.

The Post Magazine of London, perhaps the best-known of the English insurance journals, speaks of the way the Canadian life companies are tightening their fraternal grasp on the northern country. In this regard it makes particular mention of the Canada Life, whose margin of £600,000 beyond the reserve required by the Canadian Government worthily ranks it in this important particular with the first-class British officers. It further says: "It has now an organization as efficient and extended as it is likely to need for some time to come, and the stringency of its reserves, high interest, earning power, and favorable mortality experience give good promise of gratifying profit results following upon concentration of effort."

The State of New York has brought action against the Equitable Life Assurance Society of the United States, and against several of its old officers, specified. The complaint charges that the individual defendants "wastefully, improvidently and improperly" permitted the defendant society to make "large, excessive and unwarranted loans to agents," which loans the insurance department of that and other states had decided could not be considered as assets of the society, and that, in order to avoid the effect of such decisions, the individual defendants caused, every six months, portions of balances due from such agents, to be assigned to various trust companies which credited the society with the amounts as loans by them to the society, and that "the defendant society reported such amounts as cash on deposit, whereby attaining credit for the same in its annual statement." The defendants are called on to account for their own conduct in the management of the funds and property committed to their care, and to pay the society any money and the value of any property which they may have acquired, lost or wasted.

* * *

TRADE NOTES.

George J. Foy, Limited, is the name of a company which has been formed with a capital of $400,000, to take over the wine and liquor business of Mr. George J. Foy, in Toronto. F. J. and G. J. Foy, Jr., and Robt. Powell, are among the provisional directors.

The Minister of Inland Revenue has issued a special warning to manufacturers against the use of adulterants in the preparation of articles used for food. He intends to rigidly enforce the act, a desideratum devoutly to be wished in view of recent results of investigation.

A rumor from Mexico has it that one of the most important business enterprises in the history of western Canada is now projected among the abattoir operators, who contemplate organizing a joint stock company, capitalized at half a million dollars, to operate a big canning factory, patterned after the Armour Chicago plant.

The Dominion Suspender Company are building a large extension to their factory at Niagara Falls, Ont. It is stated that with it completed, this company's plant will be the largest in America engaged in the manufacture of suspenders and neckwear goods. The addition is 100 feet long by 30 feet broad, and three stories in height, and is necessitated by the large increase in this concern's business.

The operative spinners and card-room workers in the various cotton centres of Lancashire have served on their employers a month's notice of an application for a 5 per cent. advance of wages. This the employers refused to concede at the joint conference held recently. In English cotton circles the opinion is held that the dispute will be settled amicably.

The marketing of hogs, according to the Cincinnati Price-Current, was somewhat enlarged, but far short of a year ago, when strike disturbances at Chicago disordered the business. Total Western packing, 410,000 hogs, compared with 375,000 the preceding week, and 405,000 two weeks ago. For corresponding time last year the number was 260,000, and two years ago 395,000. From March 1st, the total is 9,545,000, against 8,605,000 a year ago—an increase of 940,000. The quality of current offerings is generally good, with some instances of tendency to moderate deterioration. Prices at the close are slightly lower than a week ago, prominent markets indicating an average of about $5.80 per 100 pounds, compared with $5.85 a week ago.

New York advices say that carpet manufacturers have bought fairly large quantities of Russian and skin wools this week, while considerable business is reported to have been done in China wool. Important negotiations are also in progress, which may result in the consummation of heavy transactions. About 400,000 pounds of Russian wool on old contract is now being delivered, and the consumers are anxious to have the material at the earliest possible moment. On the other hand, certain ingrain manufacturers are withdrawing from the market altogether; the demand for ingrains has been rather disappointing, and before long the number of idle looms will be large. Prices show no change, though it is known that in one or two instances importers have stretched a point to accommodate buyers. In the

foreign markets the tendency has been distinctly firmer, the East India wool sales at Liverpool having, to the surprise of the New York market, opened at an advance.

* * *

INSURANCE RATES IN MONTREAL.

The Canadian Fire Underwriters' Association is unpopular in Montreal just now on account, of course, of the position it has taken regarding a reduction of the insurance rates in the congested districts. More or less officially, they have given out the statement that no matter what may be done to improve the fire apparatus in Montreal, there will be no lowering of rates until such time as the losses, in the aggregate, are considerably less than they are at present. In other words, the improvements which have been made and others still in contemplation must prove their worth by actually checking the losses before the fire underwriters can seriously consider a reduction in rates in what is known as the congested district of the city.

Chief Benoit of the Fire Brigade makes the statement that during the past few years the city has spent half a million dlolars in improving its fire apparatus, building new stations, strengthening the force, etc. And he contends that the brigade to-day is in such excellent condition that he can guarantee to grapple with any fire that may break out. In addition to this, he makes the important statement that there is scarcely a city on the continent, the size of Montreal, that is so well equipped with fire apparatus. This may be all so, and yet, as will appear reasonable to an unprejudiced outsider, the onus of proof of this present alleged adequacy of the brigade, and of the water protective service, still rests on *them*. Let them show their power to grapple with any conflagration that may break out. At present it is nothing more than a supposition which the fire insurance companies simply cannot afford to act upon without further developments. There are other reasons for an excusable amount of obstinacy on the part of the underwriters in refusing to see eye to eye with the city in this regard. A simple computation shows that during the last ten years the companies have, as a whole, paid out something like 20 per cent. more than they have received in premiums, leaving the cost of carrying on business to look after itself. A clear loss of $100,000 a year, more or less, is enough to make any body of business men conservative in their views.

* * *

—It is officially announced that the Committee of Ministers who are to inquire into the operation of the customs tariff, with a view to some revision at the next session of Parliament, will enter upon their work about the end of August or the beginning of September. Several months will be devoted to the work. All parties interested in the matter and wishing to be heard before the committee, should at once prepare such information as they intend to submit and select representatives who are to appear. No doubt organized bodies such as farmers' associations, boards of trade, manufacturers' associations, fishermen's unions, miners' associations, etc., may wish to present their views through their authorized representatives.

* * *

—The two Soo's are in gala dress this week in celebration of the semi-centennial of the construction of the first canal lock on the United States side of the St. Mary's River. The celebration is being carried on in a large, open-handed manner, and is of interest not only to those immediately concerned, but to everyone historically acquainted with the founding of those enterprising communities.

* * *

—The National Wholesale Lumber Dealers' Association of America will hold their midsummer convention on the 16th, 17th, and 18th inst., at Ottawa, an indication of the growing importance held by Canada in the world's lumber market. The delegates will unite business with pleasure, and representatives are expected to be present from the prominent wholesale, retail and manufacturing associations throughout the country.

* * *

—The Union of Canadian Municipalities, before the close of its convention in Winnipeg last week, elected officers as follows:—President, Mayor Urquhart, Toronto; hon. secretary-treasurer, W. D. Lighthall, ex-Mayor of Westmount; vice-presidents for Ontario, Mayor Ellis, Ottawa; Mayor Meek, St. Thomas; ex-Mayor Dyke, Fort William; Controller Ward, Toronto; Mayor Biggar, Hamilton. Next year's convention will be held in Halifax.

* * *

—Among the enquiries relating to Canadian trade received Maritime Provinces ended last week. Reports from all districts are not yet available, but along north shore of Nova Scotia lobsters were very plentiful and most of the packers had secured the full output of their factories long before the legal period elapsed. It is expected that the catch in all the Gulf factories will be the largest in recent years. In Prince Edward Island the catch this season will be about an average one, last year it was above the average. This season, owing to bad weather, the fishermen were late in starting. The price this season is about one dollar a case less than in 1901. The total catch is estimated at about 50,000, valued at $650,000. The hatchery has handled a considerable quantity of eggs and this policy of the Government of restocking the waters is meeting with approval from packers and fishermen.

The Kakabeka Falls electric enterprise would appear to be well under way and the citizens of Fort William, Ont., expect to have power installed by the fall.

Mercantile Summary

A rich quartz strike has been made on Copper River, some fifty miles from Hazelton, B.C.

Joseph Laferriere, of Glen Robertson, Ont., is a blacksmith by trade who in the spring of 1904 bought out a general stock. His record as a store-keeper has been a brief one, as he recently assigned, and the stock has now been sold by the assignee, H. Lamarre, Montreal.

J. A. Gould & Co., manufacturers of brooms, at Kingston, Ont., have been obliged to assign. They have been evidently close run for some months, and were recently reported as trying to put the business into joint stock shape. They owe some $20,000, with estimated assets of $12,000.

The insolvency is gazetted of E. Audet, general dealer, St. Ephrem de Tring, Quebec. He is a tinsmith by trade, and in the fall of 1903 he decided to embark in business as a general merchant, and being without the necessary experience the usual result followed. His liabilities are about $2,500.

The mineral wealth of the Cobalt section of Temiskaming would appear to be simply fabulous, yet its discovery seems to be taken almost as a matter of course by the general public. How different from the Klondyke boom of eight or nine years ago! A correspondent in last Wednesday's Toronto Globe, Mr. Wallace Maclean, had a lengthy article in which he attempted to give the astonishing facts. Certainly his statements are pleasantly astonishing, particularly in so far as they record the value of the shipments of Cobalt and silver ore that have already actually left the country.

From Nova Scotia quite a few recent failures are reported, as follows: P. A. Doyle, of Inverness, is offering 50 cents on liabilities of about $4,000. He only began store-keeping, and had previously been interested in a gold mine, out of which he is said to have realized a little capital.——Three years ago C. F. Goddard bought out the grocery stock of Ella T. Turnbull. He is said to have come from New York, and was not reputed to have had any great amount of capital. He has now assigned.——For a short time Samuel Hurvitz has run a small clothing business at Londonderry, evidently with poor results, as his assignment is now noted, with liabilities of about $1,100. He had carried on at Springhill for a few months before locating at his present address.——A small trader at Sherbrooke named H. T. Harding, has assigned with light local liabilities.——An offer of 25 cents on the dollar is made by H. E. Duff, general dealer, Petit de Grat. He is an old time trader in the locality, and has also done more or less business as a lobster packer. The amount of his liabilities has not yet been reported.——L. J. Poirier, who has only been carrying on store at Lyon's Brook for a year or so, has assigned to C. W. Ives. He had previously given a bill of sale to a leading St. John house.

T. H. PURDOM, Esq., K.C., President.
NATHANIEL MILLS, Manager

Mercantile Summary.

The Eastern Coal Company has been incorporated with a capital stock of $500,000. It will carry on the business of a mining, milling, and reduction company. J. S. Lovell, Toronto, is among the charter members.

J. H. Lawson, in the grocery line at Fredericton, N.B., since the spring of 1904, is reported insolvent. He was formerly a cotton mill operative, and was unfortunate in being burned out on the 12th inst. His indebtedness is placed at about $3,000.——Another grocery concern at Gagetown, N.B., owned by F. L. Corey, has assigned, owing about $1,000.

The Canada-Mexico Mercantile Company, Limited, is the name of a new company with headquarters at Montreal, which will, with a capital stock of $40,000, carry on throughout Canada and Mexico the business of importers, exports, commercial agents, and forwarders. George Cushing, of Mexico City, and M. P. Cochrane, of Montreal, are among those interested.

All Torontonians and many people in all other parts of Canada will learn with regret of the death of Mr. H. J. Hill, who for twenty years was manager of the Toronto Exhibition. He had been in ill-health for the past four years or thereabout, during the last few months of which he was confined to his bed, so that his death does not come as a very great surprise. Mr. Hill was a most energetic official in the Exhibition's interests and there is no doubt that much of its early success was due to his untiring efforts.

The report of the Tyee Copper Company, Limited, for the year ended April 30th, submitted to the shareholders in London on the 13th inst., stated that the directors regretted that the developments at the mine during the past year have not so far opened up any fresh ore-bodies, though from reports received from their general manager, the formation they are now working is of a nature in which ore may at any time be found, and similar to that in which the present ore-body exists. The developments on X. L. claim also look hopeful, but no ore-body has as yet been discovered. The aerial tramway has given satisfaction during the year. Shareholders were asked to confirm the payment of 10 per cent. paid last December.

The following United States patents were granted to Canadians during last week: 795,264, wire-stretcher, John E. Baechler; 795,267, tie-fastener, R. E. G. Burroughs; 795,303, rifle-sight, Peddie Rifle Sight Co., Limited; 795,329, feed regulator, A. W. McGillivray; 795,490, vehicle attachment, Edward H. Cuddy; 795,502, spring-heel for shoes, Eugene Gareau; 795,620, vehicle wheel, Wm. T. Jones; 795,626, cover for jars or analogous vessels, Nelson Lampman; 795,642, stopper, Nels. Nelsono; 795,662, bicycle support, Alfred Taylor; 795,688, lathe for hollow woodenware and the like, United Factories, Limited; 795,695, self-aligning bearing, Electric and Train Lighting Syndicate, Limited; 795,720, box plate, Harry McCann; 795,791, broken axle repairer, Samuel L. Fader; 795,744, non-refillable bottle, John A. Watt and J. A. Clark.

The aggregate land sales of the Canadian Pacific Railway Company for the fiscal year ending June 30th, 1905, amounted to 408,188 acres for $1,934,293, an average of $4.70 an acre. In addition the town sites disposed of aggregated $551,634, bringing the total land transactions of the railway in the West and British Columbia to $2,485,927. The average price per acre in Manitoba and the Territories was about $4.70, as compared with $4.10 the previous year, an increase of sixty cents an acre. The policy of selling land to settlers only resulted in a falling off in the total acreage sold as compared with last year when the sales were 928,854 acres for $3,807,248.

OSBORNE & FRANCIS,

54 King Street W

Mercantile Summary.

The Dominion Natural Gas Company has been authorized to increase its capital stock from $500,000 to $1,000,000.

L. H. Packard & Co., manufacturers of shoe dressings, etc., Montreal, have bought a site on which they intend to build more commodious premises.

The Steel Concrete Company, Montreal, capital $200,000, will do a general engineering and contracting business and incidentally buy lands, etc. E. A. Wallberg and W. F. Boggis, of Montreal, are charter members.

The McLennan Lumber Company, Limited, Montreal, capital $100,000, has been incorporated under a Dominion Government license. They will carry on business as general contractors and builders and dealers in sashes, doors, mouldings, etc.

At a meeting of the Province of Quebec Association of Architects in co-operation with the Ontario Association it was decided to urge the Dominion Government to grant an increase of the duty on plans prepared in the United States for buildings to be erected in Canada. There is at present a 5 per cent. tax on plans made in the United States. Some of the largest buildings in Montreal and other Canadian cities were planned by American specialists who devoted themselves to a particular line of work.

A. W. McVittie, of Cranbrook, B. C., it is reported, located five square miles of coal land on Short's Creek, west of Okanagan Lake, where there are several seams of good bituminous coal, the principal seam being fifty-two inches thick, outcropping on the side of the mountain north of the valley. The openings made for examination are 1,700 feet above the creek and 2,800 feet above the water level of Okanagan Lake. Analysts say it is evidently a very good bituminous coal which can probably be mined and placed on the market for $4 a ton, without the expenditure of very much capital.

The British Newfoundland Company, which was formed recently by Mr. H. J. Crowe and others, of Halifax, to acquire and develop the properties of the Newfoundland Pulp & Lumber Company, the New Land Company and the Timber Estates Company have now, we hear, completed the deal. The combined properties comprise an area of 1,600,000 acres. The capital stock of the new concern is $5,000,000. It is stated that there are already five sawmills on the new syndicate's lands, and 3,500,000 feet of logs. It is the intention of the syndicate to immediately erect a large pulp and paper plant, which within a couple of years will attain a capacity of 200 tons of paper per day. A number of leading British publishers are interested in the venture, one of whom is already owner of several extensive paper mills and it is stated that contracts have already been entered into for a large portion of the syndicate's prospective output.

PORT ARTHUR & FORT WILLIAM.
Post Office ddress, — — Port Arthur, Ont

Mercantile Summary.

The Canadian Towing & Wrecking Company, Port Arthur, Ont., has received a charter authorizing it to engage in a dredging, towing, wrecking and salvage business and to build or acquire steamboats and other vessels. The capital is $100,000.

During the eleven months ending May 31st the number of persons who arrived at Canadian ocean ports was 100,892, being 62,510 male, and 20,328 females, and 18,054 children under twelve. Of this number 89,700 announced their intention of staying in Canada, an increase of 15,847 compared with the same period of the year previous.

According to last reports, the B. A. Pyrites Mine at Queensboro', Hastings County, Ont., is now well down on an immense body of iron pyrites believed to be of the highest grade. Shipping from the mine has commenced to Buffalo, and American sulphuric acid manufacturers offer to take all the ore the company can produce. This new development makes probable another Canadian enterprise, the manufacture of sulphuric acid from pyrites, an industry of great importance to the Dominion, as it enters so largely into the processes of various industries.

Important strikes of iron ore are said to have been made by prospectors in the neighborhood of Iron Lake, east of Port Arthur, and already applications for locations are being made. Wiley Brothers, who have been among the lucky miners, report that the quality is very good and low enough in sulphur and phosphorus to be suitable for the manufacture of Bessemer steel. The field is now believed to be much larger than was thought, and the field of operations is being extended rapidly.

It is worth noting that at a meeting of the Bradford (Yorkshire) Chamber of Commerce a letter was read from a London firm complaining of the legislation in Quebec levying a tax on commercial travellers, and suggesting that representations on the subject be made to the British Government. The president said he did not think there was much chance of getting an alteration in the tax, unless it was in the direction of a preference to English travellers. We believe that latterly London houses have been doing a more than usually large retail business in the Province of Quebec, so that the new tax works hardships on them to a considerable degree.

The Temiskaming and Northern Ontario Railway Commission have been considering at length the electric systems already in use, including the direct current system employed in city traffic, which is first-class over limited areas; the three phase system of the Hungarian railways, which is also used in Germany and the north of Italy, and which has proved satisfactory for long distance lines; and the single phase system, of which the Westinghouse Company has already installed ten lines in the United States. It is this single phase system which the expert electric engineer of the Commission, Mr. Bion J. Arnold, has recommended for adoption. Full account has been taken of the local conditions, and the cost of water-power contrasted with coal, and the estimate is in favor of electricity. Fountain Falls, on the Montreal River, has been selected for the development of power, and with 70 feet head of water the 4,000 horse-power can easily be obtained, as 15,000 horse-power is available. Notwithstanding the above report we understand that the commission will probably wait before taking definite steps for the approval of the Government.

Factory at BRANTFORD.

Mercantile Summary.

O. L. Messier, a hotel-keeper at Farnham, Quebec, has been put into insolvency after a brief year's experience in that line. Previously he had kept store for a short time at Marieville, and before that he had been a station agent on the Central Vermont Railway.

The annual meeting of the directors of the New Westminster and Southern Railway took place last week at which the following officers were elected: Mr. A. Ewen, president; Mr. T. J. Trapp, secretary, and Messrs. J. C. Brown, C. G. Major and J. Hendry, directors.

The Brading Brewing Company, Limited, Ottawa, will take over the brewing business now carried on in Ottawa by the executors of the late H. F. Brading and will continue as brewers, maltsters, and manufacturers and dealers in beer and aërated waters. Their capital stock is given as $100,000.

In a fire at Fernie, B.C., last week several buildings were totally destroyed, including the Free Press office, Caruthers' tailor shop, Sheard & Elliott's store, B. C. furniture store, Northern hotel, Kenny & McLeod's tailor shop. The Waldorf hotel was badly damaged. Total loss is estimated at $50,000, with insurance amounting to about one-third.

The Northern Construction Company, Limited, has received a Dominion charter. Its capital stock will be $100,000, and head office at Montreal. It will construct public and private buildings of all kinds and carry on a general building and contracting business. W. R. Stavely, of Montreal, advocate, is looking after the company's interests.

The steamship "Argyle" plying between Toronto and Oshawa last week ran aground in a fog and for some time the position of her passengers was perilous. They were, however, conveyed to safety by the Donelly wrecking steamer. After three days she was released and towed to shore, when it was seen that her hull had been seriously damaged.

It is stated that the Lake Superior Consolidated Company have in view the erection of a coke plant with a capacity sufficient to supply the 150,000 tons of coke now consumed annually. Many orders of various kinds have been received, and the present daily output amounts to 500 tons of rails and 450 to 500 tons of pig iron. The total output of rails since the mill was started eight months ago amounts to 100,000 tons.

It is said the Great Northern will run a line from St. John, North Dakota, to Brandon, Manitoba, where terminal facilities have been secured, and it is supposed that this is part of that corporation's struggle with the Canadian Pacific and Grand Trunk Pacific. From Devil's Lake, North Dakota, to the Rocky Mountains, a distance of over 1,000 miles, the Great Northern runs parallel with the international boundary, the average distance between the railway and the line being less than 70 miles.

OUR TRUCKS are fitted with rubber tires that do not come off. . . . .

All dealers can supply it. Samples gladly sent.
CANADA PAPER CO.
LIMITED, 4
Toronto. Montreal.

Sale of Assets of the Oshawa Wire Fence Company,
Limited.

Tenders will be received up to noon of the 30th day of August next, addressed to the undersigned for the purchase of the following assets of the above named Company:—

Parcel No. 1.—Real Estate, including Three Story Brick Factory, having railway siding and centrally located in one of the best manufacturing towns in Canada.

Parcel No. 2.—Patent Rights, Fixed and Movable Machinery, Tools and Office Furniture.

Parcel No. 3.—Partially Manufactured Goods and Raw Material.

No tender necessarily accepted. This offers an excellent opportunity for a profitable investment in a steadily increasing business. Lack of capital the only reason for selling.

Further particulars, terms and conditions of sale, with full description of the several parcels, will be mailed on application, or may be inspected at the Company's Office.

L. K. MURTON,
Secretary of said Company, Oshawa.
Oshawa, July 22nd, 1905.

More rumors come to hand concerning the movement to consolidate the White Bear and California Mining Companies at Rossland, B.C. The White Bear has reached a depth of 900 feet, and it is proposed to extend a cross-cut from the lowermost level of the White Bear into the territory of the California, and from this cross-cut to explore the ground with diamond drills. There is an eighteen-foot iron capping on the California, and it is thought that somewhere in this ground there are some good ore shoots.

Further advances have taken place in linseed oil, which is now forty or fifty per cent. dearer than a few months ago. This is due to the increased cost of flax seed. Some of the large factories in the United States have closed down.

Mr. John Earls, manager of the Canadian Freight Association, has retired after forty years of active service and will be succeeded by Mr. Thos. Marshall, former divisional freight agent of the Pere Marquette at London.

The promoters of the direct new steamship line between Quebec and Liverpool have been unable to arrive at an agreement with the Harbor Commissioners and it looks as if the project will fall to the ground.

The shipments of ore from Rossland last week were: Le Roi, 1,975 tons; Le Roi milled 310; Centre Star, 2,310; War Eagle, 1,500; Le Roi No. 2, 60; Jumbo, 200; Spitzee, 60. Total for the week, 6,415, and for the year to date, 195,193 tons.

It is announced that commencing on August 7th, the C. P. R. and G. T. R. will make an advance of between two and three cents per hundred pounds, on all packing house products shipped from Collingwood, Toronto and Peterboro' to seaboard points.

A report from Ottawa says that the saw mills on the Ottawa River are being kept extremely busy this season. The Upper Ottawa Improvement Company expects to bring 3,000,000 logs down the river this summer. This is a much greater amount than has been brought down for some years. Two years ago more logs were turned out in the shanties than could be handled, and despite the efforts of the Upper Ottawa Improvement Company, all the logs could not be brought down to the mills.

⁂

TORONTO MARKETS.

Toronto, August 3rd, 1905.

Dry Goods.—Strength is the predominating feature of practically all staples in the dry goods market. Cottons, woolens, and linens are all at high-water mark. Recent wool sales instead of showing an easier tendency in crossbreds as anticipated by some English manufacturers went higher, and the latter are already quoting higher prices for their Canadian trade. Fancy worsteds have advanced 5 to 15 per cent., and they are in good demand as also are serges. General trade is going on in good volume, little complaint being heard on this score, considering the season. Payments are being made with a fair degree of promptitude.

Flour and Grain.—But little change has occurred in the position of the flour market and ninety per cent. patents continue to sell around $4.20 in buyers' bags, Western freights. Ontario wheat has dropped considerably during the last few weeks, on account of the near approaching harvest. Other grains remain much as before. Canadian corn has not made much change. Oatmeal is easy.

Groceries.—Sugars have made an advance of 10c. in New York, but so far this has not been followed in local markets. The market for tea in London is considerably strengthened this week, but business locally is dull. The California fruits, such as prunes, apricots and peaches are strengthening their position daily. Canned goods are firm. Tomatoes still retail the high price of $1.25.

Hides and Leather.—Very firm is the position of the hide market at the present time. All those that have come forward have been eagerly snapped up, and there is now great scarcity. The leather market is feeling the effects of this quite strongly, and at last an advance of 15 per cent. has been effected. The demand is good.

Live Stock.—Receipts of cattle at the market this week were not heavy, but there was a somewhat easy tone prevailing for both exporters' and butchers' cattle. Few stockers or feeders were in evidence, but the demand was poor. Milch cows are meeting but a quiet movement. Sheep and lambs were plentiful, but were nevertheless distinctly firm. In some cases they were higher-priced.

Provisions.—Butter is steady, under a fairly heavy demand. The enquiry for Canadian in the Old Country is better, and prices there have advanced. Cheese continues in good demand, in sympathy with improved conditions in England. Eggs are in good demand, in spite of large receipts.

Wool.—About all the new clip has come in. Prices are firm, but probably the dealers have paid too high for their holdings, though the position of wool is strong in all the markets of the world.

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, August 3rd, 1905.

Ashes.—An easy tone still pervades the market, and $5.10 is the full limit for good tares of No. 1 pots, with quotations ranging down to $5. Second quality of pots are quoted at about $4.55, and first pearls at $7 to $7.25.

Dairy Products.—Cheese receipts last week were large, 102,416 boxes, and the shipments the largest of the season, thirteen steamships taking out 122,961 boxes; for the corresponding week of last year the figures were 57,824 boxes. Butter shipments were also heavy, aggregating 42,879 packages, as against 20,562 packages for the corresponding week of 1904. After writing last week the cheese market developed a very pronounced advance, fine Westerns being quoted at 11⅜ to 11½c., but within the last day or two some weakening is evident, and probably 11⅛ to 11¼c. would now fairly represent the local figures for the goods named, with fine Quebecs at 10⅞ to 11c. Further advance is noted in butter, fancy creamery being held at 23½c., with good to choice ranging from 22¼ to 23c.; good dairy finds ready sale at 18 to 20c.

Dry Goods.—Little of an interesting character comes up for report in this line. General orders are coming in fairly, and shipments of fall goods are now general. City retail trade is of a quiet character, but general collections are fair. The Cornwall & York Cotton Co. has advised a general revision of prices on all lines recently advanced by the Canadian Colored Cotton Co.

Groceries.—The situation is not greatly changed since a week ago. The movement is a very fair one for the season, and money is coming in better than in July. The New York quotations for refined sugars were advanced 10c. yesterday, but local prices are unchanged, $5 still being the factory figure for standard granulated in barrels. The demand keeps active. Molasses is dull and easy at 35c. in puncheons, and 37½c. in barrels. The demand for teas is far from active. Prices for new pack of corn and tomatoes are still unfixed. In other lines nothing new is reported.

Hides.—The market continues to develop much strength. On Monday a further advance of half a cent was established on beef hides, making the general quotation for No. 1 now 11c., though some buyers are said to be conceding a fraction more. Lambskins are also further advanced to 60c.

Leather.—The situation in this line is an extremely strong one, and holders of any quantity of stock are very indifferent sellers, being firmly convinced that values are bound to go higher. For No. 2 manufacturers' sole 25c. is the inside limit, with 30c. asked for best slaughter sole. A maker of special grade of grain, which formerly sold at 14½c., has been getting 16c. for his goods, and now quotes 17c., while 14½ to 15½c. is asked for ordinary grain. Pebble is quoted at 13½ to 15c., and Western splits as high as 24c. Sheepskin tanners are also asking higher figures.

Metals and Hardware.—For the time of year trade is good. In the general run of metals the tendency is still towards advance. Ingot tin is very strong, at 36c.; lead, $3.70 to $3.75; copper, 16½c.; antimony, still dearer at 14 to 14½c.; spelter, $6.25 to $6.50. The quotations for tinplates have not yet been affected by the continued advance in ingot tin, and no changes are noted in the general run of sheets and plates. In pig-iron nothing very interesting is reported, and bars remain at $1.75 to $1.80. The tendency to weakness noted in wire nails recently has taken definite shape, car lots being now quoted at $2.

Oils, Paints and Glass.—Business still rules on the quiet side. Linseed oil and turpentine are easier, the latter at 88c. per gallon in single barrels; the general asking price for jobbing lots of oil is 49 and 52c. for raw and boiled respectively, though these figures are said to be more or less cut. Leads, glass, etc., are all steady.

⁂

ENGLISH BANK NOTES.

The Bank of England note is in itself the most easily forged of all, for it is the simplest, consisting as it does of black printing on a white paper. The great safeguard lies in the quality of the paper, and the quality of the printing and the watermark on the paper, says Answers.

To make the actual paper is beyond the skill of the cleverest forger. It is made at a small town near London, but so well has the secret been guarded that the most skilful note printers in the trade do not understand that, though they know most of the other secrets.

Note printing is one of the highly skilled trades which still is a virtual monopoly of the city of London. It has always been so, and the great banks of the world come to the engravers and printers of London to have their notes or their plates made. They turn out the most beautiful printing in Europe. Some of it is of the most complicated description, and in this fact lies its great safety.

The steel plate itself is the work of many hands and many brains. When the main design has been decided upon the parts of the picture have to be given over to several engravers, each of whom is skilled in one branch of his art, and could not exchange his part with any of the others. One is an architectural engraver, and with a fine needle he labors for weeks in the effort to convey to the metal a perfect picture of a building. Another, with skill of quite a different sort, makes portraits, a third draws scenery, while a fourth fashions the letters. Still others contrive corner pieces; and then there is the machine engraver, which is more wonderful still, for the machine does work so fine that no human hand can imitate it.

The complicated work of tracery which is seen on the back and front of Scotch and foreign notes is so minute that the camera cannot effectively copy it. To reproduce with photography on zinc it is necessary to employ acid, and the acid would eat away these fine lines. The work is done by a machine which is made on the principle of the pantograph. It seems to consist of a multitude of wheels and eccentrics, and apparatus for guiding and checking the needle and sending it in new directions at all sorts of unexpected angles.

After the design has been worked out on the machine in accordance with the secret code, which is kept by the proprietor locked in the safe, the machine does the work itself, if the operation will go on turning the driving crank slowly and steadily. The plan is taken out with numbers, which represent the wheels and the code of figures, showing the work which is to be done by each wheel, and how it comes into play. But the operator cannot know that secret. The machine simply goes on in its own way, and the least slackening of any of the parts will put it all out. A workman cannot repair the error, for he does not know the code, and the whole work will be spoiled until the master comes along and resets the wheels and other parts in their proper order.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular, dated July 29th, 1905, said:

As anticipated, the crops have furnished an important part of the incentive for stock exchange fluctuations; and they may be depended upon to continue a prime influence during the next few weeks. If all the reports of damage to spring wheat by black rust had substantial foundation, millers would have before them a season of short supplies of American wheat, and would be looking forward to importing Manitoba wheat for mixing with the low grades of the American article. But, the damage is shown to have been very greatly exaggerated. Corn is King of Crops in the country now, and everybody in business is banking upon it being a record breaker. Should they be disappointed a setback in all channels of business will result.

Taking a broad view of the agricultural situation, therefore, the outlook remains favorable from a stock market standpoint. The seasonable reports of crop setbacks must still be awaited, and promise to provide a fluctuating market—a good traders' market—within a comparatively restricted range until the crops are well out of danger. Speculation appears to be converging to a noticeable degree upon the lower-priced stocks; this seems quite reasonable in view of the high prices which the high-grade investment securities have attained and which are so well held that they have materially narrowed the floating supply of securities on the market. In view of this a feeling of optimism seems to be increasing in regard to the lower grades of stocks, and has for its basis the generally favorable technical situation and the disposition of the large financial interests to take a favorable view of future earnings. The activity and confidence noted before continue uninterrupted except the manufacturers

are showing more conservatism in their purchases of pig-iron and are evidently determined not to permit business prospects to be marred by ill-considered speculation. The quarterly statement of the United States Steel Corporation was regarded as a fairly favorable one, but did not reflect the increased activity that has developed since the beginning of July. A strong indication of the material prosperity of the country is contained in the annual statement of immigration.

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

IRON AND STEEL MARKET.

One of the old-time buying movements of pig-iron broke loose this week and rolled up a tonnage that in the entire country probably exceeded 300,000 tons. There was in the south heavy buying of low grade iron for pipe making, more than 50,000 tons having been taken for that purpose. All kinds of users were active. For several months there had been a careful inspection of conditions and a withholding of orders, while pig-iron kept receding in value. Each buyer wished to get under cover at the bottom, and when early this week there was official notification by large southern producing interests that prices would at once advance, there was enough immediate response to make the buying for the week the most notable for the same length of time in several years. But the buying did not represent all the inquiries, in fact scarcely a respectably large factor of them. For when some of the salesmen, who had received timely notice, gave tips to their customers that the rise was about to take place, and advised the melters to immediately place their orders, these overtures were met in the great majority of instances with incredulity and with the confident prediction that the users would purchase at $10 Birmingham, instead of $12. There is, therefore, still in the early future the possibility of much additional business. In finished steel interest attaches this week to the information, which comes from New York, to the effect that the prices of plates and of structural steel will remain unchanged. Similar action is anticipated in respect to other products of the mills. This is interpreted to mean that business is to proceed for the remainder of the year at old quotations, which result removes all obstacles or check to the closing of contracts for this period. And there has been a noticeably heavier call for steel products, perhaps in consequence of this assured stability of prices. The effect is that steel is strong and active. In all portions of the West there have been excellent orders for structural shapes, most of them to fill current necessities, some to replenish broken stocks.

* * *

CHEAP EXCURSIONS TO THE SEASIDE.

The Intercolonial Railway will issue round trip tickets first-class from Montreal on August 14th, 15th, 16th and 17th to the following points, with time limit for return good until August 31st, at following rates: Riviere du Loup, $4.50; Murray Bay, $4.50; Cacouna, $4.50; Little Metis, $6.00; Moncton, $8.50; St. John, $8.50; Shediac, $9.00; Summerside, $10.00; Charlottetown, $11.00; Parrsboro, $11.00; Halifax, $10.00; Pictou, $12.00; Mulgrave, $13.50; Sydney, $14.85; North Sydney, $14.85; St. John's, Newfoundland, $28.85. Tickets, time tables and full information can be had on application to N. Weatherston, Agent, No. 51 King Street East, King Edward Hotel Block, Toronto, Ont.

* * *

Mr. Willis Chipman, engineer of Toronto, has been engaged to report on a water sewerage and electric light plant for the town of Dalhousie, and it is likely that work will be commenced at an early date.

Prof. Miller, geologist to the Ontario Government, reports an important discovery of Bessemer iron ore at Loon Lake, east of Port Arthur, from a party that has been exploring the district for a month past. They say that the deposits are much more extended than first supposed, and that the quality is of a high grade.

The lumbermen of New Brunswick met in St. John recently, and appointed a special committee to wait on the Government and urge an extension of the existing leases to license holders, a reduction in the mileage, and better regulations to govern the selection of licensed lands, nominally for agricultural purposes, and other matters.

A few days ago there was a costly fire in Toronto Esplanade, whereby loss was incurred of about $80,000, besides the death of nearly a score of horses. The contents of both the Knickerbocker Ice Company's warehouse and the Ames Holden footwear factory were completely consumed. The insurance is estimated at about two-thirds of the above amount, divided among several companies.

Arrangements have been concluded, we understand, by which the various ore mining properties on the Atikokan range will be transferred to the Port Arthur Iron Mines Company, Limited, now being incorporated with a capital of $500,000. Active mining operations are to commence soon, an arrangement having been made by which 50,000 tons of sulphur ore are to be shipped annually to the United States. The above deal will embrace over 20,000 acres of land, taking in a large portion of the Atikokan range. The arrangement assures active development work upon the property, but it is improbable that any ore can be shipped before the end of the year.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

ROBERT HAMPSON & SON, Montreal.
GENERAL AGENTS FOR CANADA.

The Northern Life
ASSURANCE CO.

Closed the half year showing over 25% more insurance issued than the same period last year.

Its policies just meet the wants of the people and are easily sold.

A few good producing agents can secure liberal contracts in desirable territory.

Head Office, — LONDON, Ont.

JOHN MILNE, - Managing Director.

THE RECORD OF THE

NORTH AMERICAN LIFE
for 1904

shows that large gains have been made in the amount of policies issued, insurance in force, income, payments to policyholders, etc.

Policies Issued $6,484,425
An increase over 1903 of $645,535
Insurance in force $35,629,988
An increase of $3,004,895
Income............... $1,504,063
An increase over 1903 of $122,700
Payments to Policyholders $561,136
An increase over 1903 of $137,918

The financial position of the Company is unexcelled. A good Company, both for the policyholder and agent. Applications invited for agencies in unrepresented districts.

Home Office, - TORONTO, Ont.

ROYAL-VICTORIA
LIFE INSURANCE COMPANY,

Head Office Montreal.

Government Deposit, **$ 250,000.00**
Capital and Assets, Dec. 31st, 1904.... **1,244,436.76**

Good opportunities for productive Agents in Nova Scotia, North-West Territories and British Columbia. — Liberal Terms and large territory to men who can write a satisfactory business.

APPLY TO

DAVID BURKE, A.I.A., F.S.S.,
Montreal, June 1, 1905. General Manager.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

GROCERIES AND DAIRY PRODUCTS.

The feature in the provision trade at the present time is the abnormally high price of dairy products, butter being, it is said, higher now than has been the case for over twenty years. The cause would appear to be the cessation in the supply from Siberia, which has brought about a scantiness on the British market. It is true that latterly the demand from the Mother Country has fallen off a little, owing to the extremely high prices asked for Canadian butter in the primary market, and it may be remarked that those prevailing are not less than 3½ or 4 cents higher than was the case at this period of last year. But this very fact has brought stocks down to a low ebb, and the English buyers will be bound to resume purchasing on a large scale before long. The same considerations apply to cheese, which both in Montreal and Toronto is quoted at very high figures. Another thing which is helping Canadian dairy produce on the British market this year is its generally good quality, which makes, in the case of butter, the comparatively small difference in value between it and Danish less surprising than in ordinary years would be the case. Some absurd reports have appeared in the press recently stating that there is an extremely wide discrepancy existing between the prices asked for dairy produce in Toronto and those asked in neighboring towns. Differences of 50 per cent. or more are alleged to exist. This, on the face of it, is so improbable from a business point of view that it need hardly be discussed.

Firm markets also prevail for hog products, and advances are recorded this week in several lines. Hams, bacon, pork, etc., are all at high values. Lard, however, is somewhat easier.

The loss "off" in eggs is heavy. Receipts, too, are somewhat on the light side. Prices continue high. The most important item now in general groceries is sugar, which is moving rapidly for preserving purposes. Prices are firm, in sympathy with a recent advance of 10 cents per cwt. in New York.

Interest is being taken in the situation in canned salmon. It looks as if values will be very firm, owing to the unexpectedly light catch. The "run," however, still continues, so perhaps it is a little early to make any definite forecast. Canned vegetables, especially beans, corn and tomatoes, are in good demand, better than usual considering the fact that this is the fresh vegetable season.

Dried fruits are in only seasonable request. The action of the Greek Government has brought about a firmer feeling in currants. There is a scarcity of new prunes, both in the primary market and locally. Apricots from California are scarce, and firm in consequence. Raisins are a little easier owing to favorable reports from the growing sections. Old stocks, however, were pretty well cleaned up, so that the market is expected to be a good one.

In teas, no great amount of business is passing. The commoner grades of Indian teas have advanced one halfpenny in the primary market. Ceylons are also dearer, especially greens, but it is expected that large quantities will shortly arrive in this market.

* * *

BANKING NOVELTIES.

It is usual for the promoter of a new enterprise to give, or to endeavor to give, to the public some idea as to why such enterprise is called for. He does his best to show that it will fill the proverbial long-felt want, and that its success is assured for that reason. The promoters of the Monarch Bank establish themselves behind this old-established precedent. They try to show some sort of cause for their existence. Whether, however, they have succeeded in their attempt is another question, to which we fancy most people will return the shrug of the shoulders which does not mean enthusiastic compliance.

To study the matter satisfactorily, however, it is necessary to examine a little more closely the basis of the promoters' belief in this high-sounding proposition. So far as one can judge, they are going to stake their prospects on a novelty—on the "new-born gaud" of keeping open day and night. We would not mention this detail of a bank's domestic economy had it not been for the fact that this apparently is the whole reason and crux and apology for the proposed new bank's very existence. Now, novelty is a good enough thing in its place, but most emphatically it is not a thing that *wears well*, and an innovation that costs more than it is worth is hardly a plan that will commend itself to sensible shareholders.

The plan proposed would not be so risky and chimerical if a day and night bank were actually needed by one business man in a hundred. But is such an institution needed in Toronto? We know it is the fashion of some people to sneer at anyone who does not immediately take hold of a new thing simply *because* it is a new thing, but we feel constrained to remark that if this be the only or the main reason that the Monarch Bank can advance for its existence, it had better remain still-born. We do not forget there is to be a special department for ladies, under charge of an efficient porter, but this novelty for general attractiveness and daring is hardly on the same plane with the keeping open of a bank all night for the accommodation of an eager public through the wee small hours, when all other banks inhospitably close their doors. By the way, here is a little arithmetical problem: What percentage will the number of customers between say 9 p.m. and 6 a.m. bear towards the clerks who have to be there to wait upon them? And query: Where will the bank's profit come from to pay these triplicate clerks?

It may be true that a day and night bank is now running in New York, and it may be true also that it has been very successful, but New York is not Toronto, nor are the conditions in any degree similar. One can understand some advantage might possibly lie in keeping a bank open until five or six o'clock, or even until ten o'clock. But all night! The idea, to anyone having knowledge of banking practice in such a city as Toronto, is merely silly. It is true that from the point of view of an infinitesimal section of the public such a plan might occasionally prove a convenience, but we are discussing now the shareholders' point of view. And shareholders' profits are not made out of plans which appeal so slenderly to the general public as this one would. It seems to us that considerable future trouble would have been saved if the difficulties which attended the obtaining of a charter by the Monarch Bank had been just a little bit increased.

* * *

INSURANCE BELOW COST.

The letter which we print in another column from an old member of the Royal Arcanum, and written apparently more in sorrow than in anger, is still another indication of the shaking of the public mind over the recent enactments as to the rates of that old-established order. In the case of the Royal Arcanum complaint cannot be made, so far as we have heard, as to extravagance or bad management; the matter which is at fault is simply one of principle: the whole groundwork of the society is on a sandy foundation. The simple explanation of the troubles in which the Order now finds itself is that it was started on an inadequate basis of rates for furnishing the real, solid kind of life insurance which for a long time its members thought they were getting. This they found afterwards they were emphatically not getting. Partial remedies have been applied, it is true, but it was not until the outgo actually overtook the income, which it did a year or so ago, that the officers fully determined to make the drastic changes which they are now endeavoring to carry out.

As it seems to us, the whole matter is treated, as in a nutshell, by a section of the report for 1905 (which has just been issued), by Frederick L. Cutting, Insurance Commissioner for Massachusetts. This State, we may remind the reader, is perhaps responsible for more good, progressive insurance legislation than any other State in the Union. Mr. Cutting's remarks, under the head of "Fraternal Insurance," fit in, it seems to us, so exactly with the requirements of this Royal Arcanum case that we think they are worthy of being reprinted in full, which we do as follows:

> **Fraternal Insurance.**
>
> There are those who have charged the insurance department with hostility to insurance by assessments, because it has, since the advent in this Commonwealth of this form of protection, expressed its deep-seated conviction that, sooner or later, trouble would come to every organization attempting to do an insurance business on inadequate rates. Commissioner Tarbox was especially insistent. In a report to the Legislature he said that "The late survivors—for such associations cannot be eternal—will find their temporary insurance costly, and their families will derive no benefit." He complained that such a corporation could get its charter, then go before the public and represent that it was acting under the strict laws of Massachusetts, when the chief jurisdiction the insurance department had over it was to call for statements. It was in relation to them that he repeated the memorable remark of a former commissioner, that "The State should either supervise, or else not seem to"—a truism that ought to be burned into the mind of every person who makes insurance laws or administers them.
>
> It is inevitable that the rate of insurance just adequate to pay the cost for current age will be inadequate for the same person ten years or five years, or even one year later. It is a fact that cannot be rubbed out, that twice as many men will die at age fifty as at age twenty-five, and five times as many at age sixty-five as at age thirty. Group 10,000 men at seventy together, requiring each to contribute his proportion of the aggregate amount required to pay to the heirs of each decedent during the year the sum of $1,000, and it would be found that the sum required from each would be nine times as much as though the group had been composed of men twenty years of age. This is only another way of saying that the liability of death increases as age advances, and as long as that is the fact, a sum which suffices to meet the cost of insurance for age forty is not sufficient for age fifty. It has taken a good many funerals to convince some men of this fact, and others are not even now convinced. They have seen fraternal orders start on a given rate and become apparently prosperous—at any rate, succeed in building up within a few years a large membership, and meet their death claims as they have accrued, without any serious burden being put upon the members. And they argue that the experience of these first years will continue, and charge that those who tell them that it cannot are enemies of this form of insurance. The fraternal does not exist, nor, in view of the inexorable law of nature, will it or any other kind of insurance company ever exist which can continue to pay death claims indefinitely if it merely collects the cost of insurance for age of entry.
>
> Take the experience in this Commonwealth. Hardly

a year goes by without an illustration of the truth above stated. Last year the American Legion of Honor, once having a membership of upwards of 60,000, went into the pit. It found it impossible, as its members advanced in age, to collect sufficient money to pay the claims as they accrued. As assessments increased, the best risks dropped out, leaving a membership of such poor physical condition that a progressively higher death rate ensued, which required an increasing number of assessments, until finally two a month was the regular thing.

* * *

JULY FIRE WASTE.

The fire loss in the United States and Canada for the month of July, as compiled in the office of the New York "Journal of Commerce and Commercial Bulletin," shows a total of $13,173,250. The following table shows the losses by months for the first seven months of 1905, and a comparison with the losses of the same period in 1903 and 1904:

	1903.	1904.	1905.
January	$13,166,350	$21,790,200	$16,378,100
February	16,090,800	90,051,000	25,591,000
March	9,907,650	11,212,150	14,715,400
April	13,549,000	23,623,000	11,901,350
May	16,366,800	15,221,400	12,736,250
June	14,684,350	10,646,700	11,789,800
July	12,838,600	11,923,200	13,173,250
Totals	$96,593,550	$184,457,650	$106,285,150

The heavy loss last month came rather as a blow to the hopes of the underwriters, who were expecting a better showing. An addition of a million and a quarter, compared with July, 1904—a month for which better things are usually hoped—is no light matter. Heavy fires in California seem to be the main cause.

* * *

CANADA'S FOREST RESOURCES.

The position of some of the older provinces in the Dominion is sad, inasmuch as their resources in woods and forests were largely dissipated before their incalculable value was fully appreciated. This makes, however, all the sadder the carelessness of some of the Dominion's newer sections, which ought to have learned better from past experience. British Columbia, for example, has enormous forest wealth, and it is now known how immensely important it is to her own advancement and to the commercial standing of Canada that this wealth should be eked out and increased rather than thrown to the winds and turned into ashes. Yet this is exactly what we fear is being done in our Pacific province to-day, in spite of what the exponents of the science of forestry, and the people of all classes who give the matter any thought at all, are trying to teach us every day.

The reports collected by the agents of the British Columbia Department of Agriculture tell a sorry tale. In one district, that of New Westminster, it is stated that the bush fires this year have been the most destructive since those of 1893. The area burned, taking the province as a whole, has been very extensive, and the value of timber destroyed is probably not less than half a million dollars. The worst fires were in the northern part, and are believed to have been due to the carelessness of prospectors, particularly persons prospecting for coal. Some fires arose from want of care on the part of persons clearing land, but the damage done in these cases was comparatively small.

As we learn through the medium of the press, the forest fires in British Columbia, during the past year, were of special severity owing to the dry season. The direct loss to the province was large, and the effect on the mining and other industries requiring wood supplies will soon make itself felt. The question of dealing with these fires is one of the most important ones which can be given consideration by the Province of British Columbia at the present time. The revenue derived by the province from these forests during 1904 was $446,276, a substantial increase over the previous year's revenue, which amounted to $347,004. In regard to lumber supplies the future is in the hands of British Columbia. Her forests of virgin timber are still great and valuable. The development of the western territories and the industrial growth of the Dominion generally will make large and increasing demands upon them, and properly administered they should make British Columbia one of the richest members of the confederation. At no distant day the public revenue from the forests may be expected to reach a million instead of half a million dollars, and will not then have reached the limit of the possibilities. Capitalize such a revenue and the province might well spend a large sum in providing proper protection from fire without going beyond what would be a low rate of insurance. Experience has demonstrated that the forests can be protected, and failure to take effective measures to do so, in the light of present knowledge of the subject, can be hardly less than criminal.

A significant feature is dwelt upon by Mr. Anderson, the Deputy Minister of Agriculture, when he reports to the Canadian Forestry Association that the most serious of the fires occurred near Eholt, and was supposed to be caused by the fires getting away from the men clearing the right of way on the new railway line of the Great Northern Railway Company from Grand Forks to Phoenix. This, no doubt, is an important item of danger, in addition to those caused by prospectors and settlers.

* * *

TRADE WITH THE WEST INDIES.

The opinion has been expressed more than once in these columns that a closer connection is desirable between the various sections of the British Empire in this hemisphere. More than once, too, we have referred to the possibilities of a great augmentation of trade between the Dominion and Jamaica and other parts of the West Indies. The Bahama Islands are an outlying section of the great archipelago that has received but scant attention heretofore from Canadians. For this, perhaps their geographical position, so close to the United States, is largely accountable. Practically the whole trade of the Conchs, which is the name, we believe, under which a large proportion of their inhabitants live, is done with New York and Miami, both in the export and import branches.

Almost the whole of the island trade passes through the port of New York, the monopoly of its transport being in the hands of a single American steamship company. The greater part, too, of the imports for the United States come through a limited number of New York commission agents, who allow liberal credits, visit Nassau frequently, keep in constant touch with their customers, and render them various services which could not so conveniently be rendered from any other centre. To these facts must be added the important one that in all respects but one (the heavy tariff duties) New York is an ideal distributing centre for Bahamian produce. New York, too, is a recognized centre for the distribution of sponge, an important item in Bahamian products; again, it is a great fruit centre, and tropical fruits are the main products of these islands of the Gulf Stream.

Notwithstanding these undisputed advantages possessed by New York, however, something can be said for the development of trade with Canada, and some remarks made recently by Mr. Anton Bertram, the Attorney-General for the Bahamas, are well worth repeating here, for the hints they contain for Canadian merchants and exporters. As we have said before, commerce between the two countries at present is nil. Or almost so, for we note that Mr. Bertram places the total imports from Canada for 1903 at £3,074, and the total exports to Canada at £2,333. Just to indicate the direction that trade development would likely assume, we append a brief statement of the items which made up this not very remarkable showing:

Imports to the Bahamas.

Flour, wheat, etc.	£2,197
Earthenware, glassware, etc.	258
Whiskey	111
Musical instruments	99
Rope	95
Meat, salted or cured	80
Tea	72
Butter	63
Oats	40
Miscellaneous	59
Total	£3,074

Exports from the Bahamas.

Preserved pineapples	£1,804
Sponge	248
Pineapples	199
Cigars	73
Total	£2,324

It may be admitted that as practically all the trade with Canada passes through New York channels, a certain amount is probably wrongfully accredited to the United States, but this probably would not make any very great difference.

Inasmuch as the Bahama Islands consume large quantities of all the articles enumerated as imports, while Canada consumes large quantities of the articles exported, it is obvious that this trade might become much more extensive. The difficulty in the way is the want of direct communication. At present the Bahamian merchants who are enterprising enough to carry on direct trade with Canada suffer constant inconvenience because they can never tell when goods consigned from Canada by rail will really be put on board the steamer. In point of fact, the facilities offered by the New York commission agents are so good, and the obstacles presented by the transit through New York are so irksome, that (in the absence of some such special stimulus as a preferential tariff) it is practically impossible to develop Canadian trade in its present channels. The same *vis inertia* seems to affect the export trade, and in spite of the paralysing effect of the United States tariff, no serious attempt has yet been made, or is likely to be made, to find a market for exports of the islands in Canada via New York.

That a considerable trade with Canada might under different conditions be developed will be manifest even on the most cursory consideration of the subject. Though Canada's population is small compared with that of the United States, it is capable of taking the whole of the products of the Bahama Islands several times over, with the exception of sponge, and probably Canada is able to supply the whole of the goods in general demand by the islanders.

Moreover, not only is the Canadian tariff much more moderate than that of the United States, but there is already in existence on the Dominion Statute-book an enactment expressly giving to the colony a direct preference of 33 1-3 per cent. It only requires direct communication to make this preference effective.

In 1903, the importation into the Bahamas from the United States amounted in value to £96,224, and among the items which might just as well have come from Canada may be mentioned apples, lard, lumber, nails, potatoes, shingles, soap, preserved fruits, fish, meats, etc., hardware.

A table prepared by Mr. Bertram shows the consumption in this country of goods produced in the Bahamas. From this table it appears that (excluding canned pineapples) Canada consumes no less than £784,464 worth of articles which the Bahama Islands export, but of which the latter only actually export £189,701. If sponge (of which Canada takes only a comparatively small quantity) be excluded, the figures are much more striking. Canada's total import is £776,447; the total Bahama export £85,307. The islands also produce good oranges, mangoes and other fruits, while probably cotton might be placed in its list of resources. Practically the only thing needed is good, direct transportation.

* * *

THE SOO CELEBRATION.

The Soo canals have been the indicators of such an enormous extension of commerce, and indeed have been such prime factors in that extension, that the celebration of the semi-centennial of the opening of the St. Mary's Canal is in reality a historical event of the first magnitude. The history of the region around the Soo also is of more than usual interest.

It was on the fourteenth day of June, 1671, that Simon Francois Daumont erected somewhere near the present site of Fort Brady, a cedar cross bearing the arms of France, and proclaimed the authority of Louis XIV. over the lands stretching from the North Sea to the waters south and west throughout the continent. Eighty years later the Canadian Count Repentigny and Captain Louis Le Bonne received a feudal grant of six leagues along the portage, with a depth of six leagues. During the British occupancy, the British Fur Trading Company took from the Lake Superior country annually furs, the original cost of which was equal to a quarter of a million dollars. That company first built around the rapids a canal for bateaux; and one of the locks is still preserved as an ornament to the grounds of the Lake Superior Company, on the Canadian side of the river.

The first Governor of Michigan, Stevens T. Mason, was an ardent champion of a canal. Plans were prepared, money was appropriated to begin the work, and in 1839 the contractors appeared on the scene, but were stopped by the regulars from Fort Brady for alleged trespass. After many futile attempts to obtain Congressional grants, in 1852 the General Government gave Michigan 750,000 acres of lands to aid in constructing the canal. A corporation organized under a New York charter began work, we are told, on June 2, 1853, and in twenty-two months constructed a canal with two locks, each 350 feet in length, 100 feet in width, and 13 feet in depth (the largest in the world), at a cost of $999,802.46.

The Saint Mary's Canal remained under State control until 1881, when it was transferred to the Federal authorities; and in September of that year a second lock, known as the Weitzel Lock, and constructed by the United States at a cost of $2,180,000, was opened. This lock is 515 feet long, 80 feet wide, and with a depth of 16 feet over the mitre-sill. The original lock was in existence until 1886, when the Government began the construction of the Poe Lock, 800 feet long and 100 feet wide, with a depth of 21 feet. The Poe Lock cost approximately $3,000,000; and the work of construction was done under the direction of General Poe. In 1895 the Canadian Government opened their canal, which has a lock of 1,000 feet in length and 80 feet in width. The Canadian and American officials exchange traffic reports daily, and all three locks are used to accommodate the commerce of the lakes without discrimination and without tolls. Some figures concerning the trade movement of the canals are interesting in this connection. We find that commerce has increased from 1,200,000 tons in the decade from 1855-64 to 253,000,000 tons in the ten years ending with 1904; the freight charges per ton mill have decreased from 2.3 mills in 1887 to .81 mills in 1904. During the year 1904, the number of passengers transported through the canals was 38,000; the amount of freight 31,546,106 tons, with a value of $340,000,000; the number of vessels using the locks was 16,120; the greatest amount of traffic in a single day was on September 6, 1904, when 287,399 tons of freight went through the canals on ninety-nine vessels.

No water route in the world approaches these canals in magnitude of trade, particularly when it is considered they are only open eight months in each year. Both East and West have benefited, and both Canada and the United States. In fact, they may be said to be a great bond of fraternal sympathy between the two countries, as referred to by Mr. Fairbanks, Vice-President of the United States, who officiated at the celebration last week. His inspiring words on this occasion are well worth repetition:

"We cordially welcome our friends from Canada to share in this celebration. The event we commemorate is of mutual interest to the people of the two countries. There, side by side, are the great locks, one constructed by the United States and the other by the Dominion of Canada. Through them passes interchangeably the commerce of the two countries. Here they will stand in close fellowship for centuries to come. We trust that they will always be symbolical of cordial relations and neighborly regard of the two peoples, through whose veins flows the blood of a common ancestry. We owe allegiance to different institutions. Above us are different flags, emblems of the mightiest powers upon this earth. We have no sense of rivalry except in those ways which make for a higher and better civilization.

"There are no fortifications along our common frontier; no battleships upon the waters which divide us. Those are not needed now, and we trust that, in God's providence, they shall never be required. We are the respectors of each other's institutions, of each other's laws, or each other's rights. We are bound to each other by strong social ties and sentiments of mutual respect. The national policies of the United States and Canada may not be in accord. If they be not, it will be due to no unfriendliness of purpose, but to that sense of duty which each primarily owes to its own."

* * *

BANK EXAMINATIONS IN THE UNITED STATES.

The subject of examination of banks has received quite a little attention of late in the United States through the failure of some institutions where the national bank examiner has been held to be at fault by the public generally. The time has come when the bankers of the country are looking the question of examination squarely in the face. Some remarks made by Joseph Chapman, Jr., upon the American system are apt to give Canadians a clearer insight into conditions there, and to cause them to render thanks that their conditions are different. Among many bankers, he says, the national bank examination has come to be looked upon more or less as a farce. There is no question but that the directors of banks feel that as long as the national bank examiner reports that the bank is all right, there is no cause for them to worry, and the depositors feel, likewise, that their money is safe. The reason both the directors and depositors feel safe is probably because they are familiar with section 5240 of the Revised Statutes of the United States, which states that "the Comptroller of the Currency, with the approval of the Secretary of the Treasury, shall, as often as shall be deemed necessary or proper, appoint a suitable person or persons to make an examination of the affairs of every banking association, who shall have power to make a thorough examination into all the affairs of the association, and, in doing so, to examine any of the officers and agents thereof on oath, and shall make a full and detailed report of the condition of the association to the Comptroller."

The office of the Comptroller of the Currency is a political office. The selection of a man to fill this place is left to the President of the United States, and he may or may not be a man who is fitted by education, training, and bent for that most important position. I do not think that the importance or the possibilities of this office is appreciated by the bankers and by the public generally. It is a position calling for the highest order of executive ability, of discretion, of tact, and of backbone. It is a position that should pay a salary commensurate with the responsibility of the office. At the present time this is not the case. The salary is small, and the man filling this position is very apt to correspond with the salary. The country has been most fortunate in obtaining men of high character, who have filled this post with great honor to themselves and to the banking profession. However, as long as the office is a political one, given as a reward for labors performed, there is danger that the man who holds this important position will be susceptible to influence.

But the course of politics in the appointment of the Comptroller of the Currency is secondary to the far more important matter of the appointment of the national bank examiners themselves. No matter how good a man may be in the office of Comptroller, he is powerless to appoint his assistants. These men are nominated and appointed by the United States Senators from the different States, and the only qualification that appears to be necessary to get the appointment of national bank examiner is that the party applying should have a political pull and influence with the Senator. The question of ability and fitness is lost sight of in the eagerness of the Senators to reward their friends and scatter the plums to the faithful.

To a convention of bankers this statement is no news. To the public generally it may be. In anything I say here to-day I do not wish to be classed as sensational or revolutionary, but I believe it is time that we talked these matters over seriously, in order that some method may be devised whereby the entire machinery of the control and supervision of national banks of this country may be removed from politics, so that we can get men, from the Comptroller down, who shall be selected simply for their ability and fitness to perform the work, men who shall be kept in office as long as their work is satisfactory, and men who shall be paid a salary commensurate with the responsibility they assume and the labor they perform.

It is to the credit of the national banking system that it has forged to the front and made itself a power in this land, in spite of the loose methods provided by the Government for its supervision and control. It is to the credit of the officers and directors of national banks that their institutions are in such excellent shape, regardless of the namby-pamby national bank examination.

In order that we may understand how ridiculous and silly the performance called a national bank examination really is, it would be necessary for us to read a few figures.

According to the report of the Comptroller of the Currency, dated March 14, 1905, there were in operation in the United States 5,587 national banks. Each bank is required to be examined twice a year, which makes a total number of examinations in one year of 11,174. The totals represented by these 5,587 banks are as follows:

Resources.

Loans and discounts	$3,888,233,694 79
U. S. and other bonds	1,216,374,365 74
Banking house furniture and fixtures and other real estate	148,663,931 83
Cash and due from banks	2,054,855,693 80
	$7,308,127,686 16

Liabilities.

Capital	$ 782,487,884 67
Surplus and profits	603,355,715 08
Circulation	430,995,523 00
Bonds borrowed	34,819,906 60
Deposits	5,427,239,316 68
Other liabilities	29,029,340 04
	$7,308,127,686 16

To examine and audit and report to the boards of directors and to the depositors in these 5,587 banks, there are employed some seventy-five men, on a commission basis. In other words, the examiner gets a certain amount of money for the capital and the total footings of any bank. If he can examine a bank with $2,000,000 assets in one day, it is to his interest to do so, for he gets no more money did he take a week, two weeks or three weeks to do this work This is probably one answer to the question which is heard so many times when anything goes wrong in a national bank, "Where was the national bank examiner?" Most likely he was consulting his railroad schedule, seeing how soon he could get out of the town and make another commission. To any thinking man, the idea of seventy-five men making 11,174 examinations of banks whose total deposits amount to $5,427,239,316.68 would be ridiculous were it not that it is a most serious question.

* * *

WESTERN RETAIL MERCHANTS.

The Retail Merchants' Association of Western Canada held their annual meeting in Winnipeg on the 26th and 27th ult. in conjunction with the Retail Hardware Association. The delegates were able to dwell with satisfaction upon the fact that the Association had been the chief means of practically putting an end to price-cutting on staples, and that hence they were making some small profit on such items as sugar, salt and tobacco. These goods have been sold for a long time past either at cost or at a loss. The important subject of long credit was discussed from all its viewpoints. At the last convention the recommendation was made to close all accounts on November 1st each year, and to enforce a strictly cash system until May 1st. The meeting endorsed this, with the exception that the cash

The Sterling Bank of Canada

HEAD OFFICE, TORONTO

The readiness with which the public has volunteered to take up the stock of "The Sterling" indicates a general confidence in the proposed Directorate and promises well for the wide popularity of the bank.

Within recent years no Canadian Bank has been promoted under more favorable auspices. Its success is assured.

The following are named for the proposed Board of Directors :

HON. S. C. WOOD.
Ex-Treasurer of Ontario, Vice-President of the Imperial Life Assurance Company, Director of the Toronto General Trusts Corporation, Director of the British America Assurance Company.

J. C. EATON, Esq.,
Vice-President of The T. Eaton Company, Limited, Toronto and Winnipeg.

DAVID DEXTER, Esq.,
President and Managing Director of the Federal Life Assurance Company of Canada.

GEO. B. WOODS, Esq.,
Managing Director of the Continental Life Insurance Company.

SIDNEY JONES, Esq.,
President of Jones Brothers & Company, Limited, Manufacturers, Toronto.

HON. JOHN DRYDEN,
Late Minister of Agriculture for the Province of Ontario, President of the London Mutual Fire Insurance Company, President of the Reliance Loan and Savings Company.

HON. W. J. HANNA, K.C., M.P.P.,
Provincial Secretary for Ontario.

WM. DINEEN, Esq.,
Of the W. & D. Dineen Company, Furriers, Toronto, Vice-President of the Sovereign Life Insurance Company.

H. WILBERFORCE AIKINS, B.A., M.D., M.R.C.S. ENG.,
Treasurer of the Medical Council for Ontario, Director of the Sun and Hastings Savings and Loan Company.

G. T. SOMERS, Esq.,
Of G. T. Somers & Company, Bankers and Grain Exporters, President of the Ontario Securities Company, Limited.

AGENTS,
The Bank of British North America.

SOLICITORS,
Messrs. Rowell, Reid, Wilkie, Wood and Gibson, Toronto.

Five Hundred Thousand Dollars of the stock of the Sterling Bank of Canada is now offered to the public at $125 the share. The premium of twenty-five per cent. will be applied to the Rest Account and utilized to sustain the Bank in a favorable position to conduct business operations and hold the confidence of the public. The premium has been fixed at a figure that warrants security.

☞Full particulars may be obtained on application to the Secretary of the Provisional Board of Directors of The Sterling Bank of Canada, Manning Chambers, Toronto.

period was shortened by one month, as April is a time when farmers are buying implements and incurring many necessary expenses of a similar character. Representative wholesalers who were present showed their sympathy with the Association movement. A large number of other subjects of interest to the trade were discussed by those present, and the general concensus of opinion was that the convention of the Association was a thorough success. The following officers were elected: President, T. J. Lawlor, Killarney, Man.; first vice-president, H. C. Hamelin, Lauder, Man.; second vice-president, J. D. Baine, Boissevain, Man.; treasurer, Robert Rollins, Killarney; secretary and organizer, W. A. Coulson, Williamson Block, Notre Dame Avenue, Winnipeg. Executive—A. G. Munro, Morden, Man.; A. E. Hill, Griswold, Man.; W. G. McLaren, Souris, Man.; J. Brown, Neepawa, Man.; R. F. Moore, Cartwright, Man.; F. W. Clingan, Virden, Man.; N. D. McKinnon, Weyburn, Assa.; G. C. Sayles, Elva, Man.; E. H. Glinz, Oak River, Man.; W. Ledoux, Arnaud, Man.

INSTITUTE OF ACTUARIES.

An intimation appears in our advertising columns that the annual examinations of the Institute of Actuaries of Great Britain will be held at the several colonial centres, including Toronto, on the 20th to 24th of April, 1906, the hour and place of the examinations to be determined by the local examiners, of which due notice will be furnished the candidates.

It will be recalled that at the last examinations of the Institute held in Toronto, almost thirty candidates presented themselves in the several Parts, and that some twenty were successful. The Institute of Actuaries is recognized as being the most influential actuarial body in the world, and students prize very highly the obtaining of its degree of Associate or Fellow.

* * *

FIRE INSURANCE ITEMS.

Mr. J. G. Borthwick, of the Caledonian Fire Insurance Company, has returned from a business trip to the Maritime Provinces and Newfoundland.

The Manufacturers' Club of Buffalo has appointed a committee to investigate fire insurance rates. The local board of underwriters recently announced an advance of 35 per cent. in the existing rates, though improvements have been made in the water system in the downtown district. It is stated that negotiations had been opened with other cities where similar advances had been announced with a view to co-operation in an effort to force the insurance companies to recede from their position.

Mayor Urquhart, of Toronto, seems to be falling into the bad habit which has been indulged in—and regretted—by some other cities on this continent, of thinking over the question of self-insurance. He thinks the rates on private dwellings are altogether too high, compared with those in other cities. He is of the opinion that the city should take some action in the matter, either by securing legislation to insure private dwellings or forming a mutual fire insurance company.

The Boston Herald tells a story of the town of Amesbury, which owns a small fire apparatus: Outside the fire limits is a small community that, on petition, received an appropriation for the purchase of a "hand pump." It was installed in an abandoned blacksmith shop, where it remained for two years, used only for decorative purposes in street parades. Last summer a stroke of lightning started a small fire in a farmhouse near by. The volunteer department rallied at once, but when they arrived at the engine house the foreman stood at the door. "Don't touch her, boys!" cried he. "I've got two hens settin' in the box. Let's use buckets." They agreed, and the hens were allowed to pursue their incubating ways.

—On the 16th and 17th inst. there will take place in Yarmouth, N.S., the eleventh annual meeting of the Maritime Board of Trade. Our Provinces by the sea have in the past received hardly so much interest at the hands of Ontario and Western Canada as their position, resources and achievements warrant, and such a gathering of their prominent business men as this convention promises to be will, we trust, be well attended and meet with the success it deserves.

THE

NORTHERN BANK.

HEAD OFFICE: WINNIPEG.

Provisional Offices: Merchants Bank Building, Winnipeg.

Now opened to complete organization.

The following have consented to act as Directors upon election:

JAMES H. ASHDOWN, President, J. H. Ashdown Hardware Co., Chairman of Provisional Directors.
D. C. CAMERON, President Rat Portage Lumber Co.
G. R. CROWE, President Northern Elevator Co.
H. M. HOWELL, K.C., Messrs. Howell, Mathers, Howell & Hunt.
SIR DANIEL McMILLAN, Lieutenant-Governor Province of Manitoba.
CAPT. WM. ROBINSON, Steamboat Owner, President Dominion Fish Co.
HON. R. P. ROBLIN, Premier Province of Manitoba.
FRED. W. STOBART, Messrs. Stobart, Sons & Co.
E. C. WARNER, President Midland Linseed Oil Co., Minneapolis.
A. STAMFORD WHITE, Messrs. A. S. White & Co., Chicago, and Liverpool, Eng.

Note—The list of Directors is subject to the vote of the Shareholders at their first meeting, who may then increase or decrease the number.

General Manager.

J. W. de C. O'GRADY, Late Manager Bank of Montreal, Chicago, Ill.

Solicitors:

Messrs. Howell, Mathers, Howell & Hunt.

AUTHORIZED CAPITAL, $2,000,000.
In 20,000 Shares of $100 Each.

Of which it has been decided to issue at present 10,000 shares at $110 per share, being one-half of the authorized capital.

TERMS—$5 per share of the par value on application, $15 per share on allottment, $30 per share on the first day of the month immediately succeeding the date of allotment, $10 per share every three months thereafter, on the first day of the month, until the whole amount, including the premium, is paid.

Interest at the rate of 4 per cent. per annum up to the date fixed for payment will be allowed on payments made in advance.

Forms of application for stock, prospectuses, or any further information may be obtained from

S. S. CUMMINS,
Secretary for Organization,
At the Provisional Office, Merchants Bank Building,
MAIN STREET, WINNIPEG.

The Ontario Government, by an order in council dated 28th ult., authorized investment by trustees in the terminable debentures of the Agricultural Savings and Loan Company.

We understand that the northwest corner of Adelaide and Bay streets, Toronto, will be occupied by a large office building, to be erected probably by the Citizens' Bank, which is now in course of organization.

The Bank of British North America has declared an interim dividend of thirty shillings per share ($7.30), free of income tax, for the half-year ending with 30th June last, or at the rate of 6 per cent. per annum.

—"The prices of Canadian securities have in a great many cases improved in value during the past few days," says a recent number of the Canadian Gazette, "especially the railway stocks, in which a good business has again been done. Some improvement was shown in the traffic returns of the Canadian Pacific and Grand Trunk companies for the second week in July, the former showing an increase of $47,000 over the corresponding period, which was $155,000 over 1903, and the latter an improvement of £4,094 over the week to July 14, 1904, which was £11,700 behind those in 1903. But quite apart from these influences, small as they are, the steady flow of orders to purchase the better Dominion railway securities which has now been going on for some months, has stimulated a very strong undertone, which, up to the present, shows no signs of abatement. Canadian Pacific shares are ⅝ better at 156¼, and the debenture stock of the same company has risen ½ to 109½. Further and substantial advances have taken place in Grand Trunk stocks, the demand for which has lately shown material expansion. The second preference leads the way with a rise of 1¾ to 101¾, then the first preference is 1¼ up at 111¼, the third preference is 1⅛ at 51⅞, the guaranteed ½ at 101¾, and the ordinary ⅛ at 22⅞, while the 5 per cent. debenture stock is 1 better at 133. Grand Trunk Pacific 4 per cent. stock is ½ higher at 101½. The other movements comprise an improvement of 1 to 98 in Canadian Northern 4 per cent. debenture stock, of 1½ to 61½ in Alberta shares, of ½ to 107 in Calgary and Edmonton 4 per cent. debenture stock, of ½ to 107 in New Brunswick Railway 4 per cent. debenture stock, and of ¼ to 5¼ in White Pass and Yukon shares. In Dominion issues Canada 3 per cents are 1 higher at 97½, in Provincial stocks, Quebec 4 per cents. (1928) and (1934) are 1 and 2 up respectively at 103 and 104, and in municipal bonds Montreal 5 per cents. at 102, and Hamilton 4 per cents. at 103 were both 1 better.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, August 10th, 1905, as compared with those of the previous week:

	Aug. 10.	Aug. 3.
Montreal	$23,477,113	$27,837,802
Toronto	16,748,309	18,520,503
Winnipeg	6,362,417	7,847,951
Halifax	1,772,718	1,967,152
Hamilton	1,019,407	1,289,026
St. John	1,139,155	1,076,602
Vancouver	1,664,920	1,669,761
Victoria	608,132	3,116,956
Quebec	1,736,211	1,718,360
Ottawa	1,904,973	2,674,438
London	949,978	1,005,282
Total	$57,383,333	68,713,833

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

Though the work of putting the street cleaning department of the City of Toronto in a proper position to do the city's work efficiently and economically has only begun, the savings already effected will total, it is believed, more than $15,000 per year. Each of the three section foremen in charge of the outside work has been given leave by Dr. Sheard, the new head, to appoint four foremen and to employ his own general staff. They will all, however, be held personally responsible for the work of their sections, and should they fail to discharge their duties satisfactorily they will be dismissed. It looks as if this most important of all branches of municipal enterprises were about to be put on a satisfactory basis.

The annual meeting of the New Brunswick Railway Company took place in St. John on the 3rd, when the following directors were elected for the ensuing year:—Lord Strathcona and Mount Royal, Robert Meighen, John Turnbull, Jos. Hardisty, John S. Kennedy, Samuel Thorne, D. Willis James, E. R. Burpee, H. H. McLean, Frank S. Meighen. At a meeting of the board of directors subsequently held, Mr. Robert Meighen was elected president, and Mr. H. H. McLean, vice-president, of the company. There was a discussion regarding reports presented on the subject of the Grand Trunk Pacific crossing the New Brunswick Railway Company's property. One of the surveys passes over the company's timber lands to the extent of 130 miles, which the directors look upon as a very serious menace to their interests owing to the danger of forest fires.

DOMINION EXHIBITION AT NEW WESTMINSTER.

Arrangements are being completed for the forthcoming Dominion Exhibition at New Westminster, B.C., and last week tenders were invited for erecting the additional buildings needed. The work for which contracts have been called includes the painting of two new buildings, the repainting of the old main building, and various and sundry alterations to the grand stand and bleachers. Mr. Henderson, the architect of the fair, states that it is the intention of the fair management to have the buildings of the exhibition painted in light, attractive colors, in which white, red and cream will predominate. The grounds when completed ought to look very pretty.

The big industrial building is now nearing completion. Work is not getting along so fast on the machinery building, but it, too, will be finished in good time.

It is the intention of the fair management to use the old machinery building for the exhibit of poultry and dogs, and for this purpose contracts are being called for thoroughly refitting it with the necessary coops.

The plans for the cattle-sheds are now about ready. These sheds, which will be of the very latest pattern, will be built so as to afford accommodation for a very large assortment of cattle and horses.

So far everything has gone very favorably with the buildings, and there is no danger that they will not be finished in time for the fair. The problem that is causing trouble to the Executive is how to accommodate the thousands of visitors who will be at the fair. No appointment has yet been made for a head of the accommodation bureau, but this will be attended to soon.

* * *

THE LAKE SUPERIOR IRON COUNTRY.

Under the title of "The Honorable Peter White" the Penton Publishing Co., of Cleveland, has just published a book by Ralph D. Williams, editor of the Marine Review, which details the development of the Lake Superior iron country and the growth of the iron ore trade. This book, which is just from the press, and abundantly illustrated, is a distinct contribution to the literature of the iron ore industry of the United States. However, in this instance it emphasizes the human and personal rather than the technical side of the industry. Three-fourths of all the pig iron that is now produced in the United States is made out of Lake Superior ore. The industrial supremacy of the United States in the manufacture of iron and steel, the output of which will probably exceed during the present year the combined outputs of Great Britain, Germany and France, is due entirely to the purity, abundance and cheapness of transportation of the ores of the Lake Superior country.

The premier position which the United States now holds rests upon a very firm basis, for not for many years will these deposits be exhausted; nor, indeed, could they be sensibly affected in value were equally enormous deposits discovered elsewhere, since in journeying to the furnace they travel along a highway whose economy of transportation is not equalled anywhere in the world. So enormous has the ore trade of Lake Superior grown that it seems incredible that it should be a matter of the past fifty years merely. Yet fifty years ago the rapids of the St. Mary's river acted as an insuperable barrier to commerce with Lake Superior. This great ore trade is now handled with extraordinary ease, and with equipment in the shape of ships and docks that can readily adapt itself to fluctuations of from one to five million tons per month, that a truthful recital of the time when an annual stock pile of 1,000 tons at upper lake ports was considered a goodly amount becomes, as may be imagined, extremely interesting. This book is prepared from examination of the manuscripts of the original mining companies. In examining these manuscripts and collateral data considerable information was discovered concerning the early copper discoveries, and this information, for the sake of history, has been incorporated in the prologue. Iron, however, is the book's chief subject. It has been considered best to tell the story of the beginnings of the Lake Superior iron industry under the title which has been given it, because Peter White, now the leading citizen of the upper peninsula of Michigan, assisted, as a boy, in stripping the first iron mine, and wrote the bill of lading of one of the first, if not the first, shipments of ore—only six barrels. Although nearly sixty years have gone by since then, he is still alive in this great iron region. The ups and downs of his active life are well described in the present book.

* * *

OUR HALIFAX LETTER.

The Transportation Commission paid an extraordinary visit to Halifax last week for the purpose of introducing the new appointee to the Commission, Mr. Ashdown, of Winnipeg, to the situation. Some misunderstanding was caused by the fact that the members of the Board of Trade, when interrogated by the Commissioners, were not prepared to present their case in extenso. The impression had been left by Chairman Reford's letter, advising of the proposed visit, that it was merely a preliminary call to look over the ground, and with this impression the committee from the Board of Trade devoted their efforts mainly towards entertaining the visitors, showing them the harbor, etc. At a meeting with the board in the afternoon the Commission asked for Halifax's "plans." Halifax did not have them on hand. Commissioner Ashdown said he "did not like this piecemeal work." Chairman Reford wanted to see produced "plans of definite action." Not expecting to be called upon summarily at an informal meeting for a plan of campaign, there was none forthcoming except a "piecemeal" statement, as Mr. Ashdown called it.

Since the departure of the Commission the Board of Trade has come in for criticism, but, it appears to me, without reason. They had been given distinctly to understand that this was not a formal visit, and, therefore, had prepared no formal array of statements for the Commission. When the Commission does make an official visit, however, prepared to listen to business, the city will have its case ready, and it will be a good one.

John H. Sutherland, who has been carrying on a dry goods business on Barrington Street, Halifax, for a good many years, offers his stock and premises for sale, owing to ill-health.

Insurance adjusters have been at work on the premises of Geo. E. Smith & Co. appraising the damages from the recent fire. The damage to the building was put down at $99,930, chiefly borne by local companies, and to the hardware stock at $13,306.76, distributed. This firm is conducting a sale of damaged stock at present.

A valuable discovery of fire clay has been made at Baddeck, C.B. It covers an area of three square miles. Tests are being made by the Dominion Iron and Steel Co.

Herring curing experiments on the Scotch plan are now being conducted on the south shore, having been discontinued at Canso after a very successful demonstration. Large quantities have been shipped from the latter point to the United States markets, bringing $15 per barrel as compared with $6 per barrel for similar fish cured by the old method. This is the second season these experiments have been carried on, this year with greater success owing to experience gained last year.

News from the fishermen is not of the most encouraging kind. Dogfish are giving much trouble. Bait is very scarce. Many vessels have taken less than one hundred quintals, and some are returning home discouraged.

Reports from the fruit districts are encouraging, and the hay crop will be a great one everywhere. The Annapolis Valley Shipping Association, consisting of fruit growers, has arranged shipping facilities for their product this season at a cost of 25 cents a barrel less than formerly.

HALIFAX EXHIBITION.

Work is progressing satisfactorily on the new exhibition buildings, the erection of which was necessary in anticipation of the holding of the Dominion Exhibition there next year. The arts building is to be two stories in height, the main building 81 by 39 feet, and an L, 14 by 22 feet. The mines building will be 80 feet by 40, one story, 20 feet high to the cornice. It will be lighted from the roof, and entered through a large portico. The fisheries building will be 100 feet long, 50 feet wide, and 20 feet at the cornice. It will include a fish tank 14 by 20 feet, in which to exhibit nets, boats, etc. The fish dealers of Halifax (where more dry and pickled fish is handled than in any other city in America) met recently for the purpose of arranging for a first-class exhibit at future exhibitions. It was decided to ask the Provincial Government to build a refrigerator in the new fisheries building, and ask the Dominion Government for the loan of the tanks used at the St. Louis Fair.

⁂

TRADE OPENINGS.

The following were among the enquiries relating to Canadian trade received at the Canadian Government office, London, during the week ending 28th July, 1905: A colonial and foreign buyer and manufacturers' agent desires to act for Canadian houses requiring the services of such a representative in England. A firm in a position to export in a large way such goods as bronze powders, barytes, china clay, dry colors, French chalk, ochres, siennas, oxides and other chemicals desires to correspond with buyers in Canada. A Nelson (New Zealand) commission and general merchant desires to get into touch with Canadian manufacturers of furniture, stoves, curtains, sewing machines, hollow-ware, bicycles, etc. A Barcelona (Spain) importer wishes to correspond with manufacturers in Canada of rubber shoes. The proprietor of a tea estate in Ceylon desires to get into touch with a wholesale grocer and importer in Canada in regard to an agency. A London firm has requested to be referred to Canadian manufacturers who use colors for decorating china and earthenware.

⁂

THE FRUIT CROP.

By the courtesy of the Fruit Division of the Department of Agriculture, of which Mr. A. McNeill is the head, we are favored with an advance copy of its report on fruits of this season.

An analysis of the reports of correspondents to date shows, we are told, a continued falling off from the good indications of previous reports. Fungous diseases are beginning to show seriously, though insects are not as prevalent as usual.

Apples will be a light crop, probably about 50 per cent. of last year's crop. It must not be forgotten, however, that the general scarcity will prevent any waste such as has been common for the last two years. Sales are being made at $1 to $1.25 for Nos. 1 and 2 on the trees. Barrels are lower in price than last year, running from 25 cents in Nova Scotia to 30 and 35 cents in Ontario, but where proper arrangements have not been made early in the season prices are likely to go higher than this.

Pears will be a very light crop, scarcely enough for the local market. Blight has worked sad havoc in many orchards this year.

Plums.—The "drop" and plum rot have lessened the prospect for plums to such an extent that the prospects can be rated for a light to medium crop.

Peaches show a light crop in the Essex and Kent district; a medium crop on bearing trees in the Niagara district. The market will not be overloaded.

Sweet cherries have rotted badly. Sour cherries have been a medium crop, though badly infested in many cases with fruit worm. Small fruits have been a medium crop, realizing good prices.

The reports from Great Britain and the Continent would indicate a light to medium crop. Reports from twenty of the largest apple-growing American States show seventeen States having a light or poor apple crop, some a failure; three, Wisconsin, Kansas and Oklahoma, report the crop promising or good.

Careful estimates by correspondents place the exports from the Annapolis Valley at 200,000 barrels. The apple crop in British Columbia is below the average, but a considerable increase in the acreage will make the exports into the North-West Territories somewhat larger than last year.

⁂

RAILWAY MATTERS IN NOVA SCOTIA.

Senators Power, McKeen and Black, from Nova Scotia, expressed the opinion recently in the Senate that the construction of the Grand Trunk Pacific from Quebec to Moncton was unnecessary. They advocated that the Government should improve the Intercolonial Railway instead, and lease it to the Grand Trunk Pacific. Feeling that there might be some danger of these utterances being taken seriously, the Halifax Board of Trade held a crowded meeting on Tuesday July 25th, when Senators Power and McKeen were heard. They also heard some plain talk, some of which was not decidedly complimentary to themselves. The board passed a resolution, regretting the action of the Senators, and putting itself on record as fully determined, backed by a solid Government representation from every constituency in the Province, to see that the Government carries out all its pledges in this matter. The general sentiment in the ocean city is that it wants not only the Grand Trunk Pacific running to Halifax, but the C.P.R. also, and strong inducements would be offered both lines to come.

⁂

TRADE WITH AUSTRALIA.

Mr. D. H. Ross, Canadian trade agent for Australia, in a report which has just come to hand, says the trade between Canada and Australia has been disappointing. Imports from Canada for the past fiscal year were valued at £222,064, a decrease of £130,000. This decrease is due to the reduction in the imports of flour and cereals. Australia would appear to have got over her bad seasons, and is now exporting cereals largely. There has been a steady

increase, however, in the import in some lines, such as boots and shoes, drugs, medicines, perfumery, preserved fish, oilmen's stores, undressed timber, sewing silks, etc. Australia's exports to Canada increased by £5,000. Mr. Ross, however, does not think Canada gets full credit for her purchases of Australian wool in the London market. He mentions that a new law has been passed requiring sacks to contain wheat or oats to be of a standard size.

It is interesting to note, as we do in this report, that the Reid-McLean Ministry, composed of a coalition of free traders and protectionists, has been defeated through the action of the majority of the protectionists withdrawing their support. The new Premier is the Hon. Alfred Deakin, an ardent supporter of a high customs tariff, and the principal Australian advocate of preferential trade. It is doubtful if the tariff will be altered in any way until after the next general elections, which take place at the end of 1906. The total revenue for the year ending June 30th was £11,288,000, a decrease of £131,000. The expenditure for customs, defence and post and telegraphs was £3,532,000. Over £7,000,000 was paid to each State by the Commonwealth treasurer. Wool shipments from Australasia totalled 1,366,942 bales, an increase of 228,792 bales. The total number of sheep in 1904 was 83,319,517, an increase of 760,000. The outlook for the wool industry this year is most promising. Grass is plentiful, the flocks are increasing rapidly, and the bales ruling for wool are high and very profitable.

* * *

TEXTILE REPORTS.

More activity is evident in the Boston wool market, and it is evident that certain of the large operators are interested and have purchased fair lines of wool. Certain transactions of larger calibre than usual have been consummated, and stocks in dealers' hands are fast being depleted. Other lines are pending the action of buyers, who are undoubtedly interested in wool if it can be bought at their figures. Estimates of stocks in seaboard markets are for very small quantities, and as compared with previous years at this time the size is insignificant. A good many wools have been bought to arrive. It is estimated by certain authorities that fully 50 per cent. of the country's clip has passed into the hands of consumers, while certain dealers are refusing to consider further offers, claiming their lines have been closed out. A large business has been reported in the goods market, especially on worsteds, and the outlook is for continued activity, and under these conditions the prospect of fair business is very bright. Prices of all grades of domestic wool still continue very firm, and with little evidence of weakening, owing to the depletion of stocks. Pulled wools are being taken more freely, certain lines being well cleaned up at current prices.

Last week the raw cotton market in New York was still in a very feverish condition. Fluctuations, however, kept within narrow bounds. The final tone was steady after sales estimated at 400,000 bales. The net decline for the day was 4 to 5 points. Spot was quoted 11.05 cents. Due to the covering of shorts, light offerings and local and New Orleans buying a rise of 10 to 11 points was recorded on Saturday. Spot advanced 5 points to 11.10 cents.

Strength is still the predominant feature in the raw silk market, says the Economist, and the outlook is for the maintenance of present prices at least, with the possibility of higher values in certain producing markets. As far as buying by silk manufacturers is concerned, the week has witnessed slightly more activity, and it is evident that a good many manufacturers have arrived at the conclusion that their predictions regarding a decline in prices are not likely to be fulfilled. In consequence their operations have been slightly more extensive, and, although not willing to contract ahead for any length of time, are buying for their wants during the next two months at least.

The hosiery situation is very similar to that of 1903, says the Dry Goods Economist, in that manufacturers who sold their product early came out at the small end of the horn. Those who were in no special hurry this season can now sit back in their chairs and laugh at the other fellows. While a heavy business for fall has been booked, there are still plenty of orders lying around waiting to be placed, and makers who were not sold up are scooping them in at advanced prices with greater ease and less expense than their brethren who were over-anxious. This is not altogether favorable to the retailers.

Holiday influences and the increased prospect of an early general election, with its disturbing effects on trade, have continued to militate against free business in the Glasgow and West of Scotland soft goods trade; indeed, until the deliveries against the 20th fall due, trading may be expected to hang fire. Agents will withhold going on their rounds till early in August. At the same time, they will set out with more than usual confidence, as retailers' stocks are, without exception, low, which, of course, augurs well for the new season. One leading representative declares that he never experienced a summer when retailers' stocks were so low, which, of course, indicates that they have been keeping down their stocks to the irreducible.

The local wool market at Bradford continues very much in the same condition in which it has been for some weeks past. Stocks of both home-grown and colonial wools are unusually small, and very little of either crossbred or merino wool has found its way here from the recent colonial wool sales in London. The prices of both pure merino and very fine crossbreds of the merino character are firm, and spinners report that a considerable business could be done at rates a little below the highest point yet reached. Users of goods made from merino wool are no doubt only supplying their actual requirements, but it is difficult to see how they can benefit by postponing the placing of their orders, as there are no indications of any weakening in the prices of this raw material for some time to come. It has been stated that the United States buyers are not operating as largely in the coarser kinds of colonial crossbred wools as they were, but even if this is the case, the large orders recently placed for khaki serges will to a considerable extent make up for any decrease in the American requirements. There can be no doubt that the unusually high prices at present ruling for these crossbred wools are seriously interfering with the trade in the cheaper classes of all-wool Bradford dress fabrics, and in the exporting of Bradford worsted yarns to the Continental manufacturing districts. The price of raw mohair is still exceedingly moderate, and as there is every indication of mohair dress goods being fashionable for the spring season of 1906, preparations for this business could be made at the present on favorable lines.

Business in the Belfast linen market is above the average for the season of the year, and bids fair to be fully maintained, while prices are hardening, and have an upward tendency. Manufacturers have had a considerable amount of business offered them, but are indisposed to accept, unless at increased rates, and buyers in numbers of cases do not yet see the necessity of agreeing thereto. However, as values have been steadily rising, and the movement upwards promises to continue, manufacturers can afford to hold out for the increases. The volume of trade is very satisfactory for the season of the year.

* * *

THE NEW ROYAL ARCANUM RATES.

The Editor "Monetary Times":

Dear Sir,—I crave your attention to a few words from me respecting the new rates of the Royal Arcanum. I have been a member for more than twenty years and am a past regent, also an R.A. medical examiner. Admitting that the rates have not been sufficient in the past, I cannot but think, nevertheless, that the new rates are very unfair to the old members.

In an official circular it is stated that the old members have only paid for their protection, and that at a very low rate. If they have only paid for themselves, who has paid the death claims in the past? The fact is that they who have died had the cheap insurance, and that they who still live have had none at all; that while young they have paid for

others, and now to some extent others should pay for them. In the circular above mentioned a statement is advanced to the effect that in 1904 the old members above fifty only paid in about one-sixth as much as they drew out, and that the members under fifty made up the deficit. This is as might be expected, and it is certainly not a true argument that the old members should pay an amount equivalent to what they draw out. One might as well say that a brother aged fifty years in 1904 paid in only $35, while his friend drew out $3,000, and therefore he should have paid in $3,000, instead of $35. Now take a given number of members aged thirty years, even at the new rates, and the same thing will occur when they attain the age of fifty years and upwards, for they will not be paying in enough to cover death claims.

Let us for a moment look at option "a" of the same circular, which is the same plan as we have been using. B becomes a member at the age of 36 years; at the new rate he pays $4.08 monthly, or $48.96 yearly, per $3,000, his expectancy is $32.77, leaving out the decimal he pays $48.96 by 32, equals $1,566.72. C became a member twenty years since and is now fifty-six years of age, his new rate is $9.72, and his expectancy is seventeen years; at the end of his expectancy he will have paid in, in seventeen years, $1,982, but he has paid an extra $600 on the old rates, or a total of $2,582, or above $1,000 more than B. In this there is a little discrepancy which cannot be easily got at, viz., that C may not be in good health, while B is in good health, but if we allow B the extra five years, viz., the difference in their respective expectancies, he would then pay in $244 more. Even with this, to which he is not fully entitled, there still remains $750 which C will have paid more than B. This strikes me as being very unfair.

Besides this, some of the options leave a low rate, which very many will take advantage of, because they know they cannot live to the age of sixty-five years.

I am sorry to trouble you to read all this; I am not an actuary and may have made mistakes in reasoning, but I have paid over $600 to the insurance fund besides Council dues, and, of course, as a poor man with a family unprovided for, I feel interested.

Yours truly,

"M.D."

Toronto, July 29th, 1905.

* * *

THE LAND OF THE FREE.

Local Chicago newspapers tell of the strange feats performed by a detachment of police a few days ago. Two men had stolen $2,500 worth of goods from a baggage car and had loaded them in a wagon, and were discovered and chased by a detective and sergeant and two lieutenants. A description in detail of the scenes that ensued would occupy too much space, but were certainly "too funny for anything," though also they were serious to innocent bystanders. Summarized, the results of the scrimmage were as follows:

"One police lieutenant shot himself in the wrist.

"Two innocent bystanders, one a woman, were shot by police detachment, part of the woman's ear being clipped off.

"One bystander, a girl, fainted as result of the excitement.

"The police squad ran into a passing wagon and was upset 'in a body.'

"The thieves escaped."

The newspaper report reads much more like a scene one might expect to find on the comic stage than as a common everyday event in the daily life of a large city, but unfortunately it is only too true, and it demonstrates beyond any question the utter incapacity of the police to deal with the ordinary duties entrusted to their care in protecting the lives and property of peaceful, law-abiding citizens. However, when it is remembered that the whole of the municipal affairs of that great city are in the hands of a political machine, and that the men on the force are selected for reasons quite apart from their capacity or fitness, it is not difficult to see what it all leads to.

TRADE NOTES.

The commercial agent at Leeds, England, once more emphasizes the fact that all Canadian produce should be branded "Canadian." The Bristol agent also repeats his former injunction that inferior fruit is not wanted in England.

The Montreal Cotton Company advises an advance of 5 to 10 per cent. on linings, sateens, Italians, ducks, Turkey reds, muslins, etc., and gives notice also that further orders for lawns and muslins can only be accepted for December delivery.

The Dairy Commissioner of the Dominion Government, who, with a number of other agricultural experts, is visiting England to investigate the methods of export of dairy produce, writes that there is in contemplation the spending of between four and five million sterling on increased shipping and cargo accommodation at the Liverpool docks, and it is proposed to provide some extra facilities for cold storage of Canadian produce there.

The Dominion Department of Customs is sending out instructions, informing the collectors that Turkey red wheat for use as seed by bona fide farmers in Manitoba and the North-West Territories be admitted into Canada without paying customs duty until September. The duty was twelve cents. The importer must make a declaration that the wheat is imported in good faith for use wholly as seed in Manitoba this year by bona fide farmers.

Mr. Kittson, Canadian trade agent for South Africa, says there is a market for $40,000,000 worth yearly in foodstuffs in that country. It is one of the largest markets in the world, and, considering the size of the population, it is not rivalled by Great Britain as a market for foodstuffs. Britain takes £5 per head, while South Africa buys from £8 to £10 per head. Not including the importations by Delagoa Bay and Biera, there were imported last year to South Africa foodstuffs valued at £8,355,300.

The relations of the Montreal Cotton and Dominion Textile Companies still remain unsettled, though it is stated that the latter is now the largest stockholder in the smaller concern. The combination has, it is said, offered shareholders of the Montreal company 100 per cent. in 6 per cent. bonds and 37½ per cent. in 7 per cent. preferred stock. In addition, the latter would have the right to subscribe for 37½ per cent. of their holdings in common stock of the new company on the same basis as the other stockholders.

Reports from the coast are to the effect that the run of salmon continues satisfactory, and, while the catches are not exceedingly large, enough fish are being brought in to keep all the canneries going. A few humpbacks are reported in the traps on the Sound, but this it not taken to indicate an end of the run. It is not unusual for a few to come up in advance, the same as a few sockeyes precede the run which may come a month later. The traps on Vancouver Island are reported full of fish, and on the Sound there are plenty. Seiners are making good hauls, but the gill netters have not been doing quite so well.

The strong position of the cotton market is the feature in the wholesale dry goods trade this week. There has been no further general advance, although a stiffening up in some odd lines is reported. The manufacturers, however, state that present prices are not yet based on the value of the raw material, and, in fact, are quite two cents a pound below raw material prices. The mills have not been so busy for many seasons as at present. Stocks on hand are exceedingly light, and the great trouble is to give deliveries. In some instances orders are in for several months ahead. At present prices it is said that quotations are very little above what they were before the drop which took place in March. In the general dry goods business midsummer quietness prevails.

BONDS ISSUED
bearing interest at Four Per Cent. Specimen Bond, Annual Report and full particulars will be sent on receipt of address.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

The town of Chatham is considering spending about $35,000 on the enlargement of its electric light plant. This is in accordance with the recommendations of an expert from Montreal, who has gone over the property.

Mercantile Summary

Repairs to the steamer "Argyle," which ran ashore a short while ago in a fog near Whitby, Ont., have now been practically completed at the Government dry-dock at Kingston.

We regret to hear of the death of Mr. J. E. Price, superintendent of the Intercolonial Railway, at the age of 51. He entered the service of the Intercolonial in 1867 as telegraph operator and had been superintendent of the line for the last three years.

A very valuable industry in the Province of New Brunswick was destroyed last week when fire wiped out the plant of the Miller Tannin Extract Co., at Millerton, Northumberland County. The company was doing a large business, and will, of course, rebuild at once.

On the 6th inst. two fires took place in Ontario manufacturing concerns. One was at the Brant Milling Company's elevator at Brantford, which was destroyed at a loss of $7,500, partially insured. The other was at Niagara-on-the-Lake, where H. Ellison's barrel factory was gutted.

The London Pressed Stone and Concrete Company, Limited, has received an Ontario charter empowering it to acquire the business of W. G. Howlett in London, Ont., and manufacture and deal in artificial stone and all kinds of cement blocks and bricks, and to do a general contracting business. Joseph Nicholson and J. C. Judd, of London, are among the provisional directors. The capital is given at $40,000.

An interesting news item from Chicago states that lake commerce at Chicago reached the lowest ebb since boats began sailing the great lakes one day last week. There were but two arrivals in 24 hours. Six clearances made up the business of the port for the same period. These figures do not include the regular passenger liners. From being the "greatest port in the world," Chicago seems to be suffering a decline in its water commerce.

The Lancaster Syndicate, of London, Eng., have purchased the Bruce copper mines and have formed the Copper & Smelter Co., with a capital of £200,000. Arrangements are being made to put the mines in operation. They aim to mine 100 tons a day the first year and will increase the output to 400 tons. The building of a smelter is included in the project. The property is believed to be a valuable one, located on the north shore of Georgian Bay. It was discovered in 1846 and worked until 1876 by the John Taylor Co., of London. With few facilities dividends of 25 per cent. had been paid on £1,000,000 capital for several years. Then came a slump in copper, and the mines were abandoned until 1898, when the Marquis of Queensberry secured the property. He sold to the Bruce Mines Copper Co., who have in turn sold to the above named syndicate.

26 KING ST EAST, TORONTO

Mercantile Summary.

The ratepayers of Dauphin, Man., have expressed their belief in municipal ownership, and will proceed to raise money by debentures to install the same.

The Lake of the Woods Milling Company's storehouse in Montreal was on Tuesday last damaged by fire to the extent of about $150,000, covered by insurance.

A large flow of oil-gas was struck in the fields of the Egg Lake Oil Company near Edmonton. It is believed that oil will be found within a hundred feet at the most.

The Toronto Lithographing Company, Limited, has been authorized to increase its capital stock from $195,000 to $500,000, also to purchase stock in other companies carrying on a similar business.

The Starke Hardware Company's warehouse in Montreal was a few days ago damaged by fire to the extent of about $70,000, covered by insurance. The Montreal Smallware Company also lost $10,000.

From St. Flavien, Que., comes word that A. Solomonovitz, after doing a peddling business in the district for several years, settled down into a regular store business in the above named village last fall. He is now reported as arranging a compromise, settling with some creditors at 50 cents, and with others on the best terms possible. In some quarters there seems to be the impression that the arrangement is a money-making one on his part.

The following is a list of the patents recently granted to Canadian inventors in Canada: Canadian patents—L. M. Jones and J. A. Johnston, Toronto, cultivators and seeders; W. E. Brewster, Edmonton, Alberta, rotary grain separators; H. C. Organ and E. J. Carpenter, Montreal, cheese boxes; R. N. Grundy, Guelph, cooking stoves; C. A. Patriquin, Grand Pao, N.S., fruit packing devices; J. F. Ross, Toronto, cans; E. Thompson, Gamebridge, and T. A. Brown, Toronto, wrench pipe jaws; J. E. W. Currier, Ottawa, knives; P. Stoins, Montreal, fire alarms; J. Ward, Montreal, display envelopes; J. Ward, Montreal, sample envelopes; W. Ames, Toronto, apparatus for fluting columns, pilasters and the like; A. N. Sandell, Vancouver, B.C., moulds for cement building blocks; W. Hunter, Kincardine, metallic piling; F. Squires, County of Victoria, automatic safety railway crossings; C. A. Sahlstrom, Ottawa, electrical ozonizers; J. Dick, Montreal, refrigerators, J. Banon, Grey County, grates; L. M. Jones, C. McLeod, Toronto, double disk drills; H. S. Cane, Newmarket, latches for hollow wooden ware and the like; R. N. Grimly, Guelph, cooking stoves and ranges; W. C. Emerson, Guelph, gates for hay carriers; A. T. Honwood, Hamilton, clothes racks; A. Lapointe, Three Rivers, Que., washing machines; H. Dreamy, Toronto, railway rails.

AChange in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

Mercantile Summary.

A small tailoring business at Lake Megantic, Que., carried on by J. A. Metivier is reported as compromising liabilities of $1,800 at 60 per cent.

What is believed to be a very fine coal prospect is being opened up near Raymond, Alta. It is known as the Wadsworth mine. A tunnel opened 85 feet into the seam is said to show 3 feet of clean coal.

This week the International Brotherhood of Locomotive Firemen is holding its annual conference in Toronto, and about four hundred delegates have been visiting the city from all parts of Canada and the States.

The Stewart Company, Limited, Toronto, capital $100,000, has been organized with the object of taking over the bread, biscuit and confectionery business of Stewart Company and A. J. Stewart, Llewellyn J. Applegath and A. J. Stewart are provisional directors.

Great satisfaction is expressed over the fact that the great "Mullin's seam" has been "struck" at Glace Bay, after having been lost for fifty years. Its extent is said to be greater than that of any seam yet discovered and it is predicted that it will furnish millions of tons of coal.

A man named J. E. Gratton, engaged in a small plumbing way in St. Henri Suburbs, Montreal, has made an assignment, owing about $2,000. He was formerly a journeyman and started for himself in 1902.——J. R. Durand, in the same line of business at Berthierville, Que., is also reported insolvent, owing about $2,500.

Several weeks ago a disastrous fire destroyed the sawmill and lumber piles of Luc Pelletier, also doing a store business at Riviere Jaune, Que. He is reported as having practically no insurance, and he has been obliged to assign. His liabilities are said to aggregate $30,600, while his apparent assets are only about $9,500.

Several months ago we noted the embarrassment of W. B. Arthur & Co., wholesale hardware merchants, of Halifax, N.S., and the subsequent arranging of a compromise at 45 per cent. They have been unable to provide for the first instalment of the settlement, and their affairs have been put into the hands of a trust company for liquidation.

For merely a grocery clerk, Zenon Brunet, of Montreal, was assisted to start in business on his own account by his father in 1902. His estate is now in the hands of an assignee.——Henri Picard, of Montreal, also in the grocery line, but in a somewhat larger way, has also assigned. He is said to owe from $10,000 to $12,000, his wife and father figuring as the largest creditors.——Joseph O'Dowd, grocer, Montreal, lately reported insolvent, has made a proposition to pay his creditors 35 cents on the dollar.

Post Office ddress. — — Port Arthur, Ont.

Mercantile Summary.

About a year ago W. J. Jackson bought out the baking business of A. McDougall, for whom he formerly worked at Finch, Ont He has already assigned to O. Fulton.——D. A. Baker, who opened in the tinsmithing line at Hawkesbury, Ont., in the spring of 1903, coming from Brandon, Man., is reported insolvent.

The record was broken by the tonnage of vessels passing through the Soo canals last month. The total was 6,705,760, over a million tons more than a year ago in July. The total so far this year is nearly twenty million tons, nearly twice as great as up to this time in 1904. There were 838 passages through the Canadian canal, with a tonnage of 830,017.

The Niagara-Toronto electric transmission line is almost complete, and the staff that has been engaged in its construction will be available for work on extensions. Surveyors are out locating the line for the first western extension, which will be to London, taking in Brantford, Paris, Woodstock, Ingersoll, and the intervening points. Probably the first additional extensions will take in Galt, Preston, Hespeler, Berlin, Waterloo, Guelph, and contiguous municipalities. The company are developing 125,000 horse-power.

The Imperial Steel and Wire Co., Limited, Collingwood, intends to enlarge its plant during the present summer, bringing its capacity up to 50 tons of wire per day. The building will consist of a fence mill, 60 x 200 feet, two stories; galvanizing building, 40 x 250 feet, and warehouse, 100 x 200 feet. The additional machines to be installed will consist of a 250 horse-power water tube boiler and a compound condensing engine of 150 horse-power, to drive a 100 k.w. generator. The expenditure on the additional plant it is said will run close to $100,000.

Mr. Thos. A. Edison, the great inventor, seems to have an optimistic opinion concerning the Sudbury region. In a recent interview he is reported to have delivered himself as follows:—"It's headquarters there for nickel and cobalt. The nickel trust has the whole nickel region up there, or so they think. I think I know where I can get some more," and he drew a rough plan of the nickel region, and indicated another district northeast of it. There's a body of magnetic ore there. It may be iron or it may be nickel—nickel is magnetic. The electric indicator showed where it was, right enough. But the geologists say we must go down 2,000 feet. I put twenty thousand dollars into that country. I'll put twenty thousand more, too. I think I know where I can get nickel. We'll use a lot of it in the storage battery. I have 14,000 cells working now, and I just want to see what they will do for a year before I go any farther. They are doing all right, and I guess we'll need the nickel."

Mercantile Summary.

In the month of June the Tyee smelter ran thirteen days and smelted—Tyee ore, 1,988 tons; customs ore, 294 tons; total 2,282 tons. Matte produced from same, 267 tons. Gross value of contents (copper, silver and gold) after deducting costs of refining and purchase of customs ore, $30,950.

The main building of the Carritte, Paterson Manufacturing Company's factory on the outskirts of the city of Halifax was destroyed by fire on Friday. The fire started in the boiling department and rapidly spread over the whole place. The factory is beyond the city water service, and the Intercolonial Railway track made it impossible to get the fire engines within the reach of the harbor.

Last week a clash occurred between a crew of the St. John Lumber Company and one working for a Bangor, Me., firm and serious trouble again is feared. The St. John crew, it is said, went to the locks which dam the foot of Chamberlain Lake and attempted to raise the gates. The locks are controlled by the Bangor company. The attendant in charge claims that the St. John crew used violence. The St. John people want the water running to clean up their drives, while the Bangor firm wishes to hold it back for power purposes.

The Temiskaming Railway Commission announces that the line will soon be located to its proposed junction with the Grand Trunk Pacific, a distance of about 275 miles. The finest timber land has been found as well as an extensive clay belt, and the engineering difficulties are reported to be not difficult. By next year 200 miles of road it is expected will have been completed. About 113 are now being operated by the commission. Traffic in the completed section had exceeded the most optimistic calculations of the commissioners. Tourist travel has also been large.

* * *

A ROUGH SECTION OF BRITISH COLUMBIA.

A comparatively well-known part of British Columbia, that is, that portion of the province lying between Morricetown and Fraser Lake is thus described by Mr. W. W. Clarke, of Vancouver, who was there some little while ago. Through this region, he says, a distance of about a hundred miles, there is an immense amount of good agricultural land. Open, prairie-like spots, where the fire has burnt out the timber, are frequent, with grass growing from three to five feet high, mingled with pea-vine. Berries of all kinds are most prolific, including raspberries, strawberries, wild cherries and gooseberries. Patches of a small kind of sage-brush are to be seen here and there, and acres upon acres of wild roses and other flowers. On some of these open prairies, strawberries grow so plentifully that the horses

trampling through them get stained with the juice right above the fetlocks. Cottonwood, poplar, small spruce and birch is the principal timber, in quantities sufficient for all purposes, but not for exportation. There is an almost endless chain of lakes, abounding in fish and fowl. Sturgeon exist in the largest lakes like Babine. Coal of a good quality has been found outcropping in several places. The land can easily be cleared; in fact, fire alone would do it in most places. There are light summer frosts; a bucket of water left standing over night will sometimes have a slight coating of ice even in July, but the clearing of the timber and settling up would probably remedy that. There is ample feed on the side-hills and benches for stock, and the snowfall does not exceed fifteen or eighteen inches, thawing at times with the warm winds that prevail. It is scarcely the country to recommend a poor man to go into, as at present the cost of supplies would be too great, and it would be years before he could reckon on any returns from his labor. It would require a capital of at least five thousand dollars to make an assured success, and even then there would be hardships to go go through such as fall to the lot of every pioneer in uncivilized and unsettled places. Among the least of those hardships to be reckoned with would be the torment caused by the clouds of flies and mosquitoes, of which there is every conceivable variety, and it is impossible to over-estimate the positive suffering caused by these pests, from which there is apparently no immunity. The Indians are on the whole quiet and peaceable, and willing to work, some of them taking quite a pride in their gardens. What few cattle and horses they possess manage to exist through the winter with very little attention.

With the exception of the surveyed portion of the Bulkley and Nechaco Valleys very little is known of the surrounding country. There is not a reliable map in existence that shows anywhere near the number of lakes and valleys that exist in that section. The advent of a railway will change much of this, and a great deal of what is now only guess work will become absolute knowledge. A stranger coming through British Columbia over the line of the Canadian Pacific Railway and gazing from the car window, would not be very deeply impressed with the agricultural possibilities of this country. The future wealth and prospects of British Columbia lie in the great valleys to the north, and a trip over the old Telegraph Trail from Hazelton to Quesnel, will convince anyone of this. At present the travelling is hard and difficult, but the day is coming when it will be possible to make the journey comfortably seated in a Pullman car, The spring of the year is the best time to go, and the most expeditious route is by steamer from Port Essington to Hazelton.

UNITED STATES FINANCE.

Henry Clews & Co., New York, in their circular dated August 5th, say: The light floating supply of stocks continues the dominant feature of the financial situation. Professional traders have during the week made a number of concerted demonstrations against the market, but have met indifferent success; and indications are not wanting of further progress towards a period of inflation in stock exchange securities out of all proportion to immediate or prospective returns on investments. There have been, it is true, since the beginning of the year, important and numerous advances in dividend rates; but with prices 20 to 25 points higher than a year ago these increased distributions may be regarded, to a very liberal degree at least, as already largely discounted by the higher quotations now ruling. It is significant that quotations to-day are well up to the highest average since the great revival which accompanied the election of McKinley and the defeat of fiat money in 1896. In June, 1896, the average quotation of twelve leading industrials was 38. To-day the average quotation of the same stocks is about 81, which is the highest average ever reached, notwithstanding the great upward movements of 1899, 1901, and 1902. The nearest approaches to the present average price of these industrials were 77 in September, 1899, 78 in June, 1901, and 73 in December, 1904. And prices of prominent railway stocks make an even more striking display, the average of twenty representative stocks in June, 1896, being 52, while to-day it is above 125—an average that has been but once exceeded, namely, by that of 129 during the memorable times in the autumn of 1902, and from which there was a gradual recession to about 89 during the reactionary year of 1903. The fact should not be overlooked, therefore, that as far as the price gauge is concerned the market is to-day at the highest point for many years. It has not, however, reached this eminence as a result of wild, senseless speculation, but has crept gradually upward, reflecting general prosperity and discounting future prosperity. As already noted, the standard investment stocks are becoming so closely held they are practically out of the market as speculative securities, and this in turn is encouraging trading in the lower-priced class of securities in which industrials figure prominently. The high prices naturally invite caution in making purchases and suggest the wisdom of profit-making on any further substantial advances and the advisability of quick turns during the irregular movements promised for the next few weeks.

Aside from high prices and the possibility of the money situation becoming so active as to constitute an adverse factor, the immediate situation, both from a financial and trade and an industrial and agricultural standpoint, remains distinctly favorable. Railroad earnings are fully maintaining their recent records, and bank clearings, not alone at New York, but throughout the country, are making new records monthly. And our foreign commerce is keeping peace with our internal trade.

THE INFERENCE IS OBVIOUS

Of the $180,653,915 of Life Insurance in force throughout the whole of Canada on Dec. 31st, 1904, no less than $20,611,399 was held in the Great-West Life Assurance Company. The figure now stands at over $22,500,000.

Low rates of premium, high profits to Policy-holders, and liberal treatment account for this high ratio.

MONTREAL MARKETS.

August 9th, 1905.

Ashes.—The volume of business doing is small, and there is little change in the market. From $5.00 to $5.10 is still about the quotation for first quality of pots; seconds, $4.50 to $4.55. Few pearls are offering, and from $7.00 to $7.25 could probably be readily realized for these.

Dairy Products.—The high prices of cheese have not been maintained, present quotations being about ⅝c. lower than a week ago. Present quotations are firm, 10⅞ to 11c. for fine Westerns, and 10½ to 10⅝c for fine Quebec's. Butter values have also fallen off to about the same proportion, 22¼c. being now about the outside figure for choice creamery. The shipments of cheese last week, 78,112 boxes have been considerably less than in the preceding week, but were nevertheless some 9,000 boxes ahead of the same week a year ago. The totai shipments for the season to date are 953,948 boxes, as compared with 813,629 boxes at this time a year ago. Exports of butter last week were fairly large, aggregating 34,806 packages, and the total to date is some 90,000 packages ahead of last year.

Hides.—There are comparatively few hides offering, and the recent advance is fully maintained, dealers readily paying 11c. for No. 1. Lamb skins are also firm at the quotation of 60c., as established last week.

Oils, Paints and Glass.—Trading in these lines is still of a rather quiet character, but a fair demand of activity is looked for towards the end of the month. Supplies of glass are coming forward quite slowly, and spot stocks are in pretty narrow compass. Turpentine is fairly steady at 88c.; linseed oil, 49 and 52c. for raw and boiled respectively, though some claim to be getting 53c. for boiled in small lots. Fish oils are very much neglected. Pure white lead is quoted at $5.25, and putty in bulk at $1.40.

Dry Goods.—A good many travellers are now on vacation, so that business is of a comparatively quiet character at the moment. Four months payments, 1st April due on the 4th inst., were generally well met, one leading house reporting 83½ per cent. of its customers' paper as being taken up. The Montreal Cotton Co. has advertised an advance of from 5 to 10 per cent. in its make of linings, sateens, Italians, ducks, Turkey reds, muslins, etc., and gives notice that further orders for lawns, muslins, etc., can only be accepted for December delivery. A couple of Belfast linen men have been in the city the past week quoting generally firmer prices, and report that quotations are bound to advance owing to the short supplies of Russian flax. In woolen goods those fabrics, into the composition of which merino and fine cross-bred largely enter, show a tendency to further advance.

Groceries.—The demand for sugars is particularly active, and both the refineries are said to be practically sold out of reserve stock, though the St. Lawrence Sugar Refining Co. had some 40,000 barrels in store a few weeks ago. Quotations are steady at $5.00 for standard granulated in barrels; yellows

Sale of Assets of the Oshawa Wire Fence Company, Limited.

Tenders will be received up to noon of the 30th day of August next, addressed to the undersigned for the purchase of the following assets of the above named Company:—

Parcel No. 1.—Real Estate, including Three Story Brick Factory, having railway siding and centrally located in one of the best manufacturing towns in Canada.

Parcel No. 2.—Patent Rights, Fixed and Movable Machinery, Tools and Office Furniture.

Parcel No. 3.—Partially Manufactured Goods and Raw Material.

No tender necessarily accepted. This offers an excellent opportunity for a profitable investment in a steadily increasing business. Lack of capital the only reason for selling.

Further particulars, terms and conditions of sale, with full description of the several parcels, will be mailed on application, or may be inspected at the Company's Office.

L. K. MURTON,
Secretary of said Company, Oshawa.
Oshawa, July 22nd, 1905.

INSTITUTE OF ACTUARIES,
STAPLE INN HALL, LONDON.

COLONIAL EXAMINATIONS.

NOTICE IS HEREBY GIVEN :—

1. That the Annual Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa, Winnipeg, and Cape Town, on 20, 21, 23 and 24 April, 19 6.
2. That the respective Local Examiners will fix the hours of the Examinations, and inform the Candidates thereof, and of the address at which they will be held.
3. That Candidates must give notice in writing to the Honorary Secretaries in London (England), and pay the prescribed fee of one guinea, not later than 31st January, 1906.
4. That Candidates must pay their current annual subscriptions prior to 31st December, 1905.

(By order) GEO. TODD, S. G. WARNER, } Hon. Secs.

T. BRADSHAW, F.I.A.,
Supervisor in Toronto.

range from $4.50 upwards. Molasses, if anything, tends to easiness; a round order was placed yesterday at 32½c. From Denia crop prospects for Valencia raisins are reported as continuing favorable, and fine off-stock of best brands are quoted at 28s. for first shipments. Fine new Filiatra currants are expected to quote at 17s. 6d. to 18s., opening prices; old are quoted at 2s. less. Crop prospects for Sultanas are promising.

Leather.—Market conditions in this line continue quite as strong as outlined in our late reports, and the general advance in all lines has checked demand for the moment. A meeting of black leather tanners was held in Toronto on the 4th inst., at which it was agreed to put quotations 10 per cent. higher, and some modification of terms was also decided on.

Metals and Hardware.—Foundrymen all seem fairly busy, but there does not seem to be much doing in pig; prices, however, are steady on the basis of $18.75 to $19.00 for No. 1 Summerlee. Bars are steady at $1.75 to $1.80, and no change is reported in cast or bar steel; wire nails are easy at $2.00 to $2.05. Canada plates continue to be quoted at $2.35 for fifty-twos, and black sheets at $2.15 for 28 gauge; tinplates, $3.65 for cokes, and $3.90 for charcoals of standard make; galvanized sheets, $4.15 to $4.25; Ternes, $6.50. Ingot tin remains very firm at 36c.; copper, 16½c.; antimony is even firmer at 14½c.; lead, $3.75; spelter, $6.25 to $6.50.

⁂

TORONTO MARKETS.

Toronto, August 10th, 1905.

Chemicals, Drugs, Etc.—Locally little change has occurred in the drug market. Prices continue steady, and the staples are in fair to moderate request. Carbolic acid and camphor are less firm than they were. A report from Manchester says that July, all things considered, was by no means a disappointing month. There was a fair business, both for home consumption and export, for the time of the year. Values in general continue steady, and there will be considerable inducement to consumers to buy freely when they come to arrange for supplies for next year, as some articles are now very cheap and may advance readily against even moderate enquiry. Already there is some enquiry for next year, but little business has been done as yet. Heavy alkalies have a moderate demand. Bleaching powder is unchanged on spot, and the price for next year's contracts has been fixed at 5s. per ton advance on this year's figure. Caustic soda is without change. Chlorates of potash and soda are firm.

Dry Goods.—There is a midsummer lull in the wholesale general dry goods trade. Travellers are away on their holidays and little real business is being done. However, the tone of the market is quite firm and it is a well realized fact that retailers must be prepared to pay full prices for everything in the way of cottons, woolens and linens. The price of raw cotton continues to fluctuate, but it is quite strong. Payments have been good.

Flour and Grain.—Ontario spring wheat has gone down a cent or two. The quality of a few first cuttings is said to be markedly good. Manitoba wheat is a shade firmer. In flour, business is fair, ninety per cent. patents sell around $3.30 in buyers' bags, east or western freights. There is a good export demand, for bran shorts are in active demand. Peas are scarce and wanted.

Hides and Leather.—Both these commodities keep up well with the advances that have been made during the last two weeks. The market is good.

Fruit and Vegetables.—Heavy receipts of fruits and vegetables have come into the local market this week. Raspberries keep pretty steady as do Lawton berries. Tomatoes are easier. We quote:—Cherries, sweet, basket, 85c. to to $1.25; Raspberries, 6 to 7½c.; Lawton, 8 to 10c.; red currants, basket, 60

THE HUGH C. MACLEAN CO., Ltd,
Winnipeg, Vancouver

Established 1882
THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

tendency is very firm, but it is believed that country dealers paid too high for the parcels in their hands.

* * *

A St. John's Newfoundland despatch says the laundry building and plant owned by M. B. Vail have been completely destroyed by fire. The loss is $25,000, insurance $5,000.

The returns of homestead entries in Canada for the month of July show an increase of 701 over July, 1904. The entries for the past month were 3,572 against 3,019 for July, last year. The largest increase was at Regina, where the number rose from 743 to 1,110. Battleford came next, with 622, against 277, July, 1904.

The Princess Royal Gold Mining Company, Limited, has been registered at Somerset House, London, with a capital of £500,000. Its objects are to acquire from the Princess Royal Gold Mines, Limited, certain mineral areas, to adopt an agreement with the said company and the Hon. W. Pugsley, and to carry on, in British Columbia or elsewhere, the business of miners, prospectors, metallurgists, refiners and dressers of and dealers in ores and minerals, etc. The company will acquire the Princess Royal mines in Northern British Columbia, in which Premier Tweedie of New Brunswick, Attorney-General Pugsley and several other prominent New Brunswickers are interested.

The contract for the double tracking of the Canadian Pacific from Fort William to Winnipeg, which has been awarded to Foley Bros., is attracting considerable attention. The obstacles attending the duplicating of 427 miles of track with 80-lb. rails from Lake Superior to the capital of Manitoba are due first to the exceedingly difficult character of about a quarter of the work, and, second, to the fact that any delays or obstruction to the vast volume of traffic passing over this particular section of the C. P. R. will have to be avoided in the carrying out of the contract. The importance of the change will be better understood by the official statement that no less than 50 per cent. will be added to the hauling power of every locomotive on that section of the road.

At a meeting of the Dominion Cabinet on the 4th, plans of the Grand Trunk Pacific for the location of their road from Portage la Prairie, 275 miles westward, were approved. From Portage la Prairie the railroad will almost parallel the main line of the Canadian Pacific to a point a little west of MacGregor, and then proceed in a straight line west to the Assiniboine River. The line runs about half-way between the Manitoba & Northwestern and the Canadian Pacific main line for some distance west of MacGregor. It is located between twelve and fourteen miles north of Brandon and a little south of Rapid City. There will be a spur line into Brandon. It will cross the Arrow River about Crandell, then run west up to the Assiniboine River near Crowe. From Crowe it runs due west to township 26, range 13, and crosses the second meridian a little north of Sumner.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391 per day in number of Claims Paid.
6,561 per day in number of Policies Issued.
$1,426,700.50 per day in New Insurance Written.
$114,060.67 per day in Payments to Policy-holders and addition to Reserve
$73,326.8 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madiscn Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00.

Equal to *190 Tons of Pure Gold.*

ROBERT HAMPSON & SON, Montreal,
GENERAL AGENTS FOR CANADA.

The Northern Life
ASSURANCE CO.

Closed the half year showing over 25% more insurance issued than the same period last year.

Its policies just meet the wants of the people and are easily sold.

A few good producing agents can secure liberal contracts in desirable territory.

Head Office, — LONDON, Ont.

JOHN MILNE, - Managing Director.

THE RECORD OF THE
NORTH AMERICAN LIFE
for 1904

shows that large gains have been made in the amount of policies issued, insurance in force, income, payments to policyholders, etc.

Policies Issued $6,484,425
An increase over 1903 of $645,535
Insurance in force $35,629,988
An increase of $3,004,895
Income................$1,504,063
An increase over 1903 of $122,700
Payments to Policyholders $561,136
An increase over 1903 of $137,918

The financial position of the Company is unexcelled. A good Company, both for the policyholder and agent. Applications invited for agencies in unrepresented districts.

Home Office, - TORONTO, Ont.

ROYAL-VICTORIA
LIFE INSURANCE COMPANY,

Head Office Montreal.

Government Deposit,	**$ 250,000.00**
Capital and Assets, Dec. 31st, 1904	**1,244,436.76**

Good opportunities for productive Agents in Nova Scotia, North-West Territories and British Columbia. — Liberal Terms and large territory to men who can write a satisfactory business.

APPLY TO
DAVID BURKE, A.I.A., F.S.S.,
Montreal, June 1, 1905. General Manager.

PROTECTION
is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

MONEY AND THE CROP MOVEMENT.

Perhaps the most prominent factor in the country's financial condition each year is the western crop movement, now rapidly approaching. At present money is easy, particularly so when the nearness of the above movement is considered. But it is bound to become tighter within the next month. When it is considered that the requirements for North-West crop purposes alone are estimated to be in the neighborhood of $75,000,000, and, unless some great catastrophe happens, are sure to exceed $50,000,000, it will be realized what a strain on our banking resources is involved, or rather would be involved were it not for the admirably elastic system under which they are worked.

It is calculated that with an early harvesting fully one-half of the crop is generally marketed and shipped to the Great Lakes before the close of navigation, and this year, with the improvement of transportation facilities, there should be even less difficulty in doing this than usual. On the other hand, this year the harvesting is inclined to be late.

The crop movement is of great importance, not only directly to the banks, but to the country storekeepers in the West, who have then the handling of what amounts in the aggregate to a vast sum of money. These merchants in many cases act as agents for the large milling companies, and by that means often have it in their power to collect an over-due debt or to sell a line of goods to a new customer.

Never before, perhaps, have the prospects for the western crops at this period looked brighter than they do at present. Without doubt the area is larger than ever before, while all the probabilities point to a yield which will approach very nearly to a record. That is, of course, unless something very unforeseen happens. The only chance in this direction, so far as human eye can see, lies in early frost, with which enemy in some sections the agriculturist always has to race.

That the chances of disaster, however, are looked upon as only of the slimmest may be seen from the course of trade. Already the buoyancy in all branches is making itself felt; and the good prospects for the West, as well as the very good prices for Ontario's produce, seem to assure good times for at least another year.

⁂

THE BANK MONEY ORDER BUSINESS.

The latest move of the Canadian banks, by which they aim at capturing from the Post-office and from the express companies the bulk of the business of remitting small sums, may have important consequences. The transmission of sums amounting to $50 and over has always been, and is still, largely in the hands of the banks; they also have nearly the whole of the business of transmitting sums over $100, which is done by sending through the mail drafts drawn by the banks themselves or cheques drawn on the banks by their customers. Besides the use of bank drafts and cheques there is another method by which large amounts are annually transferred. It is through the drawing of drafts by manufacturers, wholesalers, and others in certain cities and towns upon their debtors domiciled in other places. Probably the great bulk of the money transfers are made in this last-mentioned way. As the banks are, when transacting this business, exercising one of their principal functions, and as their machinery is peculiarly adapted to its efficient handling, they have never had occasion to fear that outside parties would be able to invade the field. This section of the remittance business is so closely connected with the business of making loans and advances that the express companies never could and never can offer facilities equal to what the banks can give.

But, until a few years ago, bankers affected to make light of the small remittance business. They were very glad to sell drafts for three dollars, five, or ten, but they insisted on charging their minimum of fifteen cents on each item. Similarly they gladly cashed small cheques drawn on other places, or received them on deposit, charging the same minimum commission. It was not until they noticed in the deposits of their customers ever-increasing numbers of express money orders that they decided to inaugurate the bankers' money order system, and started to sell small drafts at the three, five, and ten cent rates. It is questionable, however, if the business was pushed as it might have been. It is certain that some of the banks were lukewarm. Less than a year ago the writer had occasion to ask for a couple of small drafts at a leading office of an important bank. The Bankers' Association cards announcing the rates at which "bank money orders" would be sold were displayed at the teller's wickets. But when the requisition for the money orders was handed in the clerk hummed and hawed. Asked if the bank did not make a regular business of issuing the orders, he replied: "Oh, if you insist upon it we will give you them, but we much prefer to issue the ordinary drafts." For the ordinary drafts the bank charged, of course, its minimum of fifteen cents. Perhaps others among the important banks handled the matter with about the same measure of enthusiasm. If so, it was to be expected that the remittance business of the Post-office and of the express companies would show rapid increases. Evidently the bankers have been stirred to more energetic action. Their course in reducing the commission for cashing cheques drawn on other points to the same prices as they charge for issuing drafts makes their position sounder and more logical. It would be difficult to convince a bank customer in Toronto, for instance, that it was quite logical for him to pay fifteen cents' commission when depositing a cheque for $5 drawn on Montreal, while he only had to pay three cents for a $5 money order drawn on any distant, out-of-the-way Canadian town.

There are two classes of people who together probably constitute the bulk of the Post-office and express office business. One is composed of what are called occasional customers, people who have no bank accounts, foreign laborers, and the like; the second is of business houses in the cities and towns, a great many of which go to the express office and buy twenty, fifty, and sometimes more orders at one time. The former of these classes can only be won by the banks, if they can be won at all, gradually and slowly. Many of them, in their ignorance, are afraid of the great banking offices with their bewildering appointments. They have got to learn that they can go into a bank and receive courteous and helpful treatment at all times; if they don't understand how to make out slips, etc., that the clerks will make the slips out for them; that they will not be obliged to wait an unnecessarily long time while their drafts are being signed by some higher official who is "busy."

One of the important features about the success of the express order and Post-office order business is the fact that one clerk, the one to whom the money is paid, transacts the whole business. There is no delay through getting the counter signature customary with the banks. With regard to the other class of remitters, the business men, the reduction in the rates for cashing cheques on outside points should bring them to the banks almost in a body. Everybody knows that business men prefer to pay their accounts and bills by issuing their own cheques. No better receipt can be had than a creditor's endorsement on a paid cheque. Now that there has been prepared a regular schedule of rates at which small cheques will be cashed at every town in Canada it is to be expected that the great majority of those who have bank accounts will settle their small accounts due in other towns by sending cheques instead of by buying orders. The country's cheque circulation should increase. If the banks get less commission on each cheque there will be a great many more cheques yielding commission at the lower rate. An account at a bank will have more value. No doubt the banks will continue, as they have been doing, to appraise each account they have in their ledgers; and any customer who uses his privilege of drawing cheques in such a manner as to entail special expense on the bank in the way of labor and stationery will be obliged to recompense it either by maintaining a suitable free balance or by paying a straight commission to cover. In the United States, where the best practice prevails, the national banks do not charge their regular customers any commissions at all on outside cheques; occasional customers only are charged, and they make it up by not allowing any interest on deposits of any kind.

* * *

THE ENGLISH JOINT STOCK SYSTEM.

The Canadian system of registration for joint stock companies being based in several particulars upon that employed in Great Britain, it is of interest to look briefly into the working of the latter and to see how it meets, or fails to meet, the requirements. Recently the British Board of Trade created a new office called the New Companies Department, and the comptroller, Mr. G. Stapylton Barnes, who is at the head of this department, issued his first report last week. It shows in a very pointed manner how the joint stock company system has been abused. The proportion of companies not issuing a prospectus is constantly increasing, and, indeed, has done so to a very marked extent since the passage of the Act in 1901 which made it compulsory for promoters and directors issuing a prospectus to disclose sundry material particulars concerning the promotion. In 1901, the proportion of companies registered which issued no prospectus was 86 per cent. In 1902 this proportion rose to 89 per cent., while last year it was over 91 per cent., the capital of the non-prospectus companies representing £69,280,000 out of a total of £83,914,688. It may be explained that in ordinary usage the difference between a prospectus company and a non-prospectus company is the dividing line between a private and a public company. In practice, however, we believe, it is found that this is only a very rough-and-ready classification, for even though a company makes no appeal to the public for subscriptions, it can hardly be considered of a "private" character if subsequently its shares are introduced on the Stock Exchange and a market created for its shares there.

There can be little doubt that this rise of the prospectusless company is due to the desire of English promoters, like many of their class in this country, to escape publicity, or, in other words, to evade the safeguards created by the Government in the interests of investors. In this connection we note that it is intimated in an introduction to Mr. Barnes's report that the attention of the committee has been specially directed to three questions which appeared to the board to be urgent and important. The first is that of prospectusless companies; the second, the registration outside England of companies carrying on business there and appealing to English investors; the third, the extension of the provisions of the Act of 1900 with regard to the registration of mortgages and charges to include all mortgages, and not merely those created since January 1, 1900. The terms of the reference are wide enough to prevent the exclusion of any subject which any member may desire to bring forward, and the idea of the Board of Trade is that the Department shall consider by what means joint-stock enterprise can best be fostered and encouraged, as well as the means by which illegitimate practices may be most effectively repressed.

We notice another thing in connection with the British Board of Trade which is far from being without interest to Canadians, who suffer from more or less similar laxity of the law. We refer to the appointment of a committee to enquire into the operations of companies (not life insurance companies) which collect periodical payments from the industrial classes in return for benefits promised in the future. These concerns, being registered under the Companies Acts, are free from the restrictions imposed on life assurance companies and on companies registered under the Industrial and Friendly Societies Acts, and the facts show it is time for some investigation into their workings. In certain cases companies with a fairly substantial nominal capital, but with very slender cash resources, are issuing "bonds" payable by instalments over a series of years, and promising at the termination of the period in question to return to the holder an abnormally large sum, in addition to the amount he has actually contributed, one of the conditions, however, being that if the payments are discontinued, the "bond" shall be forfeited. The operations of these concerns are carried on among a class of people who, while having no money to lose, are almost entirely ignorant of financial matters, and it is, therefore, desirable that the Government should take some measures to protect them.

* * *

MAYOR URQUHART'S IGNIS FATUUS.

It is a surprising thing that a man of the ability of Mr. Urquhart, holding as he does such an important office as the mayoralty of a great city, should be led into the making of strictures on a business he does not understand. Yet his recent complaints as to the high insurance rates on residences in Toronto signify this to be the case. In the first place, they are not high. That is to say, they are not greater than those prevailing in the generality of cities of Toronto's class, and, compared with a good many, they are materially lower.

But this is not all. The underwriters have actually promised to reduce the rates to an even lower level—by twenty per cent.—just so soon as the improvements in water service, which the citizens of Toronto have already expressed their desire to see inaugurated, shall have been completed. Why does not the city, why does not Mayor Urquhart see these improvements immediately carried through? It is over a year since they were decided on; yet what has been done so far? Herein lies a much easier way to the gaining of the mayor's desire for cheaper rates than by a mere scolding of the companies for charging the reasonable fees which alone allow them to live.

As to his suggestion for a municipal system of insurance, it is strange, indeed, that in the light of past experience of other cities that have tried it to their cost, a man of Mr. Urquhart's calibre should dream of allowing such a proposition to pass his lips, even *though* he does not pretend to any close knowledge of insurance. Let us take a suppositive case, and ask a practical question. If, for example, the fire insurance in force on Toronto dwelling houses reaches the sum of about $50,000,000, the premiums payable at the present alleged enormous rates enforced by the companies would be in the neighborhood of $100,000 per year. Now, there is not the slightest chance of his suggestion ever being carried out, but for curiosity sake we will carry forward our illustration, and ask, What sort of a reserve fund will there be at the command of the city even at these rates? And these are the rates which are so high! Mayor Urquhart probably does not realize that it is not only the big panoramic fires which eat into a company's profits, but the infinite number of small claims, which in the aggregate mean a large outlay.

It is not claimed that the dwelling-house class of risk has lost money for the companies. It *is* a fact, however, that, taking the last twenty years and all classes of risks into consideration, they have come out behind in their balance. It is hardly to be expected that the companies should still further reduce rates on what is practically the only class of risk on which they have not lost money.

* * *

THE STAPLE TEXTILES.

The firmness in the woolen trade continues; indeed, since the marketing of the new clip it may be said to have become even more accentuated. A sign which shows how the wind lies is in the fact that American manufacturers already this year have from various sources imported approximately 60 per cent. more wool than was the case at this date last year. One result of the high prices is the advance by Canadian manufacturers of blankets of 2½ cents per pound, and they claim there is a likelihood of a further rise of 5 cents. This in the face of a 50 or 60 per cent. rise in raw material is not to be wondered at.

Speaking of the large American importation of wool, it has drawn particular attention to itself in recent weeks in Bradford. To such an extent has that raw material of Bradford's chief industry been purchased by agents of manufacturers in the United States that the idea has been held by many that an attempt was in progress to "corner" the market. During the year it is stated that no less a quantity than 600,000 pounds has been shipped for American account from that one district. This is notwithstanding the extremely high prices and the fact that this year's English clip has been an unusually heavy one. Some English authorities believe that the United States buyers, having gauged the situation and come to the conclusion that wool prices were bound to go even higher, were actuated by a desire to force them speculatively and then re-ship the wool back to Bradford. This forecast, however, is hardly borne out by the experience at recent London wool sales.

All this goes to show what a strong property wool is likely to be during the next few months, not only across the line and in England, but in Canada, and how unlikely it is that there will be any radical decline in the prices of materials in this country made from wool.

Almost equally strong is the position of cotton goods. The last crop report—if such reports are to be trusted at all—points to a deterioration of prospects for the current crop, but even apart from this consideration, it seems to be a proven fact that even if the raw material were to drop several points, it would not make any real difference to the position of finished goods, which are considerably lower already than they should be. All tendencies are towards a still higher market. It should be remembered that the war and the pending peace proposals have an important bearing on the cotton market. Should China become further involved, it may result in a falling off of the demand from that quarter, which, however, would be more or less counterbalanced by the probable closing of several Lancashire mills.

Wholesalers in Toronto and Montreal still report fairly brisk demand for textiles, bearing in mind that the dog days of August are never very busy ones for their trade. They express themselves, however, as a general rule, as being well satisfied with the total business done this season. The demand from the North-West has been somewhat disappointing, due, perhaps, not only to the tying up of funds in real estate, but to the fact that optimistic merchants there last year put in stocks that were over-large for their requirements. Greater care will most likely this year be exercised in the filling of orders, and in some cases they are likely to be perceptibly cut down in the filling.

* * *

LIFE INSURANCE INVESTMENTS.

Since the disclosures were made concerning some life insurance methods all sorts of plans have naturally enough been promulgated for the prevention of similar abuses of official power. Some of these proposals are very well in their way, but others are evidently based on an imperfect understanding of the business under discussion and of the problems to be solved. A solution which appeals to many critics is the confining of the investments of life insurance companies to such as are permitted to savings banks.

To this procedure there appear to us to be many objections. It is true that between a savings bank and an insurance company there are certain points of analogy. Both receive the money of their clients for safe investment, and hold such funds for repayment with moderate additions of interest. On the other hand, there are a great many differences between the two forms of institution. A savings bank from the nature of the case has to have its securities placed in such a manner as to be realizable at very short notice, the absence of which precaution might precipitate a "run" of a serious nature. With an insurance company, on the contrary, this does not apply, the nature of its contract with insured precluding call for repayment before a set term has expired, except under certain contingencies, which, on the average, can be provided for to a day. Again, a savings bank is generally confined in its operations to a given restricted locality, whereas under ordinary conditions an insurance company finds it to its best interests to cover a very wide field.

It is difficult to see why or how the two classes of investments should be placed on the same footing when they differ so essentially in many important details. It is difficult, however, to draw a clear line between them which, while it does not preclude a rationally wide discretion on the part of honest management, shall at the same time keep the business along lines which shall retain the confidence of the public to its fullest extent. We believe, nevertheless, that such a line can be drawn, and, therefore, reprint an extract from an article in the Journal of Commerce, which, as it appears to us, gives a clearer, saner view of the problem than in these days is often met with:

"It does not follow," says our New York contemporary, "that there should be no restraint upon life insurance investments. There may be a regulation of exclusion, if not of inclusion. The funds should not be put into the capital of subsidiary corporations, or used in promoting or exploiting corporate schemes, industrial or otherwise. It is doubtful if they should be put into corporate stocks at all, for the fluctuation of these cannot be calculated upon beforehand within safe limits. The proportion invested in real estate should be restricted, and there should be a safe limit to mortgages taken upon such property. Loaning upon collateral security is a questionable practice for life insurance companies. There is certainly too much latitude now, and no sufficiently definite lines to which the companies may be held by official supervision. The freedom with which the funds may be employed has been the chief incentive to efforts and expenditures for an increase of business of individual companies far beyond what is desirable, and the main source of the temptations and abuses that have been lately disclosed. But the savings standard is not one that can be applied to life insurance."

As a matter of fact the management of Canadian life insurance companies has been distinctly conservative in this respect, and has to a large degree followed the lines laid down above. The following figures will be of interest to our readers in this connection, as they show the class of investments favored by the Canadian companies:

Class of Assets.	Amount Invested.	Percentage of Total Assets.
Real Estate	$ 4,970,708.33	5.4
Loans on Real Estate	23,572,631.36	25.8
Loans on Collaterals	2,907,705.53	3.2
Cash Loans and Prem. Obligations on Policies in Force	8,812,029.04	9.6
Stocks, Bonds and Debentures	44,292,768.30	48.5
Cash on hand and in Banks	1,918,457.46	2.1
Agents' Balances & Bills Receivable	93,169.02	.1
Interest & Rents Due & Accrued	1,300,156.84	1.4
Outstanding & Deferred Premiums	3,150,131.14	3.6
Other Assets	286,144.68	.3
	91,303,901.70	100.0

NOVA SCOTIA TRADE CONDITIONS.

Every day it becomes apparent that business is improving in the Province of Nova Scotia, and there is a great change in sentiment from the gloomy predictions of the early spring. Favorable news continues to arrive about the crops, and there is now no doubt that the hay and grain crops will be extraordinarily good. Wholesalers there report a good seasonable business, and the volume of trade during July was as large as has been recorded during that month for years past. Collections, too, are much improved. On the whole, the outlook is very satisfactory, and there is little complaint heard among business men now. City retailers do not report particularly favorably regarding Halifax local trade, but this is always a dull month.

* * *

OUR HALIFAX LETTER.

Harry Cox, a member of the firm of J. P. Cox & Co., lost his life by drowning here on Saturday. The deceased was one of the most esteemed of the younger business men of Halifax.

The mackerel, which have been waited for so long have at last put in an appearance off our coast, and good hauls have been made during the past week. The situation regarding codfish continues unchanged, with the tendency towards lower prices as strong as ever, and many are predicting four dollar fish before the autumn.

The Department of Agriculture of the Province of Nova Scotia has just issued its midsummer report on the crops, being a condensation of over one hundred reports from various sections of the province. The general opinion appears to be that the apple crop in this province will fall considerably below that of last year. and indeed below an average year. The manager of the Furness, Withy & Co., the steamship line which does a large part of the apple carrying from Halifax to Great Britain, recently made a tour of the Annapolis Valley and gives his estimate of the 1905 apple crop as not likely to be more than 250,000 barrels, and not more than fifty per cent of a crop. The chief shortage will be in late winter varieties for shipping. Gravensteins will be short, and Ribstons and Kings will be only a fair crop. Other important crops, the Government report says, such as hay, potatoes, roots and oats, will be a fair average crop.

A good modern building for the housing and repairs of engines is to be constructed at Halifax by the I.C.R. The new buildings will be erected at Africville. Extensive buildings and plant for the construction and repairs of the cars will also be established, consisting of machine shop, car shop, mill and boiler shop.

The Sydney Board of Trade, at its regular meeting held last Wednesday, unanimously endorsed the recent resolution passed by the Halifax Board, urging that the Grand Trunk Pacific be built by the shortest possible route from Quebec to Moncton. This is following the protest against the proposal from St. John that the line be built along the St. John Valley, instead of by the central route.

The City of Halifax has transferred its bank account from the Royal Bank to the Bank of British North America for the next three years, their tender being the most advantageous to the city.

There is not much of interest in the local financial market. It has been found necessary to call up the total double liability on the stock of the defunct Bank of Yarmouth, amounting to $300,000. Almost all this stock was held in the town of Yarmouth and vicinity.

The City of Halifax is advertising for $207,000 of the 4 per cent. thirty-five year debentures. The Acadia Fire Insurance Company, of Halifax, will extend its business to other parts of Canada. There is a good demand for the stock in consequence.

Newspapers in Halifax are urging the Dominion Government to offer a bounty to encourage the development of iron-ore mining in the province. It is suggested that, as the Dominion bounties on iron and steel now produced in the province from imported ores will soon expire, a bounty should be offered on iron and steel made from native ore. It is pointed out, however, that little or no iron ore of a workable nature has as yet been found in the province. The Sydney iron and steel works have to bring in all, or nearly all, their ore from outside the province, which they would hardly do if they could obtain it there, particularly where they would draw an extra bonus of one dollar a ton on products made from local ores.

Halifax N.S., August 14, 1905.

* * *

LIFE AND ACCIDENT INSURANCE.

The Royal Victoria Life Insurance Company of Canada, Montreal, sends us a leaflet giving "Rules and Reasons" for the life agent, being pointers for his success and reasons "why he did not succeed."

Says the clear-headed correspondent of an exchange: "The Royal Arcanum is between the devil and the deep, deep sea; if it does, it is doomed, and if it doesn't do it, it's damned." The same thing may be said of others.

Reports as collated by the fidelity department of the Fidelity & Casualty Company for the month of June, 1905, indicate defalcations as follows: Banks, $257,463; benevolent societies, $47,548; Federal and State, $56,043.15; firms and corporations; $72,552.08; insurance companies, $748; transportation companies, $18,337; miscellaneous, $10,262.34; total, $462,953.57.

It is worthy of note that the annual report blank adopted in the United States by the National Convention of Insurance Commissioners for the life insurance companies requires them, under the head of liabilities, to state any special reserves held over and above the legal requirements, the funds apportioned to policyholders in the form of dividends to be paid in the year succeeding the date of the statement and in subsequent years, the capital stock, if any, and the remaining funds unassigned, which latter item constitutes the true surplus.

Silas K. Hocking, the novelist, says: "I am of the opinion that the gospel of life assurance should be preached much more frequently than it is. For my own part I take every opportunity of urging it, not simply as a matter of policy, but as a Christian duty. Every man, I take it, should be, as far as possible, his own providence; and it is not faith but presumption to expect the Almighty will provide for his family when he might have provided for them himself. If men would carry out the injunction, 'Be not over anxious about to-morrow,' let them assure their lives."

A policyholder intimates that instead of bothering about whether a certain risk is a total abstainer or not, if the insurance companies have their risks in force examined every year by their physicians, they would accomplish much more. Men do not usually call in a doctor until they find there is something really the matter with them. But if they were in the habit of being examined periodically by a medical man many a small ailment which might grow otherwise to serious dimensions would be nipped in the bud. Such a course would be a greater protection to the companies and would prove no small boon to the policyholders.

We note that in a paper read before the International Association of Accident Underwriters the other day, Dr. R. S. Keelor suggested that it may be profitable to ascertain and determine the efficient safeguards as well as the proximate causes of all accidents. Accident insurance men claim that it is apparent that more laws must be enacted and enforced to compel employers to adopt precautions against accidents and to report accidents. In railway and mining occupations much has been accomplished for the protection of employees, due mainly to the adoption of safeguards that followed the accumulation of information concerning accidents. It has been suggested wisely that an educational campaign should be begun for the creation of sentiment among manufacturers and employees in favor of efficient safeguarding of dangerous machinery.

Dr. Alfred Manes, general secretary of the organizing committee for the Fifth International Congress of Actuaries, has issued a circular relative to the congress which is to take place on September 10, 1906. Dr. Count, of Posadowsky, will act as honorary president. Among the papers to be read are the following: 1,. Industrial insurance, and in particular the insurance of children; 2, Methods of calculating and determining extra premiums for hazardous risks; 3, Mortality tables for annuitants;; 4 (a), Methods of insuring abstainers, (b) Methods of insuring persons whose occupations connect them with the manufacture or sale of alcoholic beverages; 5, Insurance on the lives of women; 6, Question of taxes imposed upon insurance companies; 7, Limits within which insurance is possible; 8. Methods of conducting mortality investigations; 9, Methods of adjusting or graduating tables of mortality.

The National Association of Underwriters will hold their annual convention at Hartford, Conn., on September 19th to 21st inclusive. A very interesting programme of subjects for discussion has been prepared, and will include the following: "The Value of Co-operation in Life Insurance Work," "The Value of Correspondence Lessons in Reaching and Training New Life Insurance Material," "The Life Company from an Examiner's Viewpoint." Besides these, five minutes' discussions on the following topics will take place: "Life Insurance the Highest Type of Commercialized Beneficence," "The Essential Requisites of Permanent and Best Success of a Life Insurance Agent," "The Duty of Agents in Respect to Life Underwriters' Association," "What Qualifications should be Considered Indispensable in a Candidate for Membership in a Life Underwriters' Association?" "The Possibilities of Development in the Business of Life Underwriting." The regular annual banquet, to which ladies may be invited, will close the convention.

* * *

FINANCIAL ITEMS.

The Imperial Bank of Canada has opened a branch at Cobalt, Northern Ontario.

The Standard Bank of Canada has taken over the private banking business of Mr. George Mitchell at Flesherton, Ontario, and is establishing a branch there.

The loans by banks and trust companies in the United States for the year ending June 30th last show an increase of $320,000,000 over the same period of last year.

A despatch from Mexico states that a contract has been made between the Mexican Light & Power Company and the Mexican Electric Tramways, Limited, by which the latter takes 5,000 horse-power for ten years from the Mexican Light & Power Company.

The total earnings of the Toronto Railway Company for last month were $239,870, compared with $211,755, or an increase of $28,114 over the same month in the preceding year. For the three months ended June 30th this company paid to the city as its percentage no less a sum than $18,494.

A compilation of the August dividend and interest disbursements to be made through eastern financial institutions by the principal corporations of the United States gives a total of $59,188,428, as compared with $50,240,300 in August of 1904. Much of the increase, says the Journal of Commerce, is due to the inauguration or the increase of dividend payments by railroad corporations, and to the fact that the Northern Pacific and the Great Northern companies will each pay out upward of $2,000,000 in dividends, whereas a year ago the earnings of these roads were locked up in their treasuries on account of federal court proceedings against the Northern Securities Company. The dividends of industrial companies as a whole show a slight increase, although some companies which were paying last August have since passed their dividends.

LIFE INSURANCE UNSHAKEN.

Notwithstanding the publicity life insurance has received during 1905—some of it being of a very unsavory character—it still remains as the ideal means of protection for family and business. Rooted and grounded on a solid basis, the present storm will have a beneficial effect in clearing away some of the side issues that have been injected into life insurance, so that the structure will appear even grander than before. It is the best method of protecting one's family, and is not an experiment.

How much easier it is to accomplish a task which another maps out for us, and even compels us to perform, than it is to plan and carry out the same undertaking by our own choice! When we hear the command, "Do this," we find no difficulty in obeying; but if a matter rests with us we postpone and delay and frequently fail to perform it.

The first, and probably the greatest, duty of a husband and father is the support and protection of his family; therefore the less opportunity he has to neglect it the better; and, so far as we are able, it is right for us to give him the utmost assistance in attending to it. It may be of some avail to lecture a man on caring for his family, but we will accomplish much more if we can devise a plan which will enable him to make suitable provision and then help him carry it out.

Men pay for life insurance because they know that it is the best way to accomplish a certain end—that of protecting the family—and they realize that there is no substitute for it. It gives them a definite plan which they may adhere to, knowing that certain results will be forthcoming. It requires no initiative, involves no worry. It is easy to pay the premiums because the expenditure is not for a new venture—not an experiment. It is along a well-beaten track. The insurance company points out to the man on whose shoulders is a burden which is always heavy, and which frequently appears unbearable, a method by which he can most successfully rid himself of his load; and then it applies just enough constraint so that he is likely to persevere to the end in an undertaking which he finds he was wise to have entered upon.

Taking into account the large indemnity in event of early death, and the low cost of maintaining a policy even if the insured lives to old age, there is no doubt that insurance as a means of protection for a family is not equalled by any method known to the business world. For, besides the fact that it secures the greatest returns for the least outlay, it is a method which allows a man the smallest possible chance of neglecting a duty, than which we know there is none more sacred.—Advocate.

* * *

FIRE INSURANCE ITEMS.

We understand the Alliance Assurance Company is taking over the business of the old Westminster Fire Insurance Company, the business of which has been confined to the United Kingdom.

A Wire Inspection Bureau, affiliated with the Underwriters' Laboratories, has been formed in the United States for the purpose of testing all rubber insulated wire manufactured under the rules of the National Board of Fire Underwriters, and to prevent the introduction into commercial use of such wire as would prove inferior to the standard demanded by the National Board. This will protect reliable manufacturers against unfair competition, and practically prevent any further use of wire with defective rubber insulation. The expenses of inspectors who shall from time to time visit the testing laboratories of any factories making rubber insulated wire and make, supervise, and verify tests specified by the Bureau, are to be paid by fees collected from the manufacturing companies whose product is tested, each company paying its share in proportion to the amount of wire manufactured.

THE LUMBER TRADE.

Prices in the lumber trade of Ontario and Quebec continue steady, the demand for building purposes giving considerable firmness to the market. The prospects for trade in the North-West, though it is quiet at the moment owing to the rush-work of the farmers on other business, are quite bright as there can be no doubt that the great and remunerative crops promised the farmers this year will lead to a general desire to make improvements and extensions to their various properties.

Business in the Maritime Provinces has been fair for local requirements, and shows some improvement for export purpose.

In Great Britain the receipts of lumber have been increasing a little during the last few weeks, but there has been but slight change in prices. A recent circular from Liverpool refers to Canadian lumber as follows:—

Canadian.—Of waney, the bulk of the import went to Manchester, chiefly on contract, and will go largely direct into consumption; the deliveries have been fair, but there is little improvement in the demand to report; values are steady, stocks are ample. Square pine—There have been no arrivals; the stock is light, but the demand is quiet; values are steady. Red pine has not been imported; the demand is very limited, and stocks, though light, are sufficient. Oak logs—No import; there has been a little more enquiry, recent arrivals have gone largely into consumption, and stocks are moderate; there is no change in values to report. Elm—There has been no import during the past month, but the deliveries have been satisfactory, and stocks are moderate; values rule high. Pine deals—These goods are arriving more freely; there has been a fair consumption, but the demand is slow and stocks are large; prices are fairly steady. Red pine deals—There is no improvement in the demand to report. New Brunswick and Nova Scotia spruce and pine deals—The arrivals to the Mersey during the past month have been 18,990 stds. against 15,180 stds. during the corresponding time last year. The consumption has been fairly satisfactory, but stocks have somewhat increased during the month. There has been rather more enquiry, values have an upward tendency, and imports for the balance of the season are expected to be on a moderate scale. Stocks are slightly less than corresponding period last season. Pine deals—The demand continues quiet, and there is no improvement in value to report. Birch—Logs, chiefly from Quebec, on contract, have arrived more freely; there has been a good consumption, stocks are moderate, and prices steady. Planks have been imported moderately, the deliveries have been satisfactory, and stocks are not too large; values are unchanged. British Columbian and Oregon pine—A cargo from Port Blakely has arrived on merchants' account; the deliveries have been fair, but the stock is heavy; values are steady.

* * *

TRADE NOTES.

W. Channels' knitting factory at St. Catharines has been gutted by fire at a loss of about $4,000, partly insured.

It is stated that during July no less than 9,000 cattle were exported from Alberta, and the figure for this month is expected to reach 11,000.

Last week twenty-five bales of wool, claimed to have been smuggled from Canada into the United States, were seized by U.S. Treasury officials on the s.s. St. Croix on its trip from St. John, N.B., to Boston, Mass.

The Railway Commission has issued an order requiring that the Grand Trunk and Canadian Pacific Railways make a general reduction in the rates on grain or grain products from Ontario points to Montreal. The change is expected to work with considerable benefit both to farmers and millers.

According to a recent report from G. G. Burke, Canadian commercial agent in Jamaica, there is a revival in the sugar industry in the West Indies. Hundreds of small cane mills are being imported from the United States, and Mr. Burke urges that Canadian machinists should endeavor to capture this business. He also recommends box shook manufacturers in Canada to make a move to secure the control of the market for shooks for orange and pineapple boxes.

The high price of hides and the increasing firmness in leathers is causing boot and shoe manufacturers to hold off from purchases as much as possible. It is altogether likely, however, they will have to give the price asked, even though they have eventually to raise the values of their own goods.

A feature in the fruit trade is the exceedingly high price of lemons, which is higher than has been the case for several years. This is believed to be due not only to an extra demand on account of hot weather, but to the frosts in parts of the Italian lemon belt this spring.

All foreign raw silk markets have advanced, and no one will hazard a guess as to where the end is likely to be. Reelers in Europe and Japan are well supplied with money, and will have no need to force business for at least the next sixty days. Could the demand be cut off both from America and Europe for the next six weeks holders would unquestionably revise their schedules, notwithstanding the absence of pressure to sell, but such a contingency is most improbable, thinks the correspondent of the Dry Goods Economist.

The tailor costume for the coming fall will, it is said in Paris, be constructed more in fancy all-wool fabrics (cloth, of course, among the number) than any description of plain material. The latter will be reserved for a more dressy type of robe, consequently for visiting and afternoon wear. We must remember that the tailor suit is no longer, as was the case some two or three years ago, considered suitable for visiting, though it is still not strictly reserved for morning wear. Small checks are sure to be well received, and dressmakers are ordering them freely. Then again, hairline effects are greatly favored.

It is stated that the Keystone Sugar Company, which is about to establish a beet sugar factory at Whitby, Ontario, intend to manufacture sugar from imported raw sugars as well, during the season when beet sugar operations are over. It is believed that, having already the requisite machinery for refining, they will be in a position to import cane sugar from the West Indies and raw beet from Europe, and to manufacture it into the finished product with great advantage.

A committee of the Winnipeg Grain and Produce Exchange has decided that all outstanding contracts for the sale of July wheat on which default was made at the expiration of the July delivery shall be settled at the price of $1.16 a bushel, instead of $1.35. The greater part of the evidence showed that during the last few days of the month the rapid advance in the price of July wheat was the result of manipulation, and that the final figure, $1.35, was not a fair price, as at that time the milling and export value of the wheat was not at the very outside more than from $1.00 to $1.05 a bushel. The present compromise, though giving the shorts considerable benefit, yet will net them a heavy loss.

The new crop of wool is beginning to move a little more freely, as manufacturers begin to need supplies and place further orders. Prices hold firm at 16c. to 16½c. for unwashed, 25c. to 26½c. for washed, and 20c. for rejects. Since January 1st, this year, the United States has imported 39,182,400 lbs. of wool this year, compared with only 24,455,474 lbs. in the same period in 1904. Total sales of domestic wool in the United States since January 1st, in the principal markets, exclusive of Boston, have been 39,940,971 lbs., compared with 45,695,500 lbs. in the same period in 1904. This makes total sales, domestic and foreign wools, in the United States, 79,123,371 lbs., compared with 70,150,974 in the same period last year.

* * *

—The total gross earnings of 62 railroads in the United States for five months of the present year show an increase over the same period of 1904 of $23,559,175, and of 63 roads for the six months (partly estimated), $21,659,906. The total returns of 125 roads (partly estimated), some for the first five and some for the first six months of the year show a gain of $45,219,081 over that of 1904, or 6.36 per cent. If we take the actual earnings of the 125 roads reporting for the first five months and estimate the month of June and consider the fact that the number of miles represented is only 177,213 out of an aggregate mileage of 205,000 for the whole country, it seems safe to say that the increase over that of 1904 will be approximately $55,000,000 when the returns are made public. This comparison, of course, is with that of an unfavorable period of 1904, when the gross returns showed a decrease. Of the roads reporting earnings at this time last year a decrease was shown of $12,038,643, which may be compared with the increase of $45,219,081, as in both years some of the roads report for only five months. It is interesting to note the rapid growth in gross earnings on the basis of the present improvement of 1905, over 1904, which will probably reach $55,000,000; as compared with a decrease of from $18,000,000 to $20,000,000. In 1903 estimate was made for the six months, that there had been an increase of $115,000,000 over the same period of 1902; in 1902, there was an increase of $50,000,000 over that of 1901; in 1901 an increase of $70,000,000 over 1900; in 1900 an advance of $90,000,000; in 1899 a gain of $42,000,000, and in 1898 a gain of $68,000,000 over that of 1897. Therefore, for the eight years from 1897 to 1905 for the first six months of the year, there has been an estimated increase of $470,000,000 in gross earnings. This tends to substantiate the fact in the eyes of the Financial Chronicle that the railroads have risen from a state of depression to that of steadily increasing prosperity.

* * *

—The Flower, Fruit and Honey Show for 1905 will take place in Toronto in Massey Hall during the whole week beginning November 13th. In connection with the exhibition proper there will take place the following conventions: The fruit-growers', the vegetable-growers', the beekeepers' and the horticultural societies. This year the exhibition will be much larger than last. The exhibits of commercial firms will be a feature, and another will bring out very strongly the growing importance of the canning industry in the province.

—The National Wholesale Lumber Manufacturers' Association are holding their annual midsummer meeting in Ottawa this week, and delegates have been in attendance from all parts of the United States and Canada.

* * *

—The following extract from the report of the British Royal Commission on Food Supply in Time of War is likely to be seized as an argument for the anti-Chamberlainites: "We regard the present variety of sources from which our supplies are drawn as likely to contribute to our advantage in time of war, since their wide geographical distribution must tend to minimize the risk of effective interference. Our reports from this point view the recent decline in exports from the United States and its effect upon our imports as of considerable moment. It may also be said that the more numerous neutral powers there are supplying our wants the less probable is the violation of international law by foreign navies. There is, therefore, a certain advantage for us in the fact that supplies of our principal foodstuffs are drawn in greater proportion from foreign countries than from British possessions."

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, August 17th, 1905, as compared with those of the previous week:

	Aug. 17.	Aug. 10.
Montreal	$23,167,967	$23,477,113
Toronto	17,882,542	16,748,306
Winnipeg	6,518,148	6,362,417
Halifax	1,535,682	1,772,718
Hamilton	1,461,868	1,019,407
St. John	1,139,289	1,139,155
Vancouver	1,747,161	1,664,920
Victoria	653,686	608,132
Quebec	1,591,933	1,736,211
Ottawa	2,424,082	1,904,973
London	1,070,221	949,978
Total	59,192,579	$57,383,333

—Pig iron production in the United States in July, a month of thirty-one days, was 1,741,935 gross tons, as compared with 1,793,289 tons in June. The active capacity on August 1 was 410,088 tons per week, as compared with 408,617 tons on July 1. Stocks have increased from 474,894 tons on July 1 to 500,604 tons on August 1. The increase amounts to 13,089 tons in the east and to 38,357 tons in the central and northwest. Stocks declined in the south 25,736 tons.

* * *

—A dispatch from Vancouver this week states that forty head of cattle, the first shipment of Canadian animals from this country to Japan, will be put aboard the C. P. R. steamer Athenian, leaving Vancouver on September 18. The herd is made up of Ayrshires, Shorthorns, Devons and Holsteins. The purchases were made by Mr. J. Nishimura, who is acting for the Japanese Government, and by Mr. Y. Ishizaki, an expert attached to the Department of Commerce and Agriculture, Japan. It is the intention of the Japanese Government to use the cattle for breeding purposes, and they will be distributed among the small farmers.

TENDERS FOR DEBENTURES.

TENDERS, sealed and endorsed "Tenders for Debentures," will be received at the office of the undersigned, until Monday, the 18th day of September next, at 4 p. m., for the purchase, in whole or in part, of Debentures of the Corporation of the City of Victoria, as follows:

1. Debentures amounting to $100,000.00, issued under authority of the "Sewers Loan Guarantee By-law, 1905," numbered 456, dated the 1st August, 1905, and maturing 1st August, 1955.

2. Debentures amounting to $11,000.00, is sued under authority of the "Electric Lighting Loan By-law, 1905," No. 457, dated the 1st August, 1905, and maturing 1st August, 1915.

Both sets of Debentures are secured upon the credit of the Municipality as a whole; their denominations are No. 1, $1,000.00 each: No. 2, $500.00 each, and they bear interest at 4 per cent, per annum, payable half yearly, the principal and interest being payable at the office of the Bank of British North America, either in Victoria B. C., Montreal, London, England or New York, U. S. A.

The tenderer must state the price net at Victoria which he will pay. In addition to the net price, the purchaser will have to pay to the Corporation the interest on the said Debentures for the period between the 1st of August, 1905, and the date of the receipt of the purchase money by the City Treasurer.

The Corporation does not bind itself to accept any tender.

MONTREAL LETTER.

The annual statement of the Montreal road department affords some interesting reading, giving a mass of information about the mechanical workings of the city. The report shows that one million dollars were spent last year on streets, sidewalks, and the general requirements of the road department. A satisfactory condition of affairs shown is the steady increase here of stone and cement sidewalks, by which it would seem the days of the pine plank are over. The city can now lay sidewalks of stone cement or other permanent material cheaper by paying half the cost, than by laying wood and paying the whole cost, and it would seem that proprietors are glad to accept the privilege of getting good sidewalks put down in that way. For the last two or three years the Montreal Street Railway has been renewing many miles of their steel rails. By special arrangement with the city the company has agreed to lay stone blocks between the rails if the blocks are supplied for that purpose. As these are laid in the middle of the streets, the removal of old asphalt or other material, and replacing it with clean granite blocks has greatly improved the appearance of many streets. Since the purchase of the asphalt plant the city has been doing its own repairs, thereby avoiding much delay in getting contractors to fulfil their agreements. The result appears to have been satisfactory, and as in the case of asphalt only the surface has to be renewed, the original concrete being good for any number of re-surfacings, the cost a yard is low. It is pointed out that climatic conditions have a good deal to do with the wearing out of asphalt pavement in Montreal. The frost and snow, with the great heat in summer and the amount of moisture in the spring and fall, all tend to make asphalt crumble. Though the city surveyor does not discuss this question he has prepared an interesting table, showing that the snow fall in Montreal is more than double that of Toronto. Taking the average for the last five years the following result is reached:—

Montreal	128.6	inches
Quebec	107.4	"
Ottawa	100.15	"
Halifax	68.4	"
Toronto	60.2	"
Detroit	49.9	"
Buffalo	24.4	"

The fight for control of the Montreal Cotton Company is now presenting some new and interesting phases. The Dominion Textile Company announce that they are now the largest shareholders of the Montreal Cotton Company, and state that they are as much interested in the success of the latter company as the other shareholders. On the other hand the officials of the Montreal Cotton Company, while admitting that the Textile Company may be one of the largest individual shareholders, point out that they are a very long way from having anything like the majority of the stock, and there is every indication that the proposal made to the shareholders by the directors to pool their stock and thus retain control of their stock will go through. The result of this action has been to put both parties on the aggressive in an interesting struggle to secure and retain the controlling interest in the Montreal Company. The Textile Company issue a statement in which they seem satisfied that they will get the controlling interest. In part the statement is as follows: We are not taking any notice of the circular issued by some of the directors of the Montreal Company, asking for proxies, as we feel sure that shareholders are not going to tie up their stock in the manner proposed, and we are quite content to sit down and wait, feeling confident that having made a liberal offer to the shareholders time will show that a great deal has been said about the earnings in the past which will not be borne out by results in the future, and that it is very much to the interests of both concerns that they should manufacture those lines which each company's mills are best adapted for, with a view of doing away with senseless and disastrous competition."

The announcement is made, that on and after Monday August 14, a doorkeeper will be on duty at the door opening on to the floor of the Montreal Board of Trade, and those who do not bear tickets will be denied admission. The reason of this change the executive of the board state is two-fold. First it is a gentle reminder to members that in order to enjoy the privileges of 'Change Hall and reading room they must pay up their annual subscription, and secondly there are at present a number of people taking advantage of the facilities who are not members and who interfere to a greater or less degree with those who are, and are a source of complaint. Tickets are now being issued to members of the Board of Trade in good standing, and they will be obliged to present the same to the doorkeeper until such time at least as this individual becomes convinced that the frequenter is entitled to all privileges. Non-members who have business at the secretary's office or who wish to communicate with a member who happens to be on the floor will utilize a separate entrance direct to the secretary's office, and having no direct connection with 'Change Hall.

"MOUNT ROYAL."

August 9th, 1905.

* * *

NORTH OF ENGLAND LETTER.

Canada throws a stronger spell than ever over our emigrants. Returns for the half-year just issued show that British North America attracts ten British and Irish folk where Australia and New Zealand attract one, and five for every unit bound for the Cape. The statistics are not flawless in detail, but when so broad a tendency is obvious minor errors can scarcely be said to count. In actual numbers the Dominion is 9,200 behind the States, but then Canada has an excess of 9,852 over the parallel of last year, and Uncle Sam only of 5,464. At this rate the States will soon be overhauled in the competition for Anglo-Saxon immigrants. On the Canadian side there is room for congratulation, and on our side for a mild lament.

According to American ready reckoning, an able-bodied, willing male added to the population is equivalent to an addition of $1,000 to the commonwealth. Women and children are rated less highly, but assuming the average value of the whole to be only $500 per head, Great Britain can claim to have made Uncle Sam a free gift of some $1.500 millions in the last twenty-one years. Canada has had some $275 millions from these islands in the same length of time. A sordid, selfish Little Englander might regret that we ourselves have not been equal to the task of turning these potentials to good account. It has been reckoned that each unit of the male half of the population (of all ages) is worth at last $125 per annum to Old England. Granted that he does his share of the work and the payment of rates and taxes, that sum represents his value to the common good.

Of course the shipment of the surplus makes it easier for the rest of us to pay our quota, but the fact remains that we are turning away from our doors some 275,000 Britishers per annum, worth—on the $500 basis—$137,500,000. A queer feature of the emigration history of the past two decades is that the highest returns have coincided with good years for trade and the lowest with bad ones. But perhaps this means no more than the availability or otherwise of funds for passage money.

Professor Mavor's critical report on the resources of the Northwest has been issued officially as a Blue-book, and promises to become a classic work of reference. English papers have treated the report with the seriousness it deserves, and such extracts have been fed to the general reader as will convince him that the Professor's account rings true. Non-discriminatory laudation does not do Canada all the good that the authors of the praise intend, and to impress the right sort of immigrant favorably, nothing could be better than the impartiality Mr. Mavor shows. His notes are already being taken into the calculation of our

fiscal arguliers. An inference drawn by some people is that the States in a few years will be absorbing the export wheat from the Dominion to so great an extent that Indian, Argentine and Russian supplies will be more necessary to us than to-day. Nobody dares to be certain on the point, but—as the chief Free Trade Conservative journal of the North sagely concludes—the report shows how extremely careful we ought to be in committing ourselves to a policy of Preference. But all things suggest that same moral to the wary writers of "The Yorkshire Post."

England has started suddenly at the discovery that workmen's cottages of pleasing aspect can be put up at a cost of $750 each, in place of the usual $1,250. An exhibition of model dwellings at this price is to be held at the "Garden City," and in some ways it is to be desired that the adjudication might be deferred for a term of years. Men in the building trade are loth to believe that the hasty erections will last long enough to be fitting investments for capital. Some of the houses are made of hollow concrete blocks, and some are almost monoliths. A whole houseside is cast at one operation from an aggregate of cement and furnace clinker, being lightly reinforced in places with steel. Architects have been quick to show that the dwellings may at least be decorative, and the public is in ecstasies over the picturesque appearance obtained. Journals which are not supposed to have any deep technical acquaintance with building construction are frothing at the mouth because of the iniquitous building laws which obtain in most localities and necessitate the use either of brick or stone. Good prices will no doubt be fetched by the houses erected, because there is a public for the pretty where it is also cheap. The verdict of the capitalist will be returned after a certain lapse of time.

The illicit traffic in insured lives makes headway. From the West Indies report comes of the victimization of an old English office by an agent who appears to have selected the worthless consistently and then to have primed them with early death in the shape of alcohol. In the North of England the ramifications of the industrial companies have been shamefully abused. Sometimes the office itself has not been beyond suspicion in matters of insurable interest. Canvassers also have been exposed too greatly to temptation in the arduous task of keeping up returns. Ex-agents retired have quite a nice little income from policies which ought not to have been written, and from others bought for a song from people who were drunk or in dire extremity. One individual is said to find it remunerative to pay premiums of $50 a week on the lives of others. Of course our judges are very cutting in their strictures on these proceedings, and the good industrial offices recognize their responsibilities. But by connivances the practice is kept alive, and no man knows the end of the subterranean insuring now in force.

Canadian example is responsible for the new suggestion of a "patriotic" stamp, to be affixed to postal envelopes or goods sold in shops. Its legend runs "Buy goods of British manufacture," printed around a representation of the Union Jack, with the floral emblems of the four countries of the Kingdom in the corners. Our first tendency is rather to despise such artifices, and without influential backing one dare not say that the stamps will be a great success. The notion is to stimulate home industry by creating a platonic preference for home-made goods. Except a few advertisers, nobody troubles publicly to create this feeling. Silently, however, the disposition to prefer British to foreign articles has grown stronger of recent years.

A man now stands accused of deliberately getting his legs taken off by a train that he might secure accident compensation. His pockets were filled with coupon-giving periodicals, and all to no purpose, for it is stipulated that the accident must be to the train and not to the individual. Not wanting to waste his legs for nothing the man has brought action against the Taff Vale Railway Company, and with serious consequences to himself.

NORTH-COUNTRY.

Manchester, August 4.

ONTARIO CROPS.

The August Crop Bulletin issued by the Ontario Department of Agriculture, says that the crop of Fall wheat will be a big one as regards the yield per acre, more especially in the Lake Erie counties. Most of the Fall wheat stood up well, and there was not so much "lodging" as is usual in the case of a heavy crop. A number of correspondents speak of rust, but in almost every case it was described as being only slight. The grain may be generally classified as a fair sample. In short, 1905 may be classed as one of Ontario's best Fall wheat years. Comparatively little Spring wheat is now grown in the western half of the province, and in the eastern half the crop appears to be also decreasing in popularity. Cutting was expected to be general during the week beginning August the 14th. The crop is described as being full in the head, with good straw, and promises more than an average yield. Barley, like the other cereals, will go considerably over the average in yield per acre. The condition of the crop is variable, though generally good. While in a few localities oats had been cut as correspondents reported at the beginning of August, the bulk of the crop had yet a week or two to ripen. The yield promises to be one of the largest, both as regards average and total yields, several correspondents classing it as the finest crop in years. High lands gave magnificent yields, but in low places it suffered considerably from the wet. The acreage of rye is comparatively small, and much of it is sown for pasture or soiling, and not for the grain. The yield per acre is above the average, and the grain is of good quality.

During the last four or five years the acreage of peas in this province has shrunk by about one-half, owing to the ravages of the pea weevil. This season, happily, the pest is mentioned only to tell of its absence. The crop has been injured more or less by rain, nevertheless the yield per acre will run over an average. Where grown as a field crop, beans gave promise of a large yield per acre, notwithstanding damage from heavy rains at the time of planting. The crop had still two or three weeks to ripen when reports were received, but it was then looking well, although occasional mention was made of the presence of cut-worm.

The season has been a remarkable one for hay and clover, cutting ranging all the way from the last week of June to the end of July. In fact, on the 1st of August there was some hay yet to mow in various localities, Fall wheat and other cereals having ripened before the heavily covered meadows could be cleared, and there being also a scarcity of labor. Hay cut early was more or less injured by rain,

but that harvested later was housed in fine condition. The growing of tobacco is confined mainly to Essex and Kent in the West, and to one or two counties in the East along the St. Lawrence. Although the plant suffered considerably from wet weather early in the season, it made good recovery, and its general condition is classed as good by most of those who reported on it. A large yield of potatoes is promised, and of good quality. Some of the seed rotted on low land, owing to the wet weather just after planting, but comparatively few correspondents anticipate rot in the new crop. The scarcity of labor and the crowding of harvesting forced a number of farmers to neglect their roots, and some fields are rather weedy. Nevertheless, all classes of roots promise a good yield, especially mangels and sugar beets, which are doing better than turnips.

Referring to fruit crops, all varieties of berries have yielded well, and grapes also promise well. Apples will be poor in point of yield, but the quality will be rather above the average. In many sections there will be barely enough for local consumption. Peaches have done better and may be classed as from fair to good. Some correspondents report good yields of plums, while others claim an almost complete failure. The common red cherry did well, but other varieties were a disappointment. The reports regarding pears, as in the case of plums, vary much, but they have done better than apples. Correspondents account for the rather poor orchard crops, first, from lack of pollenization, owing to the wet and cold weather prevailing during the blossoming period, and, secondly, on account of many trees failing to fully recover from the effects of the severity of the last two winters.

* * *

MARITIME BOARD OF TRADE.

On Wednesday of this week there takes place at Yarmouth, Nova Scotia, an event which is as important in its way as the recent gathering of North-West Boards of Trade at Regina. We refer to the annual meeting of the Maritime Board of Trade, a body of representative men who bear a relation to our Atlantic Provinces similar to that occupied by the Associated Board to the North-West. And to a certain degree, the work which they are called upon to do bears some marks of similarity. The North-West Board met at a time when two new western provinces were just in course of formation, while a prominent subject to be discussed, we understood, by the Easterners, is the amalgamation of the three Atlantic Provinces into one, and under one Government.

Through a natural tendency, perhaps of Canadians as well as other people, to "look West, young man," our Eastern Provinces have not been receiving the attention they should and do deserve, and for this reason, as well as several others, we trust that the convention will be a very great success. As a matter of fact, the Maritime Provinces are full of resources, not only of the resources of nature which mean wealth to their uplifters, but full of what we may call *human* resources also, for the people who inhabit them are without a doubt the peers of any in the Dominion. Indeed, without an undue attempt at flattery, they are classed by a good many judges, as being just a little bit ahead of those in other sections, in intellect and general ability. This, of course, is mere matter of opinion or taste, but it serves to draw attention to the fact that our Atlantic Coast people ought to be better known by Ontarians, Quebeckers, and other Canadians than they are at present. Such a convention as that being held this week is sure to do something in this direction.

We append a programme of the proceedings:—

Nova Scotia Boards.—Annapolis, the inspection of Cooperage stock, a standard apple barrel; Amherst, the advisability of uniting the three Maritime Provinces under one Government, the question of the advisability of advertising by literature the advantages of the Maritime Provinces as a desirable place of settlement; Berwick, the necessity of an improved railway train service between Halifax and that portion of the Annapolis Valley west of Kentville; Halifax, protection of Inland Fisheries is it advisable to place the Intercolonial under a Commission, what can be done to investigate and make better known the resources of these Provinces, fast Atlantic steam service, steel shipbuilding; Kentville, should not incorporated towns have representation in the council of municipalities, municipal ownership of electric light plants; Parrsboro, diversion of the Intercolonial by building a loop from Truro to Amherst, via Parrsboro, improved steamboat communication between Parrsboro and Wolfville; Wolfville, abolition of statute labor in Nova Scotia; preservation of historic grounds; Yarmouth, the advisability of the Government of the Maritime Provinces assisting local associations or Boards of Trades in promoting tourist travel, the advisability of the Dominion Government taking over the railways of Western Nova Scotia and making them a part of the Intercolonial system.

New Brunswick Boards.—Sackville, that the Maritime Board of Trade urge upon the Governments of New Brunswick, Nova Scotia and Prince Edward Island the importance of improvement in the common roads of the Provinces, and to take steps to diffuse information on the subject, especially by the distribution of literature and the appointing of an official who shall confer with the County Councils and lecture on the subject in the various communities throughout his Province; St. John, daily steamship service between New Brunswick and Nova Scotia via St. John and Digby, improvement in the London steamship service, prohibition of export of pulp logs, co-operative efforts on the part of the Governments of the Maritime Provinces to promote desirable immigration from Europe, union of the Maritime Provinces, re-coinage by the Government of worn and mutilated Canadian silver coins.

Prince Edward Island Boards.—Southern Kings, Montague, tunnel under the Northumberland Straits connecting P. E. I. with the mainland; Souris, better winter communication between P. E. I. and the mainland; Summerside, the tunnel from P. E. I. to the mainland; West Prince, Alberton, subsidy for steamship to ply between ports on the north side of P. E. I., Miramichi, Magdalene Islands and Sydney, daily winter communication with the mainland.

Cape Breton Boards.—Sydney, the desirability of wider publication in Maritime press of reports of Canadian commercial agents abroad, night express train between Sydney and Halifax.

* * *

OF INTEREST TO MERCHANTS.

A company has been organized under the name of the Canadian School of Scientific Salesmanship, Limited. Its capital is $90,000 and head office Winnipeg. Its purpose is to teach the science and art of scientific salesmanship and to carry on schools adapted to this end. Eben O. Weber, of Winnipeg, and I. S. K. Weber, of Berlin, Ontario, are members of the corporation.

Credit Clearing House, Limited, Ottawa, is the name of a new concern which recently obtained a charter from the Dominion Government, and the aim of which is to collect and distribute to interested parties the credit experiences of the company's subscribers, and to establish, maintain and conduct a general mercantile agency and to carry on every branch of business usually transacted in connection therewith; also to conduct a general collection business. J. A. Ritchie, of Ottawa, and J. W. Campbell, of New York, are prominent in its interests.

Mr. Edgar Tripp, Canada's commercial agent in Trinidad, draws attention to a trade trick emanating from the United States, which is calculated to do considerable harm to Canadian interests. Among Canada's standard products, he says, oats have always borne a good name, and deservedly so in the West Indies. A very inferior oat, however, is now being offered as "genuine heavy Canadian," which is not a Canadian oat at all, being what is termed in the United States "clipped American No. 2." These oats are put up in imitation Canadian bags, and the deception is completed by each bag being marked "entered for drawback," this

lettering only referring to the bags. Thus artfully prepared for consumption abroad, the shipments proceed merrily from New York, whilst the reputation of the genuine product is correspondingly damaged.

* * *

CANADIAN BANKS AND THEIR BRANCHES.

The remarkable increase in the number of branch banks in Canada during the last few years is evidenced in a report recently issued by the Dominion Government. During the last twelve months no fewer than 112 new branches were opened, and in the year previous, 143, while since 1899, the number of new banking offices has grown by 503. This represents an increase in the Territories of 383 per cent., while in Manitoba it is over 100 per cent. Ontario, however, retains the lead, with 243 new branches opened since 1899. Altogether, the number of bank branches in Canada now stands at 1,141, of which 549 are in Ontario, 196 in Quebec, 100 in Nova Scotia, 95 in Manitoba, 87 in the North-West Territories, 55 in British Columbia, 49 in New Brunswick, 10 in Prince Edward Island, and 3 in the Yukon. This is a most remarkable showing, and indicates, as perhaps nothing else can, the extraordinary development which has been taking place in Canada during the last half decade.

* * *

GOOD ROADS IN ONTARIO.

Mr. A. W. Campbell, Commissioner of Ontario Highways, has published a report comprising a large fund of information and statistics regarding the maintenance and cost of roads, besides the law with regard to them, and the specifications to be demanded in building them, the machines to be employed, and so forth. The total length of roads in Ontario maintained by township or county council, and excluding those in towns and cities, aggregates no less than 60,000 miles. The construction and repair of these roads has heretofore been done chiefly under a system of statute labor, but this is now rapidly becoming looked upon as far from economical, because better roads made with machinery can be made more of a lasting success. It has been superseded by a plan by which the work is done under an overseer and paid for out of the proceeds of a special rate. County road systems are growing steadily in favor throughout the province. There can be no doubt that every township should adopt a definite system of road improvement. There can scarcely be any more important question worthy of the consideration of our country boards and councils. The aggregate loss accruing to the community through bad roads is simply enormous, and it is a poor civilization which allows such a waste to go on without strenuous attempts to improve the conditions.

* * *

We receive word from Halifax to the effect that the judge in the Bank of Yarmouth case has granted an order for a call of $75 per share, to be paid by shareholders by October 9th. The latter are talking about taking proceedings against the directors to reimburse them for their losses.

* * *

A few days ago a number of business men who have been customers of the Bank of Hamilton met to do honor to Mr. F. J. Gosling, who has recently resigned his position as manager of the Bank of Hamilton at Toronto after an occupancy of many years. An address was read to Mr. Gosling, embodying the sense of regret of his friends and customers at his resignation, and the feelings of appreciation for his able and courteous consideration of the customers of the bank. The address was accompanied by the presentation of a set of old art silver.

* * *

—Insolvencies in the Dominion of Canada, according to compilations by R. G. Dun & Co., were more numerous in July than in the same month last year, but the loss was smaller. Total commercial defaults numbered 103, with an aggregate indebtedness of $777,226, against 78 last year for $1,040,640. Manufacturing failures were 24 in number and $290,829 in amount, compared with 25 for $647,864 a year ago, the month's improvements being in this department. Trading defaults were 77 for $482,192, against 52 for $391,376 last year. Two other commercial failures for $4,305 slightly exceeded the one for $1,400 in 1904.

* * *

—An appreciable advance in the average prices of commodities has taken place during the past month, says the London Economist. The Index Number of that journal, which indicates the combined effect of the movements in a number of selected commodities, has risen from 2,163 to 2,195, or nearly 1½ per cent. At the end of June, 1904, it stood at 2,130, and at the end of December, 1903, at 2,197. One of the principal factors in the advance is the sharp rise in cotton and cotton goods, the threatened short crop once more leading to speculative operations, to counteract which the spinners are endeavoring to take international concerted action. Silk and wool are also dearer. In the metal market, iron and steel have been firm, without quotable advances, but lead, tin, and copper were each dearer at the end than at the beginning of the month. As regards articles of personal consumption, a further fall in sugar was offset by a rise in tea, and while wheat advanced in price, there was a decline in butchers' meat.

* * *

—An association is being organized in Great Britain under the name of the Manufacturers' Association of Great Britain, the objects of which will be similar to those of the Canadian Manufacturers' Association and the National Association of Manufacturers of the United States. The means to be employed include the appointment of correspondents in all parts of the world to report on openings for trade and local changes and conditions within their respective spheres, and the distribution of such information among firms whom it will most benefit. A trade index to British manufacturers is to be compiled in the chief commercial languages of the world and distributed free to chambers of commerce, leading merchants, and others in the colonies and foreign markets. Information regarding the commercial standing of any firm of merchants and respecting railway rates and shipping rates and shipping freights all over the world will be collected and supplied and a staff organized capable of corresponding on technical and commercial subjects in any language, and also of translating into and from English commercial catalogues and similar documents. One of the main objects of the association will be the systematic dissemination of knowledge of British goods in all possible over-sea markets.

* * *

—The third number of the Canadian Forestry Journal, just to hand, contains a number of highly interesting articles. "The Art of Forestry" is dealt with by Dr. A. Harold Unwin, a European Forester, and "Diseases of Timber," by Dr. J. H. Faull, of the University of Toronto. "Forest Fires in British Columbia in 1904" and "The Poplars" are the titles of popular articles, and plans and descriptions are given of the new timber reserves established in Ontario and Quebec. As remarked by the Dominion Superintendent of Forestry, the protection of our natural forests is a matter of supreme importance to the whole country, and one that has been almost neglected in the past. The spectacle witnessed by the traveller passing through our unsettled forest country is sad indeed. On every hand he beholds the charred remains of the old-time forest. He sees this as he journeys through Nova Scotia, New Brunswick, Quebec, Ontario, the Northwest Territories, and, sad to say, this destruction is not least if not greatest in the giant woods of the Pacific slope. Everywhere this destruction of public property is before his eyes, and it is humiliating to confess, as we must do, that the fires which caused this great loss were not only permitted, but in some cases caused by our own people.

WILLIAM F. BULLEN,
Manager.
London, Ontario, 1905.

A cigar retailer of the name of Thomas Davis, in Montreal, has been put into insolvency, and shows assets of about $1,000 against liabilities of $3,000.

Mercantile Summary

A general storekeeper named J. E. Corbett at Harbor au Bouche, N.S., is asking extension indulgence from his creditors, on liabilities estimated at about $5,000. Mr. Corbett is also a member of the Legislative Council, and acts as a notary and Justice of the Peace, and it is feared his duties as such have interfered with his proper attention to business.

By a fire which occurred on the 17th ult., H. Charlebois & Co., engaged in the retail boot and shoe trade, in Hull, Que., made a serious loss, and are reported as offering their creditors 40 cents on the dollar. They are said to owe about $7,000, family connections figuring for about half that amount.——A meeting of the creditors of John Groneau, Senior, also in the shoe line at Ladysmith, Que., is called for the 17th inst.

Good progress is being made on the survey work of the Georgian Bay Canal from the Bay to the Ottawa River. At present a party of engineers, under the direction of Mr. Henry Drury, are engaged in making a detailed survey of the Chats Falls at Fitzroy Harbor. The survey is being done very thoroughly and more than 60,000 soundings have been taken in the bay at the harbor. The islands and the numerous chutes and falls in the vicinity will all be thoroughly surveyed before the party leaves.

The return for June for the Ymir Gold Mines is as follows: Thirty stamps ran 27 days and crushed 2,000 tons (2,000 lbs.) of ore, producing 363 oz. bullion. The estimated realisable value (gross) of the product is $3,390; 205 tons of concentrates, shipped, gross estimated value, $4,000. Cyanide plant treated 1,700 tons (2,000 lbs.) of tailings, producing bullion having estimated gross value of $1,000; sundry revenue, $80. Total, $8,870. Working expenses, $8,714; profit, $156. There has been expended during month on development, $2,870.

The bill granting to the Sumas Development Company the land comprised in Sumas Lake, B.C., has been approved by the Dominion Government. The grant is made in consideration of the company's building a dyke along the Fraser River to keep its waters from overflowing the Sumas prairie. The dyke is to be completed by May 1, 1907, and in order to complete it by that time the work must be rushed. The district to be dyked lies between the boundary line between the State of Washington and British Columbia and the Fraser River, and comprises an area of thirty thousand acres, including the land in the Sumas Lake. The lake contains eight thousand acres. It is one of the largest and finest section of agricultural land in British Columbia, but is subject to yearly overflows of the Fraser River, which at present renders it unfit for cultivation.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Dominion Iron & Steel Company will probably erect several more open hearth furnaces. At present there are ten, of which nine are in operation.

D. Thompson, in the grocery line at Burrett's Rapids, Ont., since 1902, is reported insolvent. He was previously a farmer and began business with little capital and less experience..

Arrangements are being made for the consolidation of the Tremont, Strathmore and Barbara mining properties, situated in Grenwood, B.C., and their development by a Chicago syndicate.

The work of enlarging the Granby smelter is now almost completed. The eight furnaces are expected to begin reducing ore shortly at the rate of 2,700 tons per day.

Hamilton City Council has granted to the Canadian District Heating Company, of that city, a franchise for twenty years authorizing it to supply heat, light and power.

The New York Times reports a combination of street-car building companies in the United States, the capitalization being $54,500,000. The J. C. Brill Co., of Philadelphia, representing the American Car Company and the John Stephenson Company, is prominent in the amalgamation.

The sales of land by the Canada Northwest Land Company during the month of July were 25,880 acres, which sold for $151,000, compare with 6,800 acres for $43,000 in that month of last year. The C.P.R. Land Department during the same month sold 58,477 acres for $304,795.

The Lancaster Syndicate, London, England, announces that the purchase of the Bruce Mines properties has been completed, and an Ontario charter is being applied for. It is expected that the task of pumping out the mines will be embarked upon very shortly, and as soon as they are in condition for taking out the ore a smelter will be located there.

The Toronto and York Radial Company has at length secured permission from the Etobicoke Council for the extension of its line from Long Branch to the western boundary of that township. The terms of the company's franchise also are extended for twenty-five years. It is hoped that the extension of the line to Oakville will be completed as far as Port Credit this Fall.

A report from the Soo says that the Lake Superior Corporation will make efforts to get its supply of bessemer ore in Canada, and will develop the Josephine mine, which is owned by the company, and arrangements will also be made with interests holding what are believed to be bessemer properties, by which the company will be able to have development work done in the properties, with a view of discovering in what quantities and of what quality ore can be found.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

OSBORNE & FRANCIS,

54 King Street West, Toronto.

Mercantile Summary.

A company has been formed in Calgary under the title of the Portland Cement Company, with a capital of $400,000, to manufacture cement in Calgary.

Two new C.P.R. steamers will be launched in October or November, and they will bear the names of "Empress of Britain" and "Empress of Ireland," instead of those previously announced.

The Robb Engineering Company, Amherst, N.S., has received the following orders during the past few days: A 100 horse-power engine for James A. Ogilvy & Sons, Montreal; a large steel smoke stack for the City of Calgary; a 130 horse-power Robb-Mumford boiler for the Dominion Iron & Steel Company; two 200 horse-power Robb-Mumford boilers for the Cumberland Railway and Coal Company, and two 80 horse-power return tubular boilers for James Ballantine & Co., Montreal.

An expert investigation is to be made into the character and extent of zinc deposits of British Columbia. The points to be determined are briefly as follows: (1) Examination of the present development of mines and approximate determination of tonnage of ore immediately available; occurrence and character of the ore and future prospects, together with cost of mining; (2) examination of present methods of milling; (3) investigation of adaptability of the ores to the new methods, concentrates, magnetic, electrostatic, and so forth; (4) study of conditions affecting marketing of concentrates, including question of smelting in provinces or elsewhere in Canada; (5) investigation of the possibility of utilization of zinc ore with silver content.

According to a Blue-book just issued by the British Government, the net tonnage of British vessels entering British ports in 1904 amounted to 34,558,656, as compared with 34,349,028 in 1903 and 32,302,436 in 1902. The tonnage figures for foreign vessels entered were 19,260,018 in 1904, 18,166,104 in 1903, and 17,317,681 in 1902. The return of vessels trading with the principal ports brings out some interesting facts. Dover, for instance, is rapidly going ahead as a port of call. In 1902 the tonnage of vessels entered was 986,908, and in 1903 951,662, while in 1904 it rose to 1,767,300. On the other hand, London shows a decrease. the figures being for 1902 10,179,023, for 1903 10,958,739, and for 1904 10,788,212. The trade with Liverpool exhibits a slight increase, last year the tonnage being 7,986,584, as compared with 7,817,050 in the previous year, and 6,843,200 in 1902. Southampton, like Dover, is a growing port. Last year the tonnage entered amounted to 2,128,379, a considerable increase over 1,689,525 in 1902. It is ahead of Glasgow, which only shows a tonnage of 1,566,478, this amount being a decrease on that shown in 1902 but an increase on that of 1903.

Mercantile Summary.

D. L. Holden will establish a windmill and power-pump factory at Whitby, Ontario.

The Consumers' Gas Company has begun work on a new $50,000 retort in Toronto.

Mr. F. E. Robson is about to open a factory in Hamilton, Ontario, for the manufacture of hardware.

The Canadian Northern Railway calls for tenders for the erection of a station and roundhouse at Edmonton.

The Dominion Automobile Company, Limited, Toronto, has been granted a Dominion charter. Its capital stock authorized is $100,000. A. H. Beaton and C. L. Wilson, of Toronto, are among the members.

The Cornwall Paper Manufacturing Company held their annual general meeting on the 11th inst., and elected officers as follows: M. P. Davis, Ottawa; S. Greenwood, Colonel R. R. McLennan, J. A. Cameron. R. J. Pitts, C. P. Deruchie, E. H. Brown.

The Newfoundland Government is about to lay a new cable between Port au Basques, on the west coast of that colony, and Canso, N.S. A cable is also to be laid from Canso by the Commercial Cable Company to Waterville, Ireland.

The Sickerton Oil Company, drilling in Moore Township, near the River St. Clair, struck a well the other day that is reported to make a splendid show of oil and gas. This is the second oil well in this new district, and is to the north of the first well. It is estimated that the well is good for forty barrels a day.

The New Ontario Ores Reduction Company, with a capital of $500,000, has been granted a charter. The prime movers of the enterprise are Mr. A. D. B. Van Zandt, of Detroit, and Mr. Alf. C. Garde. The company intends to prospect for, develop, operate and manage gold, silver, copper, iron and other mines, also to amalgamate and treat the ores extracted therefrom. It contemplates establishing a large plant with machinery permitting an output of 160 tons per day. Four towns are being considered for headquarters — Toronto, North Bay, Cobalt and Sudbury.

Several inquiries have been received from foreign firms wishing to purchase Canadian ores direct, especially zinc, chrome, nickel, cobalt, asbestos, mica, phosphate, coal and corundum. Among them are the following: Messrs. Armand & Co., Paris, are willing to purchase copper; M. de Rosenorn, Bordeaux, would like to buy Canadian phosphate; Edmond Gersenberger, Liege, would be willing to purchase ferro-silicon containing 35 per cent. of silver; F. Pradez, Liege, would like to buy direct zinc and lead ores; Leon Deugmond, Brussels, inquiring about mica deposits; D. Carnegie, Hadfield Steel Foundry Co., Sheffield, for corundum.

THE UNITED STATES FIDELITY AND GUARANTY Co.

Debentures of the City of Guelph

FOR SALE

Sealed tenders addressed to Richard Mitchell, City Clerk, Guelph, will be received up to and inclusive of Monday, 21st day of August, 1905, until one o'clock p. m., for the purchase of $103,000 in all of Debentures of the City of Guelph, issued as follows:

$48,000, under By-law to provide for the subscription by the City of Guelph for $48,000 of additional in the Capital Stock of the Guelph Radial Railway and for such purpose to borrow upon Debentures, issued under the authority of the Guelph Radial Railway Act, the sum of $48,000, to be applied to pay the existing Bonds of the Company.

$55,000, under By-law to provide for the extension of the City Gas Works. Confirmed by Local Legislature.

These Debentures will be repayable at the end of 30 years and will bear interest as follows: $48,000, 4½ per cent. and $55,000, 4½ per cent., all payable half-yearly.

The highest or any tender not necessarily accepted. Further information will be furnished on application to

JOHN NEWSTEAD,
Chairman of Finance Committee.

Debentures For Sale.

The undersigned is prepared to receive offers for the purchase of debentures of the undermentioned Drainage Districts and of the Central Judicial District, all in the Province of Manitoba. The debentures of the Drainage Districts are guaranteed by the Province and issued under the provisions of "The Land Drainage Act." All the debentures are to be in denominations of $1,000 each and payable at the dates and times set forth below, and bear interest at the rate of four per centum per annum, payable half-yearly at the Union Bank of Canada, Montreal,

Drainage District No. 3....	$ 10,455 00
" " No 14...	100,632.00
Central Judicial District....	25,000.00

The Debentures of the Drainage Districts will be dated September 1st, 1905, those of Drainage District No. 3 maturing September 1st, 1930, and of Drainage District No. 14, September 1st, 1935. The debentures of the Central Judicial District mature on the 1st day of January, 1924.

All offers must be addressed to the undersigned marked "Tenders for Debentures" and must reach this office not later than Saturday, the 26th day of August, 1905.

Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.

Factory at BRANTFORD.

Mercantile Summary.

R. J. Purcell, of Grand Forks, and others have formed a company under the name of the Brandon, Devil's Lake, and Southern Railway Company, to build a line from Dakoka into Manitoba.

Successful negotiations for a new direct line of steamships between Quebec and England seems now to have been completed, and it is likely that the Quebec Transportation Company will have steamers running within six weeks.

The worst fire that Fredericton, N.B., has seen for very many years took place last week in the Aberdeen Saw Mill, owned by Donald Fraser & Sons. The mill was destroyed, together with some 6,000,000 or 8,000,000 feet of seasoned lumber. The loss is placed at $200,000, partially insured. It is not certain yet whether the mill will be rebuilt.

The Coleman & Bucke Consolidated Cobalt-Silver Mining Company, Limited, capital $1,000,000, has received an Ontario charter. It will carry on a general mining, milling, reduction and development business in the Temiskaming district. Hon. F. R. Latchford, formerly Minister of Public Works for Ontario, is among the charter members.

For the past twenty years Pierre Beaudet, of Gentilly, Quebec, has traded in various lines, but with indifferent success, and has always been reported more or less slow in settlements. Originally he was a baker, but of late years he has kept a general store, as well as trading in various lines. Several weeks ago an action was instituted against him for some $900 by a Montreal creditor, and later he was reported as trying to compromise at 35 cents. Now his estate is in the assignee's hands.

Two rich strikes are reported from the Slocan, B.C. On the Hampton group, situated at the head of Springer Creek, and owned by N. F. McNaught, a foot of sulphide ore has been uncovered, giving returns, it is said, of 3,000 ounces in silver per ton. On the Ottawa, on the same creek, the main ore chute has been struck in the No. 5 drift, and three feet of mineral exposed. One foot of it carrying much argentite assays 2,000 ounces silver, while the balance is second-class stuff. Mining circles are reported to be quite agitated over the discoveries.

The following is a list of patents granted to Canadian inventors in Canada and the United States: Canada—94,551 Chas. Bristow, Christchurch, N.Z., seed sowers; 94,561, Thomas Hill, Joggins Mines, N.S., cheese cutter; 94,611 Thomas F. Van Luven, Collins Bay, Ontario, vehicle bearing; 94,648, Emilien A. Manny, Beauharnois, Quebec, canal lock. United States—793,642, James Drain, Peterboro, Ontario, filing case; 794,795, Gerald S. Fogarty, Montreal, necktie holder; 794,696, Philias Belle. Plymouth Union Vt., U.S.A., process for making pasted leather stock; 795,502, Eugene Gareau, Montreal, spring heel for shoes; 796,371, Messrs. Thomson & Despond, Toronto, wrench.

OUR TRUCKS are fitted with rubber tires that do not come off. . . . .

AGENTS WANTED in every unrepresented District in Canada.

The Canadian Pacific Railway Company

Dividends for the half-year ended 30th June, 1905, have been declared as follows:—

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

Warrants for the Common Stock dividend will be mailed on or about October 2nd, to Shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Monday, 2nd Oct., to Shareholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London, S. W.

The Common Stock Transfer Books will close in Montreal, New York and London at 3 p.m. on Friday, September 1st. The Preference Stock Books will also close at 3 p.m. on Friday, September 1st. All books will be re-opened on Thursday, October 5th.

By order of the Board.

CHARLES DRINKWATER, Secretary,
Montreal, 14th August, 1905.

Harris Shriaberg, of Montreal, doing business since the fall of 1902, under the style of the British Skirt Manufacturing Co., recently advised his creditors of his inability to meet his engagements. Last week a demand in insolvency was served upon him. and he has assigned. His liabilities are stated at about $10,000, with apparent assets of about $8,000.

Active mining operations are going on in the County of Hastings, Ontario. The Craig Gold Mine, near Bannockburn, is doing well, some 50 men being employed there. The Star of the East Mine, near Cloyne, is being developed with good results. The main shaft is sunk 180 feet into the rock, and there are three drifts from this shaft. At present a ten-stamp mill is in operation, which is continually kept busy. The Golden Fleece Mine, situated near Flinton, has recently been secured by a Mr. Cowan, who is developing it, and claims that it is rich in mineral deposits.

The Dominion Government's bounty on steel rails has been ordered to be discontinued by Order-in-Council on the ground that it had not been its intention to pay a bonus on them as well as on the pig iron from which they were made.

The Vancouver, Westminster and Yukon Railway Company are about to build a 2,000 feet bridge across the second narrows on the north shore of Burrard Inlet.

An offer of 40 cents on the dollar is made by D. Coulombe, general dealer, Villeroy, Quebec. He was formerly a farmer in a small way, and only began storekeeping last year.

The British Columbia Electric Railway Company is about to start work on the construction of an electric street car system in North Vancouver, as well as a power and light plant.

An offer of compromise at the rate of 25 cents on the dollar is being made by Joseph Goldenburg, clothing dealer, Dalhousie, N.B. His liabilities are figured at about $2,000.

Extensive indulgence is also asked for by M. H. Reddy, doing a general business at Port Felix, N.S., a poor fishing season being assigned as the reason for his thus approaching his creditors.

Formerly a farm laborer, D. Thompson, of Burritt's Rapids, Ontario, two or three years ago started storekeeping in the grocery line, only to meet with disaster. He has assigned to A. E. Baker.

R. B. Taylor has been in the carriage-making business at Sackville, N.B., for over 20 years. He has never accomplished much in the way of success, and has always been more or less close run financially. He has now assigned owing about $2,500.

An assignment was recently made by J. R. Johnson, in a small tailoring way, at Kingston, Ontario. His liabilities are about $1,700, and at a meeting of creditors held last week the stock was sold back to him at 55 cents in the dollar.

About 18 months ago J. D. Mills, of Prescott, Ontario, succeeded to the hardware business of his father-in-law, R. W. Ross, then deceased. Matters have not gone well with him, and recently he was reported as intimating to his creditors that a general extension of time would be necessary, but now his assignment is noted, G. W. Wallace being in charge of the estate.

From Sydney, N.S., we learn that liquidation proceedings have been instituted in the matter of the Cape Breton Brewery Co., Limited, incorporated in 1902, under Nova Scotia laws, with an authorized capital of $25,000. G. E. Farlinger will wind the concern up.

—"A case with which I was connected a few years ago," said Frederick Trevor Hill, the lawyer and novelist," involved some large corporate mortgages, and frequent references were made by the lawyers on both sides to the 'ten-million-dollar mortgage,' and the 'twenty-million-dollar bond issue.' Finally, one of the jurors, a little German barber, couldn't stand it any longer and raised his hand. 'Mr. Judge,' he expostulated, 'if der lawyers will please say von dollar ven dey means a million dollars, dot would make me understands besser. Dose millions! Dey confuses me!"

An extension of time is sought by J. E. Corbett, general merchant, of Harbor au Bouche, in the same province. Mr. Corbett is a member of the Legislature a notary and justice of the peace, and his duties in connection with these various offices have probably interfered with his proper attention to business.

IMPORTANT PULP CASES.

The United States Treasury Department is considering the appeal of the Pulp and Paper Trading Company from the decision of the collector of New York on pulp imported from Canada. The case is one relating to the interpretation of the Dingley bill respecting "dry weight."

The board of general appraisers say the term means dry weight as understood in commerce and not absolutely the dry weight of the material. The question of the weight of moisture in the pulp is a serious one, of course, for the pulp is dutiable at rates varying from one-twelfth to one-fourth of a cent per pound, according to the process of manufacture. The board of appraisers reversed the decision of the collector and sustained the protest, and issued instructions to reliquidate the entry on the basis of the dry air weight shown by the test for the importer, viz., 54.89 per cent.

Another case being considered is the order to collect countervailing duties at Port Huron on Canadian pulp of 25 cents per cord, in addition to the regular duty which is made under the Dingley bill.

The trouble began when cargoes of pulp were brought to the United States which were manufactured partly from wood cut from crown lands and partly from wood cut from other lands in the Dominion. The Treasury Department claims that it is "up to" the importer to show just how much come from the crown lands and how much from other lands.

Mr. Thomas Southworth, of the Ontario bureau of forestry, says the action of the United States Government would be all right if applied only to wood exported from Quebec, which Province charges a countervailing duty, but Ontario does not, but prevents the exportation of pulp wood cut on crown lands. Timber cut on private lands is another matter, and beyond the authority of the Ontario Legislature.

* * *

—A board of trade return of the bankruptcies in Great Britain for 1904 show that they numbered 8,631, of which 487 were failures of women. The total liabilities were £12,086,357. The estimated loss to creditors was £9,371,780. The Inspector-General calls attention to the great use made of their wives by bankrupts, the wife being put up as the principal, and the husband assuming the position of manager. He also points out the steady decline in the desire of bankrupts to obtain their discharge. Since 1883 there have been 89,583 adjudications, and only 19,136 applications for discharge. The evils caused by the growing population of undischarged bankrupts have been brought to the attention of the Board of Trade. It must be remembered that a bankrupt can get credit up to £20 without informing the tradesmen that he is a bankrupt.

Regarding Canadian Investments

The "Manitoba Free Press" for February 11th, 1905 contained the following reference:—

"Millions of dollars of Eastern money are "invested on Mortgage Security in the "West for the simple reason that it has "been found profitable."

All Investments of the Great West Life Assurance Company are made in the West, thus securing for Policyholders unusual advantages in the direction of low premiums and high profit returns.

—The official report of the Minister of Railways of Canada for 1904 shows that the number of steam railways in actual operation in Canada at the close of the fiscal year, June 30, 1904, was 191, including the two Government roads, the Intercolonial and the Prince Edward Island railways. As some of the roads are amalgamated or leased, the total number of controlling companies was 85, not including the Government railways. The number of companies absorbed by amalgamation was 54, and the number of leased lines was 38. The number of miles of completed railway was 19,611, an increase of 534 miles, besides 3,327 miles of sidings. The number of miles laid with steel rails was 19,545, of which 763 miles were double track. The number of miles in operation was 19,431. The paid up capital amounted to $1,186,546,918, an increase of $39,996,149 over the previous year. The gross earnings of the year amounted to $100,219,436, an increase of $4,154,909, and the working expenses aggregated $74,563,162, an increase of $7,081,638, leaving the net earnings $25,656,274, a decrease of $2,926,729. The number of passengers carried was 23,640,765, an increase of 92,023.

Sale of Assets of the Oshawa Wire Fence Company, Limited.

Tenders will be received up to noon of the 30th day of August next, addressed to the undersigned for the purchase of the following assets of the above named Company:—

Parcel No. 1.—Real Estate, including Three Story Brick Factory, having railway siding and centrally located in one of the best manufacturing towns in Canada.

Parcel No. 2.—Patent Rights, Fixed and Movable Machinery, Tools and Office Furniture.

Parcel No. 3.—Partially Manufactured Goods and Raw Material.

No tender necessarily accepted. This offers an excellent opportunity for a profitable investment in a steadily increasing business. Lack of capital the only reason for selling.

Further particulars, terms and conditions of sale, with full description of the several parcels, will be mailed on application, or may be inspected at the Company's Office.

L. K. MURTON,
Secretary of said Company, Oshawa.
Oshawa, July 22nd, 1905.

* * *

—Reports from across the line say that the iron trade generally continues in a very sound and satisfactory condition. The rush in the southern field is over for the present. The demand for billets and shoot bars continued good and prices are higher, with some good business pending in eastern Pennsylvania both for steel and for muck bars. Rail mills are full of work. Some large orders which have been pending have not yet been placed. For some small lots for September some large roads indicated a readiness to pay a moderate premium. The condition of the structural trade is well illustrated by the fact that United States Steel is building a mill for rolling structural shapes. Agricultural implement makers have entered into additional season's contracts for steel bars. Plate trade is looking forward to a heavy additional tonnage for the steel cars ordered by Pennsylvania lines west of Pittsburg.

* * *

—Don't turn up your nose at your neighbor. You have enough dirt on your own doorstep without getting out your magnifying-glass to count the specks you can see on his entrance from your lofty position. The man who thanks God he is not as other men are, and throws his thumb over his shoulder at his neighbor, is a rascal, even if he is a Mason and a deacon in the church. Look out for the fellow who has a great deal to say of his neighbor's failings. He is throwing dust in the air to hide his own villainy. "He that despiseth his neighbor sinneth." At the bottom of his spite is hatred, and hatred is the mother of murder. The chances are you hate your neighbor because you know at heart he is a better man than you are. This habit of taking a fling at the man over the way does not always take the form of saying nasty things about him. It may keep you from being neighborly and decent to him; it may make you stick your tongue in your cheek when his name is mentioned. For your own sake, and for the sake of all whom you want to think anything of you, get away from that mean, dirty, unmanly habit of esteeming lightly those around you. Get to Paul's plane of "thinking every man upon the things of others."—Solomon's advice in the Shoe and Leather Journal.

TORONTO MARKETS.

Toronto, Aug. 17th, 1905.

Chemicals, Drugs, Etc.—The local situation, so far as drugs are concerned, remains much as before, and there are few features of importance to note. Opium and quinine and such staples are experiencing a somewhat quiet movement. Carbolic acid also is easier. New York reports speak of a somewhat dull demand. In England, according to advices just received from Manchester the trade in chemicals is fairly brisk, especially for export.

Dry Goods.—Trade latterly has possessed something of its usual dog-days quietness, though it is not enough to be complained of. The staples retain their firmness of price and there is apparently not the slightest tendency towards a contrary direction. Payments recently have been satisfactorily prompt.

Flour and Grain.—The tendency in the market for Ontario flour is distinctly easier. Stocks in hand are fairly large, while much of it was ground before the recent fall in wheat prices. English buyers claim that prices here even now are too high for export. Manitoba flour has also declined. Bran is weak but shorts on the other hand fetch $17 to $19 with no trouble, and the demand for feeding purposes continues heavy. Rolled oats remain much as before. Wheat has fallen considerably during the last few days, and the good crop prospects in both Ontario and Manitoba accentuate the easy tone of the market. Oats have declined again on account of the fall in values in England. Barley is in light demand and prices are easier.

Fruits and Vegetables. — Heavy arrivals of all sorts of fruits have been the feature this week, and prices in some lines have been easier. Berries are lower as a rule and so are domestic potatoes. We quote prices as follows:—Raspberries, 5 to 9c.; Lawton, 7 to 9c.; red currants, basket, 60 to 75c.; plums, basket, 30 to 75c.; peaches, 25 to 75c.; pears, 20 to 60c.; California peaches, case, $1.25; California plums, $1.75 to $2.25; pears, $3.50 to $4; Georgia peaches, $2.25 to $2.50; Cantaloupes, crate, $1.25 to $2; Cantaloupes, basket, 75c.; watermelons, each, 30 to 35c.; bananas, bunch, $1.25 to $2; bananas, red, $2.50; lemons, crate, $6 to $6.50; oranges, crate, $4.75 to $5.50; tomatoes, basket, 15 to 25c.; cucumbers, basket, 10 to 15c.; potatoes, bushel, 60c.; beans, basket, 20c.; cabbages, barrel, $1 to $1.25; celery, dozen, 50c.; Spanish onions, case, $2.50; corn, 7 to 8c..

Hardware.—Though just now business is a little quieter, taken on the whole it has been highly satisfactory in all lines. Price changes keep few and far between. Seasonable articles are in good demand. In metals the movement is quite fair for this time of the year.

Hides and Skins.—Country hides have advanced ¼c. and the feeling is very firm. The supply is still somewhat scanty. Tallow is quiet. Trade in leather is gaining more briskness, as it is becoming realized that prices are not likely to recede from the recent advance.

Paints, Oils, Etc.—Linseed oil is easier, in sympathy with advices from across the Atlantic. Turpentine, which fell a few cents during the month, has now steadied itself around 87c. The demand seems to be becoming better. Paints are firmer, as they feel the effect of the recent increase in the duty on white lead. Glass is very firm.

Provisions.—Very little increase, if any, has taken place in the receipts of butter and as the demand for export is very brisk the market is strong. A slightly easier tone exists in the cheese market. Not enough strictly new laid eggs are coming into the market to meet the supply. Hops are quiet at 24 to 27c. for old crop, while reports as to the new speak very favorably. Another advance has taken place in hogs, and the prices of products have gone up accordingly.

Seeds.—Owing to the new Acts affecting the purity of seeds coming into force so shortly there is as yet considerable uncertainty regarding the marketing of seeds, as buyers are more than usually cautious. Then, too, crops are generally speaking so good that importers in England, are in the mood to await developments.

MONTREAL MARKETS.

Montreal, August 16th, 1905.

Ashes.—Business doing is of a limited extent, and stock in store is very light. Some moderate lots of American ashes are being marketed here, and quotations for first quality of pots range at about $5.02½ to $5.07½; seconds, $4.50 to $4.55. A small lot of three barrels of pearls shipped to Antwerp, is the first transaction reported in these sorts for some weeks. A nominal figure for No. 1 pearls is $7 to $7.25.

Dairy Products. — The receipts of cheese last week were 100,055 boxes, but the shipments show a falling off, having been 61,536 boxes, as against 98,255 boxes for the corresponding week a year ago. Butter shipments were fairly liberal, reaching 34,487 packages, the

total figures to date are 295,095 packages, just about 90,000 more than this time a year ago. Butter values are rather firmer than a week ago, choice dairy being held locally at 22¼ to 22½c., and good to fine at 21½ to 22c. Fine Ontario cheese is quoted at 11c., and fine Quebec at 10⅝ to 10¾c.

Cements and Firebricks.—A fair aggregate of business is reported for the season, and prices rule steady. We quote Belgium cements at $1.80 to $2; English, $1.90 to $2; American and Canadian, $2.30 to $2.40; firebricks, $17 to $22 per thousand.

Established 1882
THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST,

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

THE
EMPLOYERS' LIABILITY ASSURANCE CORPORATION,
LIMITED
MONTREAL - - TORONTO

week as regards the general trade situation will still apply, and a generally slack time prevails in wholesale circles. City retail trade is also seasonably dull, but collections are comparatively good. Advices received from New York today would indicate an advance of about 10 per cent. in cotton. English cotton manufacturers are said to be full of orders, and delayed deliveries are probable.

Groceries.—The sugar market is a steady one, with continued good demand, though there is hardly the remarkably brisk buying of ten days ago, and the refineries are now getting a little ahead again. Values are steady at $5 for standard granulated, and $4.50 the lowest in yellows. Molasses dull and easy at 35c. in a jobbing way. Evaporated apples have been advanced, owing to large buying for Europe, and 8½c. is now the jobbing quotation. Currants are firm, ¼ to ½c. dearer, owing to recent legislation in Greece. New Valencia raisins, to arrive September, are quoted at 6¼c. for fine offstalk; selected 6¾c.; layers, 7c. Figs, to arrive October, are quoted 9c. in 10 pound boxes for three crown. Prices for new pack of corn and tomatoes are still unfixed; clover-leaf salmon is quoted at $1.57½ for talls, and $1.70 for flats in from 1 to 4 case lots, larger orders 2½c. less.

Hides.—Light supplies of beef hides are still the rule, and while 11c. is the general quotation for No. 1, in some cases dealers are paying a shade more. Lamb skins are firmer at 60 to 70c. each.

Leather.—The high prices are keeping boot and shoe manufacturer from buying except for pressing needs, but they have really little stock ahead, and will have to accept the situation sooner or later. For No. 2 manufacturers sole 25c. is the general figure, and 29 to 30c. for slaughter. Pebble is still further advanced, owing to the great scarcity of stock.

Metals and Hardware.—The continued advance in ingot tin appears to be checked, and spot quotations are a little easier at 35½ to 36c. Copper is much firmer at 17 to 17½c. in an ordinary way, and owing to the great scarcity of casting copper, and the very strong market, all makers of brass goods are putting up their prices. Lead is strong at $3.75 to $3.85; spelter, $6.25 to $6.50; antimony, 14¼ to 14½c. In the prices of iron and iron manufactures there is no recent change.

Oils, Paints and Glass.—The movement in these lines is a slow one, as is to be expected at this time of the year, but anticipations are held of an active fall business. In values no marked changes are to be noted. A rather sagging market is reported in linseed oil, with quotations for raw at 49 to 50c.; boiled, 52 to 53c. Turpentine is fairly steady at 88c. Pure white lead is quoted at $5.25, and putty at $1.40 in bulk. Glass is really scarce, and though the prolonged strike in Belgium is off, supplies are coming forward very slowly. Quotations are still at $3.75 per 100 feet first break, and some profess to get $4.00 for small lots.

Wool.—There is very little buying on the part of mill men at present, but prices hold firm. We quote Capes at from 18½ to 23c.; fine B. A. scoured, 40 to 44c.; North-West, 19 to 21½c.; pulled domestic, 26 to 31c.; washed fleece 26 to 28c.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular, dated August 12, 1905, says: The financial situation, taken as a whole, has shown no appreciable change during the week. As anticipated, the general market evinced distinct irregularity, fluctuations, except in a number of specialties, ruling moderately active within comparatively narrow ranges. At times there were evidences of profit-taking by some of the larger professional operators, who, however, supported the market in other directions while selling their own accumulations. This class of stocks, however, has now little more than sentimental connection with the speculative market; they are not themselves the subject of operations for either account, their floating supply, on the one hand, being so limited that short operations are recognized to be exceedingly dangerous, while, on the other hand, immediate and prospective dividend distributions seem so fully discounted by current quotations they furnish slight encouragement for operations for a rise. This in turn is gradually concentrating speculative attention upon the lower-priced stocks, particularly the industrials; and it seems safe to assume that in any activity that may develop after the summer vacation period, the industrial stocks will be particularly prominent. The Government's monthly crop report fully confirmed anticipations; and the fact that it exerted no greater influence on prices is readily explained by Wall Street's almost invariable policy of discounting future events. Information has been so generally available, showing a brilliant grain harvest outlook, that the character of the Government's statement, if it were to influence the stock market at all, must have been disappointing.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	per day in Increase of Assets.

THE LIVE STOCK TRADE.

Apparently there is not much improvement in the state of the live stock markets in Montreal or Toronto. Trade is fair, but would be distinctly brisker with better qualities of animals offered. These, however, do not seem to be forthcoming. Considering the comparatively poor grades, however, the prices realized are fairly satisfactory. For really inferior stock the demand has been altogether slack. This applies particularly to exporters the call for good specimens of which is quite as good as can be expected. At the Toronto Junction yards, it may be mentioned that many of the cattle received have been of a somewhat better grade, a feature which is indicated by the slightly better prices.

A large proportion of the butchers' cattle offered in the Toronto sheds this week were only medium, and many were no better than common; naturally these have shown great slowness in selling, the final result being an easing off in quotations.

Quite a brisk demand developed for the better kinds of stockers and feeders, and quotations for these ruled firm. Milch cows remain unchanged, and steady for good qualities at $30 to $50 each. The trade in calves has also been fairly good.

Of the offerings of sheep and lambs everything was sold out early at remunerative prices.

The prices of hogs remain high, though an easier tendency developed on Tuesday. Selected sold at $7.10, and the better class of mediums, including lights and fat porkers, at $6.85.

The quotations ruling on the Toronto market this week may be summarized as follows:

Export cattle, choice, $4.50 to $5; do., good to medium, $4.20 to $4.50; do., others, $4 to $4.30; bulls, $3.50 to $4; cows, $3 to $3.75; butchers', picked, $4.10 to $4.35; good to choice, $3.90 to $4; fair to good, $3.40 to $3.80; do., common, $2.50 to $3.25; bulls, $2.50 to $3.50; feeders, $3.60 to $4; do, medium, $3.30 to $3.60; choice stockers, $3.50 to $3.80; do., rough to common, $2.50 to $3; bulls, $1.75 to $2.50; export ewes, per cwt., $4 to $4.15; do., bucks, per cwt., $3 to $3.40; do., culls, each, $3 to $4; spring lambs, each, $5.25 to $6; calves, per lb., 3½ to 5½c.; do., each, $2 to $10.

While some slight improvement has recently set in in the demand for cattle in the English markets, they still retain their dull tone, dealers only buying from hand to mouth. This may be due to hot weather at last reports. For average good beef the prevailing buyers' quotation has been 10c. Canadian sheep have been in rather heavy stock, and prices have taken a wide range. A report from London the other day stated that Canadian beef was selling with some degree of readiness at 11 to 11½c. per lb., while Canadian sheep were realizing 11 1-4 to 12c. Some of the best of the American bullocks fetched 12c. the pound.

⁂

THE TEMISKAMING RAILWAY.

An announcement of much public interest has been made on behalf of the Temiskaming Railway Commission. That body, as is known, some time ago caused exploration to be made northward from the present terminus of the Temiskaming road to a point on the proposed line of the Grand Trunk Pacific. This has been done, and now comes the announcement that the line will soon be located to its proposed junction with the G.T.P., a distance of about 275 miles. Fine timber land has been found, as well as an extensive clay belt, and the engineering difficulties of the route are reported to be not difficult. By next year 200 miles of road, it is expected, will have been completed. About 113 are now being operated by the commission. They report traffic over the completed section to greatly exceed in volume their expectations. And tourist travel, too, has proved unexpectedly large. It is of significance to Northern Ontario to have this favorable report about an enterprise and a district of the country which have not always received the consideration their importance warrants.

* * *

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian Banks for July, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES	July, 1905.	June, 1905.
Capital authorized	$100,246,666	$100,746,666
Capital paid up................	82,756,410	82.199.900

Greatest amount notes in circulation during month	63.516,010	62,183.720
Loans to directors or their firms........	8,680,204	8,708,649

The purchase by the Bank of Montreal of the assets of the People's Bank of Halifax has now been completed, and the name of the latter bank accordingly disappears from the list. The Home Bank of Canada has, however, sent in its first return, so that the number of banks reporting to the Government remains unchanged. The totals of capital subscribed and paid up have increased by $520,000 and $557,000 respectively, the only changes of any moment amongst the older banks being the increases in the figures of the Imperial Bank of Canada.

Notes in circulation have followed the usual course in showing a slight reduction for the month. The circulation account of the People's Bank of Halifax has been transferred to the Bank of Montreal, thus increasing the amount shown as outstanding by the latter bank to $9,072,000 as against $8,359,000 last month.

Balances due by the banks to the Dominion Government have fallen off $2,633,000, while those due to Provincial Governments have increased by $874,000, both changes being doubtless due in great measure to the payment of provincial subsidies.

Public deposits in Canada have increased during the month by $5,536,000, as compared with an increase of $7,171,000 in the same month last year, and $3,203,000 in 1903. For 31st July in each of the three years the figures are as follows:

	Demand.	Notice.	Total.
1903	$110,543,000	$271,597,000	$382,140,000
1904	118,332,000	312,713,000	431,045,000
1905	137,597,000	336,506,000	474,103,000

Deposits outside Canada continue to grow, the total for July being $48,477,000, an increase of $4,400,000 for the month, and of $16,000,000 during the year. In July, 1904, the total outside deposits were only $32,643,0000, so that during the twelve months they have increased by about 50 per cent. The Bank of Montreal and the Royal Bank of Canada are responsible for most of the increase.

Specie and Dominion notes held show an increase of nearly $2,000,000 during the month, and of about $6,000,000 during the year. While the banks as a whole carry ample cash reserves to meet any sudden demands which are at all likely to be made on them, there are, as we took occasion to point out a month or two ago, certain banks which allow their cash to remain at an unduly low level, depending apparently upon the larger and stronger banks to assist them in case of need. If a small bank chooses to keep a portion of its reserves in the shape of balances with a large, strong bank, little criticism can be offered. The larger bank can measure the responsibility which it is taking, and provide accordingly. But a bank which presumes on the feeling which undoubtedly exists that for the credit of the Canadian Banking System no solvent Canadian bank should be allowed to suspend payment ought to be given to understand that if by reason of its neglect to maintain proper reserves it should some day be driven to ask for help, it will probably be assisted, not to continue in business, but to go into "voluntary" liquidation. When banks like the Bank of Montreal, the Bank of Nova Scotia, the Bank of Toronto, the Dominion Bank, the Imperial Bank and others, which carry a good line of securities and call loans, consider it advisable to maintain cash reserves of from 8 to 16 per cent. of their total liabilities to the public, surely it cannot be wise for smaller banks o be satisfied with cash reserves of from 2 to 5 or per cent.

Balances due from British and foreign agents have been reduced by about $4,000,000, and this amount, with some $6,000,000 more, has been put into call and short loans, the chief increase being in those outside Canada, which have increased by $8,000,000. Two banks, the Bank of Montreal and the Canadian Bank of Commerce, are chiefly responsible, the call and short loans of the former outside Canada having increased by $8,000,000 and those of the latter by $1,500,000. In each case there is a corresponding decrease in the balances due from agents in Great Britain, so that both of these banks have apparently thought it desirable to prepare for autumn demands by transferring funds from London to New York. The increase in call and short loans is somewhat unusual at this time of the year. They showed a reduction of $2,133,000 in July, 1904, and of $2,123,000 in July, 1903. The total now is $94,874,000, as compared with $71,635,000 in July, 1904, and $78,263,000 in July, 1903.

Current loans, both in Canada and elsewhere, have followed the usual course in remaining practically stationary. Current loans in Canada now stand at $438,069,000, as against $414,096,000 in July, 1904, and $363,586,000 in July, 1903. In view of the large amount of money being spent, or about to be spent, in railway and other development, and of the large crop in the North-West, it seems probable that the next three or four months will see a considerable increase, with, no doubt, a corresponding decrease in call and short loans.

One of the most significant indications of the prosperity which the banks have enjoyed during the last few years is the reduction in "lock-ups," as is very clearly shown by the following figures:

July.	Overdue Debts.	Real Estate other than Bank Premises.	Mortgages.
1905	$1,699,000	$ 767,000	$530,000
1903	2,199,000	835,000	724,000
1901	1,957,000	907,000	664,000
1899	2,160,000	1,766,000	576,000
1897	3,591,000	2,043,000	506,000

In 1897 the total assets of the banks amounted to $338,244,000, and of this sum $6,140,000, or 1.8 per cent., was shown under the three headings given above. In 1905 the total assets are $766,318,000, but the amount of the "lock-ups" is now only $2,996,000, about .4 per cent. But it must be remembered that La Banque du Peuple was in process of liquidation in 1897, so that the figures for that year were not altogether normal.

Bank premises, on the other hand, have increased from $5,638,000 in 1897 to $10,577,000 in 1905, but in view of the rapid extension of branches during the last few years, and the immense amount of building which the banks have thought it necessary to do, the increase cannot be considered excessive. Different banks, however, deal with their Bank Premises accounts in different ways. The Bank of Montreal, which, as everyone knows, has recently spent a very large amount on its principal building in Montreal, and owns fine buildings in many parts of the country, shows no increase since 1897. The trifling amount of $600,000 at which all its premises have for some years been carried is only a fraction of the real value of its buildings. The Canadian Bank of Commerce, which has been one of the most active in the establishment of new branches, and which took over in January, 1901, from the Bank of British Columbia premises valued in their last statement at $150,000, has increased its figures from $759,000 to $1,000,000. In its Profit and Loss statement each year this bank appropriates a considerable sum on account of Bank Premises, while the Bank of Montreal does its writing off before carrying anything to profits. Among the other larger banks which show increases of not more than 100 per cent. are the Merchants Bank of Canada, $559,000 to $894,000; the Bank of Toronto, $200,000 to $365,000, and the Dominion Bank, $263,000 to $440,000. On the other hand, the account of the Bank of Nova Scotia has grown from $50,000 to $247,000 (still an absurdly small figure), the Bank of British North America from $350,000 to $865,000, the Eastern Townships Bank from $120,000 to $413,000, the Union Bank of Canada from $200,000 to $1,044,000, the Royal Bank of Canada from $60,000 to $432,000, and the Imperial Bank of Canada from $311,000 to $715,000. But with all the increases only 1.3 per cent. of the total assets of the banks is in their Bank Premises accounts, as compared with 1.6 per cent. in 1897.

* * *

PROGRESS ON THE GRAND TRUNK PACIFIC.

Something like definite progress is reported respecting the Grand Trunk Pacific Railway. We hear from Montreal that contracts for the construction of the line from Winnipeg to the Pacific coast and also of the branch lines from Fort William to Lake Superior Junction, have been awarded to the National Construction Company. This corporation is composed of prominent Canadian capitalists, who will proceed, we presume, much as the North American Construction Company did with the building of the C.P.R. Specifications for the first hundred miles of the Lake Superior branch of the G.T.P. show prospects of very heavy work, for there are two thousand acres of clearing, 300,000 yards of solid rock and 250,000 yards of loose rock. In addition there are said to be six million yards of earthwork, or sixty thousand per mile. This piece of work has been already financed, the bond issue of $30,000 a mile being guaranteed by the Grand Trunk Railway Company, and there being an additional land grant from the Ontario Government.

* * *

THE METRIC SYSTEM AGAIN.

Instead of diminishing with the increasing fervor of its adherents, the opposition to the compulsory adoption of the metric system in the British Isles would appear to be actually becoming stronger. And —which, by the way, is an item to be remembered by those among us who characterize criticism of the metric system as a sign of fossil-like conservatism—its opponents assuredly include in their number a large proportion of up-to-date men engaged largely in enterprises requiring weighing and measuring as prime elements, besides several who hold a high place in science. The British Weights and Measures Association, a body which does its best to crystallize the objections to the proposed system, does not enter the lists on scientific grounds. On the other hand it admits the usefulness of the metric system in scientific calculations, and indeed in commercial transactions as well. The association contends, however, that the metric is not so useful or convenient as the ordinary English system already in use. The reasons for this we may quote from the association's report recently published:

"This English system has not been changed since the time of Elizabeth. Established in England, it became established in the English colonies. Hence it rules in the United States, in Canada, in Australasia, etc. The English peoples have only one yard and one pound. Wellington, Washington and Westminster measure by the same identical yard; Montreal, Maritzburg and Melbourne weigh by the same identical pound. The measures of the Russian Empire are based on the English inch, of which the English yard is a multiple. The English yard and English pound are the measures of more people directly concerned in foreign commerce than are the weights and measures of the metrical system."

The upholders of the metric system, it seems to us, falsify the premises somewhat when they base an argument for its universal adoption upon the consideration that the larger proportion of Great Britain's foreign trade is carried on with countries in which it is in force, for a little while ago, when the matter was brought up in Parliament, a member of the British Government pointed out that not more than 42 per cent. of British trade was carried on with such countries.

However, though the use of the metric system is not compulsory in the British Isles, it has been legalized, so that any person thinking it to his advantage to make use of it can do so if he choose. And this is its position also in Canada and the United States.

It is contended by some that since Germany has seen fit to adopt the metric standard of measurement, other nations should justifiably do the same. But the cases are not exactly similar. In the old States of what is now the German Empire, there were no less than twenty-five different kinds of "feet" used in lineal measure. Some sort of uniformity was deemed necessary, and the consequence was the adoption of the metre. In Great Britain, Canada and the United States this uniformity does to a large extent already exist, not only in their own respective territories, but with each other. As the association's report points out, the inch, foot, acre and mile measures are the same in the survey systems of some five hundred million people, and its argument is, why change, when such change would cause an amount of calculation which could be completed scarcely within a couple of generations?

We do not pretend to feel convinced that the adoption compulsorily of the metric system would be attended with such hardships as its opponents suggest, but do realize that the opposition is not only keen and reasoned, but gradually growing in volume. The upshot is a difficult thing to determine; it certainly does not at present, however, look like an easy win for the metricists.

* * *

GREAT BRITAIN'S TRADE.

At the present time of fiscal controversy in the Mother Country the Board of Trade returns for the United Kingdom are looked for with increased interest, more particularly that section of them which treats of the movement and ratio of trade with the colonies and with foreign countries. The following excerpt will serve to set forth the facts for the half-year which ended on June 30th last:

	1905. £	1904. £	1903. £
Imports from:			
Foreign countries	211,832,637	213,429,200	209,169,100
British possessions	61,290,865	58,472,200	51,400,900
Total imp'ts	273,123,502	271,901,400	260,570,000
Exports to:			
Foreign countries	101,863,268	91,006,300	88,204,000
British possessions	53,842,593	53,110,400	54,318,600
Total exp'ts	155,706,221	144,116,700	142,522,600

In other words, there was an appreciable increase in the imports from British possessions and a decrease in those from foreign countries. At the same time, British exports to the colonies stood almost stationary, while those to foreigners showed the large increase of almost eleven millions. Looking at this matter more in detail, it appears that Britain's imports from Canada decreased quite materially, the one item of flour having fallen away to the extent of no less than 50 per cent. In respect of export trade, that to Canada increased slightly. On the other hand, the imports from Australia into the Mother Country rose from £12,839,000 in the first half of 1904 to £15,185,000 in 1905, a satisfactory increase for the Australians, which was due, no doubt, to the improvement in climatic and business conditions in the Commonwealth. Britain's imports from New Zealand showed a particularly large expansion. Those from the United States decreased by something like two and a half millions sterling, while those from Germany increased materially. Shipments from Britain to India rose from £18,822,000 to £20,339,000, while to Cape Colony they fell from £6,243,000 to £4,918,000. To China they increased from £4,009,000 to £6,938,000, and to Japan from £2,094,000 to £4,459,000. Apart from India, the showing of the British exportation list to the colonies and possessions is a disappointing one at a time when that to foreigners made good headway.

* * *

LIFE INSURANCE NOT UNDER QUESTION.

To read some articles in the public press and to hear the comments of some "men on the street," one would imagine that the principles, and, indeed, the whole basis of life insurance, were in the crucible for investigation. Recently things have gone wrong with one or two of the great life insurance companies in the United States, and the cry goes up, "Investigate." But it is not life insurance that is being criticized; it is not the principle that has been at fault, or that is to be investigated; it is the management of a number of men in the business, influential in one city, it is true, but still few. Their methods have been wrong; but the great and inestimable value of life insurance itself remains unshaken.

It must be remembered that as a great financial institution, life insurance is comparatively a new thing. Yet during its lifetime many far-reaching upheavals have taken place in other forms of business. Banks have gone under, loan companies have collapsed with far-reaching disastrous results to those interested. The history of life insurance, considering all things, has been singularly serene, the faulty methods of a few who tried to snatch undue benefit for themselves out of the necessities of others have only had the consequence of bringing to bear a fierce light upon the whole system of life insurance, in the glare of which its incalculable advantages to the public welfare and its nearness to perfection as a human institution have only been brought still more prominently forward.

When one brings himself to think out the subject in its depths, the surprising thing is that with, comparatively speaking, such a financial innovation as life insurance, the weaknesses have been so unimportant, and that they have been discovered so speedily, and when they have caused so little detriment to the interests of those having their money invested therein. And allowing all possible latitude for the effect of these weaknesses and shortcomings, the fact remains that life insurance, for the combined safety and beneficence of its mode of investment, occupies a preeminent position which no mere individual slackness on the part of a few of its officials can ever shake. This should be borne in mind without fail, not only by readers of the sensational stuff that has lately been appearing in the public press, but by agents soliciting insurance from persons who revamp this kind of nonsense as their own excuse for not putting their names on the dotted line.

* * *

THE CHINESE TRADE QUESTION.

To be hoist by one's own petard is an operation which always causes peculiar chagrin to the sufferer and peculiar satisfaction to one's rivals. This operation, however, is what Uncle Sam seems to be experiencing just now, with John Chinaman as the calm inflictor of the punishment. The Chinese boycott of American goods has already assumed notable proportions, and in some goods, such as flour, the loss of trade is assuming notable proportions. We fancy, however, that no great regret will be felt by the world at large. A country which goes out of its way to not only heavily fine the citizens of a peaceable, friendly country who arrive at its shores, but insults them through pert officials as frequently as Uncle Sam has insulted the Chinese, can hardly be sympathized with very deeply when that friendly nation retorts in kind. And the retort is of a nature which so directly affects the offender's pocket that the fun of the matter is that the latter is bound to cry for quarter. Indeed, that cry has already been heard, and from the very section of the United States which in past days has been most exasperating in its treatment of the Orientals. It is altogether likely that the United States Government will lose as little time as possible in trying to adjust the quarrel amicably.

In the meantime two things are afforded for Canada's benefit: An opportunity and a lesson. The lesson is certainly needed, as indicated by the loud outcries chronically uttered by Canadians of the firebrand variety against all recognition of an equality of citizenship with Japs and Chinamen. The recent action of the British Columbia Government, happily disallowed by the Dominion, is a case in point.

The opportunity is for Canada to take advantage of the opening for flour and other goods in China forcibly vacated, temporarily or otherwise, by the United States owing to its narrow policy of exclusion. Even now the call for Canadian flour for China has increased to a very marked extent. Even after the boycott against the United States shall have been raised, which sooner or later we presume it will be, the marks left by the struggle should make good occasion for increasing shipments from Canada of flour as well as many other articles, so that the opportunity referred to is one which is in no manner to be despised. And apart from the present untoward position of the American exporters, Canadians should by no means neglect to push their own interests in China, a country on which the great commercial nations of the world have had their eyes with increasing interest for years past. We have the quality of our goods to recommend them, in many cases, as in flour, to a greater extent than is the case with the Americans. Only carelessness to our commercial future will allow us to sit down with folded hands awaiting the march of events.

* * *

A MONTREAL MUNCHAUSEN.

There is some one in the noble army of Montreal press reporters who appears determined to make a name for himself, as a later-day Athenian in the acquisition of new things in the way of intelligence. In the search for novelty his eye seems to roam most often over the domain of finance, and he once in a while startles the readers of even the most staid daily journals of our commercial metropolis by making known to them discoveries in Canadian banking circles which it requires all the ingenuity of a city editor to explain away next day. This reporter attracted our attention first in the spring of the present year, when he contributed to the Montreal Gazette a series of statements about the intended doings of certain banks that were almost as interesting in their minuteness of detail as they were startling in their untruth. We had occasion then to show, by means of interviews with the bank managers, how far astray this vraisemblant essayist was in his alleged facts. Now he has got the ear of the Montreal Witness to which he furnished on Saturday last a column and a half about "A Great Banking Scheme." The central idea running through which was that the Canadian Bank of Commerce was to blossom out into $20,000,000 of capital, to place its head offices in Montreal, that Senator Cox would shelve himself by retiring to become a rose-leaved honorary president, while Mr. Kilgour would don the hair-shirt mantle of the presidency. Alas for the circumstantiality of the gifted Montreal seer, for his headings in Schoeffer type and his sub-headings in Roman long-primer, his "project now under way," his imagined "probable proposals," and his "warrants for belief," the Witness inserted, on Tuesday afternoon the following paragraph: "Mr. Byron E. Walker, general manager of the Canadian Bank of Commerce, writes from Toronto asking that the statements as to proposed increase of capital, etc., be given an unqualified denial." It was harsh of Mr. Walker to be so sweeping in his denial. He did not give the Craig Street Ananias half a chance—or else the editor of Tuesday's issue wouldn't. We have called this too ready writer a seer. Does not this word for prophet also mean star-gazer, or a person gifted with the famed second sight? He "magnifies his office," and figures to himself stately structures, architectural as well as monetary, "new schemes," "magnificent proportions," and all the rest of it and then hunts up statistics and circumstances with which to back himself up Senator Cox and Mr. Walker may very well say, as the commentor did in Tom Hood's poem:

'Tis very hard, those sort of folk
Won't let a body be.

* * *

The sardine fisheries off Brittany are said to be a total failure.

TRADE NOTES.

The Dominion Thread Company announces its intention of building almost immediately a factory on the shore of Victoria Lake, near Stratford, Ont.

The Eclipse Umbrella Company has received a Dominion charter authorizing it to manufacture, buy, sell and deal in umbrellas, suspenders, haberdashery, neckwear, etc. Its capital stock authorized is $100,000.

The village of Sutton, in Brome County, Que., has a population of 766, and the new assessment roll shows the value of real property in the municipality to be $233,000. When the village was incorporated in 1896 the total valuation was only $105,000.

We hear from Winnipeg that the first car of this year's crop of wheat was received by the Lake of the Woods Milling Company on the 20th inst. It was loaded at Douglas, and will grade good No. 1 Northern. Barley has also been loaded, said to be a fine sample.

A report from Manchester states that the master cotton spinners have withdrawn the notice of the 5 per cent. reduction, while the operatives will also withdraw their request for an advance, so that it is altogether likely that the threatened strike will be averted.

An eastern township exchange says that Mr. John MacDougall, living about three miles east of Ormstown, in Chateauquay County, thirty miles from Montreal, has sold his farm, one of the best in the locality, for $11,500. This is the highest price obtained for a farm in the vicinity, so it is said.

The strong demand for cheese in England is reflected in the recent firmness on the local country boards. At Peterborough, Picton, Woodstock, and elsewhere, the prevailing price during the week has been 11½c. At Quebec Province board 11 to 11⅛c., and occasionally 11½c. have been the figures accepted.

This is the quiet season in the Belfast linen market, but there is a full average business passing. The tone of the market is buoyant, and values are on the up-grade. The reports of the Belgian flax crop are unfavorable, but the Russian crop is stated to be more satisfactory than was expected. The Irish crop will probably be about an average one. Prices of yarns have advanced. Spinners have plenty of orders on hand now, and the smaller business of the past week was expected after the previous brisk buying. There is a fair amount of business in the brown cloth market for the time of year, and prices continue to harden. For bleached and finished goods there is the usual quiet demand from the home warehouses. It is to be noted that export business is steady and promising. Canadian business is somewhat better, and there is improvement with Australasia and with the Cape.

Pure merino wools are still in very meagre supply at Bradford, Yorks, reports the Drapers' Record, and, as spinners are getting more business and the tendency of fashion is in favor of an increased consumption, there is every reason to expect that the recent advances in prices will be maintained, at all events up to the end of the year. The coarser kinds of crossbred colonial wools, which are very similar in character to our own home-grown wools, are perhaps slightly easier in price, but are still much dearer than was the case as recently as February last, and are actually higher than for many years, even including the "boom" time of 1899. There can be no doubt that these high values in the coarser kinds of crossbred wool are seriously interfering with the trade in several classes of Bradford manufactured dress goods, as the dearness has carried the cost of such staple goods as worsted dress serges quite beyond the reach of the poorer classes of the community, and increased the sale of some of the competing classes of cheap dress fabrics, such as tweeds, into which inexpensive raw materials, such as cotton and shoddy, can be introduced.

In New York and Washington a plan is on foot to equ a large steamer and furnish space to American manufa turers for the purpose of making a display of their produc and sending them around the world on a 60,000-mile trip, consume about fifteen months. The plan is to send on tl steamer a representative whose duty it will be to see that tl exhibit is properly arranged at each port, to meet tl merchants and dealers invited to inspect the exhibits, expla the utility and advantages of the goods, ascertain what tl markets of the country demand, the competition to be me etc. This representative will also satisfy himself by person investigation that any agent so appointed to represent h principal shall be of good character and financially able t meet his obligations. The date of arrival in the ports wi be advertised. It is also proposed to print, in the languag of each country, a catalogue showing the name of each, an each exhibitor, the name of his representative, the position c the display in the ship, and a full description of the good exhibited.

* * *

INSURANCE PARAGRAPHS.

If ladies can be found who could put as much energy an tact into the obtaining of a life proposal as they sometimes d into the procuring of a proposal for life, their fortunes ma be considered as good as made.—Insurance and Bankin Review.

The happy relations existing between the Canada Lif Assurance Company and its clients can be seen in no bette manner than by a perusal of a little book lately issued b that company, bearing the suggestive title: "They Ar Satisfied." A large portion of the book is devoted to letter from holders of tontine policies, the dividend periods o which have expired, and these indicate with what correc judgment this title was chosen. In a number of cases th present cash values of the policies are greater than th estimates made when they were issued. Another portion o the book gives letters from holders of ordinary contracts and these are of a similarly satisfactory character.

At the annual congress of the Royal Institute of Publi Health in London last month a resolution was passed to th effect that the hours of sleep allowed in many public school for boys under sixteen were too short. With that dictum the Insurance Spectator of London, looking at it from th standpoint of longevity, entirely concurs. It is a fact tha there is no repair of the brain substance except during sleep although other physiological processes can and do go o very well while the subject is awake. Sleep to a prope extent is one of the surest things to make for longevity, an many persons would materially lengthen their lives b shortening their waking hours. It has been laid down b high physiological authority that after all man can only a the best live a certain time awake, and if, as is said, yo increase the period of sleep you thereby lengthen the perio left for wakefulness. Of course, the sleep must be healthy and not due to artificial means.

* * *

EVERYDAY FIRE PROTECTION.

Continued good service is being done by th fire marshal of the State of Ohio in his dissemin ation of useful hints, whereby the average householder ma help save himself from the ravages of fire. It appears tha the department of which he is the head has passed a set o ordinances against such dangers, and one section of the la prohibits the carrying of unprotected lights in rooms containing material which is easily ignitible, and also prohibit the hanging of unprotected lights too near wooden walls.

This ordinance, the fire marshal explains, is directe more particularly against the practice, quite common i villages and in the country, of carrying a house lamp to th stable. He explains that a kerosene lamp in a stable is liabl to be upset or to explode while being carried and to the start a flame in hay or straw which in a moment become beyond control. Records show that almost two-thirds fires beginning in stables or barns result in a total loss of both building and contents. And, too, a large proportion of the fires which have destroyed the business portions of villages started in stables—as did the great Chicago fire, from a cow kicking a lamp over.

A person goes lamp in hand to do the milking and the lamp is placed upon an uneven floor and is overturned in the litter, or else the agitation of the oil incident to carrying it drives gas from the bowl up the wick tube and the scared holder drops it. Often the lamp is blown out by draughts and one strikes a match to relight it and drops the match still hot in the litter, or the wood of the match being cross-grained the flaming head flies into the litter.

Rubbish under area gratings is ignited by cigar stubs, matches and fire crackers.

Shops and warehouses in which are painters' materials, shavings, kerosene, and especially gasoline, should never be illuminated for a moment with an unprotected light.

Section 2 of the ordinances says that no easily ignited rubbish shall be allowed to accumulate. Rubbish is very liable to spontaneous conbustion from greasy materials mixed with it, or from chimney sparks, or the carelessly thrown match or cigar stub, or by children playing with matches. Even the ash pile may burn spontaneously if wet.

Another clause provides that chimney soot shall not be intentionally fired while nearby roofs are dry. Many fires have been started by a neglect of this precaution as well. The loss of property, and life too, from the careless handling of petroleum products and vegetable oils is so stupendous that the matter of controlling it has been well worked out in many cities.

* * *

OUR GREAT WEST.

Festivities on no niggard scale are to characterize the occasion of the celebration next week at Edmonton and at Regina of the erection of the Territories of Alberta and Assiniboia into Provinces of the Dominion. We have been favored with a sketch of the programme and a representative of the Monetary Times leaves Toronto to-morrow to be present at one or both—for the proceedings will cover two days. It is understood that the Premier of Canada and some of his ministers will be present, and many prominent Canadians, commercial and financial, will doubtless aid by their presence in the rejoicings. It is a liberal education for a man from Eastern Canada to go out to Calgary and thence to Edmonton. By no other means can he get a proper idea of the extent and value of that great Western and North-Western land.

The Premier of Manitoba, who is also Minister of Agriculture, has been making an exhaustive inspection of crops in Manitoba. He declares that the largest and best crop ever grown in the North-West is now ripe and being harvested, but adds that the grain was so heavy and maturing so rapidly that loss must occur unless the harvest is rushed through. "Twenty per cent. is cut," he said, "but eighty per cent. should be in stack to-night, 22nd August." Mr. Roblin estimates the total wheat yield for the North-West at more than 100,000,000 bushels, being an average of over 25 bushels, with good grade at that, and the only danger being heavy rains in the next week or two. Coupled with these remarks it is an undoubted fact, says the Herald of Wednesday, that cutting is general only throughout Manitoba, and many Territorial points, while only three thousand harvesters have arrived so far. It seems as if there must be a scarcity of help to harvest so large a crop.

* * *

—The Pall Mall Gazette, referring to the confederation of Canada and the West Indies, expresses the opinion that: "Canada's interest is mainly in the revival of the sugar industry. Confederation would mean free admission of Jamaican raw sugar. Canada could not take these islands over without some expense, providing for their naval defences and the treatment of the colored population, which would entail a difficult problem."

BANKING AND FINANCIAL ITEMS.

The Standard Bank of Canada has opened a new branch in Toronto, at the market, under the management of Mr. J. H. Hyland.

The taking over of the Westminster fire office by the Alliance is an event of more than usual interest in the insurance world, owing to the great age of the former concern. Its career started as long ago as 1717, when, if our historical memory be correct, George I. was the reigning sovereign in Great Britain. Such longevity speaks much for the good management of the Westminster's directorate in the past, as well as for the conservatism of British institutions. The Alliance Assurance Company may, we should think, be congratulated on having allied with itself a concern of so much respectability and with a repute so established in the Old Land.

There is a natural curiosity, especially in Ontario, to know what disposition the late George Gooderham made of his property by will. This curiosity has been gratified by the fullest publication, in Tuesday's city morning dailies, of the testator's commands to his executors. Many had been the guesses made at the extent of Mr. Gooderham's wealth. These were mainly exaggerations, for the wealth of most men who are reputed rich is greatly over-estimated in the popular mind. The real amount, however, as now disclosed, between nine and ten millions, does not differ much from the estimates of sensible people here, and it is a very respectable sum to have been amassed by a thrifty and exceptionally hard working man in rather under than over forty years. It is to be remarked that his will mentions no large bequests of a philanthropic kind; but the people of Ontario collectively will benefit some $700,000 by his estate through the succession dues. For many years the deceased gentleman made a handsome present in money or money's worth to each of his children at the time of their marriage. But for this his estate would have been larger. The estate is found to amount to $9,325,017, of which $3,942,212 is represented by bank stocks, $1,288,003 by moneys secured on mortgage, $1,550,704 by securities on loans. The main provisions of the will is that the estate shall be divided at the expiry of ten years into equal shares for the children, the sons to receive their shares direct and the daughters' to be held in trust and the income paid them during life. Mrs. Gooderham, the wife, receives $100,000 in cash, and the use of the residence "Waveney" for life, besides the larger portion of the interest on $600,000. The distillery business, known as Gooderham & Worts, Limited, will be managed during the ten years that the estate is in trust by Messrs. W. G. and Albert E. Gooderham, who are each to receive for their services one-fourth of the net dividends on the stock. In the event of the distillery being sold before ten years these two elder sons will receive the income on $700,000.

* * *

—A despatch from Vancouver says that with a pack of 730,000 cases of sockeyes on the Fraser River, many of the canneries are being closed, but arrangements have been made so that those who remain in operation will pack the fish sent to them by those shut down. All the canneries will keep their boats out until it is an established fact that the sockeyes run is over for the year. There is a scarcity of cans at many of the canneries, and it is said that when the packing of cohoes, which follow the sockeyes, has been concluded, there will not be an empty can on the Fraser River. Such a cleaning up of cans never occurred in any year since canning was conducted on the Fraser.

* * *

—A body whose name is the National Association of Manufacturers of the United States of America, was incorporated at Albany on Tuesday last for the principal purpose of regulating relations between employers and employees and dealing with labor unions. Twenty-one prominent manufacturers from different parts of the United States are directors of it, and the principal office is in New York. The certificate states that the organization is formed for the "betterment of relations between employer and employee, the protection of the individual liberty and rights of employer and employee, the education of the public in the principles of individual liberty and ownership of property, the support of legislation in furtherance of those principles and opposition to legislation in derogation thereof." Also to secure freedom from unlawful and unjust enactions."

* * *

—The new battleship Dominion, one of the latest additions to His Majesty's Navy, will shortly be placed in commission. The name given to this vessel, with the approval of His Majesty, is justly regarded as a compliment by Canadians, and has given much gratification in every part of the Dominion. A fund is being raised in Canada for the purpose of making a presentation to the vessel of a shield, or silver plate, or some other desirable article, of Canadian manufacture, and the proposal has met with a ready and generous response. It has been suggested that a subscription list with the same object in view should be opened in Great Britain, to which Canadians resident in the country, and persons very closely connected with Canada, should be invited to contribute.

* * *

—On Tuesday last, at Melbourne, Victoria, the treasurer of the Australian Commonwealth, Sir John Forrest, introduced the federal budget. The total revenue for the fiscal year 1904-5 is $57.300,000, and the estimated revenue for the current year, $56,835,000. Total expenditures for 1904-5 were: Administrative, $21,590,000; surplus returnable to the state, $35,705,000. The estimated total expenditure for the current year is $23,000.000; returnable to the State, $33,920,000. The treasurer makes the proposal that the Commonwealth assume all state debts amounting to $1,170,000,000, which will require an amendment of the Constitution of the Commonwealth. We are as yet without particulars other than those given, but the general impression we derive, both from people in England and from Australians themselves is that the thing most urgently needed in Australia to-day is national economy, the cessation of, or at least a great decrease in, borrowing, and a systematic effort by both Government and people to lean more upon themselves and their resources than upon capitalists abroad.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, August 24th, 1905, as compared with those of the previous week:

	Aug. 24.	Aug. 17.
Montreal	$23,666,393	$23,167,967
Toronto	8,415,114	17,882,542
Winnipeg	4,747,801	6,518,148
Halifax	1,429,316	1,535,682
Hamilton	1,154,008	1,461,868
St. John	928,720	1,139,289
Vancouver	1,831,961	1,747,161
Victoria	626,179	653,686
Quebec	1,707,447	1,591,933
Ottawa	2,265,743	2,424,082
London	....	1,070,221
Total	....	$59,192,579

Vault doors in Bank of Montreal and Royal Trust Company, Montreal. Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

—It is announced that work will commence in October on the building of the tunnel under the Detroit River, and that it will continue for about two and a half years. The Canadian Tunnel Company and the Michigan Central Tunnel Company, organized to construct the crossing, have combined, it appears, under the name of the Detroit River Tunnel Company, with a capital stock of $3,000,000.

Piron, the French poet and epigrammatist, was unfortunate enough to be arrested one night by a watchman in the streets of Paris, and was taken the following morning before the lieutenant of police, who haughtily interrogated him concerning his business or profession. "I am a poet," was the reply. "Oh, ho! a poet, are you?" said the official. "I have a brother who is a poet." "Then we are quits," rejoined Piron, "for I have a brother who is a fool."

The Canadian Machinery Company's plant at Point Edward, near Sarnia, was yesterday completely destroyed by fire. The loss is reported at $200,000, with $80,000 insurance. The building was held on a lease from the Grand Trunk Railway. In our summary columns we mention two village fires in Quebec Province. A despatch from, B.C., speaks of threatening forest fires near that place. They centre around Ainsworth Camp, where the miners are packing their valuables and others are fighting the flames. Fires also are reported from Ymir, Rossland, Kaslo, Lardeau, and Cranbrook. No casualties are reported.

TENDERS FOR DEBENTURES.

TENDERS, sealed and endorsed "Tenders for Debentures," will be received at the office of the undersigned, until Monday, the 18th day of September next, at 4 p. m., for the purchase, in whole or in part, of Debentures of the Corporation of the City of Victoria, as follows:

1. Debentures amounting to $100,000.00, issued under authority of the "Sewers Loan Guarantee By-law, 1905," numbered 456, dated the 1st August, 1905, and maturing 1st August, 1955.

2. Debentures amounting to $11,000.00, is sued under authority of the "Electric Lighting Loan By-law, 1905," No. 457, dated the 1st August, 1905, and maturing 1st August, 1915

Both sets of Debentures are secured upon the credit of the Municipality as a whole; their denominations are No. 1, $1,000.00 each: No. 2, $500.00 each, and they bear interest at 4 per cent, per annum, payable half yearly, the principal and interest being payable at the office of the Bank of British North America, either in Victoria B. C., Montreal, London, England or New York, U. S. A.

The tenderer must state the price net at Victoria which he will pay. In addition to the net price, the purchaser will have to pay to the Corporation the interest on the said Debentures for the period between the 1st of August, 1905, and the date of the receipt of the purchase money by the City Treasurer.

The Corporation does not bind itself to accept any tender.

A LETTER FROM FRANCE.

The entente cordiale between France and England, which is receiving so marked an outward demonstration at Portsmouth while I am writing these lines in the harbor of Liverpool, was perhaps foreshadowed by the friendly treatment which we Canadians of the Canadian Manufacturers' Association received in Paris on our visit. This could not well have been more hearty or more graceful. But perhaps the friendly feeling towards Britain and all who belonged to her was already growing, for there were to be seen a great many British flags, or imitations of British flags about the city. Sometimes the imitations were funny. I saw near the Arc de Triomphe, over what must have been a private house, a red ensign with the field sixteen times instead of four times as big as the Jack. It was odd, but it represented a genuine feeling.

The beauty of Paris has been often described. Doubtless much of its apparent roominess and convenience of space dates from the days of Baron Haussman, who was given a free hand by Napoleon III., they say, or his gay minister De Morny, for the sinister purpose of so laying out Paris afresh that cannon and soldiers could sweep the streets by canister and rifle ball from a central point (the avenues radiating from centres), in case any attempts were made to erect barricades in times of modern revolution. But many elements go to make the beauty of the city. For one thing, the stone-cutting and carving of the houses are masterly. Nowhere else have I seen such lovely figures of angels, of children, of fruits and flowers, of clouds even, spring from creamy freestone at the corners of dwellings. The human subjects seem almost alive. And the decorations of public buildings or squares are for the most part admirable—that is to say, you have architectural grandeur where grandeur is called for by the subject; or you have placid beauty or solemnity in memorials where these are specially desired. The number and disposition of shrubs and flowers in the residential quarter is an element that adds much to the city's appearance. In story after story of tall dwellings one sees ranges of flower boxes; and the clambering roses along the boulevards have an effect all their own.

Individual taste can do much to brighten even a business street of dull grey stone. Not far from the Grand Opera stands a building of four stories, devoted evidently to dry goods or millinery. High upon it was the legend: "Hail to the Spring," in large white letters on a green and gold back-ground of flowers, surounded with crimson and blue stones (as they seemed) set in the pervading grey. Somehow the dainty thing made one think at once of spring flowers or spring clothing or spring bonnets. Any how it was refreshing to the eye in no common degree. It would not be fair to say, however, that you see no ugliness in Paris, in spite of what the author of "John Bull and His Island" has said, or that more senses than one are not occasionally shocked. The cochers and the soldiers are many of them dirty; and here is a costume that passed me one day and nearly caused me to gasp: Sulphur colored breeches, a lilac vest, a blue hat and a violently discordant tie—all this on a figure with a swaggering walk and a stick that described circles in the air as its grinning owner passed along. Other odd things struck us here and there, trivial for the most part. For instances, peaches selling on the street at "60c. the half kilo," which we at first interpreted to mean sixty cents for peaches weighing one pound and a tenth. But upon reflection and enquiry it proved to be sixty centimes, not six dimes, and so the imaginary and fabulous price of peaches came down to the reasonable sum of five cents per pound. Similarly, what seemed an impossible drinking feat, namely, "Boisson—biere colossal, 30c.," assumed the more believable proportions of a huge drink of beer for six cents.

The Bourse was, of course, an object of interest to business folk among us, its floor being a barometer of commerce in some directions and an exhibition, at certain hours, of the calisthenic possibilities of the human frame. The building has been enlarged of late years. Our party did not go inside, having been there before and having an important engagement ahead. Coming down from our hotel we saw through an opening of the Avenue de l'Opera, the home of the Bank of France, a stone building of four stories, with a clock. And in the same street, "The Sun" of Canada, which made us feel on the instant more at home. In nearly every city to which our trip took us in the British Islands were to be seen the signs of the New York Life, the Mutual Life, and the Equitable Life assurance companies or some of them. And they in most cases occupied premises in prominent buildings. The hold which some of the large domestic underwriting companies have in the Old Country is exemplified in the number of their offices in various parts of the large cities. The Prudential is an example of this in London, Manchester, Liverpool, and in the Scottish cities the Standard Life. But the great fire insurance companies have buildings in many cities that seem to typify age and strength.

After this rather wide degression from a foreign beginning let me recur to my scanty notes made in France. I transcribe, without expanding, some records made here and there, indicating the impression the sleepy French villages make upon a traveller by railway:—

"Etaples, 2.40 p.m., 14th July—No sign of life.

"Outreau, 3 p.m.—A man and a dog in the street, some women close by in a field. Here are several estaminets" (drinking houses).

These places are not far from Amiens, a city of historic interest which is also a considerable producer of velvet, linen, and other manufactures, and has to-day probably 70,000 people.

"Talk about American brag, and humorous exaggeration! Here is a little shanty in the merest hamlet of North France calls itself the Café de L'Univers, and I suppose twenty people would crowd it out of house and home.

"A somewhat curious landscape along here. The trees, like the trees in England, seem smaller than ours, but the profusion of the English trees and shrubs and their variety of shape contrasts favorably with the north French landscape, which is more bare.

"In the north of France, for a long distance east of Calais, there is no forest, the land is mainly bare—that is to say pasture or arable land, resembling the South of Scotland and the North of England.

"Row after row of Lombardy poplar trees mark the landscape in these departments.

"Passengers are severely let alone by officials in the French railway carriages, according to our experience."

I may conclude this discursive sketch of a brief trip by mentioning my two fellow-passengers in the smoking compartment from Paris to Calais. I boldly asked them for a match, and each of them showed the most courteous taste to provide it. Accepting the favor from the younger man I thanked him in English, upon which the other said; "You will excuse my brother that he speaks not English. He is of Eetalee and is charmed to be at your service." Noticing that they had been talking French together, I then made a modest essay in that language, speaking very likely the language of Voltaire's Charles X. of Sweden, or of Les Aventures de Telemaque, rather than the conversational French of to-day. But neither of them laughed at me. By and by an exchange of cards showed one to be an officer in the Italian army, while the other had been, he told me, a resident of Malta for twenty years. They were the most cheerful and polite of companions, and learning that I was from Canada plied me with questions about our fair land. Is there, indeed, anywhere in Europe to-day a place where people are not curious about Canada?

J. H.

M.E., of Ottawa, and Philip Argall, M.E., of Denver. The results of their investigations will be reported to Dr. Haanel, who is an expert on zinc deposits. The arrangements provide for the examination by the present party (1) of the present development of the mines to determine approximately the tonnage of zinc ore available at once, its occurrence and character and the future prospects, together with the cost of mining. (2) Examination of the present methods of milling. (3) Investigation of the adaptability of the ores to the new methods of concentration (magnetic, electrostatic, etc.). (4) Study of the conditions affecting marketing of the concentrate, including the question of smelting in the Province and elsewhere in Canada. (5) Investigation of the possibility of special utilization of the zinc ore of high silver content. So it will be seen what important results may follow the proposed survey.

⁂

MARITIME BOARD OF TRADE.

The eleventh annual meeting of the Maritime Board of Trade was held in Yarmouth, Nova Scotia, on Wednesday, Thursday and Friday of last week, the 16th, 17th and 18th August, and a large number of questions of great interest to the Maritime Provinces came up for discussion. About fifty-five delegates were present, representing the Provinces of Nova Scotia, New Brunswick, and Prince Edward Island. Subjects for discussion had been proposed in advance by the different boards, as our article of last week stated in detail, and many of these were thoroughly ventilated at the gathering. The total number of members of Boards of Trade in the Maritime Provinces is 2,205. Two new boards have been established during the year and two have been affiliated.

President Spinney's address referred to the Transcontinental Railway and its effect on trade Maritime union; Government inspection of invested funds of insurance companies; fire insurance; new steamship lines, etc. It was a decidedly able summary of progress during the year and present conditions, and was received with enthusiasm. At this, the first session of the board, a subject which the Annapolis Board of Trade had proposed for discussion was crystallized into a resolution that a "uniform apple barrel" be established for Canada, and the cooperage thereof be Government inspected. Subjects discussed by the convention on Wednesday afternoon were: Improved railway service; fast Atlantic service; representation of incorporated towns on municipal councils; municipal ownership of electric light plants; preservation of historic grounds; compulsory militia drill; wider publication of the reports of Canadian commercial agents abroad. The proposal for a tunnel between Prince Edward Island and the main land was unanimously endorsed by the assemblage.

On Thursday, the 17th August, three sessions of the Board were held. The first subject discussed was the appointment of a permanent delegation to go to Ottawa when the business of the Board requires it. This standing delegation was named as follows: Ex-president, E. K. Spinney, Yarmouth; A. P. Price, Prince Edward Island; J. E. DeWolfe, Halifax; G. A. R. Rowlings, Sydney; W. M. Jarvis, St John; Hon. J. Robertson, Moncton; James Meikle, Charlottetown; W. J. Vroom, Fredericton; N. Rattenbury, Charlottetown; the president and two vice-presidents, ex-officio.

One of the subjects of particular interest discussed by the delegates at the gathering was that of union of the Maritime Provinces. The following resolution was exhaustively discussed and eventually carried:

"That in the opinion of this meeting the time has arrived for a union of the three Provinces of New Brunswick, Nova Scotia, and Prince Edward Island, and that a memorial to this effect be forwarded to each of the Governments and that they be urged to arrange for a meeting of representatives from each Government at an early date."

A resolution was passed asking that the Government make a survey of the shortest and most practicable route for a new line of the Intercolonial from Amherst to Truro.

A. M. Bell, of Halifax, addressed the Board at length on the urgent need of protecting the inland fisheries, from distruction by nets, dams, explosives and so forth. A resolution was passed that the Government institute a scientific enquiry to ascertain what should be done to protect the fisheries, and that the report be published and public opinion educated thereby, and an adequate protection law be then passed.

An unanimous resolution was passed urging the abolition of statute labor in Nova Scotia.

A resolution was passed calling on the Government to redeem worn coins at face value; also another that the Government deport the Newfoundland twenty-cent pieces now flooding the country.

A resolution favoring the union of Canada and the British West Indies was adopted. Likewise a resolution suggesting that the Provincial Governments make grants to assist in the carrying on of tourist work.

The new officers of the Board for the current year were elected as follows:—

President, Capt. Joseph Reed, Summerside, Prince Edward Island.

Vice-presidents W. S. Fisher, St. John, and A. M. Bell, Halifax.

Secretary, C. M. Creed, Halifax; auditor, M. G. DeWolfe, Kentville.

Amherst was selected as the next place of meeting.

⁂

FIRE AGENTS IN SESSION.

When we went to press last week the annual convention of the National Association of Local Fire Insurance Agents for the United States was in session at Denver, Colorado. We take from the annual address of the president, Mr. A. H. Robinson, the following paragraphs:—

If the declarations set forth in our platform be adhered to and the legislation already framed for the betterment of the agency business becomes operative, much of the purpose for which this organization was created, will have been accomplished.

Overhead writing, which is now pretty much a thing of the past, would be gone forever.

Sole agencies—becoming more fashionable every day, and being recognized by the best companies as the most responsible and economical method of doing business—would eventually become the only recognized system.

Schedule rating would be universally adopted, much to the simplification of all troubles arising from this source,

relieving the tension as between company, agent and customer, overcoming troublous legislation and creating betterment in construction of buildings.

Preferred classes would be eliminated, and with them the attendant evils, multiple agencies, excessive commissions, rate cutting and rebating. Salaried representatives, another form of the multiple agency evil, and one that is fruitful of much objectionable practice, would be no more.

All reputable companies, whether agency or non-agency would adopt uniform rates and forms of policies and recognize the prescribed rules and regulations of the community in which the risk is located, and all disreputable companies, commonly known as "wild cats," would be so hedged in and regulated by State and National law as to put a stop to their nefarious practice.

The question as to ownership of expirations is no longer one of doubt, and if the good practice recognized by many companies of respecting the rights of former agents were universal, rate wars would be less frequent and agents more considerate for each other's welfare.

As a matter of fact, with the provisions of our legislation up to date, fully attained, the American Agency System would be firmly established, and I might add, the millenium would be close at hand. So that, if we work another year and still another upon the principles and platform heretofore enunciated, there will still be some unfinished business.

But as time rolls on, conditions will arise that would seem to necessitate some change in the provisions under which we are now working or additional legislation to meet new troubles confronting us.

* * *

HUMAN LIFE CHEAP.

An interesting commentary on the indifference or carelessness as to human life which exists among our neighbors to the south is furnished by the official statistics respecting the casualties on the railroads of the United States during the year 1904. The number of people killed totalled 10,046, of whom 441 were passengers, and the total number injured 84,155. Compared with this the mortality table of the British roads is indeed small. In Great Britain, the ratio of passengers killed was one to every 199,758,000; in the United States the ratio was one to each 1,622,267. Passengers injured were as one to every 2,244,472 and to every 78,523 respectively. In the United States 3,632 employees were killed out of 1,296,121, while in Britain the fatality list was 7 out of 71,007. They were 67,067 employees injured on United States railroads and 114 on those of Great Britain Something must be radically wrong with a system which disseminates death and broken limbs so profusely as the United States list only too well indicates.

* * *

—The United States Investor advises us that it will in the immediate future devote considerable attention to promoting the policy of reciprocal trade relations. The Investor believes in protection, and in such an adjustment of duties as will insure the greatest development of American industry, but is frankly in favor of meeting the growing demand of farmers and manufacturers for improved exchanges of the products of other nations by reciprocity treaties rather than by free trade.

* * *

—Halifax has no serious reason to lament the ravages of fire in 1904-5, although Old Country people would say that $9,000 per week of fire loss was sufficiently grave, perhaps. It is stated that the chief of the Fire Department, Mr. P. Broderick, estimates the total loss occasioned by all the fires at about $484,178, practically all of which is chargeable to two large fires, viz., $470,000, and in the other case $14,178. The apparatus of the department includes five steam engines, two chemical engines, two ladder trucks and ladders, eight hose waggons, eight sleds, two ladder sleds, and twenty-six horses..

THE VALUE OF ENGINEERING.

The public is only beginning to realize the value of engineering experience and skill in constructing industrial works, and people have still a good deal to learn about proper economy in this direction. In the August issue of The Canadian Engineer—a very good one, by the way—is an article on "The Value of Engineering," from that sterling publication the Engineering and Mining Journal. This article is as follows:—

The value of engineering service in the construction of industrial works is nowadays appreciated to a far greater extent than it was even within the memory of the younger men of the profession; but the public has yet a good deal to learn in this direction. The argument, why it pays to employ a competent engineer, was presented so concisely in a pamphlet recently issued by a well-known engineering firm in Cleveland, Ohio, that it seems to us worth while to reproduce it.

It pays to employ a competent engineer, because of:—

"1. Reduction of first cost, including the avoidance of 'extras.'

"2. Reduction of operating expenses because: (a) The desired results are obtained with maximum economy of labor, fuel and supplies. (b) Repairs are a minimum. (c) Depreciation is a minimum.

"To what extent will it pay?

"On first cost it will probably save from one to three times the cost, possibly more.

"On operation, including repairs and depreciation, the result of the best design and supervision of construction, as compared with haphazard or mediocre engineering, is a saving of 20 per cent. to 30 per cent., or more, of the amount paid the engineer. This is the direct saving, but, because of the greater reliability, the direct gain is incalculable.

"Therefore, upon basis No. 1, if the engineer saves in first cost an amount equal to his charges, his employment is justified; a greater saving is profit; and, upon basis No. 2, he will also directly save annually 20 per cent. to 30 per cent., or more, interest on his charges besides the indirect saving stated above.

"The net result is a dividend on the engineer's charges of 100 per cent. or more, at the start; and 30 per cent. or more, annually, during operation.

"What other investment pays at such a rate?"

Although this argument was not presented with especial view to mining and metallurgical plants, it is directly applicable to them with as much force as to the construction of electric railway, lighting and power plants, to the erection of a cotton mill, or the building of a bridge. It is a shortsighted policy which disregards the immediate commercial value of the services of the engineer, and in nothing is it more so than with respect to mining, milling, and smelting plants. The plants that have been built and abandoned after one brief, inglorious campaign, which stand all over the West as monuments to ignorance, bear silent testimony to the absence of competent engineering; but greater is the number of those which are operating at less than proper efficiency, because of defective design, whose troubles are known only to the wise.

* * *

THE OLD COUNTRY POST OFFICE.

A wonderful business is done by the postal authorities in the United Kingdom. But indeed there are those who insist that the Post-Office Department does more business than it should, in other words, that it does a lot of carrying that "does not pay," but costs a lot of money to the taxpayer. From London papers just received we obtain some particulars about the year's Post-office business which ended with March.

Lord Stanley's report is chiefly remarkable for the proof it affords of the popularity of the picture postcard and the telephone. One is making inroads upon the letter service and the other on the telegraph.

Only to the boom in picture postcards can the Postmaster-General ascribe a decrease of one-half per cent. in

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

the number of letters delivered in London last year. Postcards delivered in the United Kingdom numbered 734,500,000, an increase of nearly 20 per cent., and 80 per cent. of them were privately printed.

The number of postal packets delivered in the United Kingdom during the year was as follows: Letters, 2,624,600,000; postcards, 734,500,000; halfpenny packets, 843,700,000; newspapers, 179,400,000; and parcels, 97,200,000; making a grand total of 4,479,400,000. Letters showed an increase of 1 per cent., the average number for each person being 61.2, and of postcards there was an increase of 19.7 per cent., with an average number for each person of 17.1.

The following paragraph describes what is called typewritten telegrams:—

The ordinary telegram declined by 1,777,000 to 72,050,000, while foreign telegrams increased by 407,000 to 8,339,000, and the Press telegram by 408,000 to 6,730,000. Experiments are proceeding in high-speed automatic typewriting instruments which may aid the telegraph in its contest with the telephone. Under favorable conditions speech between London and Rome was carried on, but in spite of this partial success a public service is not yet considered practicable.

In London the Post-Office telephone system is growing rapidly, subscribers increasing from 15,632 to 24.351 during the year. To meet the demand a new city exchange, with a capacity of 18,000 lines, will soon be opened.

With regard to the cash-on-delivery system, the opposition on the part of retail traders has been so pronounced that the Postmaster-General has come to the conclusion that it would be inadvisable at present to establish the system in connection with the inland service.

FINANCIAL ITEMS.

The Ontario Bank has opened a branch at King City, Ontario.

We are this week advised by the Bank of British North America of the opening of a branch of that bank at Oak River, Manitoba.

Branches have been opened by the Canadian Bank of Commerce at Pincher Creek, Alta., with Mr. W. G. Lynch as acting manager, and at Princeton, B.C., with Mr. W. H. Switzer as acting manager. The bank also purposes opening a branch at North Battleford, Sask., shortly.

A propos of the present shutting down of the United States Mint at Philadelphia, the New York Journal of Commerce remarks that there is no demand for increased coinage except for subsidiary silver, and for that the mint has no material that it is permitted to use. On the first of July the stock of gold, including bullion in the United States treasury, was $1,360,273,787. Of this, $517,579,969 was represented by certificates, of which $487,661,449 were in circulation and $29,918,520 were among the assets of the Treasury. There might be a somewhat larger demand for gold if there were no inducement for unnecessary increase in bank note issues, which, under the present system, are in effect a means of circulating United States bonds instead of money.

The following particulars about Frank G. Bigelow, ex-president of the First National Bank of Milwaukee, who is now serving a long term of imprisonment because of his embezzlement of $1,553,000 are given by the "Milwaukee Journal." He began his stealings on May 25, 1904, and within eleven months thereafter had defrauded the bank of the heavy sum charged against him. Starting with taking $15,000, his shortage by July 1 had increased to $55,000, and within two months thereafter the thefts aggregated $122,000; by October 1st the defalcations reached $687,560, and within another ninety days the account stood at $1,062,185; an additional $491,048 was taken before April 25, following which came discovery, arrest and conviction. Mr. Bigelow was "rapid;" happily the process of the law was not much less, as it is said that on the policies issued on the life of Bigelow, not a cent of premiums have been paid. Notes were given amounting, it is stated to $30,000. The insurance amounted to $300,000.

* * *

FIRE INSURANCE ITEMS.

Because the Teutonic Insurance Company, of New Orleans, was already in New York, the insurance superintendent of that state refused to admit the Teutonia of Allegheny, unless it incorporated the word "fire" in its title. This has now been done, says the Chronicle, and the Pennsylvania company will promptly be licensed in the Empire State.

The School of Actuarial Preparation, which was announced in connection with Miles M. Dawson's general course on insurance at the Y. M. C. A., at 57th Street, New York, has been transferred by agreement to New York University, in connection with its School of Commerce, Finance and Accounts. The same actuaries remain in charge, namely Messrs. Moir, Dawson and Jackson.

Perhaps the publication of such items as the following from an Ontario daily paper may have a slight effect in curing people of the folly and danger of using coal oil to kindle kitchen fires: "Bertha Smith, a nineteen-year-old colored girl at Chatham, Ont., attempted to hurry the kitchen fire with coal oil yesterday at noon. The oil can exploded and the young woman was so badly burned that she expired."

Here is how an American insurance paper puts it: "If you know when Michaelmas, 1906, arrives, you can set it down that on that date the Union Assurance Society, of London, will begin the construction of quarters for its life and accident branches, on the site at the north-west corner of the Royal Exchange building, between Cornhill and Threadneedle Streets." The reference in the first words is to the practice, so common in England and Scotland, of dating events from Michaelmas (29th September) or Whitsuntide, a sort of summer date.

The village of Albert in New Brunswick is taking the consequences of its lack of enterprise. A few weeks ago a serious fire broke out which swept out a large number of buildings in its business section. There has been but little movement made towards rebuilding, and this seems likely to remain the case, because those who suffered feel naturally enough disinclined to risk their money until they see some provision made for fire protection. The loss in the recent fire is estimated to have amounted to about $3,000. Whereas, it is said, that with the existing natural advantages, an up-to-date water system could be put in for the comparatively small sum of $10,000.

* * *

According to the views of a Melbourne newspaper, the political socialist is always allowing himself the blessedness of receiving. He never permits himself the extra felicity of giving. This is where his self-denial comes in.

The Wallace Shipyards, Limited, is the name of a company which has just been started in Vancouver, B.C., with the object of going into shipbuilding on a large scale. Its first task will be the building of a new coasting freighter, on which construction work will be begun in a few days.

The Investigator says that New York contractors have recently lost over $1,100 because plate glass insurance companies refuse to insure windows until after work on them is finished. The losses alluded to were the result of attempts to put ventilators in the windows, to accomplish which holes about eight inches in diameter had to be bored.

—At the convention of the National Wholesale Lumber Dealers' Association, held last week in Ottawa, the delegates held a joint conference with representatives of other lumber associations to consider the action of railroads east of the Mississippi in compelling lumber shippers to equip gondola or flat cars with racks and stakes. Great interest was taken in the discussion, and a complaint is to be lodged with the Interstate Commerce Commission.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st July, 1905.

London Office—37 Nicholas Lane, Lombard Street, E.C.

J. S. COCKBURN, Manager. | J. FERGUSON, Assistant Manager

The Agency of Colonial and Foreign Banks is undertaken and the Acceptances of Customers residing in the Colonies, domiciled in London, retired on terms which will be furnished on application.

OUR BONDS are a legal investment for Trust Funds. If you send us your address we shall be pleased to send you a copy of the Order-in-Council under which Trustees are authorized to invest Trust Moneys therein. They are also accepted by the Government as the deposits of Insurance Companies, Banks, etc.

THEY are secured by more than Twenty-four Million Dollars of Assets. . . They bear interest at FOUR PER CENT., payable semi-annually. We issue them in sums of One Hundred Dollars and upwards. A specimen will be sent you on application; also a copy of our last Annual Report.

Write for them.

M. Turcot, of Ottawa, who engaged in the furniture business in a small way three years ago, has put his affairs into the hands of an assignee. His liabilities are shown at $2,200, with nominal assets of $2,000.

Mercantile Summary

The Ingersoll Nut Company propose to build a large factory in Ingersoll, Ont.

The Staunton Wall Paper Company have been granted a permit for a $50,000 addition to their factory in Toronto.

The Canadian Pacific Railway Company has abolished the department of divisional engineer for the Winnipeg division, which office will in future be in charge of Mr. F. F. Busteed, assistant chief engineer.

The insolvency is noted of O. Martin & Co., general dealers at St. Guillaume d'Upton, in Drummond County, Que. Mr. Martin failed previously in 1902, when the stock was bought in for him, and he resumed business under cover of his wife's name.

John Crichton, grocer, at Valleyfield, Que., has assigned to Kent & Turcotte, of Montreal. Mr. Crichton was for many years foreman for the late Alex. Buntin, in his extensive paper mills at Valleyfield, a position which he lost when it was decided to close up the mills and sell the property.

At the Quebec watering place of Murray Bay, J. A. Brassard, general dealer, has assigned to V. E. Paradis, accountant, in the city of Quebec, and his liabilities are scheduled at $6,700. The business has been carried on, it is generally understood, for the benefit of J. W. Brassard, the father of J. A., who failed some years ago at Cedar Hall, on Lake Metapediac, the estate panning out very poorly.

The Commercial Cable Company has succeeded in laying the shore end of a new Atlantic cable at Canso, N.S. The length of the cable to be run out is about 2,200 miles, passing near St. Pierre, Newfoundland, and north of Flemish Cap to Waterville, Ireland. We are told that this will be the fifth and fastest transatlantic line of the Commercial Cable Company, and will probably increase the company's service thirty per cent. A recent dispatch from Canso stated that the "Colonist," the company's cable ship, had grounded on a shoal off Fox Island, with what injury is not stated.

In the year 1890, M. A. Hagerman began storekeeping at Bear Island, N.B. A few years later he failed, but was able to effect a compromise and continue in business. Recently frequent suits have appeared against him, and now he has assigned to the sheriff. Whether his career as a merchant will now close we cannot say.——Maurice Goldman, dealing in dry goods, etc., in a small way at Albert, in the same province, wishes to compromise liabilities of about $1,200, at twenty cents on the dollar. He formerly was in business in St. John, N.B., as one of the firm of Goldman Bros., who dissolved in 1901. He continued the retail shop and failed a year later.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Campbell block at Listowel, Ont., had its upper story destroyed completely by fire last week. It was occupied by Walter Bros., dry goods, who lost nearly $20,000, (insured), A. Broadfoot, undertaker, etc.

The Plymouth Cordage Company, of Plymouth, Mass., have bought a large site in Welland, and will, it is understood, immediately erect large mills for the manufacture of binding twine and all classes of rope, for which purpose they expect to employ several hundred hands.

The "Dahomey," the second steamship to sail from Montreal on the Cuban-Mexican service, is expected to sail from that city this week with a full cargo. For Cuba there are paving blocks, hay and general cargo, and for Mexico the chief cargo will be box shooks, of which there are already eight carloads. The "Dahomey" will upon her voyage outward take several passengers destined for Cuba, and, stopping at Halifax on her way out, she will load some salted fish for the southern market.

Rapid progress is being made on the proposed Georgian Bay Canal route between Desjoachims Rapids and the mouth of French River. It is believed that by winter the details of the entire section will probably have been completed. During next winter plans will be made, so that by the close of the next fiscal year, it is hoped the Government will be in possession of a practically exact estimate of the cost of this great waterway. Indications, however, point to the fact that the project cannot be put through for anything like the sum of $75,000,000 originally suggested.

A number of recent minor failures among Montreal tradespeople are noted as follows: A voluntary assignment has been made by Louis Allaire, grocer. He was formerly city salesman for a tea house, and married the widow of the late A. Hetu, grocer, several years ago, continuing the business.—Louis Dick, a manufacturer of clothing in a limited way, has been asked to assign.——Joseph Chalifoux, doing business under the style of the King Paper Box Co., has assigned. He had previously a partner in the A. B. C. Paper Box Co., who only failed a few months ago. His liabilities amount to $4,076.——A small suburban tailor, Victor Marin by name, has assigned owing something less than $1,000.——After being a street conductor for several years, M. L. Rousseau embarked in a retail grocery venture about four years ago, which has proved unsuccessful, and he has assigned, owing about $2,000.——E. A. Tourangeau, butcher, has been asked to assign.——Consent to assign has been fyled by J. A. Dagenais, fruit dealer in the Bonsecours Market, who has also been interested in a hotel business, which is believed to have been a losing venture.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

A despatch from Victoria, B.C., says that a very rich strike of gold quartz has recently been made at Seymour Arm, Kamloops. The discovery was made by Donald C. Simpson. The vein, he says, can be traced for three miles through the gneiss and granite.

The Plumbing & Heating Supply Company, Toronto, has received a charter. It proposes to make and deal in all kinds of plumbers' and steam fitters' supplies. F. Armstrong and W. Mansell, Toronto, are charter members of the concern, which will have a capital of $100,000.

The Gore Bay Brick and Tile Manufacturing Company, Limited, has been granted an Ontario charter to manufacture brick and tile, and to acquire machinery and land for such purposes. R. Russell McKessock and R. J. Porter, of Gore Bay, Manitoulin Island, are provisional directors.

The New Ontario Ore Refining Company, Limited, Toronto, has been granted by the Ontario Government, a charter to carry on the business of reducing, smelting and refining ores, and to acquire from the Standard Reduction Company, Limited, certain patent rights. The share capital is placed at $500,000. T. B. Barton, of Toronto, is a provisional director.

The net earnings of the Temiskaming Railway for the four months of April, May, June, and July, averaged $8,000 per month. When the road was taken over from the contractors last January, the running expenses for that month and February were 96½ per cent. of the earnings. In March, when the new commission took hold, the expenses were 75 per cent., and for the past four months they have been under 55 per cent. of the earnings.

The Randolph, Macdonald Company, Limited, with head office at Three Rivers, Que., and a capital stock of $100,000, has been incorporated under a Dominion charter. It will take over the contractors' business of Randolph Macdonald, in Toronto and elsewhere, and will enter into contracts with persons, governments, municipalities, etc., for the constructing and equipping buildings, public or private, and also will acquire and work gravel pits, timber limits, sawmills, etc.

It is stated that the Western Canada Milling Company, of Montreal and Toronto, has contracted with James Stewart and Co., of Pittsburg, for six buildings of a flouring plant, that will cost between $550,000 and $600,000. The flouring mill proper is to have a capacity for the manufacture of 5,000 barrels of flour a day, and the grain elevator a capacity of 1,000,000 bushels. All the buildings of concrete and steel, and fireproof. About 3,000 tons of steel will be required for the buildings, which will be made at Pittsburg.

PORT ARTHUR & FORT WILLIAM.
Post Office ddress, — — Port Arthur, Ont

Mercantile Summary.

The contract for building a post-office in Vancouver has been awarded to Kelly Bros. & Mitchell.

The Dominion Bridge Company, Lachine, are said to be negotiating for a site in Winnipeg, on which to establish a branch of their business.

The Medicine Hat Milling Company will build a 50,000 bushel elevator at Medicine Hat, an indication of the growing importance of grain in that region.

The Thunder Bay Improvement Company's steamer "Gordon," was damaged by fire off Port Arthur a few days ago to the extent of $5,000, fully covered by insurance.

The Ennis Piano Company's factory at Hamilton was damaged by fire a few days ago to the extent of $20,000 on stock, and $1,500 on the building. Partially insured. The fire is believed to have been of incendiary origin.

It is stated that the Hamilton Cataract Power, Light & Traction, and the Toronto and York Radial Railway companies have come to an agreement whereby each will have running powers over the line of the other. The two roads will join at Oakville. The former's extension from Burlington to Oakville will be completed by fall, and it is expected that the Toronto & York Company will have their road extended to Oakville about the same time.

Mr. J. Hambury, of Brandon, Man., recently bought the British Columbia Box and Lumber Company's factory in Vancouver, and is said to contemplate erecting in that city flour mills and elevators on an extensive scale for the handling of prairie products, and shipping them by way of Pacific ports. He already has mills at Brandon, Cranbrook, Moyie, and Elko, and also timber limits of 11,000 acres at Sechelt, besides 4,000 acres in the Kootenay district.

The Locomotive & Machine Company, of Montreal, recently built and delivered to the Grand Trunk Railway Company fifteen ten-wheel passenger engines and ten compound Mogul engines for freight service. The same railroad has just received also fifteen Mogul locomotives from the Kingston Locomotive Works. Canadian-made engines are pronounced to be strongly and carefully constructed, and to be admirably adapted for service on Dominion railroads.

N. J. Holden Company, Limited, Montreal, has been granted a Dominion charter to manufacture and deal in all kinds of apparatus for the transportation of persons or freight, such as railway cars, car wheels, trucks, etc. It will take over the business now carried on in Montreal by N. J. Holden & Co., and will issue in consideration for the same certain securities. Pierre A. Masse, engineer, and Lewis Johnson, clerk, both of Montreal, are named among the charter members. The capital is $200,000.

Debentures of the City of Guelph

FOR SALE

Sealed tenders addressed to Richard Mitchell, City Clerk, Guelph, will be received up to and inclusive of Monday, 21st day of August, 1905, until one o'clock p. m., for the purchase of $103,000 in all of Debentures of the City of Guelph, issued as follows:

$48,000, under By-law to provide for the subscription by the City of Guelph for $48,000 of additional in the Capital Stock of the Guelph Radial Railway and for such purpose to borrow upon Debentures, issued under the authority of the Guelph Radial Railway Act, the sum of $48,000, to be applied to pay the existing Bonds of the Company.

$55,000, under By-law to provide for the extension of the City Gas Works. Confirmed by Local Legislature.

These Debentures will be repayable at the end of 30 years and will bear interest as follows: $48,000, 4½ per cent. and $55,000, 4½ per cent., all payable half-yearly.

The highest or any tender not necessarily accepted. Further information will be furnished on application to

JOHN NEWSTEAD,
Chairman of Finance Committee.

Debentures For Sale.

The undersigned is prepared to receive offers for the purchase of debentures of the undermentioned Drainage Districts and of the Central Judicial District, all in the Province of Manitoba. The debentures of the Drainage Districts are guaranteed by the Province and issued under the provisions of "The Land Drainage Act." All the debentures are to be in denominations of $1,000 each and payable at the dates and times set forth below, and bear interest at the rate of four per centum per annum, payable half-yearly at the Union Bank of Canada, Montreal,

Drainage District No. 3....	$ 10,455.00
" " No. 14...	100,632.00
Central Judicial District....	25,000.00

The Debentures of the Drainage Districts will be dated September 1st, 1905, those of Drainage District No. 3 maturing September 1st, 1930, and of Drainage District No. 14, September 1st, 1935. The debentures of the Central Judicial District mature on the 1st day of January, 1924.

All offers must be addressed to the undersigned marked "Tenders for Debentures" and must reach this office not later than Saturday, the 26th day of August, 1905.

Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,

BRANTFORD.

Mercantile Summary.

James Ballantyne, of Montreal, is, we hear, about to erect a manufacturing and retail plumbing shop in Winnipeg.

The Canadian Pacific Railway has given a contract to J. McDiarmid & Co., of Winnipeg, for new machine shops at Moose Jaw, Assa. The cost is estimated at $40,000.

The Bell Telephone Company will erect a new office at Brantford, Ont., at a cost of $40,000, and also a central energy system, and additional underground cables. The city so far has refused to give the company an exclusive franchise.

The considerable alterations which are being made on the Mispec, N.B., pulp mills are progressing rapidly. The mill's capacity is to be increased from 23 to 40 tons of pulp a day, and as it requires about 1,000 feet of wood to produce a ton of pulp, the mill will therefore grind from 12,000,000 to 15,000,000 feet of lumber annually.

⁂

DO, AND DON'T.

Abe Hummell, the New York lawyer, is credited with a new and very much to the point retort. The other morning, accompanying a client to court, the case at issue being a breach of promise suit for damages based on letters written by the defendant, the counsellor had given a lesson on morals to his client, when the latter dejectedly remarked:—

"Oh, I know all about it, Abe; the same old song, 'Do right and fear nothing.'"

"No, no. That's not it at all," answered Abe; "don't write and fear nothing."—Omaha Bee.

⁂

UNITED STATES FINANCE.

Henry Clews & Co., New York, report under date, August 19th, as follows:—

The stock market has this week shown additional signs of divorcing itself from the considerations that conservatism would seem to prompt; there is the presence of enthusiasm in the air which takes no account of practical tests of values such as returns on investments and prospective returns on investments; and barring possible adverse developments that appear daily to be growing less and less probable, the financial situation seems to be working toward a period of inflation. It appears no exaggeration to say that the market is at fever heat; the shoulders of the large interests are under it. stimulating it, and deals and rumors of deals are being used to foment the situation. It is true that prices are high, but under these conditions it would not be surprising if they should move somewhat higher. The large interests in the market themselves recognize the high level; but they argue that conditions also are high and that the speculative mind is so enthusiastic over the promise of material prosperity contained in this year's unprecedented harvests—now virtually past the danger point—that the time is ripe for a campaign to market the securities they acquired during the collapse following the inflation which culminated in 1902. The great crops of the country, taken alto-

Debentures For Sale

The undersigned is prepared to receive tenders for the purchase of one hundred and fifty thousand dollars ($150,000) of Drainage Debentures of Drainage District No. 2 in the Province of Manitoba, such debentures being guaranteed by the Province of Manitoba and issued under the provisions of "The Land Drainage Act, 1895." The debentures will be in denominations of $1,000 each, payable in thirty years from the

15th day of September, 1905

and bear interest at 4 per centum per annum, payable half-yearly at the Union Bank of Canada, Montreal. All offers must be addressed to the undersigned, marked "Tenders for Drainage District Debentures" and must reach this office not later than the 23rd day of September, 1905. Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.

Winnipeg, Aug. 18, 1905.

DEBENTURES

SEALED TENDERS addressed to undersigned will be received up to noon of Monday, September 11th, 1905, for the following debentures of the City of Niagara Falls namely:

$6,962.62 twenty years 5%, issued for permanent walk purposes, dated August 15th, 1905.

$10,022.37 thirty years 5%, issued for sewer purposes dated August 15th, 1905.

Said Debentures, Principal and Interest, are payable at the City Treasurer's Office, Niagara Falls, Canada, annually.

Purchasers to pay accrued interest from Aug. 15th, 1905.

Further particulars can be obtained on application.

Highest or any tender not necessarily accepted.

JOHN ROBINSON, City Clerk.

Niagara Falls, Can., Aug. 22, 1905.

gether, easily promise a period of unequalled agricultural prosperity, with the single exception of the cotton crop; corn, the king of crops, will certainly exceed all previous records; wheat, and hay, and oats, and barley and rye all promise to be very close to the record limits if they do not exceed them; and this, in view of the impaired crops in Russia and elsewhere, offers a basis for general confidence. The market has not been influenced so generally by individual price movements as it was last week.

⁂

MONTREAL MARKETS.

Montreal, 23rd August, 1905.

Ashes.—Trading in this line at present is very light, and the few lots offering are principally American ashes, indicating an easy market in the United States. Quotations remain about steady at $5.05 to $5.10 for first quality pots; seconds, $4.50 to $4.55; pearls nominal at about $7 to $7.25 per cental.

Dairy Products.—Shipments of cheese from this port last week were 74,263 boxes, which quantity was 10,384 boxes less than for the corresponding week of last year. The market is a strong one, some dealers claiming that there is a comparative falling off in the make, but others are of the opinion that the higher prices prevailing are due to manipulation. For fine Ontario's the present figures are 11½ to 11⅝c.; Quebec's, 11¼ to 11⅜c. per lb. Exports of butter continue active, 37,320 packages having been shipped last week. In this line also values are firmer than a week ago. Fancy Townships creamery is quoted at 22¾c., and fine to choice, 22 to 22½c. per pound.

Dry Goods.—The autumn millinery openings are fixed for the 28th, 29th, and 30th days of this month, and every expectation is held that the attendance of visiting buyers will be large. Matters in the general dry goods trade are still quiet, but commercial travellers now on vacation will soon be getting on the road again. With the opening of the schools next month, and the return of the summer saunterers, city retail trade is expected to show some resumption of activity. All European letters continue to speak of increasing firmness in all lines of woolen piece goods, hosiery, linens, etc.

Groceries.—The demand for sugars at the refineries has fallen off very considerably, and though quotations remain just as last given, there seems an expectation in some quarters that there may be a shading of prices in the near future. Molasses shows signs of weakness, and it is reported offers of round lots of Barbadoes have been made at 31½c. California raisins will be high this year, a cent and a half dearer than last year, and the demand for Valencias is expected to be larger in consequence; first shipments of these latter goods were to be made from Denia on the 20th inst., and will arrive on a pretty bare market, stock of old fruit being well run out. Teas move slowly, the only noticeable demand being for cheap Ping Sueys, such as the Government seeks to exclude. Japans are very firmly held, and Ceylons and Indians are stronger, especially the lower grades.

Hides and Skins.—Values of hides continue very firm, with small offerings, and buyers' quotations for No. 1 run from 11 to 11½c. per lb. Lambskins are steady at 60 to 70c. each.

Leather.—It is now getting in towards a "tween season" time in the shoe manufacturing, and this together with the higher quotations for leather affects the demand, which is of a quiet and slow character just now, but there is no disposition whatever on the part of tanners to make any concessions in prices as last quoted.

Metals and Hardware.—Iron values are steady, with $19 quoted for Summerlee and best brands of domestic pig-iron, and bars at $1.75 to $1.80. Iron pipe is steady at $4.10 for inch, and boiler plate at $2; bar steel, $1.90 to $1.95. In the way of sheets, tinplates are quoted at $3.65 to $3.75 for cokes, and $3.90 to $4 for charcoals of standard weight and brand; ternes, $6.50; Canada plates, $2.35 to $2.40; black sheets, $2.15; galvanized sheets, $4.15 to $4.25. Ingot tin rules steady at 35½ to 36c.; copper is scarce and strong, and antimony is also hard to get on spot, some asking as high as 16c.; lead, $3.75 to $3.80; spelter, $6.25 to $6.50.

Oils, Paints, etc.—Considerable quantities of whale oil are coming to hand, and with the further development of whale fishing companies in the Gulf of St. Lawrence, it is feared the market may become glutted; about 35c. is quoted for whale oil of fair quality. Seal oil is neglected, and remains easy at 45c. in a jobbing way; cod oil, 36 to 40c. as to grade; castor, 7½ to 8c. per lb.; linseed oil is a little firmer abroad, but boiled has been sold in fair lots as low as 49 to 50c.; turpentine is a little firmer at 89c. Leads, window glass, putty, etc., remain as last quoted.

⁂

TORONTO MARKETS.

Toronto, Aug. 24th, 1905.

Chemicals, Drugs, etc.—While no special feature presents itself for review this week, the position of the local drug market as to turnover and steadiness of prices is normal. While values of the two staples, opium and quinine, are somewhat easier, those of most of the other drugs are quite firm. Cod-liver oil is on the dull side. A New York report speaks of a rather poor trade going on at the moment. Baltimore advices refer to a considerable degree of steadiness in the chemical market while in Manchester, England, also this branch is keeping up well, particularly in the export departments.

Dry Goods.—A busier time apparently has again set in for the wholesalers in general dry goods, though it is expected to become much more marked next week when so many exhibitors are sure to arrive in town. Calicoes, ginghams, and similar goods have been in more

Regarding Canadian Investments

The "Manitoba Free Press" for February 11th, 1905 contained the following reference:—

"*Millions of dollars of Eastern money are*
"*invested on Mortgage Security in the*
"*West for the simple reason that it has*
"*been found profitable.*"

All Investments of the Great West Life Assurance Company are made in the West, thus securing for Policyholders unusual advantages in the direction of low premiums and high profit returns.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

than usual demand. Dress goods, too, are going out satisfactorily. Reports from country points are very bright and prospects for a heavy fall trade are good. The values of staple cottons, and woolens, as well as linen goods, retain their strength to the full.

Flour and Grain.—Quotations from Old Country points for Ontario have fallen off, and ninety per cent. patents now seldom realize at local rates more than $3.10 in buyers' bags. The coming in of the new crop is likely to present any reversal of these conditions. Millfeed, however, seems to retain its strength to the full owing to the heavy demand. Oatmeal has declined 25c. owing to the nearness of the new crop. Little business has so far been transacted in new Manitoba wheat. Canadian corn remains nominally the same with little movement. Barley and rye are dull. Peas are dull at the low prices.

Fruits and Vegetables.—One or two days this week, business at the fruit market has been a little quieter, though the average for the past few days has indicated fairly heavy receipts and sales. Prices have been pretty steady. We quote. Raspberries, 6 to 8c.; Lawton raspberries, 6 to 8c.; plums, basket, 15 to 25c.; peaches, 25 to 60c.; pears, 20 to 60c.; California peaches, case, $1.25; California plums, $1.75 to $2.25; pears, $3.50 to $4; Georgia peaches, $2.25 to $2.50; cantaloupes, crate, $1.25 to $2; watermelons, each 30 to 35c.; bananas, bunch, $1.25 to $2; lemons, crate, $6 to $6.50; oranges, crate, $4.75 to $5.50; tomatoes, basket, 15 to 25c.; cucumbers, basket, 10 to 15c.; potatoes, bushel, 60c.; beans, basket, 20c.; cabbages, barrel, $1 to $1.25; celery, dozen, 50c.; Spanish onions, case, $2.50; corn, 5 to 6c.

Hides, Skins, and Leather.—The market may be said to be extraordinarily high for hides, due, it is said, to one dealer having tried to buy up everything in sight. In leather conditions seem to have improved since the advance and the recent heavy purchases by the Japanese Government.

Groceries.—Sugars remain unchanged in price, though the undertone is firm. The movement in other staple goods is fair, and some of the wholesale firms have been particularly busy. In teas and coffees there is no special feature. Interest is being taken in the canned vegetable situation. Peas are strong and are expected to advance 2½c. during the week. Payments have been satisfactory.

Provisions.—Prices for butter are very firm, receipts being light, and the enquiry from Britain insistent. Cheese is in the same boat, and prices, generally speaking, have gone up ¼c. Eggs are very firm. Smoked meats are very firm and the demand even greater than usual at this time of the year. Hops, old crop Canadian are almost out of the market, the nominal price being 24 to 26c. Reports as to the crop in England are not glowing.

DELAYS ARE DANGEROUS.

TENDERS

will be received up to the 20th September next for loan on the new Hospital Building and lots, Moosomin. Amount required, $3,000. Value of property, about $10,000.

A. E. CHRISTIE,
Secretary,
Moosomin General Hospital.

Aug. 11th, 1905.

Sale of Assets of the Oshawa Wire Fence Company, Limited.

Tenders will be received up to noon of the 30th day of August next, addressed to the undersigned for the purchase of the following assets of the above named Company:—

Parcel No. 1.—Real Estate, including Three Story Brick Factory, having railway siding and centrally located in one of the best manufacturing towns in Canada.

Parcel No. 2.—Patent Rights, Fixed and Movable Machinery, Tools and Office Furniture.

Parcel No. 3.—Partially Manufactured Goods and Raw Material.

No tender necessarily accepted. This offers an excellent opportunity for a profitable investment in a steadily increasing business. Lack of capital the only reason for selling.

Further particulars, terms and conditions of sale, with full description of the several parcels, will be mailed on application, or may be inspected at the Company's Office.

L. K. MURTON,
Secretary of said Company, Oshawa.

Seeds.—Some alsike has been brought into the market this past week, and sold at $2.50 to $5, but no free movement has started as yet.

Wool.—While prices are firm, manufacturers are only buying for immediate requirements. The Russian crop is said to be a little easier in market tone.

CANADA FOR THE UNITED STATES.

The development of Cobalt is another example of how our enterprising southern neighbors step in and capture the cream of Canada's rich resources before Canadians realize their value. In the Kootenays, the Yukon, the Alberta oil fields, at Sudbury and the "Soo," at Niagara, in our lumber industry, and in the power plants of Quebec and New Brunswick, the Yankees have been in the van in exploiting Canada's wealth.

In the new mining centre it is the same story. Visitors to this, our latest "nine days' wonder," report that American prospectors have already succeeded in securing a lion's share of the ground. For instance, the Nipissing Mining Co., said to be controlled by John D. Rockefeller, recently purchased a tract of no less than 1,600 acres.

Owing to the lack of smelting plants in Ontario, New Jersey smelters have, up to the present, had a monopoly of this important industry. As soon as ever talk began of establishing a smelter at Toronto, the Americans controlling the copper industry of Algoma arranged to build a smelter at Copper Cliff to handle the Cobalt ores.

Every credit must be given our American cousins for their enterprise, but we desire to draw the attention of Canadians to the necessity of having boundless faith in the future development of Canada's riches, and to the advisability of such development being kept in the hands of our own citizens. We cannot expect the Government to erect a high fence to exclude American enterprise; the only safeguard lies in developing an enterprising individuality in our own people.—Canadian Grocer.

NO DEMI-TASSE FOR REED.

Some years ago Thomas B. Reed went to Ohio. On his journey out there he went into a little railway station to have dinner. At the end of his order he said:

"Bring me a demi-tasse, also."

The waiter stared. "What's that?" he asked.

"A small cup of coffee," Mr. Reed exclaimed. "A small cup of black coffee; see that it's good coffee, please. Demi-tasse means half a cup."

"Aw, g'wan," said the waiter, "I ain't a-goin' to bring you no half-cup. We don't sell nothin' less than five cents here."—Boston Herald.

THE IRON MARKET.

For the present the large makers of iron and steel in the United States, seem, says the Iron Age, to have lost interest in the export trade again, and to have withdrawn from an active campaign for the furtherance of the foreign trade. The home demand proves the more attractive proposition, every time the choice is thus presented, which seems to be happening about once in three years. The rail mills have received additional inquiries, and have accepted additional contracts, where engagements of that sort were possible. The southern rail mill has closed a contract for a large tonnage for next year's delivery, which is accepted by some people as an evidence of a liking for the open hearth product of the south. Crude steel is reported to be strong in the larger markets and the demand for steel scrap is one of the bright spots of the present market. Eastern buyers have invaded the west for tonnage of that kind, and the tone of the market is very strong. For finished steel there is a less uniform condition. Prices have taken no decided turn one way or the other, but the market is not universally strong. Iron bars have advanced $2 per ton and the rising tendency of billets and sheet bars is exerting a wholesome effect upon the prices of the finished products related thereto. On the whole the market is perhaps a shade stronger.

Here is the story as it first appeared in Wednesday's Montreal Gazette: "Ste. Scholastique, Que., August 23.—Fire, which broke out here shortly after midnight, threatens to wipe out this village. At an early hour this morning over twelve houses had been consumed, and every building in the place is in danger from the flames, which are gaining great headway, being fanned by a strong wind. All the villagers are fighting the flames, but as there are no fire appliances, their efforts are practically futile. The mayor has telegraphed to Montreal for aid, which is awaited with anxiety." And here is the version given by a telegram of later date on Wednesday to the Toronto World of yesterday: "Montreal, Aug. 23.—Five houses and three sheds at St. Scholastique were burned this morning. The damage was $25,000. The fire started at 12.30 o'clock this morning, and made such alarming progress that Montreal was asked for assistance. A steamer and squad of firemen from here were sent by special train and had the fire under control by about 10.30 in the forenoon." Evidently the writer of the despatch to the Gazette saw double in his excitement.

At Lambton, on the Quebec Central Railway, a fire started at noon on 22nd August, caused by hot ashes being put near the barn of Thos. Lapointe. As a result twenty-nine houses, the church, the convent and the presbytery were destroyed. The burned houses formed about one-third of the village.

—A good story of a recent conversation between Mr. Howells and Mark Twain is going the rounds. Mark Twain was relating some of his experiences before he became famous. "My difficulty taught me some thrift," he observed, "But I never knew whether it was wise to spend my last nickel for a cigar to smoke or for an apple to devour." "I am astounded," returned Mr. Howells, "that a person of so little decision should meet with so much worldly success." Mark Twain nodded very gravely, "Indecision about spending money," he remarked, "is worthy of cultivation. When I couldn't decide what to buy with my last nickel I kept it, and so became rich."

—The stockholders of the Goderich Elevator Company after examining the various tenders advised their directors to accept that of J. H. Tromanhausen, of Minneapolis, for a cement and steel house of half a million capacity. The directors met and let the contract, as advised, upon condition that the by-law now before the ratepayers is carried.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00

FOUNDED A.D. 1710

Head Office, Threadneedle St., London, Eng.

. Transacts Fire Business only, and is the oldest purely Fire Office in the world Surplus over Capital and all Liabilities exceed **$7,000,000.**

Canadian Branch—15 Wellington Street East,
TORONTO, ONT.

I. M. BLACKBURN, ... Manager
F. E. MAULSON, ... Inspector

HIGINBOTHAM & LYON, Toronto Agents.
Telephone 488.

Agents Wanted in all Unrepresented Districts.

The Northern Life ASSURANCE CO.

Closed the half year showing over 25% more insurance issued than the same period last year.

Its policies just meet the wants of the people and are easily sold.

A few good producing agents can secure liberal contracts in desirable territory.

Head Office, — LONDON, Ont.
JOHN MILNE, - Managing Director.

THE RECORD OF THE

NORTH AMERICAN LIFE

for 1904

shows that large gains have been made in the amount of policies issued, insurance in force, income, payments to policyholders, etc.

Policies Issued $6,484,425
An increase over 1903 of $645,535

Insurance in force $35,629,988
An increase of $3,004,895

Income $1,504,063
An increase over 1903 of $122,700

Payments to Policyholders $561,136
An increase over 1903 of $137,918

The financial position of the Company is unexcelled. A good Company, both for the policyholder and agent. Applications invited for agencies in unrepresented districts.

Home Office, - TORONTO, Ont.

ROYAL-VICTORIA
LIFE INSURANCE COMPANY,

Head Office Montreal.

Government Deposit, **$ 250,000.00**

Capital and Assets, Dec. 31st, 1904 .... **1,244,436.76**

Good opportunities for productive Agents in Nova Scotia, North-West Territories and British Columbia. — Liberal Terms and large territory to men who can write a satisfactory business.

APPLY TO

DAVID BURKE, A. I. A., F. S. S.,
Montreal, June 1, 1905. General Manager.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

THE MARITIME CONVENTION.

Some of the subjects discussed by the Maritime Province Board of Trade at its Yarmouth meeting are worthy of still further consideration. We have already given on 18th and 25th August a pretty full list of the resolutions presented for discussion by the different boards and a synopsis of the debates, as well as of the president's address. We regret that a supplementary report, intended also for last week's issue, and giving fuller reports of the speeches, did not reach us in time. No fewer than nineteen places in the Atlantic Provinces were represented in the convention, and there were more than fifty persons present, representing a membership of over 2,200, so that the gathering was a representative one.

The appointment of a permanent committee of the board, which shall follow up and where necessary take action upon the resolutions passed at annual meetings of the whole body, is one of the most practical steps taken by the gathering. In addition to matters already debated in general assembly there are matters coming up almost constantly in trade which merit the attention of some such authoritative body. And it is not always possible to await the yearly gathering of the board in order to deal with them if the best results are to be attained. This permanent committee will afford subordinate but still practical machinery to deal with them.

Among the matters referred to in the address of the president was a legislative union of the three maritime provinces, Nova Scotia, including Cape Breton, New Brunswick, and Prince Edward Island. This also was to have formed the subject of a resolution, for it was presented as a topic of debate by both the Saint John and the Amherst chambers. One cannot tell at this distance how much significance should be attached to the fact that the St. John delegate, who had proposed the subject, was not present, and that the Amherst member, who was present, had no resolution to offer. The proposal had been before the convention at Moncton, and again at Charlottetown, but was postponed. However, it reached the form of a resolution on the last day of the Yarmouth meeting, which was passed after some debate and with a few members dissenting. The resolution provides that a memorial on the subject be sent to each of the three provincial Governments, and that they be asked to arrange a meeting of representatives at an early date. The idea prominent in the mind of the proposal of this resolution was the growing power of the West compared with that of the Maritime Provinces. How is the balance of power to be maintained, he asks. One way undoubtedly is to make strenuous efforts to get into the eastern end of the Dominion more population, more capital, more development, so that by force of their productive importance they shall command a greater influence than they do now. We do not pretend to say whether one Government for the three provinces would prove satisfactory; efforts in a like direction elsewhere seem to have shown that local dissatisfactions resulted from a centralization of authority. But doubtless some economy in administration would result; and this is not a small thing.

It is twelve months since the Maritime Board of Trade passed a resolution favoring Government assistance to steel ship-building in terms which it is worth while to repeat. Premising that steel shipbuilding is handicapped on our Atlantic coast because of the nearness of the British shipyards, the resolution read: "The Maritime Board of Trade hereby endorses and approves of the principle of home steel ship-building as offering a new and profitable field for the utilization of our steel products, the employment of skilled labor, and the creation of a new mercantile marine—formerly a great source of wealth to the country." Very good. But the corollary which appeared to be in the minds of the authors was that the Government at Ottawa should come down handsomely to start the thing on a large scale. Our friends in the Lower Provinces are too much disposed to rely on governmental assistance. Governments cannot subsidize every industry—it would not be healthy if they should. And there is too much subsidizing of one kind and another as it is. The resolution itself speaks of the profitable field offered by ship-building for our steel products and skilled labor: this being the case, what more is needed than public spirit, enterprise and capital? We often call to memory the words of J. M. Carmichael, of New Glasgow, uttered five years ago on this very subject: "Not a ship can be built so long as our people are content to allow even their own timber to be carried by English and Norwegian vessels." Let a start be made, even on a small scale, to show what can be done. The provinces on our eastern border are extraordinarily rich in those necessaries of ship-building: they have designers, shipwrights, sail-makers, fitters and riggers; they have skilled navigators and mariners; they have stores of wood and iron; and they have a glorious history of world-encircling commerce in their own wooden ships, when some twenty years ago Yarmouth herself owned 260,000 tons of shipping out of 855,758 tons owned in the two Provinces of Nova Scotia and New Brunswick. Let it not be said that by reason of timidity no effort shall be made to utilize these valuable factors.

⁂

THE WESTERN GRAIN CROP.

It is a great satisfaction to learn that the joyous reports current for weeks of a bountiful harvest this year in Manitoba and the Territories are confirmed by actual observation of conditions at the close of August. The yield is remarkable of both wheat and oats. Wheat north of Brandon, we are told, runs thirty-five bushels to the acre and oats eighty to eighty-five bushels. Practically the whole crop is ripe in Manitoba. Farther west, the famous Robertson fields in High River district are declared to average fifty bushels to the acre of hard wheat as far south as Red Deer, Alberta, the grain harvest is ripening, and the yield is very heavy. This intelligence had all come in before receipt of our special wire of yesterday noon from Winnipeg. The apprehensions that much wheat would be lost because of a lack of farm laborers to harvest it have been in part removed by the fact that rain came this week, which postponed harvesting operations in parts of Manitoba, and allowed time for harvesters from Ontario or elsewhere to reach the wheat fields.

Summarizing all the latest reports throughout Western Canada up to noon on 31st August our Winnipeg correspondent concludes that they "indicate the cutting of oats and barley to be nearly completed. The wheat harvest is now general, about forty per cent. being already cut, and threshers will be at work next week. Weather conditions continue favorable, and indications are that the grain will be garnered safely. Farmers report the wheat to be of a fine sample and heavy yield. Careful estimates by best-informed parties place probable yield of wheat in Western Canada at ninety million bushels." This is the figure given us on Tuesday by a well-informed Winnipeg merchant, and, although it is lower than the estimate made a week ago by the Premier of Manitoba, we are disposed to think it is a reasonable figure. And a very handsome figure it is.

⁂

THE STATE OF TRADE.

Satisfactory reports of the state of trade, both retail and wholesale, continue to arrive. In Montreal there has been an extraordinary attendance at the millinery openings, and the feeling in the metals trade is promising. In Toronto a marked improvement has been manifest in the local trade, and with the steady arrival of visitors by every train and boat for the Exhibition the retail trade next week ought to be phenomenal. Prices in all lines of merchandise are steady, and their tendency upward, except with perishable stuff, like vegetables and fruit; with these, prices are unsettled, as supplies are larger each day. The wholesale houses generally in both cities are busy filling orders for immediate delivery, and also in preparing for an unusually large fall trade.

The volume of summer trade in dry goods in particular has been greater as a rule, merchants say, than they had calculated upon. Not only are orders good from country dealers who have come into Toronto for Exhibition week, but the reports sent in by travelling salesmen, both in this city and Montreal, are cheerful. Whether from the East or from the West, but especially from the far West, the demand is brisk and prospects are considered good.

Money is plentiful nearly everywhere, and paper is being well met. In almost every quarter a feeling of quiet confidence is expressed, a feeling which is in itself half the battle of success. The present prosperity in Canada is not regarded by business men as a temporary boom, but as a result in due course of national development, leading to wealth and comfort.

⁂

PEACE BETWEEN RUSSIA AND JAPAN.

An agreement has been reached between Russia and Japan by the Peace Conference at Portsmouth, New Hampshire, which is so unexpected as to be almost startling. For Japan has made concessions from her demands that three days ago could not have been looked for. Russia, it is true, has conceded to Japan practically the control of Korea, and has also relinquished her rights in Manchuria, with the exception of the common right of all nations to the "open door" as affects commerce. But the Mikado's Government has withdrawn its demand for an indemnity for the cost of the war, for possession of interned Russian warships, and for the limiting of Russia's naval power in the East. With respect to the Island of Sakhalin, Japan has secured one-half the island, which was a thing yielded by M. Witte when he learned that Japan's demand for indemnity for the cost of the war was abandoned. The Russian plenipotentiaries claim the result of the peace agreement as a victory for them, but opinions in Russia itself are not so sanguine. And the war-party is not pleased. For instance, Prince Oukhtomsky, writing on Wednesday in the "Viedomosti," declares that in spite of "the advantageous terms wrested out of defeat," the moral advantage rests with Japan, who will be regarded in the eyes of the East and of Europe as the victor. Russia's prestige, he asserts, has received a heavy blow, while Japan has acquired a predominant position in Asia.

An illuminating glimpse of the feeling of the Japanese with respect to the war is to be found in a remark made by Hon. T. Nossé, the Imperial Consul for Japan in Canada: "We started to teach them [the Russians] a lesson," said he, "and I think we have attained that end. This being the case, we can afford to be generous." Japan engaged in this war because she was tired of Russian aggression, and in his opinion "the good offices and influence of the King of England and the President of the United States had much to do with the cessation of hostilities." How much these influences had to do with the settlement now reached by persuading Japan to yield certain points we may only speculate. But that a stop has been put to horrible bloodshed and suffering and to the waste of war is a thing that the whole world will be satisfied and glad to know. But the general impression remains that while Russia was stubbornly resolved to the last to do nothing to secure peace, Japan has shown generosity that leaves her a moral victor, while, indeed, she secures practically all she claimed before the war began.

* * *

CANADIAN BUTTER IN BRITAIN.

Reports made by those who have recently investigated the dairy trade situation in Great Britain concur in stating the likelihood of a good demand continuing for Canadian butter for some time after the expiration of the war. Prof. J. H. Dean, of the Ontario Agricultural College, is authority for the statement that the best Canadian cheddar cheese is equal to the best English and Scotch cheddars, but it does not bring the same price. The best Canadian butter is probably equal to the best Danish when first made, but owing to the greater distance and longer time required to reach the market it is not so good when delivered. It also lacks the uniformity which is so characteristic of Danish butter. This uniformity is the result of uniform methods of manufacture and the adoption of pasteurization and pure cultures in making the butter. The trade in the Mother Country seems to be agreed that some form of preservative is necessary in order to have saltless butter hold its flavor, and the danger is lest the Canadian maker should add too much, one-half of one per cent. of boracic acid being the maximum allowed by British law. All investigators agree apparently in the idea that considerable preference is being shown in the Motherland to articles of Canadian make. The greater the necessity, therefore, that we should always send to the United Kingdom good and honest wares.

* * *

RETAIL STOREKEEPING.

It was an Old Country wholesale merchant who once said to the writer long ago: "You may call it aspiration, if you like, or you may call it dissatisfaction at working for some one else, but there always have been and there always will be more persons wanting to 'go into business' than there is room for. And people are foolish to give them credit as they do." If that were true in the United Kingdom twenty years ago, it appears equally true in some parts of Canada to-day; and not less true that such people get credit to a degree and under circumstances which are enough to make us suspect the sanity of the commercial travellers who send in the orders and the men in the warehouse who fill them.

We receive weekly from various correspondents particulars of failures of retail traders or compromises they have arranged, and we print them in our Mercantile Summary as part of "The Day's Work," so to speak, of the Canadian commercial community. Sometimes there is an exceptional case, where the man has met with misfortune, and his downfall cannot be attributed to the usual causes; but as a rule the failing retail trader is a weakling, who overbuys, or who does not get profit enough to cover his expenses, or who will not give his business proper attention. Illustrations of this will occur naturally to many who are interested, but we take from to-day's Quebec and Montreal letters some of the latest:

> A dealer in hardware, named J. H. Lacroix, at Shawinigan Falls, Quebec, is insolvent, and his affairs are in the hands of Kent & Turcotte, assignees, Montreal. The liabilities reach to about $9,000, and the over-liberal extending of credit is said to be the cause of failure. Lacroix was formerly a clerk in Nicolet, Quebec, and began business four years ago on quite small capital, hoping, no doubt, to grow with the place and become a merchant prince.
>
> L. N. Cote, of Seven Islands, in the Gulf of St. Lawrence, was born and brought up a farmer, but at the age of nearly sixty he became imbued with ambitions to become a merchant, so, selling his farm in Rimouski County, he embarked in a general business at the above location, which is far down the river on the north shore, a remote place, also doing something in a hotel-keeping way, as well as trading along the coast, not in a common schooner, but with a yacht, which he equipped with a gasoline engine. None of his ventures have panned out well, and he has now assigned on the demand of a Quebec creditor.
>
> It is announced that A. Lamarche, of Montreal, is appointed curator to the estate of Myer Goldberg, who has been a dealer in men's furnishings in Montreal. Goldberg was formerly an operative in a clothing factory, and started storekeeping in a small way two or three years ago. It is a marvel that he ever got credit, for he had no means to speak of, no remarkable ability, no acquaintance with or aptitude for retail merchandising.

We need quote no more. Nor is the subject a pleasant one. Manufacturers and wholesale merchants are to blame if they give credit to a weakling, an incompetent, who essays to start a shop alongside some of their old and trusted customers. He can only divide their legitimate trade and render it harder for them to pay their bills and make a living.

* * *

FIRE-FIGHTING IN SMALL PLACES.

We had occasion to mention in our summary columns last week a number of fires in small places in different Provinces. In one case a dozen houses were burned, in another twenty-nine. This week there are more such occurrences. Too often such little places have inefficient fire appliances, or none at all. Then there are forest fires, which sweep away villages which have been, without prescience, placed in the midst of the forest. For a fresh example here is Belmont, a settlement eight miles from Truro, in Nova Scotia, which was nearly swept out of existence last Tuesday afternoon by forest fires. The fire, which consumed seventeen buildings, including the railway station, is supposed to have started in the woods from a spark from a train, and as a result of it six families are homeless. We are all too careless in this country about fire; all too forgetful of what it has done and what it may do in given conditions.

Nor is it better, apparently, in the Old Country. We are told of a painful instance of the utterly inadequate arrangements made by parish and rural district councils for the proper protection of the inhabitants of the British Islands against the perils and losses of fire. The latest case of this sort is the recent destruction of a number of villagers' homes at Castlethorpe, in North Bucks, cited by the London Review. It appears that this would not have happened but for the scarcity of water. Although two fire brigades were in attendance, those who were on the scene could do really nothing, comparatively speaking, but stand by and helplessly watch what was practically the destruction of the whole of a small village. "Why these things should obtain in the twentieth century passes the wit of man," says our contemporary. "We are afraid that in the United Kingdom there are numbers of villages—and, for the matter of that, many fairly large towns as well—where the fire protection arrangements require a very thorough overhauling."

⁂

BRIDGES AND THEIR MAINTENANCE.

There is a law on the statute book, the Consolidated Municipal Act of 1903, which gives power to any township council to relieve itself of the maintenance of bridges under certain conditions. This is specified under Section 617A of the Act just named, which reads as follows:

> The council of any township in which a bridge over 300 feet in length is situate, may hy resolution declare that owing to such bridge being over 300 feet in length and being used by the inhabitants of municipalities other than the township and being situate on a highway which is an important road affording means of communication to several municipalities, it is unjust that the township should be liable for the maintenance and repair of the bridge and that it should be maintained and repaired by the corporation of the County; and that an application should be made to the Judge of the County Court for an order declaring such bridge a county bridge, to be maintained by the county corporation.

In view of this enactment the township of Anderdon, in the county of Essex, Ontario, took the requisite steps to have the bridge over the Canard river, on the front or Detroit River Road, maintained and kept in repair by the corporation of the county. An application was made to the county judge, Mr. Chas. R. Horne, for an order declaring that this bridge must be taken over by the county authorities of Essex and maintained as a county bridge. Judge Horne thereupon took evidence in the matter, and gave a hearing to both the township and the county councils. His decision was rendered a week ago, and is against the contention of Anderdon. His Honor finds that while the Canard bridge (a wooden one) is used by the inhabitants of other places than the township, and is situated on a highway which is an important road affording communication to several municipalities, and has been for many years maintained by the township and the county jointly, it is not long enough to come up to the dimensions mentioned in the Act. The bridge itself without the approaches is 223 feet in length, but the approaches are fillings in of marsh land by logs and earth, "and the banks, or rather the deep water of the river is clearly defined." It was urged by the township that the length of the bridge should be the measurement of the river between its defined banks, and not the bridge as it has been known and has existed for many years.

But the claim is not found to be substantiated. The judge holds that "the bridge is the bridge known and recognized for many years, and repaired by the township and the corporation of the County of Essex." Furthermore, he finds that it is not 300 feet long, as the Act requires it to be, and, therefore, he refuses the order asked for. This decision may be borne in mind by other township municipalities who are maintaining bridges in like circumstances to this in Anderdon.

⁂

ASSESSMENT INSURANCE.

Let it be understood at the outset that what here follows has not been written with the purpose of decrying the great work that has been accomplished in the past, and is still being accomplished to some extent by assessment societies. Not only have these societies done incalculable good by saving thousands of families from poverty and want, but they have also performed a noble work in stimulating and encouraging habits of thrift in every community, and, above all, in educating the public to an appreciation of the benefits of life insurance.

But while the best features of assessment societies are freely admitted, it is impossible to overlook the fact that there is another side to the picture. No one can deny that the failures among these institutions have been exceedingly numerous. Out of the hundreds of societies that have existed in the United States and in Canada during the past fifty years only a paltry remnant remain. Where are the others? There are thousands of persons throughout the country who can answer that question to their sorrow.

Some of them are men who, after paying assessments regularly for years, have lost their insurance, either through failure of the society or by reason of repeated increases in the rates. These men have nothing to show now for the assessments they paid, and in many cases are unable on account of age or ill-health to secure fresh insurance.

Some of them are widows and orphans, whose husbands and fathers relied upon assessment insurance for protecting their families. These families are now suffering hardships that might have been rendered unnecessary if their husbands and fathers had not chosen to rest the future welfare of their dependents upon the broken reed of assessment insurance.

Surely the insurance business can be conducted in such a way as to safeguard it from risk of failure. The history of legal reserve insurance seems to indicate that such a thing is possible. In Canada, the burying-ground of so many assessment concerns, there is not on record a single failure of a legal reserve company. Verily, that single fact speaks volumes for the difference between the two systems.

No business concern can persist in selling an article at a loss and escape failure in the long run. Herein lies the secret of the calamities that have overtaken so many assessment and friendly societies. They have consistently refused to charge a proper price for the insurance they offer to their members, and consequently have reaped disaster. On the other hand, the legal reserve companies have always insisted on a fair premium, scientifically calculated, and as a result are to-day strong and flourishing.

"But," it may be objected, "are there not some of the assessment societies that have escaped the general wreck, and are still carrying on a large business, with assets, in some cases, amounting to several millions of dollars?" Granted. But how long will this apparent prosperity continue? Judged by actuarial standards, the rates of all these societies are ridiculously low. They are selling their insurance at a loss. Such a course must inevitably bring ruin in the long run.

To take an example. A prominent fraternal organization charges a monthly rate of 74 cents; that is a yearly rate of $8.88 for $1,000 insurance at age twenty-five. There are no extra payments to meet expenses. Even if every member lived to be one hundred years old (!) he would pay in dues only seventy-five times $8.88; that is, $666. Nevertheless, the society expects to be able to raise $1,000 at each member's death, no matter whether he has paid dues for only one month or for seventy-five years. Let any reasonable man take these figures into his consideration and explain how, in the name of common sense, the society in question can hope to do business on such a basis and still survive!

"But," some one may object, "we are leaving interest out of our calculation." Yes, we are leaving interest out of our calculations and we are also not considering expenses. The annual expenditure of the society in question is over 5 per cent. of its assets, so that its interest earnings may possibly, though not probably, suffice to meet the expenditure. At any rate, the society cannot count on the magical powers of compound interest coming to the assistance of its sadly inadequate rates.

The simple, undeniable, inexorable fact is that the rates charged by all assessment societies are utterly inadequate. In support of this statement we could quote the unanimous testimony of hundreds of skilled statisticians. Unfortunately, statisticians are usually regarded as having an animus against assessment societies. Well, then, if their testimony is not admitted, let us quote the opinion of a man who is everywhere recognized as a sincere and disinterested friend of fraternal and assessment organizations. We refer to Dr. Howard Hunter, Superintendent of Insurance for the Province of Ontario, Registrar of Friendly Societies, an upright and able official, whose wide experience of assessment societies adds special weight to his opinion.

The Toronto "News" of 16th June, 1905, published an interview with Dr. Hunter on this very question that we are now discussing. "The summing up of Dr. Hunter's argument," said the "News," "was this: That there is a price for life insurance just the same as a price for any other commodity, and it must be paid. That price can be ascertained by applying to the actuaries, and the sooner these societies not now charging enough apply to the actuaries and get their rates up the better for all concerned."

"But," we hear the objection raised, "if these societies are selling insurance at a loss, how is it that some of the societies continue to transact a large business amassing assets of several millions of dollars in some cases, with all the outward evidences of undiminished prosperity?"

We can best answer this question by means of an illustration. Twenty-five or thirty years ago there sprang into existence in the United States a number of societies whose extraordinary methods attracted widespread attention. These societies differed in the details of their operations, but their general plan was the same. For a ridiculously small annual premium they guaranteed $1,000 at the end of a stated period. For example, one society charged $50 per annum for an endowment of $1,000, to be received at the end of seven years. The scheme at first attracted very few people but as it became better known new members joined the society in constantly increasing numbers. The result was that when the first seven years came to an end the society had on hand enough funds to easily meet the endowments maturing at the end of the seventh year; but as time went on and the endowments continued to mature in ever-increasing numbers, the claims upon the society caught up to the premiums and insolvency soon followed.

We must devote another article to the subject.

* * *

THE INDUSTRIAL EXHIBITION.

Once more the Toronto Industrial Exhibition has demonstrated its attractiveness to the general public. Tuesday, the opening day, was by far more satisfactory in attendance than the first day of any year since the fair began. There were 40,000 people present. And on Wednesday, school children's day, there are stated to have been at least 80,000 in the grounds. Of course, the unusual efforts made by the management to secure attractions, such as the Jack Tars from the British fleet at Quebec and the band of the Irish Guards have brought out many spectators. These spectacular features are, however, by no means the only claims of the Fair to recognition by Canadians. There is a fine collection of products of the field, the factory, and the mine; the dairy pavilion is a worthy centre of attraction, and the gatherings of stock-breeders and fruit growers testify to their continued interest in the Fair as an educator. Nor must the art gallery remain unnoticed. Never before was there a display of art treasures in the grounds so well worthy of careful appreciation. We devote a separate article to these works of art. The zealous, and in the main sensible, efforts of the management to combine instruction with recreation have been eminently rewarded.

* * *

THE EQUITABLE LIFE.

How much sorrow and heart-burning among its agents and well-wishers has been occasioned by the revelations of misuse of funds by some of the officers and directors of the Equitable Life Assurance Society can only be guessed at, it can never be fully known. However, the purging which is going on must do the company good. One of its most optimistic vice-presidents, Mr. Tarbell, has recently been telling the agents that the worst is over, and that the end of the company's difficulties is near at hand. "When," he says, "we have once turned our backs upon them and resolutely set our faces forward, how soon they will dwindle away and disappear!"

He further encourages the agents per circular by the following considerations:

"Let me give you this to think about: those who want to do so can nurse their sorrow over the Equitable's troubles and their disappointment over shattered ideals for a lifetime, and never find it possible "to be quite the same again" but those who wish to forget them and prefer to work in a house that they have seen cleaned and know to be clean, rather than to cling to an old one full of memories, will soon find out, by diligent seeking, a new era of prosperity opened up to them.

"Get abreast of the new conditions and forget the past. The Equitable has lost some old associations, but it is like a tree that has been pruned, the trunk is there, solid and strong; the useless branches and those that were growing out of harmony with the tree have been cut off, and the one and inevitable result will be that the tree will grow stronger and bigger and more beautiful than ever before. It is the law of life.

"Look at it in this new light, and you will soon be entering into your work with a lighter heart than ever. Remember that heretofore you merely had faith in the company you represented. Now you know what it is. You know that, as compared with the total assets of the Equitable, the amount that has been diverted to questionable uses was very small, and the semi-annual statement submitted by President Morton at the last board meeting shews a condition of which we may all be more than proud."

* * *

NOTES IN THE OLD COUNTRY.

Evidences have been accumulating of the interest felt in this country in the possible results of the visit of delegates of the Canadian Manufacturers' Association to the British Islands in July and August. And this tempts one to reprint some pages of one's note-book of impressions made while on the tour and some extracts from letters written home. It is not too much to say that the tour has opened the eyes of many of the Canadian visitors to the extraordinary industrial activity of the United Kingdom, and it will likely prove a warning to us not to pay too much attention to the writers (American for the most part) who would have us believe that England is a decaying nation, in either manufactures or anything else. And we may hope that what the delegates were able to tell the Old Country folk of conditions in this new land will arouse their interest in us afresh. Assuredly they have a great deal to learn about Canada, and a great deal of prejudice and misinformation to get rid of.

Extract from letter written at London, England, July 1, 1905.

Our reception in the Midlands was wonderfully warm. As an instance of the people's whole-heartedness, when I reached Sheffield at 7 p.m. there was no room for me at the hotel I was billeted upon. While scolding the lady clerk for somebody's error, a nice little man came up and said, "Sir, if you are Mr Hedley, Mr. F.——, of Sharrow, bids me say that you are welcome at his house, and if you like to go first to the Athenaeum Club he will wait there till 7.30." Thanking the man—a member of committee, I suppose—away I drove with all my four pieces of luggage to find, twelve minutes afterward, the lady of the house awaiting me, with her two nice daughters and little boy, on the front doorsteps. "Will you not have something to eat, Mr.——." "No, Madame, thank you." "Then you must have a cup of tea." Presently the master drove up and said, "Why, this is somelike like! You don't look a bit the worse: come and have a smoke and tell me about things." This we did, till it was time for all three of us to dress for the reception in Cutler's Hall. We drove in, had music, readings, refreshments, met lots of townspeople, cordial and real. Reached home at 11.30. Next day, my host, who is a builder and contractor, drove me in and saw me off on the train, introducing me to the Master Cutler—a great swell—the Lord Mayor, and others. So this domestic entertainment was better than any hotel, and I had learned how warm the stand-off Englishman can be.

I cannot begin to tell you through what scenes we have passed: Lichfield cathedral and Sam. Johnson's house—Kirkstall Abbey near Leeds, a wonderful ruin—the Birmingham dinner, where we heard Joseph Chamberlain speak and I shook hands with him and his wife and reminded him of his speech in Toronto in 1893, which he remembered with warmth. Then at Bradford yesterday, a place as big as Toronto. They had the traffic stopped and we marched up from station to town hall in the middle of the street, which was crowded with people on both sides, flags flying, a band playing welcomes outside the building. Clearly we were either regarded as curiosities or as welcome visitors—and we preferred to be in the latter category.

Extract from notes of the trip.

Richard John Younge, our secretary, made the prettiest speech of the tour at Leeds. Yesterday Morley Wickett, of Toronto, and George Amyot, of Quebec, spoke. Previous speakers have been Messrs. George, Ballantyne, and McNaught—all did well. I am resting here all this forenoon and have much need, for the pace is hot. Four hours in the train, 60 miles an hour, to get here yesterday, four hours in the train to-morrow to get to Liverpool.

Extract from letter written at Middlesborough, England, July 20th, 1905:

Approaching Middlesborough last night, it seemed that this great iron place was an inferno. Smoke and mist and thick vapor was everywhere. Blue flame, white flame, red flame, streamed from the tops of chimneys of puddling furnaces, and the Bessemer converters were emitting their smoke. Every now and then a burst of radiance illumined the landscape (moonlit) for miles around as something burst from a furnace. At last the train reached the station and I hired a cabby to drive me out to cousin John's. Tired and half dazed, trying to make out, as the Yankee says, "Whar I was at," by looking out of the windows, the cab stopped, and I asked the driver, who had got down, "Are we at Cleveland Lodge?" and he answered, "No, sir, not for half a mile yet. Please, sir, have you got a match? My lamp is out, and you see, sir, it's a matter of 15s. fine." So I gave him a match, for which he was profusely grateful. The incident set me thinking how careful of the individual the authorities are over here. The regulations as to bicycles, their bells and lamps, are strict to a degree that would make the Canadian bicyclist stare. One thing, however, which still needs modification, and that is the speed of auto-cars in country villages. I have seen something of their swiftness, and can understand as well as Kipling, how the country people resent the inconsiderate and dangerous speed of chauffeurs from the cities.

Extract from letter written at Glasgow, Scotland, July 30th, 1905:

Such a lonely-looking town, this Sunday Glasgow, after the crowds and bustle of last night, and after what we know of the city's enormous extent and its week-day industrial activity. The very churches seemed deserted, and it was 10.45 in the morning; I passed two which were not even open, and it set me thinking whether this disgraceful condition of quarrel between the U. P.'s and the Wee Frees may not be responsible for their closing.

At Rothesay my friends saw me to the boat for Prince's pier, Greenock. The view as the sun was setting over the hills and slopes of Clyde Banks and the Kyles of Bute was something to remember for many a day. The many swift steamers, steam-yachts, sea-going vessels, small boats, made glistening streaks of white foam in the deep blue water. Through rifts in the low-lying clouds the sun lit up Wemyss Bay across the Firth, and made patches of vivid green on the slanting farm lands or elevations all about. The watering places of Dunoon and Kirn are so grown as to form almost a continuous settlement, and the stream of traffic to those coast towns by trains and steamers makes it one of the busiest landscapes in the world. Rothesay, too, has grown much. Disregarding all convention, I made it a point to speak to some one in every train or boat, and made pleasing acquaintance-ships thereby. There is observable everywhere a wondering curiosity about Canada. Man after man would say he had relatives "in Canada," but often when you asked him where, he could not tell. "Away by Hamilton," one man said, he had a cousin a farmer; and one keenly intelligent railway hand, whom I found going down by the G. & S. W. Railway, declared that his nephew, Rev. John Wallace, was somewhere in Canada, and he wondered rather that I did not know him. "Do you know Colorada?" was asked by one man, who evidently did not know where it was, and marvelled when I described it as *thousands* of miles away from where I lived in Canada.

From the note-book, 1st August.

An enormous deal remains to be done in arousing the mind of the British people to the possibilities of Canada for emigrants of the right sort. The whole continent of America is terra incognita to them for the most part; and the great fiscal question, Chamberlain versus Free Trade as it seems to be considered, puzzles the minds of nine out of ten. To-day at ten I went to Edinbro, and thence to Dirleton to see Rev. John Kerr, the captain of the curling team who went to Canada in 1903. Strange to say, I met on the station steps, bound on the same errand, Provost Gordon, of Bathgate, who was such a favorite with Canadians. He walked with me to the charming manse and the quaint church and the very old castle and also to the very new castle garden. I came home tired, the train an hour late. Am off to London to-morrow.

THE LAKE ST. JOHN DISTRICT OF QUEBEC.

The vice-president of the Lake St. John Railway, Mr. William Hanson, of Hanson Bros., and some of his co-directors have been on their annual trip to the Lake St. John district. Mr. Hanson says that, although there are some 50,000 people around that inland sea, there is ample room for half a million. The party took carriages at Roberval, and drove through a good many of the parishes, and are convinced that there is more real agricultural progress in the Lake St. John country than in any other section of the Province. No less than 3,000 settlers took up homes last year in that fertile region. They drove fifty-eight miles the first day, and he was simply amazed at the very large areas of the choicest wheat, as well as other grains. Most of the new settlers who come to Lake St. John are brought in under the auspices of the Quebec and Lake St. John Colonization Co., of which Mr. Rene Dupont is the moving spirit. A large percentage of these new-comers are French-Canadians, who have been induced to leave the industrial establishments of New England and establish homes for themselves in the Province of Quebec. They are taking an extraordinary interest in dairying in this district.

They all expressed themselves pleased with their lot, except for the fact that the Government had shown little zeal in providing them with good roads. However, Hon. Mr. Prevost, who had just made an extended visit to the Lake St. John parishes, takes a most intelligent view of the situation, and the new Minister would certainly remedy the evil of which the people complained at an early day.

The visitors also inspected the forty-mile branch road being built from Jeanotte, on the Lake St. John Railway, to La Tuque, and found the work being pushed forward with energy. Some ten miles of track have already been laid. The object of this new branch is to connect with what will soon become the centre of a large pulp and lumber industry. They also visited Chicoutimi, and inspected the works of the Chicoutimi Pulp Co., where $1,500,000 have been spent in the erection of the largest and best-constructed mills in the world. The output is 300 tons of wet and 150 of dry pulp per day.

The seining of the famous ouananiche in the rivers of Lake St. John, he said, has become a crying abuse, and Hon. Mr. Prevost had promised that the seining of these fish would be absolutely forbidden by a provincial statute. Mr. Beemer has spent many thousands in establishing hatcheries, and if the seining is permitted any longer, the Lake St. John region will be ruined as a sportsman's paradise.

We are notified by the Merchants Bank of Canada that branches of that bank have been opened at Camrose, in the North-West Territories and at Fort Saskatchewan, near Edmonton in Alberta.

INSURANCE ITEMS.

M. Lamoureux, president of a French Canadian fraternal society, is missing from Berlin, N.H., and his residence has been attached for creditors claiming some $21,000. It is said that when a member of the society died, Lamoureux would represent to the leading citizens that the organization was short of funds; money was then advanced on the president's note, with the understanding that the legatee of the decedent would make it good.

Mr. Chester G. Scott, of 11 Lowther Ave., Toronto, tells us that he has just returned from British Columbia and Manitoba, where he has been representing the Ontario Accident Insurance Co. He says that the volume of business he wrote for the company during the few weeks of his trip amounted to one million and twenty-one thousand dollars. Mr. Scott is enthusiastic about the growth and prospects of our great western provinces.

It is stated by the Firemen's Fund Record that out of the fourteen American fire insurance companies twenty-five years old and over, having assets of over $6,000,000, the percentage of growth of the Firemen's Fund in the last twenty-five years, 1880 to 1905, in assets 789 per cent., and in net surplus, 1,670 per cent. leads the other thirteen. The next best growth in assets is 468 per cent., running down to 56 per cent.; and the next best growth in net surplus, is 567 per cent., running down to a decrease.

An effort is being made to have included in the program for the forthcoming meeting of the Western Union Insurance Association a plan to exclude from the standard mortgage clause the word "assigns." If a policy can be transferred to any assignee, the company wishing to cancel may not get notice to the proper party and might pay a loss to the wrong person. It is claimed that the indorsement should show to whom the assignment is made, instead of being in blank. The Chicago Underwriters' Association permits no such clause, the assignment running only to "their successors in trust."

It is currently reported that the Independent Order of Foresters, having failed to convince more than a very small proportion of the inhabitants of these islands that theirs is the only true and economical system of life assurance, and that all others are of the nature of a delusion and a snare, are folding up their tents preparatory to departing from this country. No doubt, if this is the case, arrangements will be made for dealing with the business the Order has still in force here, but it certainly will not be done from the present chief offices situate over a tobacconist's shop in Whitehall, as these are now decorated with the ominous sign, "To Let."—Commercial World.

Not content with dispensing sick benefits, it seems that the Orange True Blues are hankering after doing life assurance. If a resolution offered on Wednesday at Victoria Hall to the Grand Lodge of the Orange True Blue Association finds favor with the Grand Executive the True Blues will have an insurance department. The members of the lodge decided that the addition of an insurance section to the constitution of the order was far too technical a subject for them to discuss and act upon finally, and so by vote it was referred to the Grand Executive, with orders to bring it before the next meeting of the Grand Lodge of Canada. The majority of the members, although unable to speak upon the matter, are said to be in favor of the proposal.

* * *

BANKING AND FINANCIAL PARAGRAPHS.

The Bank of Toronto advises that a branch of that bank has been opened at Welland, Ontario. under the management of Mr. H. F. Holland.

The manager in Hamilton of the Bank of Montreal for a number of years, Mr. A. D. Braithwaite, has been promoted to the New York office of that bank. The event was made the occasion of a valuable present from his Hamilton staff.

A corrected copy of the supplement to the Canada Gazette, containing the report for July of the Canadian banks to the Government, reached us on Saturday morning last, too late to correct the former return. The error made in the first return was that it gives the paid-up capital of the Bank of Montreal as $14,000,000, whereas it is properly $14,400,000.

In these days of tainted money and apparent jealousy of wealth it is worth noting, says Harper's Weekly, how indifferent our public is to the vast accumulations of Astor money. There is an enormous heap of it, it renders no services to the public that anyone hears much about; comparatively little of it is ever given away. But it pays taxes and obeys the laws, and nobody worries or complains about it.

The banks of America are banded together to protect each other by information and advice from the scoundrels who are constantly trying to prey upon them. And it costs the banks a pretty penny. It costs the American Bankers' Association every year $50,000 or more to hunt down burglars and other criminals who have robbed or attempted to rob members of the organization. The bank burglary and surety companies likewise spend large sums annually for police service, the cost of tracking a criminal being quite secondary to the restraining effect his arrest and conviction will have upon other members of the dark lantern fraternity who may be tempted to prey upon institutions protected by the insurance companies.

* * *

—Col. Pellatt, of Toronto, a director of the R. & O. Navigation Co., being interviewed in Toronto on his return from a trip down the Gulf of St Lawrence, expressed himself as at a loss to know why Canadians patronize the American summer resorts when they have the beautiful Lower St. Lawrence at their doors. The colonel only echoes what many have said for years. Americans know a good thing when they see it, and they go down to St. Lawrence and Maritime Province ports by thousands for their vacation. So crowded are the steamers "Toronto" and "Kingston" on Lake Ontario to Brockville that they have been using cots all summer; and so overcrowded has been the "Montreal" on the Quebec route that it has set the company planning for more boats to accommodate the traffic of the St. Lawrence.

—The officers elected by the Montreal branch of the Canadian Manufacturers' Association for the current year are as under: Chairman, Jeffrey H. Burland, the Canada Engraving and Litho. Co., Limited, elected by acclamation; vice-chairman, D. Lorne McGibbon, the Canadian Rubber Co., of Montreal, also elected by acclamation. Executive Committee—J. H. Birks, Henry Birks & Sons; S. S. Boxer, the Watson, Foster Co., Limited; W. P. Coleman, Canada Car Co., Limited; C. W. Davis, the Williams Manufacturing Co., Limited; J. S. N. Dougall, McCaskill, Dougall & Co.; Geo. E. Drummond, the Canada Iron Furnace Co., Limited; Geo. Esplin, G. & J. Esplin, S. W. Ewing, S. H. Ewing & Sons; Robt. Gardner, Robt. Gardner & Sons; Chas. B. Gordon, Dominion Textile Co.; J. T. Hagar, J. & T Bell, J. J. McGill, ex-officio; Wm. McMaster, the Montreal Rolling Mills Co.; Robt. Munro, the Canada Paint Co., Limited; Hon. J. D. Rolland, Rolland Paper Co.; G. W. Sadler, Sadler & Haworth; Clarence F. Smith, the James McCready Co., Limited; W. T. Whitehead, the Colonial Bleaching & Printing Co., Limited; D. Williamson, Diamond Flint Glass Co., Limited.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, August 31st, 1905, as compared with those of the previous week.

	Aug. 31.	Aug. 24.
Montreal	$22,305,307	$23,666,393
Toronto	17,530,464	8,415,114
Winnipeg	5,381,466	4,747,801
Halifax	1,467,339	1,429,316
Hamilton	1,099,237	1,154,008
St. John	916,707	928,720
Vancouver	1,768,233	1,831,961
Victoria	757,318	626,179
Quebec	1,518,425	1,707,447
Ottawa	2,003,507	2,265,743
London	783,176	975,492
Total	$55,531,179	$57,748,174

The firm of Kelly Bros., Mitchell, Ltd., of Winnipeg, has been awarded the contract for the erection of the new Bank of Toronto building in that city. No expense is to be spared in making the building thoroughly modern in every respect. The front is to be of white Tuckahoe marble, and will look on Main Street. The contract is said to be in the neighborhood of $150,000.

Enquiry having been made by a Canadian firm as to the best means of developing trade in the United Kingdom in Canadian malt, the Canadian agent in London, Mr. Harrison Watson, has been making some enquiries. While he is not sanguine that a profitable trade can be established, he has interested several Old Country houses in the matter. The trade is largely in the hands of merchants called malt factors, but some brewers make their own malt. The general impression, says Mr. Watson, is that a much better opening exists for Canadian barley, which is not subject to the difficulties of transportation indicated. Indeed we understand that owing to the demand from other sources for the varieties of barley which formerly came only to the United Kingdom, the existing supplies of suitable barley are insufficient to meet the demand by the trade.

TENDERS FOR DEBENTURES.

TENDERS, sealed and endorsed "Tenders for Debentures," will be received at the office of the undersigned, until Monday, the 18th day of September next, at 4 p. m., for the purchase, in whole or in part, of Debentures of the Corporation of the City of Victoria, as follows:

1. Debentures amounting to $100,000.00, issued under authority of the "Sewers Loan Guarantee By-law, 1905," numbered 456, dated the 1st August, 1905, and maturing 1st August, 1955.

2. Debentures amounting to $11,000.00, issued under authority of the "Electric Lighting Loan By-law, 1905," No. 457, dated the 1st August, 1905, and maturing 1st August, 1915.

Both sets of Debentures are secured upon the credit of the Municipality as a whole; their denominations are No. 1, $1,000.00 each: No. 2, $500.00 each, and they bear interest at 4 per cent, per annum, payable half yearly, the principal and interest being payable at the office of the Bank of British North America, either in Victoria B. C., Montreal, London, England or New York, U. S. A.

The tenderer must state the price net at Victoria which he will pay. In addition to the net price, the purchaser will have to pay to the Corporation the interest on the said Debentures for the period between the 1st of August, 1905, and the date of the receipt of the purchase money by the City Treasurer.

The Corporation does not bind itself to accept any tender.

HERE AND THERE IN THE MANUFACTURERS' BUILDING AT THE FAIR.

This is the most imposing structure in the grounds. The effect of the building is improved by terrestrial globes erected upon the corners of its porch at the south, albeit their generous proportions make the little finial at the top of the low dome look like the school-boy's proverbial "thirty cents." The two plaster statues of heroic size which flank and improve the stairway appear to typify Industry and Art respectively. The male figure is distinctly good, the attitude natural and the accessories appropriate. Of the woman, one can only say that she does not look her role: whether the fault is in her shape or in the fit of her voluminous drapery, she does not satisfy one's idea of a patroness of the arts, either ancient or modern, for it is clear that she is not a Minerva, nor yet a female Mercury, for she wears modern dress, while her chest and bust are entirely too full for that slender Goddess Diana—but she may be one of the Three Graces, modernized, *a la* Gibson girl, only that she is not waistless.

Entering from the north and walking towards the lilac and faint green entablature of the piano manufacturers next the lake, you pass along an avenue of white structures of nearly uniform height, but with a pleasing diversity of shape. Likewise their contents is warious, as Silas Wegg would say, ranging from pickles to jelly, from knives and forks to umbrellas. Next to the empurpled glittering bower where, by the look of things, one's

"Bed may be roses
Bespangled with dew,"

emitting sweet odors galore such as John Taylor & Co. produce at their perfume mill, is a pavilion of which the colors (in cheese cloth) are autumnal white and a tender blue, devoted to the display of Blanc Mange Powders, and the equally gilded and gifted Nonpareil Jelly Powders offered to the public by that conservative house, Dalton Brothers, of Toronto.

Close by the Standard Silver Company's neat pavilion on the corner near the north main entrance is the stand of the Irving Umbrella Company, like a store front with recessed door of mahogany finish, and with brass railings as big as a yacht's cannon. The interior shows a background of yellow and white of a velvety effect, and relieved against it circles and squares of unbrellas made by this house. Further along are to be found the Luxfer Prism Co., and next to them the Ontario Lead & Wire Co., with a fine display of plumbing fittings. An especially artistic front is that of the Borden Condensed Milk Co., of which its representative, Mr. Joseph Irving, is justly proud. Close by is the temple of Lever Brothers, and the jewelers' booths of several Toronto firms, all in spring white.

Strolling to the west end, one is confronted by John Kay & Sons' elaborate exhibit of interior furnishings and decorations, which continues to be a source of attraction to householders as well as lovers. The Toronto Carpet Mfg. Co. has, on the other side of the entrance, an imposing display of its products, differing somewhat from last year's. A novel facade is that of the Penman Manufacturing Company's booth. Its arrangement of prismatic and mufiled glass is quite striking. A stained glass window, or series of windows in one of the avenues, among a group of white walls makes a pretty interlude. White and gold without, crimson and olive within, is the exhibition office of the United Typewriter Company, which has on view the Underwood and the Empire machines. The Rogers Furniture Company show antique patterned and Directoire furniture behind handsome green hangings, while near them Gowans, Kent & Co. show a structure of rich old oak that somehow reminds one of ye antient citye of Chester.

The portion of the former gallery to the left as you enter, occupied by the Intercolonial Railway, is a surprise as agreeable as it is unexpected. The interior is fitted in hemlock bark, ceiling as well as sides, relieved against which are immense photographic views of scenes along the great Canadian route which, having once seen them, a man always wants to see again. Glass tanks are placed in the walls, containing specimens of sea trout and other game fish from down East. The arrangement does great credit to those energetic shirt-sleeved swells, Mr. D. G. Smith, fishery commissioner of New Brunswick, and Mr. A. E. Barton, traveling representative of the I.C.R., whose civility to a member of the press was redoubled when they found in him an admirer of Canada's Atlantic Coast scenery and of our Maritime Province people. The right hand part of the building is devoted to a series of views illustrative of the Grand Trunk Railway System. These striking pictures or others like them have done good service at exhibitions in the United States and the United Kingdom, by illustrating to the passer-by the remarkable variety of landscape, soil, and development to be witnessed along this great route three thousand miles in extent. Not only routes of travel are illustrated by them but farms, homesteads, factories, belts of woods; fishing and hunting scenes, yachting and bathing places, hotels, and summer boarding houses, game and fish, from lake to ocean, from Muskoka tangles to the Atlantic's vastness. We were told by Mr. R. McC. Smith, who has for seven years been in charge of this exhibit, that he has shown it in some hundreds of different places.

MacLaren's Imperial Cheese has a handsome dwelling-place (Ionic pillars, no less!) just opposite Harry Love's athletic outfitting rooms, and "Nothing Better" is the legend thereon. Well—we have not often found anything better in the way of masculine human-kind that this same brusque and busy Stratford MacLaren: so that, for his reputation's sake he has, like the old Tennessee darkey, "jist done got ta" make good cheese. For years, one of the most constant features of the Toronto Fair has been the exhibit of Christie's biscuits, and it is always a good exhibit. This year it is resplendent in gold—quite striking in both design and arrangement.

Thus far these notes have mostly concerned Toronto houses. Let us now concern ourselves awhile about manufacturers from a distance, for it is one of the boasts of the Industrial Fair that it is *Canada's* greatest exhibition, and that it could not be if it were all given over to Toronto exhibitors. Leeming, Miles & Co., of Montreal, have a booth about the centre of the building, where they show various druggists' sundries which they keep in stock, and we again this year observe Packard's blacking and Dunlop heels, side by side. There is Edwardsburg made maple syrup, too. We discover a maker of syrup from South Stukely, in Shefford County, and another from Dunham, in Mississquoi County, both of which are in the Eastern Townships of the Province of Quebec, famed for maple sugar making. It is noteworthy that the latter has the honesty to issue two brands, one entitled So-and-so's Selected Maple Syrup, and the other Maple Flavor Syrup, which latter, the exhibitor admitted to us, is a compound. There have been such things heard of as maple sugar and maple syrup which were innocent of maple sweetness.

A pretty little establishment upholstered in green and white gauze is devoted to that article of food or refreshment known as Bovril. It is topped by the head and horns of a dun-colored "bossy" who, as the pictures put it, has Alas! lost her poor brother. We had become accustomed to think that its Saint John, N.B., proprietor, had secured a good and rather unique title in Red Rose Tea, but we now find an article on exhibition entitled Red Feather ditto. It is matter of wonder whether Mr. Estabrooks considers this a "colorable imitation." Among the many chocolates now in the market are two from Montreal, one apparently made there and one abroad, for which D. Masson & Co. are agents.

"Cowan's cook-shop" is what a passer-by called the neat band-box of a kitchen which the Cowan Company have fitted up on Longtitudinal Avenue 1, Transverse Avenue 6, of the Manufacturers' Building. Here will be prepared and served to passing thousands the Perfection Cocoa and Perfection milk chocolate made by this firm. Its show-cases likewise set forth the virtues of Cowan's prepared icings and confectioners' coatings.

fast foods are now-a-days made from oats we will not venture to say, but several are on display at the bureau of the Peterboro Cereal Company. Sheaves of the honest and stomach-filling old grain adorn the corners of the dainty barn—or is it a toy-warehouse—erected on a corner of two avenues. The mottoes somehow remind us of that long-legged modern myth, "Sunny Jim."

The Gutta Percha & Rubber Mfg. Co. appear to have got a recent contract from the government of Brobdingnag, judging from the size of the rubber boots they are turning out and labelling "Maltese Cross Brand." Their products occupy a large square, whose interior wall has a decided 12th of July effect with the plentiful blue and yellow of its contents. "Everything in Rubber," as their catalogue says, from rubber boot-heels to rubber floors, from lawn hose-pipe to golf balls.

* * *

NORTH OF ENGLAND LETTER.

Some of our Chambers of Commerce are seriously perturbed by the tax on commercial travellers imposed in Quebec, and next month a unanimous protest on behalf of the Associated Chambers may be expected from the conference which is being held in Belgium, at Liège. The usual stale comments on Canadian animosity against English goods have been reproduced by partisan papers. A German-born subject of the Jewish faith, and with the accent of his birth and breeding was first the other day to arise and insist that British travellers should be able to go without restraint to every portion of the Empire. The sentiment appears reasonable to us, and though the tax probably means $300 a year out of the expenses account of the speaker's firm, perhaps that circumstance may be discounted. Account for it as you will, our nationalized population is certainly not the least fervidly Imperialistic section. Instead of crying "Hoch" to the toast of the Kaiser, our German-Jews are always ready with guttural "Hurrahs" and spread-eagle speeches for and about British institutions. And in this there is nothing to regret.

Mr. Marshall Stevens, who made friends in Canada on his recent tour, has earned the qualified approval of the Commission on Food Supply in Time of War. He has a national granary scheme whereby 500,000 quarters of wheat should be kept in store at Trafford Park, Manchester. The use of the system is, of course, to prevent us from being "starved into submission in three weeks" in the event of a first-class European war. Grain, whether English or imported, would be attracted to a certain number of depots by the offer of free warehousing. Our Government is to pay storage rents, and the companies operating the granaries are to certify warrants and enable millers to buy actual grain for future delivery in place of speculation futures. It is not unlikely that fruit will come of the proposals, and it is significant that the Commissioners say they were "favorably impressed by the evidence of Mr. Stevens, and the ability with which he placed his views" before them. Perhaps some Canadian will take occasion to point out that the foundation of any such granaries would provide an eligible opening for an admission of the preferential claims of colonial wheat to any specially favorable treatment going.

The recorder of English business matters can hardly with-hold comment on the evidences of mistakes. It serves no purpose, to particularize instances, but probably no city in the land is without its specimen professional man who has succumbed to the craze to get-rich-quick. Not all of them have plundered orphans, dissipated trust funds, or have matriculated for gaol. More have gone ignominiously under or stand condemned to drag out to a lame conclusion careers once bright with promise. Accountants, discontented with the liberal gains of auditing, liquidating and managing estates, have been tempted into the "promotion" traffic only to sink in the morass of slimy finance. Solicitors and bank managers, tired of negotiating good things for others have ventured out to seize slices of less legitimate plunder. The consequences have been anything but happy. Two instances are in mind of professional firms employing ov thirty clerks each three years ago, whose affairs can now b accomplished comfortably by six. Their colleagues, a least, can see the cost of tarnishing a good name.

Motor buses for street transit are coming into use increasingly, and most of all in London. Conflicting statements as to the comparative merits of patrol and hors power are about, but it appears that the auto-bus in Londo covers 113 miles a day against the 70 miles of the horse drawn vehicle. Owing to frequent withdrawal for repair a reserve force of the mechanical cars is imperative, and th statement that one motor-bus does the work of three horse buses is corrected by the London General Company,—which carries 216,000,000 passengers a year. It is more true t say that two motors equal three horsed 'buses, and it i reckoned that 1,000 of the former will be needed to replac 1,420 of the latter. Managers of two great companie prophesy confidently that the auto will quickly drive th present vehicles from the road, and this prediction is base on experiments of some months' duration, and is made b firms owning between them over 12,000 bus horses. Wha the displacement means to stock-raisers is plain to read.

Fire insurance affairs are still unsettled, and bids fo old offices are again rumored with firm persistency. The County is one whose name has been freely mentioned. On the other hand there are rumors of the formation of new offices, and the objective of these is said not to be genera business so much as special business, which the prestige o the directors will enable them to secure.

Co-operative societies make most things and sell al things nowadays. For some months back they have bee doing life insurance through the Co-operative Insuranc Company. The claim is made that a clear saving of 7s. 6d in every sovereign of premium income is effected. Of cours the comparison is with industrial and other heavily-rate offices. The customer of the retail co-operative store insures his life out of bonuses earned upon goods purchased and otherwise distributable among the society's members Dividends on turn-over at these stores aggregate a larg total, and the root problem is, doubtless, whether the member does best to insure with this particular company, o

whether better terms and better security can be obtained elsewhere with the annual savings.

A ready admiration has been shown here for the business-like way in which Dominion Governments have advertised Canada in this country. As someone has said, they have dealt with Canada "like a patent medicine." The ex-Agent-General in London for New South Wales feels humiliated by the ineptitude of his own superiors. Says Mr. Grainger; "There never was and never will be a Government without any idea of doing business." This outburst is provoked by the Australian habit of sending out antediluvian hand-books instead of crisp, bright and informative printed matter. But from latest news to hand it appears that New South Wales intends to enter seriously into the competition for immigrants.

Profound relief has been shown over the avoidance of a cotton-strike. No business-man in the country would have been unaffected, and mischief would have resulted to every other textile industry. It is not thought that mere gamblers will be allowed to get cotton-prices out of hand. Our spinners are preparing to do battle with them. Wool prices give no hint of a fall, and dealers are re-stocking their warehouses with raw material at the prevailing values. Manufacturers who have established their season's prices are looking anxiously for relief and some machinery is standing, but holders insist on having their own way.

NORTH COUNTRY.

Manchester, August 18.

* * *

THE ART EXHIBIT AT THE CANADIAN NATIONAL EXHIBITION.

Knowing of the arrival from Europe of a number of cases of valuable paintings to be exhibited at the Canadian National Exhibition, the question of their value as an educational factor arose. It seemed reasonable that choice examples of work by eminent artists of the Old Land placed before the Canadian people ought to produce some mental process that should be considered educational. But whether such were small or great, or whether sufficient for economic estimate it seemed well to inquire. The result of an interview with one of our own artists may best be given in words mostly his own.

Mr. Forster said in part: The courtesy of the Motherland in lending occasional pictures of great value is only in keeping with the appreciation with which they are welcomed by the Canadian people. This courtesy is repeated in a marked manner this year. And this year the first fruit of the *entente cordiale* between the great nations of France and Britain, to which the fine spirit and masterful statecraft of good King Edward has contributed so much, is seen in a loan from the French Government of many most valuable pictures. To the enterprise and foresight of responsible officers of the Exhibition Association is due in no small degree the initiative and detail arrangements which have made such courtesies possible; and I believe they will succeed in creating an atmosphere of mutual courtesy and good-will by the manner in which these treasures are being received on this side. The occasion being one when great numbers visit Toronto, by whom they will be seen, the erection of a suitable fireproof gallery for their safety while here, and the prominence given to public notice of them will not fail to be properly estimated by their owners. The Ontario Society of Artists, to which body is given the responsibility of the entire gallery, has given proof of its ability to cope with its duty of placing these paintings by obtaining the loan of many treasure pictures from private owners to suitably bear them company.

Regret is felt that their brief stay makes the time insufficient for a careful examination and study of masterpieces of art. This is also true of the almost priceless products of gold and silver smiths' art represented in the collection of replicas to be seen in the neighboring building. Much might be gained in such study by workers in various other crafts. Examples in one line find some point of contact for suggestion in other lines. The near presence of masterpieces makes them subject of discussion, and even a casual view of them must stimulate the impulse to produce better things everywhere. If the manufacturing jeweler is induced to attempt more delicate and complex designs the iron, brass, leather worker or textile weaver is likely to thrill with the same ambition. While men are content they see no vision and hear no call of higher striving. The visionless worker is but a laborer. "Where there is no vision the people perish"—of stagnation, if nothing else. The exhibit of fine examples of handicraft provides a vision to the true craftsman.

This is true in the realm of the finer arts of the loan to Canada from the State collections of Britain and France and from private galleries just now on view in Toronto. Their educational value may not be limited to the thousands who will feast upon their thought, their color and lines of grace. The lenders may find their interest deepened in the people they have sought to enlighten and benefit. We hail with satisfaction such a possibility, as a better acquaintance with us should result in mutual good.

To the people who will throng the galleries will come a higher conception of what great minds are creating and deft hands are producing in the world's studios. While to some the impressions upon the mind may be confused and vague, to others, one, two or more of the pictures will remain a vivid and inspiring memory. Many young, rustic philosophers will begin to formulate and con the question within themselves: What is the reason for and what the true mission in the world of the picture painters' art? And they will perceive an ethical value and find a moral force in art of which they had not thought, and of which their elders are unaware. One is gladdened to learn that the people's eyes are not forever bent upon the soil, and the toil and the

The FIVE per cent. Debentures issued by this Company afford the following advantages:

The investment can be converted into cash at any time after two years by giving sixty days' notice.

The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.

The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.

The Debentures issued by the Company will be a first charge upon the assets.

moil of it, but are often lifted to mountain and cloud forms; to the glow of light and glory of color as day swings from dawn to evening and into wistful and mysterious night. Men are students of the significance of the many phases of life and of her modes and means of expression. To all such the work of the artist, which touches all these realms, is of vital and unfailing interest. In so far as it leads to fuller observation of them it instructs. Great pictures also instruct by their evidence of discipline and self-control in the painter, and by their evidence of so many paintable things in the life about us and within us, of which we are so careless. Indeed, their educational value to the eager exhibitioners who press about them may be much greater than the art directors estimate; and this might be greater still if they were allowed to linger, and less of the Philistine "move along" break in upon the awakening spirit.

To our artists themselves their educational value is perhaps greatest. They are enthusiasts in appreciation of good workmanship, and keen in analysis of artistic methods. Of all men the artist is the most free to follow impulse. In him, as in well-prepared soil, the seed of any new impression will germinate to fruit or harvest while he thinks of it. Although methods and fancies and fads may be taken up, followed for a time and abandoned, a residuum of good remains. There will be found that "saving remnant" a sober and dignified style, an executive power and a love of truth which will make Canadian art a national honor.

* * *

BOOK NOTICE.

The Power of an Ideal is the title of a pamphlet issued from 35 Nassau Street, New York. Its publishers are The Moody Corporation. Instead of its being an essay in the moral or intellectual world, as might be inferred from its title, the pamphlet is a brief sketch of the founding and growth of the Moody business as dispensers of financial statistics, to use their own phrase. Beginning early in 1900 with a man and a boy who worked night and day, fired evidently with enthusiasm, they have progressed until the concern now occupies 17,000 square feet of floor space. They publish Moody's Manual, Moody's Dividend Directory, Moody's Magazine, The Truth about the Trusts, and Banking Publicity, and have directors in York, Pennsylvania, and Albany, as well as in New York. It must have been that the projector of this business, fired with an ideal, has pursued it earnestly, with the result that, as the story shows, he has met with success. If any person desires a copy and will apply, the publishers will send him one.

* * *

TRADE NOTES.

The direct imports of cotton to Manchester this season via the Ship Canal have been most satisfactory, says an English journal, and the shareholders in that great undertaking should feel considerably gratified. Up to the 12th August, no fewer than 535,044 bales had arrived at the Manchester docks from the United States, as compared with 363,413 at this time last year, and the receipts of Egyptian cotton amounted to 177,750 bales, as against 148,143 bales twelve months ago.

The making up of cheap, duty-free Japanese silks by English garment manufacturers has enabled them to build up an export trade which is seriously perturbing some colonial firms. The business promises to develop, and its growth, in a large measure, justifies the enterprise of those firms who, unable to weave silks in competition with the Japanese article, thought it as well to make some profit out of the trade by converting the cloth into articles ready for wear.

Yorkshire advices say that alpaca is coming to the front as a stylish material, especially now that the colors produced in it are so improved as to leave little to be desired. Another thing that has helped on the public esteem for alpaca in England is the extent to which it is favored by American ladies for getting about in. Alpaca blouses, alpaca dresses, alpaca coats and alpaca underskirts should all come in for excellent sales during the new season.

A person of some authority, in recently declaring that we are likely to see an alpaca season, added, emphatically, "and cashmere." There is a wide expectation among dressmakers—even in the West End of London, and I add that advisedly—that this useful material will be called for a good deal, and I may add that already fairly substantial signs have been given of the public turning towards it. Very fine cashmeres are still those most sought after, says a Record correspondent.

Thanks to the prosperous condition of the cotton industry during the past few months, the amount of holiday money which will be distributed amongst the Lancashire operatives at the annual "wakes" will be larger than for some years past. According to the Record's letter, the approximate sums in the principal districts being as follows: Oldham, £300,000; Blackburn, £100,000; Bury, Hyde, and Stockport, £10,000 each; Heywood and Nelson, £9,000 each; Clitheroe, £3,000; Preston and Haslingden, £8,000 each.

A letter from Manchester says that a revival in the demand for blue serges is apparently hoped for by indigo dyers. It is feared that in Behar the small indigo crop of last year will be still further reduced, and that indigo, in consequence, may become much dearer. The London stocks are 4,482 chests, against 5,804 chests last year. "As to the competitive German artificial indigo, less is now heard than formerly, but German manufacturers are not asleep in connection with the matter. We shall have much to thank the Continent for shortly, when it has sufficiently developed its business in weighted silks, artificial silk, artificial indigo, beetroot sugar, margarine, and other impositions."

The mighty development in the last twenty to thirty years of the made-up section of the wholesale trade has been often alluded to in this journal, says the Draper's Record in its "City Echoes." The necessity for establishing making-up factories as near as possible to the Wood Street quarter and for an increased number of warehouses for the stocking and sale of the goods has led to a wonderful expansion of the quarter northwards. London Wall for some years provided the chief line of this expansion, but it soon proved incapable of contributing to it further, and entirely new neighborhoods were opened. The process still continues. It may be added that in the United States and Canada as well establishments for making and selling ready-made clothing and underclothing for men, women and children are steadily increasing in number and extent.

* * *

—British people are coming into the Dominion freely, a British board of trade return shows that between December 31st last year and the end of July this year, 57,249 persons of British origin emigrated to Canada, an increase of ten thousand over the number of emigrants during the corresponding period last year. Australasia took only 6,325, which number, however, was 460 more than last year. The emigrations to India showed a decrease of 278, the number being 1,421. Other British colonies received 2,078 British immigrants. The total of Britons who left the Mother Country for the colonies was 80,045, an increase of about ten thousand over last year. Those who went to foreign countries numbered 70,864, of whom 67,728 went to the United States. The total of emigrants from the United Kingdom for the seven months in view was 150,909, an increase of 13,447 over last year, when the number was 137,462. If Canada continues to receive 50,000 a year for ten years—and the prospects are that British emigration to her will increase rather than abate—she will by 1915 have added to her population half a million of the kind of people who, provided they will work, she likes best to see landed on her shores.

Mercantile Summary

The death in Montreal of Mr. Charles Taylor in his 90th year was announced on Sunday. Mr. Taylor was born in Fredericton, N.B., and was the first man to cross the Miramichi River in a steam craft. He built at Waverley, Halifax, the first stamp mill in Nova Scotia.

The Macdonald, MacMillan Company, of Westbourne, Man., have been awarded the contract for the entire construction of the road-bed ready for ties and rails, for the Grand Trunk Pacific between Portage la Prairie and Touchwood Hills. This section of the line is expected to be a fairly easy one, though some rather heavy work will have to be done on about 75 miles of it.

A special meeting of the Three Rivers, Que., city council was held in the City Hall, to consider a grant by the city to the new railway to Shawinigan Falls, when it was decided to pay the sum of $3,000 per mile to the road, making $66,000, to Shawinigan Falls, with an additional $18,000 for continuation of the line to Grand Mere, which is six miles further on. The proposed railway will pass through the villages of St. Etienne and St. Boniface, and is to be completed by December, 1906.

We hear from Montreal of the sale of a plot of land which shows the activity and increased value of land in the east end of that city caused by the construction of the Angus shops for the C.P.R. No fewer than 287 lots, comprising 800,000 square feet, which used to belong to the Sun Life Assurance Company, have been purchased by the Montreal Land & Improvement Co., of which Mr. Holt is president. It is in Hochelaga ward, and extends from St. Catherine street north to Nolan street, being bounded on the east by Nicolet, and on the west by Chambly. The price paid is said to be $65,000.

The following United States patents granted to Canadians last week are reported by Owen N. Evans, Montreal: Combined door hanger and track, John H. Vivian; bicycle handle-bar, Samuel Angrove; aerial ladder, elevator or lift, A. W. Shaw; switch-rod, William K. Bryce; setting-out, scouring, and stuffing machine, Jas. W. Deckert; flush valve, J. P. Goodfellow and S. R. Ramsay; kitchen cabinet, Sherman H. Ford; coin-controlled apparatus for vending perfumes and other liquids, Louis L. Martin. Messrs. Marion & Marion report the following Canadian patents: Wm. Eug. Globensky, Montreal, building blocks and apparatus for manufacturing the same; Eugene S. Manny, Montreal, steam heating system and apparatus; Ernest Renaud, Montreal, cue-tip holder; Fred B. R. Skager, Lemberg, Assa., N.W.T., twine holder; John Terreault, Montreal, process for manufacturing metals; Hugh Mowlem, Palmerston North, New Zealand, envelopes; Orrin Weidrick, Cheapside, Ont., hockey stick.

DOMINION SECURITIES CORPORATION LIMITED
26 KING St EAST TORONTO.

Mercantile Summary.

A cable of Monday last to the Montreal Gazette states that an order for 5,000 tons of hematite pig iron for America was placed at Middlesborough on that day.

Among the recent inquiries made of the Canadian Government Office, 17 Victoria street, London, during the week ending 18th August were one from a Hamburg firm desiring to work up agencies for Canadian wood pulp, wrapping and printing paper, and one from a London house making inquiry respecting Canadian consignments of asbestos fibre.

Says Mr. L. O. Armstrong of the Canadian Pacific Railway: "Eight years ago, when I wrote the first pamphlet on the Temagami district, only a few persons spent a short period there in the summer. Now there is an average of 2,000 tourists up there yearly." He adds that one firm alone in North Bay has sold 746 canoes this season for use on Lake Temagami. This gives some idea of the numbers from all over America who are going into those northern regions.

On Monday last a fire broke out at the wash plant of the Dominion Coal Company, near Port Morien, N.S. A strong north-east gale was blowing, and the fire drove the men from the boiler room and the pump was rendered useless. The Glace Bay fire department was sent out six miles with a steam fire engine, but before the firemen arrived the plant was hopelessly destroyed. The loss is at least $100,000. Report says the fire will necessitate cutting down the output at several of the Dominion Coal Company's mines.

The Ontario Pipe Line Co. made a hit by announcing Saturday in Hamilton that it would supply natural gas at a price lower than it is forced to do under the liberal franchise granted by the city council. Those who use natural gas for all purposes, heating, lighting, and cooking, will be given a rate of 35 cents a thousand feet from October 1st to May 1st. During the remainder of the year the franchise rate of 45 cents will be charged. Those who use the gas for only lighting and cooking will also have to pay the full franchise rate. The company expects to supply gas within ten days.

An assignment is made by J. O. Bessette, a Montreal grocer. He was formerly employed in the stores department of the Montreal Street Railway, and became a shareholder in La Compagnie d'Epicerie Moderne, in English The Modern Grocery Co., but not being satisfied with the management, and having, perhaps, some ambition, he bought out the other shareholders and assumed the direction of affairs himself. This was only last year, and now he has had to place his affairs in the hands of the assignee, with quite heavy liabilities, it is said.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

Mrs. Rene St. Jean, of Ottawa, doing a millinery business as Miss E. Curisse, her maiden name, has assigned her estate to W. A. Cole.

D. Coulombe, general dealer at Villeroy, Quebec, before reported as offering his creditors 40 cents on the dollar, has now reduced his figure to 25 cents. Perhaps he thinks he has the whip-hand of his creditors.

An offer of compromise is made by R. J. Riddell, a small general dealer at Douglas, Ontario, who asks creditors to accept 66 2-3 per cent. of their claims. He has traded at the above address about three years, and was previously for a short time in business at Hyndford.

The estate of Gustave Richard & Co., druggists, of Sherbrooke, Quebec, is being wound up by J. J. Griffith, assignee. Richard failed in 1903, when he tried, unsuccessfully, to arrange a compromise at 25 cents on liabilities of nearly $7,000. He has since been doing business under cover of his wife's name.

All Price & Co.'s establishment at Metabetchouan River, Lake St. John, is destroyed by fire, which broke out last Saturday afternoon on the wharf. In spite of the efforts of Quebec and Chicoutimi firemen, the strong gale which arose enabled the fire to wipe out the mills, dwelling-houses, stores and many piles of sawed lumber. The loss is about $40,000. Insurance on the mill is $7,000 and $6,000 on lumber in the North British & Mercantile and British American, $3,200 each, and the balance in the following companies: Aetna, Scottish Union, Hartford, Home and Sun.

By last week's Ontario Gazette, notice is given of the following companies having been granted charters in Ontario to do business: Port Arthur Iron Mines, Limited; directors, W. H. Moore, G. G. Reul, F. C. Annesley, L. W. Mitchell and James Barbour, all of Toronto; capital stock, $5,000. The New Ontario Silver Mine, Limited, capital, $1,000,000, consists of three Carlton men, W. G. White, W. A. Allen, J. T. Louis, and two New Yorkers. The Copper Mining and Smelting Company, of Ontario, with a capital stock of $1,000,000, is to take over and re-open the famous Bruce Copper Mines, recently purchased by an English syndicate; the incorporators being T. H. Sheen, H. J. C. Williams, London, England; F. M. Perry and A. M. Lyon, Toronto, and H. A. McPhail, Sault Ste. Marie. The Temiskaming Mining Company is incorporated with a stock of $100,000. The William J. Crothers Company, Limited, is to take over a biscuit and confectionery business in Kingston; capital, $100,000. The Sucker Creek Gas & Oil Company, of Anderdon, is to bore for and handle petroleum and natural gas; capital, $25,000. The Detroit & Kent County Oil & Gas Company proposes to bore for and distribute petroleum and natural gas in Kent County; capital, $40,000.

Mercantile Summary.

A. Duhamel, a small jobber of woodenware and groceries at Montreal, and only in business about a year, has already assigned.

Mr. David Brook, of Brockville, has been awarded the contract for the erection of an armory at Guelph, the price being about $70,000.

A cable of August 25th from the Canadian Associated Press states that the Australian Commonwealth intends to send a commissioner to Canada to report upon conditions in the Dominion regulating the immigration traffic from Europe.

A despatch from Vancouver states that W. F. Borland, of Montreal, is negotiating for about 30,000 acres of coal lands on Graham Island, one of the Queen Charlotte Islands. The land at present is owned by a Victoria, B.C., company. The sum involved is said to be about $500,000.

Arrangements have been made by The Rolla L. Crain Co., of Ottawa, manufacturers of the Crain loose leaf ledger, for an exhibit of their specialties at the Toronto office, 18 Toronto Street, during the next two weeks. A full line of ledgers will be shown and to those who are not familiar with the possibilities of the loose leaf ledger, the exhibit will doubtless prove of great interest.

During the month of July nearly 30,000 immigrants arrived in Canada, which is about 5,000 less than the number of arrivals during July, 1904. Via Atlantic ports, mainly at Quebec, the arrivals were 8,849, about the same number as in July, 1904; while from the United States there were 31,033, as compared with 36,012. Nearly all the American immigrants entered at Winnipeg.

A Chicago newspaper has it that eleven hundred cars, costing nearly $6,000 apiece, or involving a total expenditure of approximately $6,500,000, are said to comprise the equipment of the proposed Chicago Municipal Street Railway, as suggested by the report of Mr. Dupont, an expert from Detroit.

Because of the excellent outlook for tobacco a number of tobacco barns are going up this summer on Pelee Island. The Echo ennumerates six, belonging to as many different persons.

As we have before stated, preparations are going forward for a tunnel underneath Detroit River, near Detroit, the difficulties of ferriage through the winter ice between Ontario and Michigan being found more and more troublesome. This week comes the further report that the Michigan Central Railway contemplates building a tunnel under Niagara River, from Canada to New York State, at a point between Buffalo and Tonawanda; indeed, the construction work is expected to be carried on jointly with that of the tunnel at Detroit, and by the same building company. The rapid increase of traffic through the Buffalo gateway and the large and steady development of tonnage originating on the Niagara frontier are the reasons given for such an expensive undertaking.

TENDERS
FOR
Binder Twine Plant AND Property

Tenders will be received by the undersigned for the following property:

The whole plant, including Factory, Warehouse, Machinery and 16 lots. Tenders must be in the hands of the undersigned by 8 P. M. Sept. 25th, 1905.

The property consists of a brick Binder Twine Factory and Machinery and Plant with the capacity of three tons of twine per ten hours, with the necessary Spinning and Winding Machinery. There are also two boilers and an Engine of 100 horse power capacity, a Frame Warehouse — capacity one thousand tons — and 16 lots situated in the centre of the City of Brandon. The Plant has most convenient railway facilities for shipping and receiving of goods. This plant is situated in the midst of a great consuming population which is annually increasing, and the market for the product of this factory is at its doors.

Each tender must be accompanied by an accepted cheque, payable to the Bank of British North America, equal to 10 per cent. of the amount tendered, and which will be applied upon the purchase money in case the tender is accepted, or will be forfeited to the Company in case the tender is accepted and the purchase for any reason is not carried out by the Purchaser. Each tender must state terms of payment proposed, and any other special terms he desires. Rate of interest will be 6 per cent. upon deferred payments.

Tenders will be received for the whole or portions of the property. The highest or any tender not necessarily accepted.

For further particulars, terms and conditions apply to

The Brandon Binder Twine Co.,
LIMITED.
P. O. Box 923,
Brandon, Manitoba.

Factory at BRANTFORD.

Mercantile Summary.

Watson's box factory at London, Ont., was, on the 25th ult., destroyed by fire at an estimated loss of about $40,000, with insurance of $12,000.

It is stated that the Tariff Commission will hold its first meeting in Winnipeg on September 7th, and then work west through the territories to Victoria.

The Government has decided to purchase forty new locomotives for the Intercolonial Railway, and it is understood they will be obtained from Canadian manufacturers.

On Saturday last, fire destroyed the Newville Lumber Company's two mills, near Parrsboro, Nova Scotia. More than 1,000,000 feet of lumber was burned. The fire originated from a spark from the furnace of the larger mill. The loss is estimated at $50,000, and there is only partial insurance.

⁂

DEATH OF A WELL-KNOWN BUSINESS MAN'S DOCTOR.

Monday evening of the death in New York of a man whose skill and success in the treatment of disease made him widely known all over this continent. We refer to Dr. James Henry Salisbury, M.D., LL.D. He had been the means of relieving thousands of sufferers, and his kindly sympathy and help has made of these not only grateful patients, but enthusiastic friends. A great part of the success of Dr. Salisbury in curing the ills that flesh is heir to arose from his care and acumen in dieting his patients according to their needs. Medicine, in the shape of drugs or other such potions, formed a small part of the remedies he prescribed for ailing humanity. "The Salisbury system," as it came to be called, embraced a regular plan of diet and of rest. He recognized that the people among whom he practised ate too much of improper food, exercised too little, over-wrought their brains and imposed shamefully upon nervous system and stomach. Hence arose dyspepsia, neurasthenia, general debility—the man or woman became a chronic dyspeptic, perhaps flew to the use of whisky or opium to get relief.

Dr. Salisbury pursued a rational course with such sufferers: gave them food easy of digestion and calculated to nourish; fed their exhausted nerves with beef and milk; kept them away from cock-tails or morphine; taught them how to rest and how not to worry; gradually built them up into better men and women. Salisbury, who was prominently known fifty years ago as a chemist, was a painstaking microscopist, and had made a lengthy study of the alimentation of food, experimenting with men whom he hired for the purpose; and it is narrated to his credit that he was a co-laborer with Ernest Haller, of Jena, in establishing the germ theory of disease.

Debentures For Sale

The undersigned is prepared to receive tenders for the purchase of one hundred and fifty thousand dollars ($150,000) of Drainage Debentures of Drainage District No. 2 in the Province of Manitoba, such debentures being guaranteed by the Province of Manitoba and issued under the provisions of "The Land Drainage Act, 1895." The debentures will be in denominations of $1,000 each, payable in thirty years from the

15th day of September, 1905

and bear interest at 4 per centum per annum, payable half-yearly at the Union Bank of Canada, Montreal. All offers must be addressed to the undersigned, marked "Tenders for Drainage District Debentures" and must reach this office not later than the 23rd day of September, 1905. Delivery and payment of debentures to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.

Winnipeg, Aug. 18, 1905.

DEBENTURES

SEALED TENDERS addressed to undersigned will be received up to noon of Monday, September 11th, 1905, for the following debentures of the City of Niagara Falls namely:

$6,962.62 twenty years 5%, issued for permanent walk purposes, dated August 15th, 1905.

$10,022.37 thirty years 5%, issued for sewer purposes dated August 15th, 1905.

Said Debentures, Principal and Interest, are payable at the City Treasurer's Office, Niagara Falls, Canada, annually.

Purchasers to pay accrued interest from Aug. 15th, 1905.

Further particulars can be obtained on application.

Highest or any tender not necessarily accepted.

JOHN ROBINSON, City Clerk.

Niagara Falls, Can., Aug. 22, 1905.

Many are the evidences given by grateful patients to his skill and tender care, and many the testimonies of people in humbler life of his great heart and philanthropic liberality. Among those who have acknowledged their debt to his skill during the last twenty years are well-known Canadians. We have seen letters from G. B. Smith, of Toronto, George Gillies, of Gananoque; Mrs. J. L. Cook, of Toronto; and we are told of the favorable experience under this able physician of Sir William Howland, Hon. G. W. Ross, Mr. Justice McLennan, and various other prominent men. Mr. Jas. Austin, of the Dominion Bank; Ex-Governor Schultz, of Manitoba; Hon. A. W. Ogilvie, of Montreal; the late Duke of Argyll; were persons who, in their lifetime, confessed their obligation to his skill. Perhaps the most enthusiastic admirer of Dr. Salisbury in Canada is the well-known underwriter of this city, Mr. Hugh Scott, who declared that his life was made bearable and a new lease given to it by the art of the distinguished man whose death is now announced. Our columns are hardly the place to discuss the relative curative values of massage, hot-water drinking, or of minced beef and rice—the only food; nor are we concerned to insist upon the propriety of all his methods, some of which, at all events, were common sense ones, and are employed by many sensible and successful physicians of to-day. But it is fitting that a tribute should be paid, in these days of prevailing dyspepsia and neurasthenia among the commercial class, to the effective work done by this good man, who was eminently a business man's doctor, and who had attained both distinction and great age in a profession renowned for constant industry and self-abnegation.

* * *

"WRITE WHAT IS IN YOU."

"Children," said the teacher, instructing the class in composition, "you should not attempt any flights of fancy; simply be yourselves and write what is in you. Do not imitate any other person's writings or draw inspirations from outside sources."

As a result of this advice Tommy Wise turned out the following composition: "We should not attempt any flights of fancy, but write what is in us. In me there is my stummick, lungs, hart, liver, two apples, one piece of pie, one stick of lemon candy and my dinner."—London "Tit-Bits."

* * *

—Pheeder—The shape of a man's stomach is round, ain't it, Doc? Dr. Weeder—Nearly so. Why? Pheeder—Ain't it funny that nothing fits it so well as a square meal?—Philadelphia Ledger.

THE SUMMER BURGLAR.

Have you ever stopped to reflect what a glorious season is the vacation time for the festive burglar? You shut up your house, leave the house cat and house dog to forage for themselves or else consign them to the tender care of the neighbor's children, send your trunks and grips to the station and follow them in blissful anticipation of a season at the seashore, in the mountains, or on the lakes. Of course, the policeman on your beat will look after the place, you think; but will he? If you have taken the cook with you or sent her home to her mother for the summer, what interest has the gallant boy in blue in your house any more than in the half-dozen or more on the same block? In this day and age the burglar is a conscienceless individual, who never stops to consider your personal feelings in any particular. He has a craving for this world's goods which is almost insatiable, and such a little matter as the consideration of "thine or mine" never enters his head. He does his work with an artistic abandon which leaves nothing to be desired and very little in the house. Refrigerators, coal boxes, folding beds, red-hot stoves and other apparati have no terrors to such gentry when their ambition to excel is aroused. Occasions have been noted when an organized party of "property lifters" have descended upon a house, closed for the summer, in broad daylight with moving vans and all the paraphernalia used by draymen and carried away the entire furnishings of said domicile.

Now, having told all that we know, and some things which we do not, concerning burglars, we will come to the point. Have you a burglary insurance policy upon your house? If not, why not? Don't you know that there are reputable and responsible corporations which make a business of insuring you and your fellow men against loss in such contingencies? Before you leave for your summer vacation, see to it, therefore, that you have some such protection, or you may return in September or October to find your house dismantled and you without recourse or resources wherewith to refurnish it. Do it now and avoid mistakes.—Western Insurance Review (St. Louis).

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 30th August, 1905.

Ashes.—Business is seasonably dull, and receipts are very light. Quotations are more or less nominal at $5 to $5.10 for first quality of pots; second pots, about $4.50; first pearls, $7 to $7.25 per cental.

Cements and Firebricks.—A fair amount of business is doing in cements in moderate-sized lots, and no recent important deals have been put through. Values tend to firmness, and we quote Belgian at $1.80 to $2; English, $1.90 to $2.10; Canadian, $1.90 to $2.10. Very little American is now coming forward owing to the Customs regulations with regard to packages. Firebricks are steady at $17 to $22 per thousand.

Hides.—The usual monthly advance in lamb skins will go into force at the beginning of the month, when the figure will be about 80c. each. There is steady demand for all the beef hides offering, and dealers are buying at 11c. per lb., or a shade over in some cases.

Dairy Products.—Cheese shipments last week were again fairly large, eleven steamships taking out 86,896 boxes, about 8,000 boxes more than the same week a year ago. The total shipments since May 1st aggregated 1,176,613, being 101,000 boxes more than for the same period of 1904. The shipments via Portland this year only amount to 9,897 boxes. Prices being paid for cheese continue to be high, about 11¾c. being the figure for finest Ontarios; finest Townships, 11½ to 11⅝c., and Quebecs, 11⅜ to 11½c. Export business in butter is well maintained, last week's shipments reaching 27,240 packages, and the total for the season to date is 353,011 packages, being 97,000 packages more than at this date a year ago. The demand is not as brisk as it has been, but the market holds fairly steady at about 22½c. for fancy Townships creamery; choice, 22 to 22¼; good to fine, 21½ to 22c.; dairy, 18½ to 19c. the pound.

Dry Goods.—The wholesale millinery houses express general satisfaction with the results of the fall opening now on, one house reporting over 2,200 visitors on Monday, and the volume of their sales is ahead of last year. Among the general dry goods houses, however, there has not been a great deal of buying, and business is still on the quiet side. Commercial travellers are getting on to their grounds for the fall sorting trade, which is by general consent, expected to be excellent. Most of the large houses here have representatives in Toronto this week, to meet customers attending the Industrial Exhibition, and some good orders are already reported from this quarter. Remittances as a whole are fair to middling. English advices speak of further stiffening in linens and woolens; in domestic textiles there have been no late changes.

Groceries.—The only notable feature in this line is a decline of 10c. a cental on all grades of refined sugars, standard granulated in barrels being now quoted at $4.90 at the factory, with yellows

ranging upwards from $4.40; in some quarters there appears to be an anticipation of further decline. The price of molasses also rules towards easiness. The first direct Mediterranean dried fruit steamer is timed to begin loading at Patras, Greece, on the 31st inst., and the second at Leghorn, Italy, about the 12th September, both boats calling at Denia, in Spain.

Metals and Hardware.—Now that peace between Japan and Russia seems assured, a strong impression has arisen in some quarters that prices in all lines of manufactures of iron will advance. There doubtless will be considerable demand from Russia, a very large proportion of orders from that quarter having been cancelled last spring, and in support of the feeling above indicated, it is stated that a cable enquiry regarding black sheets made this week elicited a quotation at an advance of 5s. per ton; Canada plates are also held more firmly than last week. Local business in pig-iron is still quite moderate, and No. 2 selected Summerlee is quoted ex-wharf, at $18 to $18.25; rather more demand exists for No. 1 Summerlee, which is quoted at $18.50 to $18.75. In domestic brands Londonderry is quoted at $19 for No. 1; there is no Midland pig offering, the output being contracted for ahead. Ingot copper is firmer at 17½c., and tin at 37 to 37½c.; spelter also shows signs of stiffening, and is firmly held at $6.25 to $6.50; the scarcity of antimony is very pronounced, and 15c. or over is asked for small lots; $3.75 to $3.85 is the quotation for lead.

Oils and Paints.—Nothing specially new is noted in these lines, but all houses are looking for a good fall trade. Turpentine is slightly firmer at 89c. in single barrels; linseed oil, 49 to 50c. for raw, and 52 to 53c. for boiled. The scarcity of window glass is unrelieved, and $3.75 is a firm quotation for 100 feet for first break. Leads, putty, etc., are steady.

The Canadian Pacific Railway Company

NOTICE TO SHAREHOLDERS.

The Twenty-Fourth Annual Meeting of the Shareholders of this Company for the election of the Directors to take the places of the retiring Directors, and the transaction of business generally, will be held on Wednesday the 4th day of October next, at the principal office of the Company at Montreal, at Twelve o'clock, noon.

The Common Stock transfer books will close in Montreal, New York and London at 3 P. M. on Friday, September 1st. The Preference Stock books will also close at 3 P. M. on Friday, 1st September.

All books will be re-opened on Thursday, 5th October.

By order of the Board,
CHARLES DRINKWATER,
Secretary.

TORONTO MARKETS.

Toronto, 31st August, 1905.

Grain.—At present but little grain is being marketed. Prices at Chicago and Winnipeg are easy, but Ontario wheat is steadily maintained in value. In Ontario sales of new wheat are quoted (for No. 2) at from 75 to 76c. per bushel. For old, 77c. was bid yesterday. Spring and goose are nominal. In Manitoba wheat, cash quotations for delivery at lake ports are:—No. 1 northern, $1.02; No. 2 northern, 99c.; and No. 3 northern, 84 to 85c. In flour there is no change for Manitoba; for Ontario the best offer yesterday was, for 90 per cent. patents, $3.10; Manitoba, first patents, $5.20 to $5.40; Manitoba, second patents,, $5 to $5.20; strong bakers', $5 to $5.10, bags included, on track, at Toronto; Ontario, 90 per cent. patents, in buyers' bags, east or middle freights, $4.30 to $4.40; Manitoba bran, sacks, $17 to $18 per ton; shorts, sacked, $19 to $20 per ton, in Toronto. No. 2 oats are reported at 28½c., low freight for export. Old is worth 34c. at outside points. Old and new barley is worth from 36 to 43c. outside. Rye is worth from 56 to 57c. outside. Canadian corn is nominal; American sells at 62c. for No. 3 yellow at Toronto, and for No. 2 the price is 62½c. Peas are 65c. outside. For rolled oats quotations are:—For car lots in barrels, $4.75 on track here, in bags, $4.50; 25c. more for broken lots here and 40c. outside.

Dairy Produce.—Receipts of butter here are good, and prices are strong on a very good export demand. Quotations are:—Creamery prints, 22 to 23c.; creamery solids, 21 to 21½c.; dairy lb. rolls, good to choice, 18 to 20c.; medium, 17 to 18c.; tubs, good to choice, 17 to 18c.; inferior, 15 to 16c. For cheese, quotations are firm at from 11½ to 13½c. per pound. Eggs are unchanged, at around 18c the dozen.

Groceries.—Locally there is a pretty fair movement. Quotations for sugar are as follows:—Montreal granulated, in barrels, $4.98; Acadia, $4.88; Ontario beet, $4.88; Phoenix, $4.88; yellow, $4.48 to $4.78. In bags, Montreal and Ontario Sugar Co., 5c. less than in barrels. St. Lawrence sugars as quoted are as fol-

---

Sale of Assets of the Oshawa Wire Fence Company, Limited.

Tenders will be received up to noon of the 30th day of August next, addressed to the undersigned for the purchase of the following assets of the above named Company:—

Parcel No. 1.—Real Estate, including Three Story Brick Factory, having railway siding and centrally located in one of the best manufacturing towns in Canada.

Parcel No. 2.—Patent Rights, Fixed and Movable Machinery, Tools and Office Furniture.

Parcel No. 3.—Partially Manufactured Goods and Raw Material.

No tender necessarily accepted. This offers an excellent opportunity for a profitable investment in a steadily increasing business. Lack of capital the only reason for selling.

Further particulars, terms and conditions of sale, with full description of the several parcels, will be mailed on application, or may be inspected at the Company's Office.

L. K. MURTON,
Secretary of said Company, Oshawa.

Oshawa, July 22nd, 1905.

very busy. The volume of summer trade has been better than the variable weather would lead people to expect. As an indication of the general prosperity throughout Canada orders from the country are very liberal, and reports from travellers all over are of a most encouraging kind. From various points in the North-West especially the demand for all lines of dry goods has been larger than ever before. Payments are reported good, and prospects as being bright.

Hides and Skins.—There is a fair movement, but no quotable change in prices, which for hides are still high.

Leather.—The demand has been better this week, and prices are steady, but unchanged from those previously quoted.

Seeds.—There is no particular demand yet, and prices are not settled. Locally, alsike is quoted at from $5 to $5.25; timothy, $1 to $1.30; fancy, $1.50 to $1.60.

Paints and Oils.—Not very much doing in these lines. Prices of oils and paints are firm, and window glass is well maintained.

Live Stock.—The demand in the British markets for Canadian cattle is but poor; they are selling at from 10 to 11c. per pound; refrigerator beef is worth from 8 to 9c. per lb.; sheep are worth 12c.

Fruit.—Heavier supplies being due, are so unsettling prices that it is useless to attempt to quote them. While the city is crowded with visitors the demand is not equal to the supply, and as a result prices are downward.

Mercantile Summary.

We lately reported Joseph Goldenberg, dealer in dry goods at Dalhousie, N.B., as making an offer to creditors of 25 cents on the dollar. He has since assigned.

The coal areas in and around Edmonton, N.W.T., are, it is reported, gradually showing up in larger quantity and better quality. One mine, about 15 miles up the river, has a seam of coal fifteen feet in thickness adjoining the river, which means ease in transportation.

Fernie, B.C., seems to be a mark for the fire fiend. This energetic and thriving town was again visited by a disastrous fire on August 26th, by which many of the choicest buildings were destroyed. The estimated damage was $35,000, about half of which was covered by insurance.

Mr. T. J. French, K.C., secretary of the Prescott, Ont., Terminal Company, is authority for the statement that on account of the large crop in the American and Canadian North-West, the company would immediately fit up the elevator at that place. For the past few years this elevator has been closed down, and only a short time ago was sold to the present owners.

It is understood, says the Montreal Witness, that the Government has practically consented to renew for a period of five years from August next, its arrangement with Messrs. Allan for the carriage of the mails between this country and the United Kingdom. We understand the steamship company wanted a ten year contract, but the proposition was declined.

In the last weekly report of the Department of Trade and Commerce we find a report from Mr. C. M. Kittson, commercial agent for Canada at Cape Town. He says that South Africa at certain times is a good market for the sale of Canadian apples. During the months of October, November and December the locally grown fruit is out of season, as it also Australian fruit, which country usually ships large quantities of apples and other fruits to South Africa. At this particular time Canada could, with advantage, step in and supply the South African consumer with apples, which would meet with a ready demand. The apples most favored by the consumer are those of any large red variety. Apples without much color will not meet with a ready demand, and would probably have to be disposed of at reduced prices. Shippers are advised that no inferior fruit will fetch anything like a remunerative price. Apples for South Africa may be packed in boxes containing about one-third of a barrel, or in barrels. All fruit shipped to South Africa must be free from scale or black spot. If otherwise, the fruit will be destroyed by the South African governments, without compensation to the shippers.

Test of Popularity:

(1) Low ratio of business lapsed, and
(2) High ratio of business gained.

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

has been noted for many years for its pre-eminence in these important respects, and to-day it

Leads all Canadian Companies

in the net amount of business **in force** in Canada, **gained** during the **last five years**, as shown by the Dominion Government Blue Books.

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Company, 5

Temple Building, - Toronto.

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00.

J. GARDNER THOMPSON MANAGING DIRECTOR
WM. JACKSON SECRETARY.

The Pelican and British Empire Life Office has a vacancy for the position of Inspector for parts of Western Ontario, with Headquarters at Toronto. To a man of character, and of proved ability to introduce business and organize Agencies, remunerative terms will be given. Applications will be treated as confidential, and may be addressed to "The Manager, Montreal"

Standard Life
Established 1825.
Head Office for Canada, MONTREAL.
Assurance Co. of Edinburgh.

Invested Funds..................	$55,094,925
Investments, Canadian Branch....	17,000,000

Assurances effected on first-class lives "Without Medical Examination." Apply for full particulars.

D. M. McGOUN, - - - - - - - MANAGER
CHARLES HUNTER, Chief Agent Ontario

LONDON & LANCASHIRE FIRE INSURANCE COMPANY

ESTABLISHED A.D. 1720.

THE LONDON ASSURANCE.

Head Office, **Canada Branch, Montreal.**

Total Funds, - - - $20,000,000

FIRE RISKS accepted at current rates.
Toronto Agents
S. Bruce Harman, 19 Wellington Street East.

SUN INSURANCE OFFICE FIRE
FOUNDED A.D. 1710

Head Office, Threadneedle St., London, Eng.

Transacts Fire Business only, and is the oldest purely Fire Office in the world. Surplus over Capital and all Liabilities exceed **$7,000,000.**

Canadian Branch—15 Wellington Street East, TORONTO, ONT.

H. M. BLACKBURN, . . . **Manager**
F. E. MAULSON, ... **Inspector**

HIGINBOTHAM & LYON, Toronto Agents.
Telephone 488.

Agents Wanted in all Unrepresented Districts.

The Northern Life
ASSURANCE CO.

Closed the half year showing over 25% more insurance issued than the same period last year.

Its policies just meet the wants of the people and are easily sold.

A few good producing agents can secure liberal contracts in desirable territory.

Head Office, — LONDON, Ont.

JOHN MILNE, - Managing Director.

THE RECORD OF THE

NORTH AMERICAN LIFE
for 1904

shows that large gains have been made in the amount of policies issued, insurance in force, income, payments to policyholders, etc.

Policies Issued	$6,484,425
An increase over 1903 of	$645,535
Insurance in force	$35,629,988
An increase of	$3,004,895
Income	$1,504,063
An increase over 1903 of	$122,700
Payments to Policyholders	$561,136
An increase over 1903 of	$137,918

The financial position of the Company is unexcelled. A good Company, both for the policyholder and agent. Applications invited for agencies in unrepresented districts.

Home Office, - TORONTO, Ont.

ROYAL-VICTORIA

THE NEW YORK LABOR LAW.

In these days of unusual activity on the part of organized labor, with its constantly increasing demands from employers, it is of interest to note isolated legal cases as they arise, in which the workingman's condition is dealt with, because these throw a great deal of light on the general movement forward of labor claims.

In 1897 the Legislature of the State of New York passed a statute known by its short title as the Labor Law. Among other things it was provided by Section 110 that no "employee shall be required or permitted to work in a biscuit, bread, or cake bakery or confectionery establishment more than sixty hours in any one week." Other sections of the Act prescribe various sanitary conditions.

In the case of Lochner vs. State of New York, which was finally decided by the Supreme Court of the United States on 17th April, 1905, the validity of a conviction under the above Act was fought out, it being contended that the act of the New York Legislature above-mentioned restricted personal freedom of contract (the inviolability of private contract being one of the fundamental principles of English Common Law) as provided for in the 14th Amendment to the Constitution of the United States, which enacts as follows: "Nor shall any State deprive any person of life, liberty, or property, without due process of law."

There were two important questions at issue therefore, (1) as to whether a State of sovereign authority and knowing especially well the peculiar conditions which prompted the enactment in the public interest of such a law, was infringing on the above amendment to the Constitution, and (2), whether or not the State could regulate and restrict private contract; in other words, if a man in the confectionery business was willing to contract to work fifteen hours a day, could the State say to him that it would not allow him to do so.

Both these questions were determined against the State, although there were several dissenting judgments in the Supreme Court. To say, or to enact, that a laboring man in a free country cannot contract to work as long as he pleases and provided his remuneration seems fair to himself, seems to the average man rather absurd and it is not surprising from this standpoint that the State Law was determined to be unconstitutional; but the apparently strained part of the judgment is in declaring the State Law unconstitutional under the 14th Amendment. If there is anything in the principle of public policy, although that term is not very clearly defined, then the States, with theoretically sovereign powers the same as our Provinces of Canada, are the best judges of what peculiar local conditions warrant the enactment of any given law of essentially and entirely local interest.

This case of Lochner versus New York, has caused a great deal of comment in both the United States and Great Britain, and English jurists are more inclined to adopt the view of the dissenting judges as the true exposition of the law. As to this view of the case the following extract from the judgment of Mr. Justice Holmes will be of interest:—

"This case is decided upon an economic theory which a large part of the country does not entertain. If there were a question whether I agreed with that theory, I should desire to study it further and long before making up my mind. But I do not conceive that to be my duty, because I strongly believe that my agreement or disagreement has nothing to do with the right of a majority to embody their opinions in law. It is settled by various decisions of this court that State Constitutions and State Laws may regulate life in many ways which we as legislators might think as injudicious or, if you like, as tyrannical as this, and which equally with this interfere with the liberty to contract. Sunday laws and usury laws are ancient examples. A more modern one is the prohibition of lotteries. The liberty of the citizen to do as he likes so long as he does not interfere with the liberty of others to do the same, which has been a shibboleth for some well-known writers, is interfered with by school laws, by the Post Office, by every state or municipal institution which takes his money for purposes thought desirable, whether he likes it or not. The Fourteenth Amendment does not enact Mr. Herbert Spencer's Social Statistics. The other day we sustained the Massachusetts Vaccination Law: Jacobson vs. Massachusetts 197 U.S. United States statutes and State statutes and decisions cutting down the liberty to contract by way of combination are familiar to the court. Two years ago we upheld the prohibition of sales of stock on margins or for future delivery in the constitution of California. The decision sustaining an eight-hour law for miners is still recent. Some of these laws embody convictions or prejudices which judges are likely to share. Some may not. But a constitution is not intended to embody a particular economic theory, whether of paternalism and the organic relation of the citizen to the State or of *laissez-faire*. It is made for people of fundamentally differing views, and the accident of finding certain opinions natural and familiar, or novel and even shocking ought not to conclude our judgment upon the question whether statutes embodying them conflict with the Constitution of the United States."

Thus, then, if the decision in the case in question were to be considered on the grounds of precedent, there are too many conflicting precedents to allow it long to remain unchallenged. Public opinion, however, if not legal opinion, leans to the idea that labor unions must not be allowed to terrorize the community, nor yet be allowed to have either custom or law framed to meet the vagaries of members of such bodies.

* * *

ASSESSMENT INSURANCE.

(Continued.)

Cool-headed business men had all along predicted this result. But the societies took in new members so rapidly, that in spite of the utter insufficiency of the premiums charged, those who entered "on the ground-floor" actually received their endowments; and for some years, the great influx of new entrants enabled the societies to meet their claims.

Now it is far from being our purpose to classify the assessment organizations of the present day with the "wild-cat" concerns of which mention has been made above. The former are, we believe, honestly conducted; the purpose of the latter, from the very outset, was fraudulent. Nevertheless, while we give the managers of modern assessment organizations full credit for honest intentions, there is yet a certain similarity in the modus operandi of the two schemes. The defunct "wild-cat" concerns charged inadequate rates; so do the assessment societies. The promoters of the former trusted that the rapid influx of "new blood" would keep their schemes afloat; so do the apostles of assessmentism to-day. Both built their structures on an insecure foundation, and the ruin which overtook the one can hardly fail to overwhelm its modern counterpart.

The reason, therefore, that several of the assessment societies in Canada are still able (in spite of utterly insufficient rates) to carry on an apparently prosperous business, is simply this; they are taking in new members in such large numbers that their death-rate is kept very low—the new members being younger and healthier lives than the rest of the membership. But it is evident that the larger the society becomes, the larger must be the influx of new members in order to keep the death-rate stationary. Sooner or later, the time must come when it will be impossible to secure enough new entrants to balance the increasing death-rate among the old members. When that moment comes, the society is doomed.

Let us use a comparison which will be readily grasped by every member of a fraternal society. Suppose a merchant starts business in a retail trade. He purchases all his stock at three months' credit. His prices are so low that he speedily secures an enormous business. He does not require to meet any bills at all for three months, and when that time comes, he has abundant funds to meet his debts. We will suppose that the merchant continues on this basis, buying goods on credit, selling them below cost. It is evident that with a large, constantly-increasing trade he may be able to continue in business for a long time, before his debts overtake his assets. It is evident also that the merchant's business to an outsider will appear exceedingly flourishing, for he will be doing a large trade. But it is *just as evident* that sooner or later the time will come when he will be forced into bankruptcy, *because he is selling at a loss.*

Now the case we have cited is exactly analogous to that of the assessment societies. They are selling insurance at a loss, because their rates are inadequate. They are doing business on a credit basis, because they do not have to meet any claims until deaths occur. They may be able to continue in business for some years with apparent success, because new members are flocking to them. But, sooner or later, the time must and will come when the unsoundness of their financial standing will be made evident.

When that time comes, what will be the position of the members who remain? This is a question which should be seriously considered by every member of an assessment or of a fraternal society. If you, reader, belong to one of those ill-starred organizations, it may repay you to stop a moment and consider your own position. You have a family to protect, and it was for that reason that you insured your life. But are you really insured? Can there be any insurance where there is nothing sure?

The society is paying other men's death claims at the present time. If you were to die ten years from now, would it have sufficient funds to pay your death-claim?

The society is doing a flourishing business now. If it collapses within the next ten years, will you have anything to show for the premiums you have paid?

You are satisfied with the society now, and expect to remain in it. Would you remain in it, if you knew that the rates would be raised within the next few years?

You are in good health now, and can secure insurance in any company. Ten years from now, after the society has collapsed, will you still be in good enough health to secure insurance elsewhere, or will you be left in the lurch as thousands of others have been?

Do you believe that it is wise on your part to continue throwing money away on insurance that does not insure?

The reader may be inclined to say, "Well, the society in which I am insured may possibly collapse some day. But there are no signs of failure as yet, it is doing a prosperous business, and will probably not fail during my lifetime." Do not be too sure of that. An assessment society may exist many years on a false basis. It may exhibit to the casual observer all the outward tokens of strength even while a keen insight can detect the evidences of impending ruin. When the end does come, it comes rapidly. The healthy risks drop out, the impaired lives remain. The death-rate soars far above the normal. Suddenly, without warning, the insecure foundation totters, and all the imposing superstructure melts away like snow.

In almost every instance where an assessment society has failed, the collapse has been marked by a startling suddenness. Take the case of the Select Knights, a prominent assessment order, which was organized in St. Catharines in 1883 and went into liquidation in 1898. The following table gives a synopsis of the society's standing during the last half-dozen years prior to its decease.

Year.	Certificates in Force.	Income.	Assets.	Assets per $1,000 of Insurance in Force.
1892	$7,162,000	$ 85,188	$ 48,647	6.79
1893	8,099,000	99,000	98,636	12.18
1894	8,748,000	118,724	157,039	17.95
1895	9,411,000	134,312	172,840	18.35
1896	9,552,000	159,206	244,371	20.44
1897	1,464,000	69,036	8,912	6.01
1898		In liquidation.		

It will be observed that the society gave no outward signs of approaching collapse until 1897. The insurance in force, the income, the assets increased steadily. The year 1896 was to all appearances the most prosperous year in the history of the society. The very next year came the crash. The certificates in force dropped from $9,552,000 to $1,464,000, the assets from $244,371 to only $8,912. The next year, the society was in dissolution.

We could, if required, give other illustrations, all pointing to the same conclusion; but we believe that the above example is sufficient to show the uncertainty attaching to the life of assessment societies. Most of them have died young; some have lived 25 or 30 years; in no case, has an assessment organization attained to a good old age.

In conclusion, may we be permitted to offer a word of practical advice. First, to the reader who already belongs to a society. If you are getting up in years, or are in poor health and feel that you would have difficulty in securing insurance elsewhere, we do not advise you to leave the society. The insurance that it furnishes is at least better than none at all. But if you are fairly young in years, and enjoy good health, our counsel is, emphatically, "Secure a policy in a good life company, and then drop your society insurance." It is fair neither to yourself nor to your family that you should continue paying money to an organization which cannot guarantee insurance, which has power to raise your assessments at any time, and which is bound, sooner or later, to cause disappointment to all connected with it. It is true that if you throw up your society insurance, you lose the assessments that you have already paid. But, by continuing, you are liable to lose a larger sum when the society ultimately dissolves.

To the reader who has not already taken out society insurance, we would say, "Don't do it." When you require insurance, be sure that you get a policy that really insures, with premiums that cannot be raised, in a company that will not collapse. You would not trust your money in any other investment unless you were sure of getting it back. Why, then, should you invest your money in an assessment society, knowing that the only chance of having the money returned to your estate is for you to die before the society does?

As we stated in the beginning, this paper makes no attempt to deny that there are many things to be said in favor of assessment societies, or that they have been the origin of much good in various ways. What we *have* tried to do, is to show that the financial basis of these societies is unsound. We have sought to argue the case without unfairness or exaggeration; and simply express the hope that our readers, in their turn, will not refuse to grant our arguments an impartial and unbiased hearing.

* * *

THE FIRE WASTE.

There is not much room for congratulation of the fire underwriting companies when we peruse the return of the fire waste in the United States and Canada thus far in 1905, and compare the figures with the corresponding one of previous years. As compiled by the New York Journal of Commerce the losses by fire on this continent in August last amounted to $11,435,600, while in the same month of 1904 they were $8,428,350, and in August 1902 they were only $7,425,550. The difference is clearly in the wrong direction. The return says that 211 fires took place during last month, in each of which the loss reached $10,000 or more. A noticeable feature of the fire waste of the past month was the numerous fires due to lightning and in some instances these caused heavy losses. Now to compare the losses for the eight months of 1905 thus far elapsed with a like period of former years, from 1st January to 31st August this year the fire loss was $117,720,750.

January ...	$13,166,350	$21,790,200	$16,378,100
February ..	16,090,800	90,051,000	25,591,000
March	9,907,650	11,212,150	14,715,400
April	13,549,000	23,623,000	11,901,350
May	16,366,800	15,221,400	12,736,250
June	14,684,350	10,646,700	11,789,800
July	12,838,600	11,923,200	13,173,250
August ...	8,428,350	9,715,200	11,435,600
	$105,021,900	$194,172,850	$117,720,750

Compare this with previous years, and the average, conflagrations excluded, is not such as to make underwriters complacent. Of course last year's unusually large aggregates were caused by the conflagrations in Rochester and Toronto. But even allowing for this the total fire waste of 1905 thus far exceeds the average of several recent years.

* * *

WORLD'S FAIRS.

It was the exclamation of a travelled American: "World's Fairs will never pay, never can repay their cost. They are spectacles for the most part; educators if you will, but they are always on too grand a scale for profit; the collection of the marvels to be seen in them costs too much." The gentleman was speaking, evidently, of the world's fairs thus far held in his own country, at Philadelphia, Chicago, Buffalo, St. Louis. He could not have known of Glasgow, for instance, where a profit of something over £80,000 sterling was secured by the projectors of the Exhibition of 1901 in that city. But then the Glasgow people understand economic administration, which is something that most United States communities have yet to learn.

What has brought the subject to mind is the definite announcement made this week of the actual loss by the Chicago Columbian Exhibition of 1893. It turns out to have been more than four millions of dollars—$4,152,500, to be exact. There was five and a half millions subscribed and paid in by stockholders, and of this the sum of $1,347,500 has been returned to them, equal to fourteen and a half per cent., or, say, one-seventh of the whole stock. This is the result arrived at by the officials of the Fair after a dozen years' work. It appears that the president, Mr. Higinbotham, and the secretary, Mr. H. O. Edmonds, must still remain officers of the company, however, because $20,000 is on hand belonging to stockholders who cannot be found.

Many people wonder why it has taken so long as twelve years to settle the affairs of the company. But it must be remembered that its managers had to deal with persons in many countries of the world, where negotiations were slow and difficult, and that they had doubtless to engage in the prosecution and defence of many actions by or against concessionaires and contractors. It was, however, a wonderful and memorable fair. Chicago performed wonders in its planning and carrying out, and she has learned much by it.

* * *

OUR AUSTRALIAN LETTER.

The Commonwealth of Australia has again experienced a change of Government, and the ship is now being navigated by Mr. Alfred Deakin as Premier, backed by a small party of Protectionists. The real centre of power, however, lies in the Labor or Socialist Party, who altogether outnumber their Protectionist allies, and who openly announced their intention of continuing their support just so long as the Government make sufficient concessions in the way of Socialistic legislation to make it worth their while. The Government was carried on these lines some months ago by Mr. Deakin, and the result was so unsatisfactory that he himself pronounced the position to be intolerable, and it was recognized as a public blessing when the Labor Party took the responsibility of office, becoming the rulers in name as well as in fact. Their occupancy of the Treasury benches brought about a fiscal truce between the Protectionists and the Free Traders, and united the two parties as a coalition under the leadership of Mr. G. H. Reid, who as a result became Premier, and held office until a few weeks ago. Mr. Deakin's action in withdrawing the support of his party from Mr. Reid at a day's notice is considered to be something of an act of treachery, not only to the coalition, but to his own principles of "No power without responsibility."

The prospects of the coming season in Australia in wool and wheat continue to be most favorable, and so far as prediction is safe our exports of natural products will surpass record figures, both for value and quantity. A kind Providence is doing everything possible to restore prosperity to this southern continent, but the frequent changes of Government, the uncertainty as to what experimental legislation will next be introduced, and in this State the maladministration of our land laws, referred to below, have caused a most serious want of confidence, which reflects itself in the continued depression, decreased imports, and hand-to-mouth dealings noticeable in nearly every line of trade.

An important investigation is being carried on in this city at present by a Supreme Court judge, acting under Royal Commission, into the conduct of certain land transactions, in which the State is one party. The result to date is to abundantly confirm as facts certain suspicions, which were formerly current only in the form of rumors. It has been proven that a certain party has drawn commissions from private persons to the extent of at least £40,000 during the past few years. These commissions were nominally paid to the party aforesaid, an ex-member of Parliament, for his services as land agent, but it is alleged that considerable portions of these moneys were devoted to improperly influencing officials and Ministers in high places to grant long leases and concessions of land to certain sheep breeders. It is claimed that New South Wales has 40,000,000 acres of suitable land for wheat-growing, much of which is Crown property. Only a small fraction of this area is cultivated, and there is a constant demand by local residents and farmers from the neighboring States for this land, but for reasons which this investigation has helped to reveal it has been exceedingly difficult to secure any of it. The large leaseholder for pastoral purposes has been able to maintain a preference over the smaller agriculturist desiring to put the land to more profitable use. This is one of the explanations why Australia possesses no attractions for immigrants at present. The land agent referred to is at present on his way to South Africa, his departure being due, as he explains, to the urgent requirements of health.

Concurrent with the incoming of the Deakin Government, the Customs Department have issued certain instructions of considerable importance to Canadian trade. For some years it has been the custom to charge duty on the value of goods at the place of manufacture. Now it is proposed to charge on the value at the port of shipment. This change works out disadvantageously for goods manufactured at, say, Toronto or Brantford, which have to pay a high freight to reach the ocean, compared with goods manufactured in Boston or New York, which are close to the steamer. This alteration was proposed some years ago, but through the offices of the Canadian Commissioner was not carried out. That official pointed out the unfairness it would inflict on Canadian goods, particularly those carried over the long rail route, via the C.P.R. and Vancouver.

Another regulation is the arbitrary decision that the value of harvesters for customs purposes shall be £65 each, no matter at what amount invoiced. The harvester is, I believe, not known to Canadian farmers, but is a machine largely made in Canada for Australian, Argentine, South Africa and other warm climates. It combines the functions of the binder, winnower and threshing machine, leaving the straw standing in the field and the wheat cleaned in the bags ready for market. The retail price here is £80 to £85, and the duty on the Canadian article, it is understood, has been levied on a declared value of £38 10s. A large American concern has recently introduced a harvester of their construction, and have declared at £25. The combined competition has much disconcerted one or two Australian manufacturers, who have succeeded in influencing the Minister of Customs to the above decision. It should be explained that the usual terms for the retail sale of agricultural implements here are three yearly payments, and the retail price has to cover a large expenditure by the manufacturer for experts and mechanics, who assist the farmer to learn the proper handling of his machine, and who come to his assistance free of charge when he is in trouble from any cause. The decision is meeting with much opposition not only from the manufacturers, but also from the champions of the farmer in Parliament. It is generally recognized that so far as the Canadian machines are concerned the old valuation was a fair one.

Mr. Octavius C. Beale, of Sydney, head of a large piano manufacturing business here, intends to visit Canada in a month's time. Mr. Beale is president of the Chamber of Manufacturers.

F. W.

Sydney, New South Wales, 7th August.

TORONTO EXHIBITION NOTES.

This year the exhibits of office furniture and labor-saving devices for offices are more numerous than formerly, which goes to prove that, like the manufacturers, the office manager is alive to the fact that to eliminate waste is to increase dividends. The exhibit of the Globe-Wernicke Co., of Stratford, in charge of Mr. B. E. Johnston, is full of interest. A full line of office furniture is shown. This company shows a new book-case called the "Ideal." Carved work adorns the sides of this new case which adds materially to the richness of its appearance, and removes the flat look which characterizes the ordinary sectional book-case.

Our old friends, the Office Specialty Mfg. Co., have, as usual a large and up-to-date line of filing devices, desks, sectional and book-cases on exhibition, besides a host of other devices, all of which are calculated to reduce the tedium of office work to a minimum. The finish on the goods in this exhibit is excellent, and their quality doubtless worthy of the establishment on Wellington Street West.

A new exhibitor of this class of work is the Library Bureau of Canada. A striking feature of the goods shown by this company is that the light oak finish is used. To most of us, who have been so long accustomed to the darker finishes this appears somewhat strange, but as a matter of fact the more one examines into it the more does this newer style seem to appeal to one. A complete line of card indexes, filing devices, and interior wood work is shown, and the exhibit as a whole is complete, neat, and attractive. Mr. H. S. Damp is in charge.

Mechanical adding machines have been used for many years, but it is only perhaps within the past five or ten years that business men have been disposed to recognize their value as time savers. Not only do they save time, but mistakes also, and mistakes cost money. One of the best known of these machines is the Burroughs' Adding Machine, which is to be seen in the Manufacturers' Building. Already there are many of these machines in use in banks, insurance companies, or manufacturing plants throughout Canada. The work done by them is truly wonderful; simple in operation, their possibilities must be seen to be understood. The Canadian representative is Mr. Ahern, Manning Chambers, Toronto.

An exhibit in the Manufacturers' Annex which proved at once suggestive and interesting to business men was that of the R. Stewart, Muir Agency, of Winnipeg. Among the devices shown which are calculated to simplify office work was the Hawley Time Register for recording the time of employees; the Shermac envelope sealer, by which it is claimed a boy can seal 2,000 letters per hour; automatic registers for shipping rooms. A machine which aroused considerable interest was the Universal Adding Machine, operated by hand and electricity. This machine has a number of features not found in other devices of a similar kind.

The tent of the Canadian Correspondence College opposite the old Art Building has been very freely patronized by exhibition visitors. It contains, besides the customary printed matter a great many of the instruments and other apparatus used in connection with some of the courses taught. For the man who cannot afford the time nor money to take a regular course in some institution of learning, the correspondence school fills a long-felt want, and we are pleased to know that this purely Canadian school is making such fine progress.

MACHINERY HALL.

A lesser number of exhibits with adequate space for each gives more satisfaction to either the public or the individual exhibitor than where one man's display crowds another's. This is seen in Machinery Hall, where there is less pressing of merchandise together than in former years. Men who have machines to explain or their movement to illustrate have a better chance to do so. And not only this, but an exhibit can hardly be laid out to please the eye if it has not sufficient space. Hence Machinery Hall has an altogether improved look.

C. Wilson & Sons' exhibit is effective because not too crowded, and because the upholstering of its walls in pink and green, and the dado and table coverings of crimson afford relief against which the scales and bakers' machines on view stand out well. The floor matting, too, assists the bright and clean effect of the whole. Its situation is at the west end, north side.

The champion feed mill of Vessot & Co., of Joliette, Que., makes another appearance this year in its former place. In addition to specimens of the wood-split pulleys that the Dodge Mfg. Co. have so long been furnishing to the public, there are now shown three sizes of the Standard Split Iron Pulley, made by the same house, with interchangeable bushing, and an array of shafting and hangers worthy the attention of manufacturers.

In front of the south door is to be seen a specimen of the Waterous Gasoline Fire-Fighter, which particular engine is sold to the village of Beaverton. Hugh Cameron, of Manning Chambers, near the City Hall, is the Toronto selling agent for this sturdy fire appliance. Alongside, the United Electric Co. shows a direct current generator in motion. Its capacity is 112½ kilowatts. Another by the same concern is of 16 horse-power. Besides these, which are in motion, there are several smaller specimens, and a rotary steam engine which is at work this week.

A large exhibit of electric lighting plant is made by the Jones & Moore Electric Co., of Toronto, surrounded with attractive colored lighting. Various fittings are shown in brass and chinaware, relieved against green baize in the one case and white marble in the other, making a tasteful and roomy display.

Year by year the display of the James Morrison Brass Manufacturing Co. at the Fair seems to grow in extent as it does in interest. This year the company shows marine brass work, locomotive brass work, as well as gas and electric fixtures. A feature of the present exhibit is the range of phosphor-bronze valves for pulp mills. These durable machines are made of gun metal in order to stand wear and tear. The electroliers of hammered brass, are very striking items in the ceiling display. The standard goods of this house, such as J.M.T. valves and locomotive injectors are well in evidence. Bath-room fittings are very plentiful, and the whole very handsome.

About one-eighth the floor space of the building is occupied by the products of the Canada Foundry Company and the Canadian General Electric Company. We have before commended the taste as well as the liberality of these concerns for the way in which they have fitted up and decorated their joint exhibit for successive years. A pair of hammered iron gates strike the eye on entering; while great castings alternate with great forgings and electric work of various kinds illustrate the output of the two establishments. These are two of the most important factories in Ontario, and it is pleasing to see that they recognize so fully the advantage of being well represented at the National Fair.

PROCESS BUILDING.

To a person who likes to see machinery in motion, and there are many such, and to those who desire by the demonstration of processes to comprehend better industrial advancement that they have only read of or imagined, the Process Building appeals. It is a valuable educator. The operation of such machines as boot sewers and peggers, looms, typesetting machines; the lasting of rubbers and the turning out of envelopes or paper bags by the thousand are industrial processes that can in no case be so well understood by the uninstructed as by eye-witness of the machines at work.

In the Process Building the Model Bakery Co., Ltd., of Toronto, has a most creditable exhibit, of which a candy model of the City Hall is an attractive part. They have their own ovens in the building, and supply lady-fingers, cookies, tarts, macaroons, and even Christmas cakes to passers-by.

The R. Forbes Company, of Preston, Ont., have here a

Fair Alberta's Lively Celebration.

From Our Special Correspondent.

You may read about the West in newspapers and magazines; you may have friends there only too willing to tell you all about it; you may have formed in your own mind the broadest, highest notions of its marvellous expansion and its still more marvellous possibilities; and all will be of no avail unless you actually see the country for yourself with your own physical eyes.

Reading about it is of little use; Government reports even are tame; you have to pass through the land and see what is there, and appraise it, and listen to the voice of its own people in their own territory; and, having done this, you are not much further advanced; you are simply staggered by the immensity of the problem which a rational judgment of its present and future is called upon to fill.

The latter position is mine. I have seen a little portion of the great Canadian North-West; that is to say, I have skimmed over a small fraction of it—and I am still trying, not very effectually, to collect my thoughts and put them into such shape that they will present to a distant reader some slight notion of the general conditions without allowing him to suspect for the shortest moment any degree of finality, either in the potentialities touched on or in the judgment formed thereon.

When a person from the East has reached that remarkable place, Winnipeg, and the prairie country, with its miles and miles of golden wheat, he already begins to think Canada a pretty big proposition; when, however, he has left that far behind, and, travelling through thousands of square miles, finds the country even fuller of promise for the future than ever, he is not only sure of it, but begins to see that what is really called for is the work of the descriptive specialist rather than a general summary of detailed conditions which, properly done, would fill several numbers of The Monetary Times. And he is very apt to decide to seize a "better opportunity," and postpone the heavy task of forcing his own somewhat disordered impressions into tangible shape till—till they become even more disordered by a new aggregation of even more numerous impressions. To come to the gist of this first letter however. When, as I say, the raw Easterner reaches Calgary, for example, he has generally come to the conclusion that he has already seen "quite a little bit" of the West, and usually he is quite ready to allow matters to stand at that for a while, so as to allow impressions to "soak in." He is hardly prepared to be told that this is but the beginning, that away up north from the Rocky foothills and beyond the cattle-dotted vastness of those seemingly limitless prairies there is a stretch of land which, for richness of soil, varied opportunities for successful farming, and civic progress already made—I mean by this the actual forming, organization and building up of towns and villages—is hard to duplicate on this continent. It creates a lingering astonishment in the mind of the new beholder.

Mr. K. W. MacKenzie, Mayor of Edmonton

Chairman Alberta Inaugural Celebration Committee.

Edmonton district is the country to which I refer; and nobody who had the good fortune to be present last Friday at the inaugural celebration of the new Province of Alberta will hesitate to admit that this brief snap-portrait of what he and I and all of us saw on our trip to that region falls far short of the reality.

The whole of the new Province of Alberta has been this week in the throes of glorification at the great ceremony of autonomification, if I may coin such a word; but naturally, Edmonton as the probable capital was the spot at which the joyful celebration reached its culminating point. To say that Edmonton did its part royally is but a half-sufficing tribute.

Imagine a city—small now only in size, and not very small even in that—nobly situated on beautiful wooded hills overlooking a natural amphitheatre, which appears to have been planned from the absolute beginning of things for the playground of a great metropolis. Imagine that young city to have been laid out with sufficient wise forethought to have wide streets, fine brick buildings, and with sufficient recognition of the comforts of the present to have extensive granolithic walks, good electric lighting, telephone and water services, etc. Imagine, too, the streets of that city swarming with the crowds of its own citizens on holiday bent, but with multitudes on multitudes of out-of-town visitors, all desiring—and meaning—to have the greatest time of their lives. On top of all this figure to yourselves an enveloping mass of bunting which for color effects and joyful significance would quite easily have put Toronto's Jubilee celebration in the shade—I mean proportionately, of course—and you may, perhaps glean some faint idea of what Edmonton looked like last Friday.

But even this by no means tells the whole of the story. The real celebration was not in the decorations or the music, or the speeches, though some fine ones were delivered by the Governor-General, by Sir Wilfrid Laurier, Hon. Mr. Paterson, by Mayor MacKenzie and others, but in the attitude of these far North-Western brothers of ours. Sir Wilfrid may be ever so sure of the great future of this part of the great Canadian federation, and so may His Excellency; but the real surety for that future lies in the irresistible determination of the people of Edmonton to make that future.

The way they celebrated is only one indication of the spirit in which the people of Edmonton district undertake to carry through any object that appeals to them. The celebration had to be well done; and it *was* well done—to every most minute detail it was a wonderful success.

But, as I have said, it is only as an *indication* of the spirit of the West that needs to speak of the inaugural ceremonies themselves. They were an unqualified success in every way, and visitors wre greeted with a hospitality that they will remember for the rest of their days. What interested me even more than the jubilation was the country surrounding Edmonton, and this, through the courtesy of Mr. Fisher, the energetic secretary of its Board of Trade, I had an unsurpassed opportunity of seeing to advantage to-day.

The splendid streets of this city of the far North-West, the remarkably fine exhibits to be seen in its magnificent stores are only in keeping with the country which contributes its riches for the upbuilding of its commerce. I drove through miles and miles of land which, for soil, and climate, and general appearance, for fertility of make-up and beauty of outline, beat anything I have seen so far in all my experience. Beautiful rolling slopes of deep, black soil, climate superior in many respects to that of Ontario—prairie easy to clear and easier to work; this on an area of thousands of square miles—what must they mean to Edmonton and its people?

Mr. F. J. Fisher

Secretary Edmonton Board of Trade, Secretary Alberta Inaugural Celebration Committee.

F. P. W.

Edmonton, Alta., Sept. 2, 1905.

EXHIBITION NOTES.

(Continued from page 301.)

loom at work, power-driven, which produces worsted tweed. Their line of colored serges is illustrated by samples in brown and blue of these well known goods. Looms are at work, too, in the division of the building occupied by the Dominion Textile Co., turning out in the one case cotton bags and in the other curtain stuff. These greatly interest the crowd.

A machine which commands great attention is the Linotype. The one at work is Style B, No. 10, which is a "single letter" machine, and amazes while it mystifies any one who is not a printer.

Not to be outdone in showing what attracts the hoi polloi, and should indeed attract the *haute noblesse*, if we had any in Canada, the Gutta Percha & Rubber Manufacturing Co. has, at the eastern end of the building, fitters at work setting up on lasts Maltese Cross rubbers, with apparently as much interest in their work as if they had not a thronging, talking, gum-chewing crowd forever pressing round them. And the envelope-making machine, capacity 50,000 per day, shown by Davis & Henderson, has an attraction for those who admire swift-moving machinery. The monotype is a comparatively recent form of type producer which is coming into increasing use. It is shown at work on the south side of the Process Building.

In the Agricultural Machinery Building is an array of canvas covered cedar canoes of very great attractiveness, made by R. Chestnut & Sons, of Fredericton, New Brunswick. They are made of cedar, covered with canvas, and have metal tanks in their sides for safety. They have an agent in Toronto, namely, at Toronto Junction—the Toronto Gas & Gasoline Engine Co., who build their own boats, and make a very large and handsome exhibit.

CARRIAGE BUILDING.

Large as the Carriage Building is, or the Transportation Building as they now call it, there does not appear to be room enough in it for all those makers who aim to display their wares therein. It might be rash to hazard a guess as to how many carriage factories there are to-day in Canada, but their number must be great and their output large. London, Toronto, Gananoque, Palmerston, Guelph, Chatham, are carriage-making places accustomed to be represented at this and other yearly fairs. And the latest we have now to notice is Barrie, for a modest concern, the Barrie Carriage Co., launched only this year, we are told, has a display of no fewer than fifteen vehicles.

A large area at the north end, what used to be formerly the Art Room of the Canadian Society of Artists, is now the show room of that extensive concern, Wm. Gray & Sons, of Chatham, Ont. Transparencies, colored lights, flowers and bunting are employed with intent to make this display inviting. At the door-way a pyramidal structure rises, the basis a model of the Gray factory at Chatham, and the apex Miss Canada, as a life-size figure is named, bearing the maple leaf in one hand and an Empire flag in the other, the motto beneath being "THE WORLD OUR MARKET." Figures appropriately uniformed typify the navy and the army. Indeed so lavish is the use of festoons and of shields that ornamentation is overdone, and in reality seems in some measure to hide the handsome and uncommon types of vehicle shown. Here for instance is a new style victoria, after the style of those seen in Hyde Park, but with a certain American lightness of structure. Again a basket phaeton upholstered in blue broadcloth attracts the eye. And then an "English" brake, the body of natural woods, such as ash and whitewood, with tan leather cushions and aluminum fittings. The ingenious device by which some of the carriages of this house are, by a single motion of the driver's arm, converted from a two-seated to a one-seated rig, is most convenient.

* * *

BANKING AND FINANCIAL ITEMS.

The Standard Bank is opening a branch at Deseronto in a few days. We have seen it stated that Mr. J. W. Osborne, formerly agent for the same bank at Richmond Hill, is to be in charge.

It is reported by the Canadian Associated Press that the profit of the Bank of British North America for the past half-year was £40,613. A dividend of thirty shillings per share was declared, being at the rate of six per cent.

The resignation of Mr. Walter N. Anderson, of the assistant treasurership of the Province of Ontario, is announced, and will take effect, we are informed, in a few days. Mr. Anderson has held this important position for twelve years, having been appointed in the year 1893, and he was a safe man for the place, being eminently careful, methodical, and conscientious. His training as a Scotch banker and his long experience in Canada in the British, the Merchants, and the Commerce banks, in which last he held the highest position, marked him as an adviser of successive ministers. We understand that he is to be succeeded by Mr. C. H. Sproule, who has for years been provincial auditor, and who has the reputation of being a very sensible and prudent official.

OUR SAINT JOHN LETTER.

Trade conditions throughout the Province of New Brunswick are hardly as good as it was supposed at the opening of the summer they would be. In the first place there is a scarcity of logs for the lumber mills, due to the light spring freshets. Already two or three mills in the immediate vicinity of St. John have been compelled to shut down, and in a few weeks others will have to follow. This has thrown several hundred men out of employment much earlier than usual, and there is no other work for them to turn to until winter sets in, when they will get employment loading the winter port steamers. This scarcity of lumber is greatly felt at the present time, because there is a good English market and satisfactory freight rates, so if there was a supply our shipping men also could be doing well, where they are now compelled to let matters drift. The crop will not be as abundant as was expected, because there was practically no rain during the whole month of August, and crops that promised well have been so parched that there will be a considerable falling off in the yield. The outlook, however, is not by any means blue. A heavy rain on Sunday and Monday has greatly benefited the crops, and the hope has not yet been abandoned of getting out several million feet of logs that are hung up on the lower stretches of the St. John river. A few heavy rains would release these. Merchants and traders generally say that business continues good, and they look for a fairly successful fall trade.

The Mowry Safety Nut Company, a local concern manufacturing a patent nut invented by a St. John man, has sent samples to the Midland, Lancashire and Yorkshire, and Great Western Railways of England, and also to the Trans-Siberian Railway. They are also filling a large order for the Intercolonial. The Mowry patent enables the company at small cost to convert an ordinary nut into a Mowry nut, and then it is declared to be absolutely impossible for it to wear loose. If the claim of the inventors holds good, and there seems little doubt that it can, the nut will be invaluable in fastening railroad ties and on machinery at all points where there is a special strain. It is expected to supersede the celebrated cotter pins. The company manufacturing these nuts, have begun operations in a small way, but they are making every effort to direct the attention of railroad men and machinery manufacturers to the invention, and are meeting with considerable encouragement.

The Provincial Government has given a contract to Messrs. Brown Brothers to make necessary repairs to the New Brunswick Central Railway. The contract price is $85,000, and for this some bridges and culverts are to be renewed and other repair work done that it is believed will put the road-bed in good condition. It taps a good lumber country, and the Queen's County coal fields, and it is believed will more than earn running expenses.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, September 7th, 1905, as compared with those of the previous week:

	Sept. 7.	August 31.
Montreal	$21,037,782	$22,305,307
Toronto	17,129,634	17,530,464
Winnipeg	7,633,855	5,381,466
Halifax	1,665,922	1,467,339
Hamilton	1,177,455	1,099,237
St. John	945,773	916,707
Vancouver	1,891,531	1,768,233
Victoria	561,258	757,318
Quebec	1,658,188	1,518,425
Ottawa	2,314,667	2,003,507
London	840,072	783,176
Total	$56,856,137	$55,531,179

VANCOUVER HARBOR.
